## Secretary of State's Office Summary

### California Voter's Choice Act: Language Access During the November 2020 General Election

The Secretary of State's office commissioned research from the Voting Rights Project of the University of California, Los Angeles (UCLA) to provide an overview of voting access for language minorities in Voters Choice Act (VCA) counties during the 2020 General Election. This analysis uses data from the Secretary of State's VoteCal system, supplemented by information reported by each county, to highlight voter behavior for persons requiring language assistance – here, defined as voters who have indicated a language preference on their voter registration. UCLA's report, *California Voter's Choice Act: Language Access During the November 2020 General Election*,<sup>1</sup> also provides useful information about county budgets and expenditures and varying strategies that counties employed to provide services to their communities.

### Background

The statutory framework for language assistance derives from Section 203 of the Voting Rights Act<sup>2</sup> and Section 14201 of the California Elections Code.<sup>3</sup> In short,

---

<sup>1</sup> Barreto, M., Waknin, S., Venzor, V., Alejandre, A., Rios, M., (2021). *California Voter's Choice Act: Language Access During the November 2020 General Election*. University of California, Los Angeles, Voting Rights Project.

<sup>2</sup> Section 203 provides: "Whenever any State or political subdivision [covered by the section] provides registration or voting notices, forms, instructions, assistance, or other materials or information relating to the electoral process, including ballots, it shall provide them in the language of the applicable minority group as well as in the English language."

<sup>3</sup> EC 14201 (a) provides: "In counties and precincts where the Secretary of State has determined that it is appropriate, the county elections official shall provide facsimile copies of the ballot, as described in subdivision (b), with the ballot measures and ballot instructions printed in Spanish, one of which shall be posted in a conspicuous location in the polling place and at least one of which shall be made available for voters at the polling place to use as a reference when casting a private ballot. Facsimile ballots shall also be printed in other languages and provided in the same manner if a significant and substantial need is found by the Secretary of State. A facsimile copy of the ballot available for voters to use in casting a private ballot shall be sufficiently distinct in appearance from a regular ballot to prevent voters from attempting to vote on the facsimile copy."

these statutes place obligations on the state and covered county jurisdictions to provide various levels of language assistance services; generally, translation of ballots and election materials for Section 203; and posting of translated facsimile ballots and recruitment of bilingual poll workers on Section 14201.<sup>4</sup>

The November 2020 General Election occurred during the COVID-19 pandemic and under varying local public health protocols throughout the state. Local business shutdowns, stay-at-home orders, social distancing and the transition toward predominately virtual environments required county elections officials to adjust their outreach and engagement strategies and required voters to adjust to these changes. As a result of the pandemic, Governor Gavin Newsom signed Executive Order N-64-20 which required all county elections officials to send vote-by-mail ballots to all active registered voters across the state.<sup>5</sup>

## Findings

Research from UCLA found that turnout overall increased due to expanded vote by mail across the state.<sup>6</sup> Their research also found similar turnout and vote by mail usage rates in VCA counties compared to non-VCA counties (excluding Los Angeles County). Voters throughout the state preferred voting by mail, and voters in non-VCA counties voted by mail slightly more, 90.2%, than in VCA counties, 88.4%.<sup>7</sup>

UCLA's research also found that turnout rates were only slightly lower among language minority voters, 68.5%, than for English speakers, 70.6%<sup>8</sup>—a difference in participation that is consistent with the Secretary of State's analysis of voter participation data. Language minority voters preferred to vote by mail more than English-speaking voters, with 89.9% of language minority voters and 70.6% of English-speaking voters casting a mail ballot.<sup>9</sup>

Voters preferring translated ballots had slightly lower rates of ballot rejection, 2.3%, than voters using English ballots, 3.0%.<sup>10</sup> Perhaps this suggests that understanding the content of a vote by mail ballot envelope—which includes

---

<sup>4</sup> We note that section 14201, first enacted in 1994 has a coverage trigger formula that may create some structural impediments to more providing more cost-effective language assistance services.

<sup>10</sup> *Id.*

various instructions on how to submit information that allows a registrar to correctly process it in one's language—helps avoid rejections.

County-specific findings for each of the 15 VCA counties include spending on education and outreach, translation services and bilingual staffing, ballots requested in languages other than English, turnout among language minority voters and any formal complaints about language access.

## **Recommendations**

This report did not contain any recommendations; however, the Secretary of State's Office used these key findings to inform future implementation of the Voter's Choice Act.

BY UCLA VOTING RIGHTS PROJECT IN PARTNERSHIP WITH  
THE CALIFORNIA SECRETARY OF STATE OFFICE

This report was written by the UCLA Voting Rights Project in partnership with the California Secretary of State.

### **About the UCLA VRP**

The UCLA Voting Rights Project (UCLA VRP) is a nonpartisan, educational project housed within the Latino Policy and Politics Initiative (LPPI) at the University of California, Los Angeles. The UCLA VRP educates undergraduate, graduate, and professional degree students through our flagship voting rights clinic. The UCLA VRP works with experts and election officials across the country to ensure equitable access to voting.

COUNTY DEMOGRAPHICS	7
LANGUAGE ACCESS STRATEGIES IN VCA COUNTIES IN THE OCTOBER 2020 GENERAL ELECTION	17
CONCLUSION	102

## Executive Summary

With the rise of COVID-19, county clerks and voters had to find new, innovative, and flexible ways to vote. Election officials had to adjust the ways in which they were recruiting new voters and providing helpful resources and materials, all while providing a safe and sanitized environment. At the same time, voters were adjusting to new ways of voting, whether that was voting by mail for the first time or getting informed about the new voting devices some counties were providing.

In this report, we utilized VoteCal data to provide a comprehensive analysis on language access in the Voters Choice Act (VCA) counties. Our summary of the VCA counties averages and totals excludes Los Angeles County to prevent the skewing of the findings due to the size of Los Angeles County. Outlined below is the general landscape of language access in VCA counties, how the VCA counties compared to the non-VCA counties, and separate, individual analysis of each VCA county.

Major findings of this report are that turnout rates significantly increased across California counties as a result of more accessible voting by mail and that both non-VCA and VCA counties (excluding Los Angeles) had comparable vote-by-mail usage rates. In fact, non-VCA counties voted by mail at a slightly higher rate, 90.2% compared to the VCA counties average of 88.4%. In VCA counties, turnout among English-speaking and non-English speaking voters was similar. Voters who speak a primary language other than English had an average turnout rate of 68.5% compared to 70.6% for English voters. Additionally, both English and minority language voters in VCA counties chose to vote by method at similar rates.

It was clear that the preferred method of participation during the 2020 General Election was by mail ballot; 88.3% of English-speaking participants voted by mail, while 89.9% of minority language voters cast a mail ballot. Given the increased use of vote-by-mail, there were no significant disparities in mail ballot rejection rate between English and minority language voters. The rejection rate for English mail ballots was 3.0%, while the rate of rejection for all other language ballots was 2.3%.

As with any data analysis, there are limitations to the various data sources used in this report. The UCLA VRP utilized VoteCal data for our analysis because provides insights on voters who have their language preference on file with the county and/or state. Even though this dataset is of high quality, it does not contain totally complete information about all voters' racial and ethnic backgrounds. For instance, there is no requirement to self-report race or ethnicity in California, and only a small percent of voter report this information. Moreover, the objective of this report was to assess VCA counties compliance with language access requirements. Additional research could study voter satisfaction with language access services, however that was beyond the scope

here. Finally, not all voters who might need language assistance requested language assistance when registering to vote. There are potentially thousands of voters across California who might be interested in language services as they become aware and knowledgeable of this option.

Further, data about voter characteristics and method of voting gathered from county registrars and county election officials was varied from county to county. There is no state-mandated standard across VCA counties on how to maintain and report this information, which could be an opportunity for further guidance from the state. For example, some counties provided estimates, but not necessarily validated records, while other counties were unable to answer requests at all because they did not keep detailed records. While some counties did have better organized data related to language services, there is a need for more consistent and uniform reporting of this information.

## **Introduction**

Signed into law in 2016, the California Voter's Choice Act (VCA) ushered in an election model used by fifteen counties during the November 2020 General Election: Amador; Butte; Calaveras; El Dorado; Fresno; Madera; Mariposa; Napa; Nevada; Orange, Sacramento; San Mateo; Santa Clara; and Tuolumne. This new election model expanded early voting opportunities and methods for voters to return their ballots. Designed to provide greater flexibility and convenience for voters, this new election model allows voters to choose how, when, and where to cast their ballot.

Under the VCA, each voter is mailed a ballot which they can then return by mail, to a secure drop box, or at a vote center. Voters may also cast a ballot at any vote center within their county or through other expanded in-person early voting options. Additionally, 2020 was the first time that all fifteen counties implemented the VCA.

This report, commissioned by the California Secretary of State's office pursuant to California Elections Code Section 4005(g)(1)(A), provides a comprehensive overview of voting access for language minorities in VCA counties during the November 2020 General Election. This report primarily focuses on VoteCal Data and County Reported Data to present research and findings related to minority language access to the ballot in the fifteen VCA counties during the November 2020 General Election.

## **Methodology**

The purpose of this report is to provide an analysis of language access efforts and voter turnout rates for the November 2020 General Election in California's fifteen VCA counties.

## **Data Sources**

VoteCal Data: This report primarily relies on data from VoteCal, California's single uniform, centralized voter registration database. This data includes information about voter registration, voter participation method, and voter participation by primary language group.

County Reported Data: Requests were sent to registrars in the fifteen VCA counties for data concerning various aspects of election administration, such as the issuance of ballots, the number of ballots dropped off at each vote center, and the accessibility requests made by limited-English voters. In addition, these same officials were asked to provide any additional information that could be relevant in assessing the impact of the VCA.

## **Data Limitations**

As with any data analysis, there are limitations to the various data sources used in this report. The UCLA VRP used VoteCal data for our analysis because it provides insights on voters who have their language preference on file with the county and/or state. Even though this dataset is of high quality, it does not contain totally complete information about all voters' racial and ethnic backgrounds. For instance, there is no requirement to self-report race or ethnicity in California, and only a small percent of voters report this information. Moreover, the objective of this report was to assess VCA counties compliance with language access requirements. Additional research could study voter satisfaction with language access services, however that was beyond the scope of this report. Finally, not all voters who might need language assistance requested language assistance when registering to vote. There are potentially thousands of voters across California who might be interested in language services as they become aware of this option.

Further, data about voter characteristics and method of voting gathered from county registrars and county election officials varied from county to county. There is no state-mandated standard across VCA counties regarding how to maintain and report this information, which could be an opportunity for further guidance from the state. For example, some counties provided estimates, but not necessarily validated records, while other counties were unable to answer requests at all because they did not keep detailed records. While some counties did have better organized data related to language services, there is a need for more consistent and uniform reporting of this information.

## **Presentation of Data**

This report includes the following tables for each county: 1) general election participants; 2) preferred voting methods; 3) voters by language type; 4) minority language share of eligible voter; 5) turnout by language; 6) preferred voting method by language; 7) Vote-By-Mail (“VBM”) rejection rate; and 8) VBM rejection rate by language.

Table Type 1: General Election Participants

These tables present the total number of eligible voters, the number of eligible voters that participated in the election, the number of eligible voters that did not participate in the election, and voter turnout rate.

Table Type 2: Preferred Voting Method

These tables present the preferred voting method and share of voters that chose that method across the county.

Table Type 3: Voters by Language Type

These tables show the share of voters whose primary language is English and those who speak a primary language other than English, often defined in our analysis as minority language voters.

Table Type 4: Minority Language Share of Eligible Voter

These tables show the number of eligible voters in each non-English speaking language group and their respective share of the total eligible voters and total minority language voters.

Table Type 5: Turnout by Language

These tables show the number of eligible voters in each language group, the number that voted in the general election, the number that did not vote or had their vote rejected, and the turnout rate.

Table Type 6: Preferred Voting Method by Language

These tables show the preferred voting method and share of voters that chose that method across each language.

Table Type 7: VBM Rejection Rate

These tables show the number of mail ballots cast, the number received and accepted, the number rejected, and the rejection rate across a county.

Table Type 8: VBM Rejection Rate by Language

These tables show the number of mail ballots cast, the number received and accepted, the number rejected, and the rejection rate across each language.

## **VCA Counties Performance Overall Compared to Non-VCA Counties**

Using the available VoteCal data for the 2020 General Election, we joined the voter file, vote by mail ballot file, and voter participation history file by the voter ID. We repeated this process for VCA and non-VCA counties to estimate voter turnout and mail ballot rejection rates. We determined the total number of eligible voters to assess voter turnout in each county by counting unique voter IDs.<sup>1</sup>

As shown in figure 1 below, in the 43 non-VCA counties, there were a total of 12,996,166 eligible voters. Of these eligible voters, more than 8.9 million, or 68.8%, voted in the 2020 General Election. According to the VoteCal data, more than 4.0 million voters did not participate in the election. In the 2020 primary, we observed a turnout rate of 40.7% in these non-VCA counties. Based on this data, there was an increase of 28.1 percentage points, along with a 77.8% overall increase, in voter turnout for the 2020 General Election.

**Figure 1: Participation in the 2020 General Election for Non-VCA Counties**

<b>Total Non-VCA Counties</b>	
Total Eligible Voters	12,996,166
Voted	8,946,215
Did Not Vote	4,049,951
Turnout	68.8%

As shown in figure 2 below, in the 14 VCA counties (excluding Los Angeles County), there were a total of 6,204,118 eligible voters. Of these eligible voters, nearly 4.4 million, or 70.5%, voted in the 2020 General Election. According to the VoteCal data, over 1.8 million voters did not participate in the election. In the 2020 primary, we observed a turnout rate of 35.2% in these VCA counties. This data means that there was an impressive 35.3 percentage point increase in voter turnout for the General Election.

---

<sup>1</sup> VoteCal election data includes the method of participation by voter ID. The dataset lists a “NA” observation for voters who did not vote or whose participation method was unknown. In our analysis, we assume all NAs are for non-participants in the 2020 General Election.

**Figure 2: Participation in the 2020 General Election for VCA Counties (Excluding Los Angeles County)**

<b>Total VCA Counties (Excluding Los Angeles)</b>	
Total Eligible Voters	6,204,118
Voted	4,371,942
Did Not Vote	1,832,176
Turnout	70.5%

Figure 3 below shows the 70.5% average VCA voter turnout compared to each VCA county’s voter turnout. Eight counties – Orange, Calaveras, Nevada, Amador, Tuolumne, Mariposa, El Dorado, and Napa –all had voters turn out at rates above the average. Napa had the highest voter turnout rate at 81.9%, and Fresno had the lowest rate at 63.7%.

**Figure 3: Voter Turnout in Each VCA County Compared to the VCA County Average (Excluding Los Angeles County)**

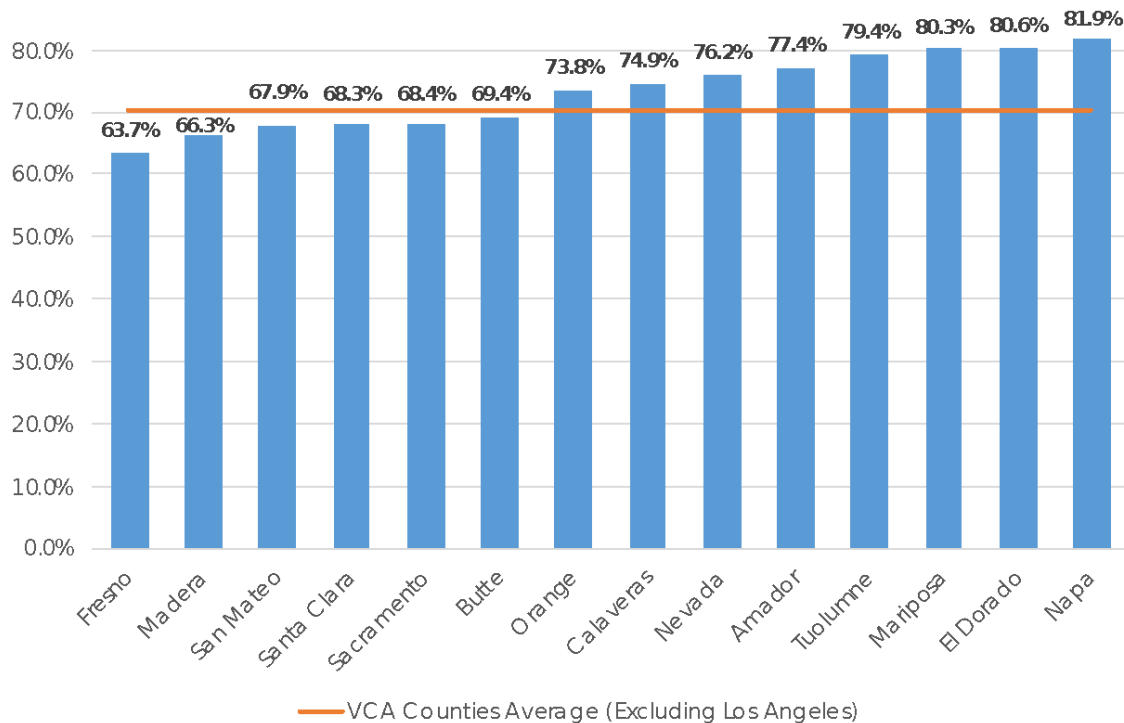

Figure 4 below shows the preferred voting methods for General Election participants in the non-VCA counties during the 2020 General Election. Nine out of ten voters in non-VCA counties voted by mail. More than 500 thousand voters, or 5.6%, chose to vote in person at an assigned polling place. The next most preferred methods were, in descending order, voting in person at a vote center, Conditional Voter Registration (CVR)/non-provisional CVR,<sup>2</sup> and in person early voting at 3.0%, 1.1%, and 0.2%, respectively.

**Figure 4: Participation Using Voting Methods in the 2020 General Election for Non-VCA Counties (Excluding Los Angeles County)**

<b>Total Non-VCA Counties</b>	
General Election Participants	8,946,215
Voted-by-Mail	8,072,292
% Voted-by-Mail	90.2%
Vote Center (In Person)	270,027
% Vote Center	3.0%
CVR / Nonprovisional CVR	99,435
% CVR / Nonprovisional CVR	1.1%
Precinct Polling Place (In Person)	503,939
% Precinct Polling Place	5.6%
Early (In Person)	22,289
% Early	0.2%

Figure 5 below shows the preferred voting methods for general election participants in the VCA counties. Similar to non-VCA counties, a significant majority of voters (88.4%) selected to vote by mail in the General Election. The most significant difference between non-VCA and VCA counties is that voters in VCA counties chose to vote in person at a vote center over their assigned precinct polling place. It is unknown why this disparity exists, but one theory is that VCA counties made vote centers more accessible.

<sup>2</sup> A “CVR voter” is a person who, on Election Day or the fourteen (14) days immediately preceding Election Day, does both of the following: Delivers an executed affidavit of registration to the county elections official in order to register to vote in California for the first time, or re-register to vote in the same or a different county in California. The executed affidavit of registration can be submitted either in person at the office of the county elections official, at a vote center, or at a satellite office designated by the county elections official or online through the Internet Web site of the Secretary of State. Requests a CVR provisional ballot at the office of the county elections official, at a vote center, or at a satellite office designated by the county elections official. A “CVR provisional ballot” is the type of provisional ballot issued to a CVR voter.

**Figure 5: Participation Using Voting Methods in the 2020 General Election for VCA Counties (Excluding Los Angeles County)**

<b>Total VCA Counties (Excluding Los Angeles)</b>	
General Election Participants	4,371,942
Voted-by-Mail	3,862,710
% Voted-by-Mail	88.4%
Vote Center (In Person)	458,630
% Vote Center	10.5%
CVR / Nonprovisional CVR	55,132
% CVR / Nonprovisional CVR	1.3%
Precinct Polling Place (In Person)	722
% Precinct Polling Place	0.0%
Early (In Person)	3
% Early	0.0%

In non-VCA counties, more than 12.6 million, or 97.2%, of voters listed English as their primary and preferred language. Conversely, over 400 thousand, or 3.1%, of voters in these counties speak a language other than English as their primary language.

**Figure 6: Eligible Voters by Language Type in the 2020 General Election for Non-VCA Counties**

<b>Total Non-VCA Counties</b>	
Total Eligible Voters	12,996,166
English	12,634,407
% English	97.2%
Total Minority Languages	403,937
% Minority Languages	3.1%

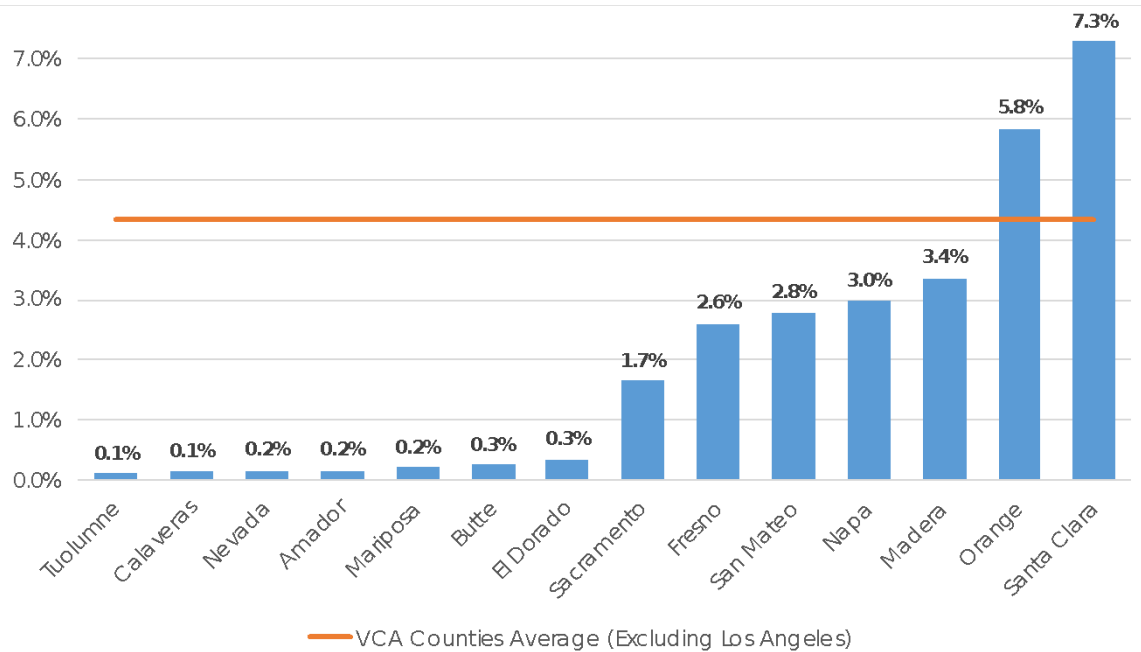

In VCA counties, nearly 6.0 million voters, or 95.7%, speak English as their primary language. VCA counties have a slightly larger limited-English electorate, with 4.3% of voters speaking a language other than English.

**Figure 7: Eligible Voters by Language Type in the 2020 General Election for Non-VCA Counties**

<b>Total VCA Counties (Excluding Los Angeles)</b>	
Total Eligible Voters	6,204,118
English	5,935,354
% English	95.7%
Total Minority Languages	268,764
% Minority Languages	4.3%

Figure 8 below shows the proportion of eligible voters that speak a minority language compared to the average across all VCA counties, which is represented by the orange line. As shown, only Orange and Santa Clara counties, have more limited-English voters than the VCA counties average. Seven counties have less than one percent of minority language voters that make up their electorate.

**Figure 8: Minority Language Composition in Each VCA County Compared to the VCA County Average (Excluding Los Angeles County)**

In non-VCA counties, Spanish speaking voters make up the majority of non-English speakers at 72.8% and comprise 2.3% of the total eligible voters. Chinese speaking voters represent the next largest group, comprising 16.4% of minority language voters and 0.5% of the total eligible voters. The remaining language groups make up 0.1% or less of total eligible voters.

**Figure 9: Eligible Voters by Minority Language and Each Group’s Share of Eligible Voters in the 2020 General Election for Non-VCA Counties**

Total Non-VCA Counties			
	Eligible Voters by Language	Share of Total Eligible Voters	Share of Minority Language Voters
Spanish	294,204	2.3%	72.8%
Chinese	66,409	0.5%	16.4%
Vietnamese	18,823	0.1%	4.7%
Korean	8,593	0.1%	2.1%
Tagalog	7,151	0.1%	1.8%
Other (Not Listed)	3,456	0.0%	0.9%
Hindi	2,060	0.0%	0.5%
Thai	1,260	0.0%	0.3%
Japanese	1,218	0.0%	0.3%
Khmer	763	0.0%	0.2%

In VCA counties, Spanish speaking voters still make up the majority of non-English speakers at 38.5% and comprise 1.7% of total eligible voters. However, VCA counties are collectively more diverse in non-English speaking groups. Voters that speak Vietnamese comprise 34.0% of minority language voters and 1.5% of total eligible voters, similar to Spanish speakers. Chinese and Korean speaking voters make up 13.9% and 7.8% of non-English speaking voters, respectively. The remaining groups make up less than three percent of the share of minority language voters each.

**Figure 9: Eligible Voters by Minority Language and Each Group’s Share of Eligible Voters in the 2020 General Election for VCA Counties (Excluding Los Angeles)**

<b>Total VCA Counties (Excluding Los Angeles)</b>			
	Eligible Voters by Language	Share of Total Eligible Voters	Share of Minority Language Voters
Spanish	103,575	1.7%	38.5%
Vietnamese	91,501	1.5%	34.0%
Chinese	37,484	0.6%	13.9%
Korean	20,832	0.3%	7.8%
Tagalog	7,309	0.1%	2.7%
Other (Not Listed)	4,488	0.1%	1.7%
Hindi	1,318	0.0%	0.5%
Japanese	1,194	0.0%	0.4%
Thai	572	0.0%	0.2%
Khmer	491	0.0%	0.2%

Figure 10 below presents the breakdown of turnout by language in VCA counties. English, Vietnamese, Korean, Hindi, Japanese, Thai, and other non-listed languages all have a higher turnout than the 70.5% VCA counties average. Tagalog speaking voters are the only language group to have a turnout rate under 50% at 44.0%. The next group with the lowest turnout is Chinese speaking voters at 66.3%. This suggests that significant efforts need to be made to make voting more accessible and to engage Tagalog speaking voters.

**Figure 10: Voter Turnout by Language in the 2020 General Election for VCA Counties (Excluding Los Angeles)**

VCA Counties Total (Excluding Los Angeles)				
	Total Eligible Voters	Voted	Did Not Vote	Turnout
English	5,936,441	4,188,587	1,747,854	70.6%
Spanish	103,262	69,403	33,859	67.2%
Vietnamese	91,250	64,990	26,260	71.2%
Chinese	37,417	24,798	12,619	66.3%
Korean	20,757	14,968	5,789	72.1%
Tagalog	7,291	3,207	4,084	44.0%
Other	4,455	3,673	782	82.4%
Hindi	1,311	1,024	287	78.1%
Japanese	1,188	877	311	73.8%
Thai	566	411	155	72.6%
Khmer	490	314	176	64.1%

Figure 11 below presents a more detailed look at the preferred method of voting in VCA counties by language. No language group diverted too far from the participation methods discussed earlier. The differences in preferred method seem to occur with some voters that voted CVR/nonprovisional CVR. No language group selected to vote at a precinct polling place or early above 0.1%.

**Figure 11: Preferred Voting Method by Language Group in the 2020 General Election for Non-VCA Counties (Excluding Los Angeles County)**

VCA Counties Total (Excluding Los Angeles)											
	General Election Participants	Voted-by-Mail		Vote Center (In Person)		CVR / Nonprovisional CVR		Precinct Polling Place (In Person)		Early (In Person)	
English	4,188,587	3,697,663	88.3%	443,788	10.6%	51,192	1.2%	717	0.0%	3	0.0%
Spanish	69,403	61,425	88.5%	6,658	9.6%	1,405	2.0%	5	0.0%	0	0.0%

Chinese	24,798	23,328	94.1%	1,223	4.9%	253	1.0%	0	0.0%	0	0.0%
Korean	14,968	14,057	93.9%	741	5.0%	179	1.2%	0	0.0%	0	0.0%
Other	3,673	3,222	87.7%	221	6.0%	230	6.3%	0	0.0%	0	0.0%
Tagalog	3,207	2,969	92.6%	200	6.2%	39	1.2%	0	0.0%	0	0.0%
Hindi	1,024	940	91.8%	56	5.5%	28	2.7%	0	0.0%	0	0.0%
Japanese	877	828	94.4%	39	4.4%	10	1.1%	0	0.0%	0	0.0%
Thai	411	378	92.0%	22	5.4%	11	2.7%	0	0.0%	0	0.0%
Khmer	314	267	85.0%	26	8.3%	21	6.7%	0	0.0%	0	0.0%

The purpose of figure 12 is to visually compare the preferred voting methods across languages. As shown below, an overwhelming majority of voters chose to vote by mail, regardless of language.

**Figure 12: Voting Method by Language in the 2020 General Election for Non-VCA Counties (Excluding Los Angeles County)**

Given that approximately 90% of voters selected to vote by mail in both non-VCA counties and VCA counties, it is important to take a deeper look at this method of participation. For non-VCA counties, over 180 thousand, or 2.2%, of mail ballots were rejected.

**Figure 13: Vote-by-Mail Statistics in the 2020 General Election for Non-VCA Counties**

Total Non-VCA Counties	
Attempted to Vote-by-Mail	8,253,129
Accepted	8,072,292
Rejected	180,837
Rejection Rate	2.2%

In VCA counties, the mail ballot rejection rate was slightly higher, with 3.0% of ballots being rejected.

**Figure 14: Vote-by-Mail Statistics in the 2020 General Election for VCA Counties (Excluding Los Angeles County)**

<b>Total VCA Counties (Excluding Los Angeles)</b>	
Attempted to Vote-by-Mail	3,981,974
Accepted	3,862,710
Rejected	119,264
Rejection Rate	3.0%

Figure 15 below shows the average mail ballot rejection rate for all VCA counties compared to each county's individual rejection rate. Nine of the fourteen VCA counties are at or above the 3.0% average mail ballot rejection rate. The county with the highest rejection rate is Santa Clara, while Sacramento had the lowest rejection rate. Santa Clara also has the largest non-English speaking voter base of the VCA counties excluding Los Angeles, so it is possible that additional outreach needs to be done to prevent minority language voters from having their votes rejected.

**Figure 15: Average Mail Ballot Rejection Rate for All VCA Counties Compared to the Rate in Each County in the 2020 General Election (Excluding Los Angeles County)**

## Language Access Strategies in VCA Counties in the November 2020 General Election

This section of the report evaluates the language access obligations and strategies for the fifteen VCA counties. It likewise presents data regarding voter registration and activity in each county.

### Amador County

Amador County is covered by Cal. Elec. Code §14201 for Spanish but is not covered by §203 of the Voting Rights Act (VRA). The county spent less than \$1000 on advertising for voter education.<sup>3</sup> Voter education advertisements took several forms, including public service announcements (PSA), newspaper (Ledger Dispatch), radio (KGVC radio), and community organizations and services (ESL courses, LAAC, county website).<sup>4</sup> Amador County does not have any media outlets that are specific to the Spanish speaking population. Therefore, the County enlisted the aid of community partners to educate the Spanish speaking communities.<sup>5</sup> The County also provided a toll-free voter assistance hotline for Spanish speakers. The hotline was in partnership with an interpreter relay service that was operational for 29 days before the election and approximately 30 days following election night.<sup>6</sup>

<sup>3</sup> Email from Mark Hambergren, Chief Deputy Registrar of Voters, Amador County, to Vivian Alejandre, UCLA Voting Rights Project (Mar. 23, 2021) (on file with author).

<sup>4</sup> *Id.*

<sup>5</sup> Amador County, Voter's Choice Act Election Administration Plan, at 7 <https://www.amadorgov.org/home/showpublisheddocument?id=34376> [hereinafter Amador Election Administration Plan].

<sup>6</sup> *Id.* at 7.

As mandated by SB 450, which requires counties send out mailers to voters, Amador County provided mailers and facsimile ballots in Spanish.<sup>7</sup> Mailers are mailed if requested by a voter at a vote center, however, the county reports that no one has ever requested to receive one.<sup>8</sup> The County Clerk & Register of Voters currently has two permanent staff members, but neither are bilingual.<sup>9</sup> The Chief Deputy Register of Voters stated that the office hires bilingual poll workers when possible.<sup>10</sup> For the 2020 General Election, two bilingual poll workers were hired.<sup>11</sup> Poll workers were trained on how to engage with language access voters through LanguageLine, a video translator service.<sup>12</sup> The county reported that they knew of two voters who were assisted at the polls—one was helped at the clerk’s office using LanguageLine, and the other was aided by a poll worker at one of the vote centers.<sup>13</sup>

At Vote Centers, ExpressVote ballot marking devices were available to assist voters. ExpressVote is a paper-based voting system that uses touch-screen technology to produce a paper record for tabulation.<sup>14</sup> Each vote center also provided iPads with LanguageLine live video translation through which voters could access video or audio live interpreters in over 200 languages, including American Sign Language.<sup>15</sup>

Amador County’s Language Access Advisory Committee (LAAC) is joined by the County’s Accessibility Committee thus housing a VLAAC.<sup>16</sup> The VLAAC was composed of 6 members in 2020.<sup>17</sup> Committee members are required to serve one year (6 meetings). The committee met 5 times in preparation for the 2020 General Election.<sup>18</sup> On the VLAAC website, only select meeting minutes from 2019 are publicly available.<sup>19</sup> Through suggestions and partnerships developed by the LAAC, Amador County held four public events; no one from the community attended.<sup>20</sup>

<sup>20</sup> Hammergren, *Supra*, note 8.

Amador County had just over 29 thousand eligible voters, 22,494 of whom, or 77.4%, participated in the 2020 General Election. From the primary election, we observed more than a 20-percentage point increase in voter turnout from the 57% rate.

**Figure 16: Participation in the 2020 General Election for Amador**

<b>Amador</b>	
Total Eligible Voters	29,075
Voted	22,494
Did Not Vote	6,581
Turnout	77.4%

The preferred method of voting for participants in the County was by mail, with 91.2% of voters opting to vote by mail. The next most popular method, used by 7.8% of voters, was in person at a Vote Center.

**Figure 17: Participation Using Voting Methods in the 2020 General Election for Amador**

<b>Amador</b>

% Early	0.0%

In terms of a breakdown by language, Amador only has 51, or 0.2%, of voters that are limited-English speaking.

**Figure 18: Eligible Voters by Language Type in the 2020 General Election for Amador**

<b>Amador</b>	
Total Eligible Voters	29,075
English	29,024
% English	99.8%
Total Minority Languages	51
% Minority Languages	0.2%

Spanish speaking voters make up 54.9% of minority language voters, but only 0.1% of total eligible voters. The next largest group is an assortment of minority language voters from unlisted languages. No other minority language group makes up more than 10% of non-English speakers.

**Figure 19: Eligible Voters by Minority Language and Each Group’s Share of Eligible Voters in the 2020 General Election for Amador**

<b>Amador</b>			
	Eligible Voters by Language	Share of Total Eligible Voters	Share of Minority Language Voters
Spanish	28	0.1%	54.9%
Other (Not Listed)	8	0.0%	15.7%
Chinese	4	0.0%	7.8%
Vietnamese	4	0.0%	7.8%

Japanese	1	1	100.0%	0	0.0%	0	0.0%	0	0.0%	0	0.0%

With more than 9 out of 10 voters choosing to vote by mail, the County’s mail ballot rejection rate was slightly higher than the VCA counties average of 2.2%.

**Figure 22: Vote-by-Mail Statistics in the 2020 General Election for Amador**

<b>Amador</b>	
Attempted to Vote-by-Mail	21,128
Accepted	20,523
Rejected	605
Rejection Rate	2.9%

While most minority language groups maintain a small share of the overall County electorate, the figure below shows that with additional outreach on proper vote-by-mail procedures, the non-English turnout rate would be closer to 100%. For example, there are two Japanese speaking voters in Amador, but only one voted in the general election. Further inspection shows that both of these voters attempted to cast a mail ballot, but one was rejected, reducing turnout by one-half.

**Figure 23: Mail Ballot Rejection Rates by Language in the 2020 General Election for Amador**

## Butte County

Butte County is not covered by §203 of the Voting Rights Act (VRA), but it is covered by the Cal. Elec. Code §14201 for Hmong and Spanish. The County invested in non-English advertisements for voter education through different forms of Public Service Announcements (PSAs) and a toll-free assistance hotline. The PSAs were distributed through minority language media, including radio stations, and the County worked with local agencies that consisted of language minority groups to provide support and services.<sup>21</sup> Additional strategies used to educate language assistance voters was to translate the amended Elections Administration Plan (EAP) in Spanish and Hmong, flyers, ballot types, as well as offer year-round over-the-phone translations by full-time staff proficient in both languages.<sup>22</sup> The County spent an estimated \$5,000.<sup>23</sup> For the 2020 General Election, language assistance was provided via phone or in-person interpretation, however there are no recorded instances of voters requesting or using these services.<sup>24</sup>

<sup>21</sup> Butte County Clerk-Recorder/ Registrar of Voters Election Administration Plan, at 10. <https://elections.cdn.sos.ca.gov/vca/2020/eap/butte/butte-eap-amended-draft-11.5.2019.pdf> [hereinafter Butte County Election Administration Plan].

<sup>22</sup> Email from Madison Wyman, Assistant County Clerk – Registrar of Voters, Butte County, to Vivian Alejandre, UCLA Voting Rights Project (Jan. 26, 2021) (on file with author).

<sup>23</sup> *Id.*

<sup>24</sup> *Id.*

Butte also provided facsimile ballots in Spanish and Hmong. The facsimile ballots were available via website, email, mail, and in Voter Assistance Centers.<sup>25</sup> The County had a total of five bilingual staff, two Hmong-speaking (one full-time and one temp) and three Spanish-speaking (two full-time and two temp).<sup>26</sup> They made efforts to work with a temp agency that could assist with hiring bilingual poll workers during election periods. Butte attempted to place at least one Spanish-speaking and one Hmong-speaking temp worker at each Voter Assistance Center, but with COVID-19, they instead had two call-in language assistance options. One option was with their main office and allowed voters to talk with staff, and the other was offered via Language Solutions Translation services.<sup>27</sup> The County also had poll workers who were trained on how to provide assistance, how to contact the main office, who to ask for help, and what steps to take to use Language Solutions.<sup>28</sup> For the 2020 General Election, no assistance calls were received by the County.<sup>29</sup>

The County had a Language Access Advisory Committee (LAAC) to assist the Hmong and Spanish community. Election officials stated that they had phone conversations with the Hmong and Spanish community leaders at times that were most convenient to them, since they were not in their office as much due to COVID-19.<sup>30</sup> While the County did partner with Language Solutions for translation services, it did not provide mailers. Instead, the County offered fliers in Spanish and Hmong.<sup>31</sup> Different ballot making devices were also made available, which included Image Cast X (ICX) and Remote Accessible Vote by Mail (RAVBM). ICX is a voting device with a touchscreen display and can be used as either a ballot marking device (without tabulation capabilities) or as a Direct Recording Electronic Device (DRE).<sup>32</sup> As for the RAVBM system, it allows voters to mark their selections using their own compatible technology to vote independently and privately from home, so long as they return the printed and signed selections either by mail or at a voting location.<sup>33</sup>

### **VoteCal Data Analysis**

Butte County had nearly 150 thousand eligible voters, more than 103 thousand, or 69.4%, of whom participated in the 2020 General Election. The General Election yielded more than a 23-percentage point increase from the approximately 46% turnout rate in the primary.

% CVR / Nonprovisional CVR	1.0%
Precinct Polling Place (In Person)	0
% Precinct Polling Place	0.0%
Early (In Person)	0
% Early	0.0%

Similar to Amador County, Butte’s electorate is comprised of more than 99% English-speaking voters and only 376, or 0.3%, minority language voters.

**Figure 26: Eligible Voters by Language Type in the 2020 General Election for Butte**

<b>Butte</b>	
Total Eligible Voters	149,203
English	148,827
% English	99.7%
Total Minority Languages	376
% Minority Languages	0.3%

Three quarters of limited English voters speak Spanish. Vietnamese, Chinese, and other language speaking groups have over 20 eligible voters.

**Figure 27: Eligible Voters by Minority Language and Each Group’s Share of Eligible Voters in the 2020 General Election for Butte**

<b>Butte</b>			
	Eligible Voters by Language	Share of Total Eligible Voters	Share of Minority Language Voters
Spanish	282	0.2%	75.0%
Vietnamese	24	0.0%	6.4%
Chinese	22	0.0%	5.9%
Other (Not Listed)	22	0.0%	5.9%
Korean	12	0.0%	3.2%
Japanese	6	0.0%	1.6%
Thai	4	0.0%	1.1%
Hindi	3	0.0%	0.8%
Tagalog	1	0.0%	0.3%
Khmer	0	0.0%	0.0%

English-speaking voters had the same exact turnout rate as the total county. Of the three next largest language groups – Spanish, Vietnamese, and Chinese – two had lower turnout rates than the 69.4% county average.

**Figure 28: Voter Turnout by Language in the 2020 General Election for Butte**

Butte				
	Total Eligible Voters	Voted	Did Not Vote	Turnout
English	148,832	103,294	45,538	69.4%
Spanish	280	203	77	72.5%
Vietnamese	23	15	8	65.2%
Chinese	22	11	11	50.0%
Other	22	17	5	77.3%
Korean	12	9	3	75.0%
Japanese	6	3	3	50.0%
Thai	4	3	1	75.0%
Hindi	3	2	1	66.7%
Tagalog	1	1	0	100.0%

Voting by mail was significantly preferred across all language groups. Only one language group, Vietnamese speakers, had a vote-by-mail utilization rate under 90%, but this has more to do with the group being small rather than a difference in preferences.

**Figure 29: Preferred Voting Method by Language Group in the 2020 General Election for Butte**

Butte											
	General Election Participants	Voted-by-Mail		Vote Center (In Person)		CVR / Nonprovisional CVR		Precinct Polling Place (In Person)		Early (In Person)

## Calaveras County

Calaveras County is covered by Cal. Elec. Code §14201 for Spanish but is not covered by §203 of the Voting Rights Act (VRA). For the 2020 General Election, the County provided facsimile ballots that were translated into Spanish. Facsimile ballots were only mailed if a voter requested one. Otherwise, the translated ballots were located at every vote center and were available to voters who opted to use Touch Writers to vote.<sup>34</sup> Specifically for language assistance voters, the County Registrar sent out postcards informing registered voters of a voter education workshop where they could go over how to obtain a facsimile ballot. They taught voters how to cast a translated ballot using a Touch Writer at vote centers. Finally, the County sent out a postage-paid postcard with information in English and Spanish, either directing voters to the website or asking voters to return the mailed card if they needed assistance in Spanish.<sup>35</sup> Each voter information pamphlet that was provided also included a Spanish translated copy of all voting locations, dates, and times.<sup>36</sup> In total, the County spent \$1,350.97 on translation services and Spanish language materials. This figure does not include staff time to compile, print, and make materials available to voters.<sup>37</sup>

Calaveras County provided mailers for Spanish as mandated by SB 450. Currently, the County Clerk & Registrar of Voters only has one permanent bilingual worker.<sup>38</sup> During voting periods, the County actively recruits bilingual poll workers and was able to obtain eight active bilingual poll workers for this past election cycle, five of whom worked at vote centers throughout the County during the November 2020 Election.<sup>39</sup> Calaveras tries to place at least one bilingual poll worker at each voting site, or at a minimum at a site where 3% or more of the registered voters are members of a single language minority.<sup>40</sup> Additional pay is given to bilingual workers.<sup>41</sup> Furthermore, poll workers are specifically trained on how to engage with language access voters. Poll workers are trained to post facsimile ballots in vote centers and have two copies of facsimile ballots available for voters. If a voter brings a translator, poll workers are trained to make eye contact with the voter and speak directly to the voter, and if they have difficulty understanding a voter,<sup>42</sup> they are trained to write down their communications and use a bilingual election worker or telephone interpreter service.<sup>43</sup>

---

<sup>34</sup> Email from Robin Glanville, Assistant Clerk-Recorder, Calaveras County, to Vivian Alejandre, UCLA Voting Rights Project (Feb. 3, 2021) (on file with author).

<sup>41</sup> *Id.*

<sup>42</sup> *Id.*

<sup>43</sup> *Id.*

At vote centers, Calaveras provided Touch Writers to assist voters. The Touch Writers are programmed both in English and Spanish, so voters are able to choose their language preference between the two.<sup>44</sup> Aside from facsimile ballots being provided at vote centers, voters also had the option to ask for verbal Spanish language assistance; poll workers could call a language line to reach an interpreter to translate between the voter and the poll worker.<sup>45</sup> Poll workers did not keep track of how many voters were assisted at the polls. However, poll workers did have a tally sheet to track how many voters requested assistance in Spanish and the number of voters who used the translation line, but there were none for Spanish language assistance in the November 2020 General Election.<sup>46</sup>

Calaveras County has a Language Access Advisory Committee (LAAC). They are made up of five members. Two of these members, County Elections Staff, and regular attendees from Disability Rights California (DRC) and Disability Resource Agency for Independent Living (DRAIL) actively participate in every meeting.<sup>47</sup> The LAAC met once in preparation for the 2020 General Election and did not publicly report the meeting minutes.<sup>48</sup> In addition to having a LAAC, Calaveras had contracted with AvantPage for translation services but did not enter into a contract for media services.<sup>49</sup> AvantPage translated ballots, had online and voter pamphlet information regarding polling locations within the County, different languages available to voters at each location, and translated the Election Administration Plan (EAP) updates due to COVID.<sup>50</sup> The County holds at least two events before each statewide election at which voters are provided with language and disability information, but attendance tends to be low.<sup>51</sup> Furthermore, posters and flyers are posted throughout the Count. Calaveras also uses press releases, social media postings, and mass emails to all voters in order to get the word out to the community about each workshop.<sup>52</sup>

Korean	1	0.0%	1.8%
Vietnamese	1	0.0%	1.8%
Other (Not Listed)	1	0.0%	1.8%
Tagalog	0	0.0%	0.0%

Minority language voters had a collective turnout rate of 64.8%, more than 10 percentage points under the English voter turnout. While small in numbers, there is a concerning trend with no voter turnout for Chinese, Hindi, and other language speaking voters.

**Figure 36: Voter Turnout by Language in the 2020 General Election for Calaveras**

Calaveras				
	Total Eligible Voters	Voted	Did Not Vote	Turnout
English	36,652	27,443	9,209	74.9%
Spanish	41	28	13	68.3%
Khmer	3	3	0	100.0%
Chinese	2	0	2	0.0%
Hindi	2	0	2	0.0%
Japanese	2	1	1	50.0%
Korean	1	1	0	100.0%
Other	1	0	1	0.0%
Thai	1	1	0	100.0%
Vietnamese	1	1	0	100.0%

Most language groups had a similar vote-by-mail utilization rate to the county average. However, a considerable share of English-speaking voters selected to vote in person at a vote center.

**Figure 37: Preferred Voting Method by Language Group in the 2020 General Election for Calaveras**

Calaveras											
	General Election Participants	Voted-by-Mail		Vote Center (In Person)		CVR / Nonprovisional CVR		Precinct Polling Place (In Person)		Early (In Person)	
English	27,443	23,762	86.6%	3,348	12.2%	346	1.3%	0	0.0%	0	0.0%
Spanish	28	24	85.7%	3	10.7%	1	3.6%	0	0.0%	0	0.0%
Khmer	3	2	66.7%	1	33.3%	0	0.0%	0	0.0%	0	0.0%
Japanese	1	1	100.0%	0	0.0%	0	0.0%	0	0.0%	0	0.0%
Korean	1	1	100.0%	0	0.0%	0	0.0%	0	0.0%	0	0.0%
Thai	1	1	100.0%	0	0.0%	0	0.0%	0	0.0%	0	0.0%
Vietnamese	1	1	100.0%	0	0.0%	0	0.0%	0	0.0%	0	0.0%

Similar to Butte County, Calaveras had a relatively high rejection rate compared to other counties. This rate does not indicate a disparity in ballot rejection against minority language voters.

**Figure 38: Vote-by-Mail Statistics in the 2020 General Election for Calaveras**

Calaveras	
Attempted to Vote-by-Mail	24,617
Accepted	23,792
Rejected	825
Rejection Rate	3.4%

As shown in figure 39 below, all but one rejected mail ballot was from an English-speaking voter.

**Figure 39: Mail Ballot Rejection Rates by Language in the 2020 General Election for Calaveras**

Korean	1	1	0	0.0%
Vietnamese	1	1	0	0.0%

**El Dorado County**

El Dorado County is covered by Cal. Elec. Code §14201 for Chinese and Spanish but is not covered by §203 of the Voting Rights Act (VRA). For the 2019/2020 budget, the County spent an estimated \$25,000 in advertising for voter education.<sup>53</sup> This included ads via public service announcements, flyers, radio stations, social media, department website, and newspapers.<sup>54</sup> The County also provided voter guides containing information regarding other County services designed to assist limited-English voters in the voters' requested languages.<sup>55</sup> The County also provided facsimile ballots in Chinese. Facsimile ballots were mailed if a voter requested one and also in person at both the County Clerk's office and at vote centers.<sup>56</sup>

As mandated by SB 450, El Dorado County provided mailers for Spanish.<sup>57</sup> The County Clerk & Register of Voters has no bilingual full-time staff but hires additional bilingual help staff at vote centers during election season.<sup>58</sup> During the voting period, the County actively recruited 15 bilingual poll workers who are allocated based on how close they live to a vote center.<sup>59</sup> Further, poll workers are trained to operate a service called Language Line, which gives staff immediate access to a translator via video call or phone call at vote centers.<sup>60</sup> Though the number of assistance calls through Language Line were not tracked by poll workers, the County does know of a few voters who were assisted by a language interpreter.<sup>61</sup> The County is looking to create a procedure to track the amount of bilingual calls for future elections.<sup>62</sup>

At vote centers, El Dorado County provided a minimum of 3 Image Cast X (ICX) as well as a Mobile Ballot Printing module that prints ballots on demand in all required languages.<sup>63</sup> A RAVBM ballot marking device was also available to voters who requested an accessible VBM ballot.<sup>64</sup> Voters must request access in order to receive a postage paid envelope to mail their ballot in. The RAVBM system allows voters to cast their vote using a compatible technology device, print, and mail the ballot from the comfort of their own home.<sup>65</sup>

El Dorado County’s language access advisory committee (LAAC) did not meet in preparation for the 2020 General Election.<sup>66</sup> The committee’s meeting minutes are not publicly recorded, except for those regarding meetings held in 2019.<sup>67</sup> The County has not disclosed the number of LAAC members due to privacy concerns.

### VoteCal Data Analysis

Over 117 thousand, or 80.6%, of the nearly 146 thousand eligible voters participated in the General Election. This is significantly higher than the 70.5% VCA counties average. From the primary election, there was more than a 25 percentage point increase in voter turnout from the previous rate of 55%.

**Figure 40: Participation in the 2020 General Election for El Dorado**

	<b>El Dorado</b>
Total Eligible Voters	145,715
Voted	117,378
Did Not Vote	28,337
Turnout	80.6%

Like most of the analyzed VCA counties, most voters in El Dorado selected to vote by mail in the General Election. Voting in person at a vote center was the next preferred method with over 10 thousand, or 8.6%, of voters selecting this option.

**Figure 41: Participation Using Voting Methods in the 2020 General Election for El Dorado**

El Dorado, like some of the counties detailed above, has a small share of minority language voters. Only 503, or 0.3%, of voters in the county speak a primary language other than English.

**Figure 42: Eligible Voters by Language Type in the 2020 General Election for El Dorado**

<b>El Dorado</b>	
Total Eligible Voters	145,715
English	145,212
% English	99.7%
Total Minority Languages	503
% Minority Languages	0.3%

Spanish speaking voters represent the only minority language group with a noticeable share of the total eligible voters at 0.2%. Similarly, the Spanish language group makes up 64.6% of the non-English-speaking voters in the county. The next three largest language groups in order are Chinese, Korean, and Vietnamese residents with 57, 32, and 29 voters, respectively.

**Figure 43: Eligible Voters by Minority Language and Each Group’s Share of Eligible Voters in the 2020 General Election for El Dorado**

<b>El Dorado</b>			
	Eligible Voters by Language	Share of Total Eligible Voters	Share of Minority Language Voters
Spanish	325	0.2%	64.6%

## Fresno County

Fresno County is covered by §203 of the Voting Rights Act (VRA) for Spanish and by Cal. Elec. Code §14201 for Chinese, Hmong, Korean, Cambodian/Khmer, Punjabi, Filipino, and Vietnamese. The County invested in non-English advertisement for voter education through different forms of Public Service Announcements (PSA) and toll-free assistance hotline. The PSAs were distributed through minority language media, including radio and television stations, and the County worked with local agencies made up of language minority groups that provide support and services.<sup>68</sup> Additional strategies used to educate language assistance voters included mailing ballot translation and voter information guides in Chinese, Hmong, Korean, Cambodian/Khmer, Punjabi, Filipino, Vietnamese, and Spanish, offering over-the-phone translations, postcards informing registered voters of voter information guides, social media advertisements, and public events in all seven languages.<sup>69</sup> Fresno County has not finalized calculating their estimated expenses pertaining to the language assistance provided.<sup>70</sup> For the 2020 General Election, language assistance was provided via phone or in-person.<sup>71</sup> Non-Spanish speaking bilingual election workers' placement at vote centers were determined by precinct designations provided by the State.<sup>72</sup>

Fresno County provided mailers for Spanish language voters as mandated by SB 450 for the 2020 General Election. The County also provided facsimile ballots in Chinese, Hmong, Korean, Cambodian/Khmer, Punjabi, Filipino, Vietnamese, Laos, Tagalog, and Spanish.<sup>73</sup> The facsimile ballots were available via mail to any registered voter, anyone who requested voting assistance, and was also made available at all vote centers.<sup>74</sup> The County's bilingual staff varies from month to month, but there are generally eight to ten members, with at least one Spanish-speaking and two to six other bilingual staff working in the office.<sup>75</sup> With COVID-19, the County expanded the availability of bilingual staff through language assistance options and recruited bilingual poll workers for the 2020 General Election.<sup>76</sup> Poll workers were trained on how to provide assistance and informed of the rules surrounding language assistance. For the 2020 General Election, the County is unaware of how many assistances call they received, as the data was not collected.<sup>77</sup>

The County has a Language Access Advisory Committee (LAAC) to assist the County’s Chinese, Hmong, Korean, Khmer, Punjabi, Vietnamese, Tagalong, and Spanish communities.<sup>78</sup> Based on advice from the LAAC, Fresno held bilingual Voter Education Workshops and worked with all language access communities in the region to ensure the workshops were effective and strategically located.<sup>79</sup> The ballot marking device, Image Cast X (ICX), was also made available to use at vote centers this General Election.<sup>80</sup> ICX is a voting device with a touchscreen display and it can be used as either a ballot marking device (without tabulation capabilities) or as a Direct Recording Electronic Device (DRE).<sup>81</sup>

**VoteCal Data Analysis**

Nearly 368 thousand, or 63.7%, of the 577 thousand eligible voters participated in the General Election. While this is a significant increase from the 36% turnout rate during the primary, Fresno had the lowest turnout among all VCA counties.

**Figure 48: Participation in the 2020 General Election for Fresno**

	<b>Fresno</b>
Total Eligible Voters	577,027
Voted	367,619
Did Not Vote	209,408
Turnout	63.7%

More than 318 thousand, or 86.6%, of voters cast their ballot by mail for the General Election. An additional 42 thousand, or 11.5%, voters went to a vote center to vote in person.

**Figure 49: Participation Using Voting Methods in the 2020 General Election for Fresno**

## Madera County

Madera County is covered by §203 Voting Rights Act (VRA) for Spanish and by Cal. Elec. Code §14201 for Punjabi. The County invested approximately \$24,000 in non-English advertisement for voter education through television and radio Public Service Announcement (PSA).<sup>82</sup> Additional strategies used to educate language assistance voters were legal notices and advertisements in newspaper publications alongside direct voter contact mail to Spanish and Punjabi communities.<sup>83</sup> Though the County does not provide facsimile ballots, live ballots in Spanish and Punjabi are available at in-person vote centers through ballot marking devices such as Image Cast X (ICX) and Mobile Ballot Printing (MBP).<sup>84</sup> As a result of COVID-19, Spanish and Punjabi ballots were mailed in the 2020 General Election, regardless of if the voter indicated a language preference other than English.<sup>85</sup> In total, the County spent \$60,000 on translation materials, excluding staff time to compile, print, mail and make materials available to voters.<sup>86</sup>

Madera County provided mailers for Spanish and Punjabi as mandated by SB 450. The County Clerk & Register of Voters does not track the total number of its employees that are bilingual.<sup>87</sup> During the 2020 General Election, 31 of the 73 vote center poll workers were bilingual, and there was a minimum of 2 bilingual poll workers per vote center.<sup>88</sup> Vote centers that were designated with more than 2 bilingual poll workers were determined based on voter registration data for non-English preference voters residing in the area of the vote center.<sup>89</sup> Poll workers are specifically trained on how to engage with language access voters. For all registered voters, a pre-paid postage voter assistance card was mailed with a telephone number that would connect voters to a bilingual poll worker at their nearby vote center if they needed language assistance.<sup>90</sup> The County did not track the number of voters who called and used the language assistance telephone number.<sup>91</sup>

For the 2020 General Election, Madera County deployed the Image Cast Voting System (ICVS) from Dominion Voting Systems (DVS). At each vote center, the ICVS included a minimum of three Image Cast X (ICX) ballot marking devices and a Mobile Ballot Printing (MBP) module

that allowed all the County’s vote centers to print ballots on demand in Spanish, Punjabi, and English.<sup>92</sup> Additionally, Madera County provided a DVS Remote Accessible Vote-by-Mail system for all registered voters accessing a VBM ballot in Spanish and Punjabi.<sup>93</sup>

The County has a seven-member Language Access Advisory Committee (LAAC). The 2019-2020 Madera County LAAC members were Samuel Molina (co-Chair), Leticia Gonzalez (Co-Chair), Alexander Salazar, Johanna Torres, Nadeem Ahmad, Felipe Grimaldo Jimenez, and Humberto Avila.<sup>94</sup> The LAAC met twice in preparation for the 2020 General Election and did not publicly report meeting minutes.<sup>95</sup> In collaboration with the LAAC, Madera County held bilingual voter education workshops in Spanish and Punjabi where language interpreters were in attendance.<sup>96</sup> The workshops provided language access voters information about materials and assistance available in the specified language, in addition to the vote center model voting process.<sup>97</sup>

### **VoteCal Data Analysis**

Over 53 thousand, or 66.3%, of the nearly 81 thousand eligible voters participated in the General Election. Although this is an increase from the 40% turnout rate during the primary, Madera still had the second lowest turnout among all VCA counties.

**Figure 56: Participation in the 2020 General Election for Madera**

Japanese	2	0.0%	0.1%
Khmer	1	0.0%	0.0%

Unlike some of the other counties discussed above, Madera had a near identical turnout rate for both English-speaking and minority language voters. The County’s English-speaking voters turned out at 66.3%, and non-English speaking voters collectively turned out at 66.4%. Minority language voters were widely led by the Spanish speaking group, which had a turnout rate above the County average at 66.0%.

## Mariposa County

Mariposa County is not covered by §203 of the Voting Rights Act (VRA), but it is covered by Cal. Elec. Code §14201 for Spanish and Filipino. At vote centers, there were zero voters assisted either by a language interpreter or by someone they brought or chose.<sup>98</sup> There were also zero assistant calls received in a different language.<sup>99</sup> In general, Mariposa County worked with County Departments (such as Health and Human Services, Community Services and Veteran's Services), and radio (KRYZ radio 98.5 FM) to educate voters.<sup>100</sup> To educate language assistance voters, the County had community meetings, used social media outreach, had postings in public areas, used the County website, VBM inserts, and newspaper articles.<sup>101</sup> The budget information specifically for non-English advertising is unknown and available upon request.

The County provided facsimile ballots in Spanish and Tagalog, which were provided upon request by the voter.<sup>102</sup> The County also sent out mailers in Spanish and Tagalog as mandated by SB 450.<sup>103</sup> Mariposa County hired bilingual poll workers when possible, and these workers were dispersed equally among vote centers (if any were hired).<sup>104</sup> The County did, however, conduct training for their poll workers on how to provide language assistance and concerning the rules for language assistance from third parties. The number of bilingual staff that the county has is currently unknown.<sup>105</sup>

Mariposa County also had a Language Access Advisory Committee (LAAC). The LAAC is composed of four members who met once in preparation for the 2020 General Election, and the meeting minutes are publicly reported.<sup>106</sup> There were accessible ballot marking devices at the vote centers for any registered voter to use. Voters could mark the ballots using the touchscreen display, provided audio tactile device or their own assistive technology to cast their vote

## Napa County

Napa County is not covered by §203 of the Voting Rights Act (VRA) but is covered by Cal. Elec. Code §14201 for Spanish and Filipino. For the 2020 General Election, the County had a 2019/2020 outreach budget of \$64,200<sup>109</sup> that covered Public Service Announcements (PSA) in Spanish, translated election materials, news broadcasts (translation provided by the Secretary of State), radio, newspaper ads, and community and social media outreach.<sup>110</sup> The County also provided signage in three languages at each vote center but did not account for these costs.<sup>111</sup> Some of the specific strategies used to educate language assistance voters involved outreach at fairs and community days (pre-pandemic) led by Napa County’s Community Leaders Coalition and the Voters Choice Napa consortium in order to provide information and materials.<sup>112</sup> In addition, the County’s outreach team hosted a number of workshops promoting voter registration and voter participation.<sup>113</sup> Napa County has a Language Access Advisory Committee (LAAC). The LAAC has 22 members who met once in preparation for the General Election.<sup>114</sup> Meetings minutes are publicly recorded, except for two meetings held before the end of the 2020 year.<sup>115</sup> After the March 3, 2020, Primary, no public events were held.<sup>116</sup> Instead, in-person events transitioned to zoom meetings, which the LAAC and VAAC attended with community members.<sup>117</sup>

As mandated by SB 450, the County provided mailers for Spanish and Tagalog.<sup>118</sup> Facsimile ballots were available in Tagalog upon request and at all vote centers.<sup>119</sup> Vote centers were also equipped with ballot printers that translated ballots and voter information guides in the supported languages.<sup>120</sup> Further, touchscreen Image Cast X (ICX) ballot marking devices were available, which allowed voters to insert a “voter activation card” that was configured with a voter’s ballot style (language) during the voter check-in process.<sup>121</sup> Once the activation card was inserted, the

ICX automatically displayed an electronic ballot in the voter's requested language.<sup>122</sup> Poll workers were stationed on the side of the ICX and cleaned the screen after each use to prevent the spread of COVID-19.<sup>123</sup>

Napa has one permanent bilingual worker but hired seven staff members during this election season.<sup>124</sup> Napa County also hires bilingual poll workers and does their best to place bilingual Tagalog speaking workers in American Canyon vote centers where many Filipino residents reside.<sup>125</sup> Poll workers are specifically trained on how to engage and assist language access voters with facsimile ballots and signage in three languages, and directed to call the County's bilingual phone bank operators if they need further assistance.<sup>126</sup> Information on the number of voters who were assisted was not tracked by the County.<sup>127</sup> The County's phone bank has English and Spanish operators. For the 2020 General Election, the County did not track the number of voters who used and called the language assistance telephone bank.<sup>128</sup>

**VoteCal Data Analysis**

More than 73 thousand or 81.9% of the 89 thousand eligible voters participated in the General Election. Napa had a significant increase in turnout from the 56% rate during the primary. In fact, Napa had the highest turnout rate among all VCA counties.

**Figure 72: Participation in the 2020 General Election for Napa**

## Nevada County

Nevada County is not covered by §203 of the Voting Rights Act (VRA) but is covered by the Cal. Elec. Code §14201 for Spanish. In general, the County invested over \$100,000 in advertising for voter education, translation services, toll-free hotline, public service announcements (PSA), flyers, advertisements in Spanish-language newspapers, and the mailing of translated voting materials.<sup>129</sup> The County also provided facsimile ballots in Spanish to voters upon requested either through the County Voter Instruction Guide postcard or in-person at the County Clerk office.<sup>130</sup> However, there are no reported instances of voters requesting these services.<sup>131</sup> Additionally, the County invested in a LanguageLine subscription that provided over the phone translation services to language access voters.<sup>132</sup>

Nevada County provided mailers for Spanish as mandated by SB 450. The County Clerk & Register of Voters has one permanent bilingual worker, but their job is not to process voter requests.<sup>133</sup> The County hires bilingual workers when possible, but always asks and encourages vote center workers and volunteers who speak languages other than English to assist during elections.<sup>134</sup> For the 2020 General Election, Nevada County had 3 bilingual Spanish poll workers throughout all its vote centers.<sup>135</sup> Bilingual poll workers are assigned based on worker availability and Secretary of State guidelines on language needs by precinct.<sup>136</sup> Moreover, poll workers are trained on how to provide language assistance through LanguageLine, how to work with the LanguageLine translator, and are instructed to speak to the voter directly.<sup>137</sup> Language access voters are allowed to be assisted by up to 2 people so long as they are not an employer or union representative in Nevada County.<sup>138</sup>

All vote centers in Nevada were equipped with at least three HART Intercivic Verify Scan ballot marking devices.<sup>139</sup> The HART Intercivic Verify Scan is a ballot scanning and tabulating device; voters hand-feed paper ballots into the scanner in order to cast the ballot.<sup>140</sup> Aside from the

<sup>139</sup> Nevada County, Election Administration Plan (Mar. 2, 2020), at 3, [https://www.mynevadacounty.com/DocumentCenter/View/34021/2020-Election-Administration-Plan\\_FINAL-Rev-3-2-2020](https://www.mynevadacounty.com/DocumentCenter/View/34021/2020-Election-Administration-Plan_FINAL-Rev-3-2-2020) [hereinafter Nevada County Election Administration Plan].

<sup>140</sup> Nevada County, Hart Intercivic Verity Scan, <https://verifiedvoting.org/election-system/hart-intercivic-verity-scan/>

BMDs provided at vote centers, in-person translators from Avant Page and LanguageLine translators were available over the phone upon requests.<sup>141</sup> The Clerk-Recorder/Register of Voters knows that at least two assistance calls were made in the 2020 General Election, but estimates that other voters asked for language assistance based on past election experience.<sup>142</sup>

The Nevada language access advisory committee (LAAC) is composed of one committee chair and three or four additional committee members. No meetings were held in preparation for the 2020 General Election, nor were meeting minutes publicly recorded.<sup>143</sup>

**VoteCal Data Analysis**

Over 65 thousand or 76.2% of the 85 thousand eligible voters participated in the General Election. This turnout rate places Nevada above the VCA counties average of 70.5%.

**Figure 80: Participation in the 2020 General Election for Napa**

Nevada	
Total Eligible Voters	85,373
Voted	65,092
Did Not Vote	20,281
Turnout	76.2%

Nearly 60 thousand or 92.1% of election participants chose to vote by mail. The next most selected method was in person at a vote center with a 6.9% share of the ballots cast.

**Figure 81: Participation Using Voting Methods in the 2020 General Election for Nevada**

<sup>141</sup> Email from Natalie Adona, Assistant Clerk-Recorder/Registrar of Voters, Nevada County, to Vivian Alejandre, UCLA Voting Rights Project (Feb. 11, 2021) (on file with author).

% Precinct Polling Place	1.1%
Early (In Person)	2
% Early	0.0%

As shown in figure 82 below, Nevada only has 136 or 0.2% of voters that speak a primary language other than English. This proportional share of minority language voters is the second lowest among all VCA counties, tied with Amador and Mariposa.

**Figure 82: Eligible Voters by Language Type in the 2020 General Election for Nevada**

Nevada	
Total Eligible Voters	85,373
English	85,237
% English	99.8%
Total Minority Languages	136
% Minority Languages	0.2%

Spanish is the primary language for 110 or 80.9% of the non-English speaking voters in the County. However, Spanish-speaking voters only make up 0.1% of the County's total eligible voters.

**Figure 83: Eligible Voters by Minority Language and Each Group’s Share of Eligible Voters in the 2020 General Election for Nevada**

<b>Nevada</b>			
	Eligible Voters by Language	Share of Total Eligible Voters	Share of Minority Language Voters

## Orange County

Orange County is covered by §203 of the Voting Rights Act (VRA) for Chinese (including Taiwanese), Spanish, Korean, and Vietnamese. The County is also covered by Cal. Elec. Code §14201 for Filipino and Persian.<sup>144</sup> The County spent \$1,500,000 in advertising, \$50,000 in newspaper legal ads, \$84,945 in miscellaneous advertising, \$500,000 in outreach, \$45,000 in miscellaneous outreach operations, and \$10,000 in voter outreach events.<sup>145</sup> Particularly for limited-English proficient voters, the County spent an estimated \$598,425.87 toward outreach.<sup>146</sup> Some of the specific strategies used to educate language assistance voters were year-round full-time Language Community Program Specialists, bilingual phone bank operators and election workers, voter information guides, speaking engagements and more.<sup>147</sup> The County also held workshops at which voters were given information about the vote center model, voting equipment demonstrations, language assistance services, ballot drop-off options, and how to request translated election materials.<sup>148</sup>

As mandated by SB 450, the County provided mailers for Spanish, Vietnamese, Chinese, and Korean.<sup>149</sup> The County also has facsimile ballots available in Hindi, Japanese, Gujarati, Persian, and Tagalog.<sup>150</sup> Voters could access the facsimile ballots at vote centers, by request through the postage-paid postcard in the Voter Information Guide, in person, online, or by phone. Additionally, a translated reference ballot was automatically mailed to voters living in a targeted precinct who indicated a language preference for one of the supported languages.<sup>151</sup> Orange County recorded that 435 voters were assisted at the polls by either a language interpreter or by someone the voter had brought or chosen.<sup>152</sup> On the other hand, the County did not track how many assistant calls were received in different languages, since the total number of calls go through a general phone number.<sup>153</sup> Orange County has 373 bilingual staff.<sup>154</sup> They had 211 Spanish speaking bilingual poll workers, 68 Vietnamese speaking bilingual poll workers, 29

---

<sup>144</sup> This report mirrors the language used by the Secretary of State, and thus uses “Persian,” instead of “Farsi.”

Chinese speaking bilingual poll workers, and 36 Korean speaking bilingual poll workers.<sup>155</sup> The County follows the VCA language requirements for determining how these poll workers are placed.<sup>156</sup> Poll workers are trained on how to provide language assistance and what the rules are regarding language assistance from third parties. In particular, Orange County Vote Center Customer Service Representatives (CSRs) are instructed to display vote center signs, voting materials, Voter Information Guides, and translated reference ballots in different languages at the vote center.<sup>157</sup> Representatives are taught how to treat voters of all backgrounds with equal and the utmost level of respect, courtesy, and service.<sup>158</sup> CSRs are given written materials to appropriately offer ballots and voting materials in other languages, and voters can also request a translated reference ballot in Tagalog, Persian, Gujarati, Hindi, or Japanese to take to their voting booth as they mark their ballot.<sup>159</sup>

The County has a Language Access Advisory Committee (LAAC) to help non-English speaking voters. They have one Spanish speaking representative, two Vietnamese speaking representatives, four Chinese speaking representatives, three Korean speaking representatives, two Persian speaking representatives.<sup>160</sup> The LAAC met two times in preparation for the 2020 General Election and did not publicly report meeting minutes.<sup>161</sup> At vote centers, the County had ballot marking devices such as the Hart InterCivic Verity Touch Writer. With this ballot marking device, voters can select a ballot in English, Spanish, Vietnamese, Chinese, or Korean.<sup>162</sup> Additionally, vote centers provided language assistance for Spanish, Vietnamese, Chinese, and Korean through in-person assistance, internal and third-party telephone calls, video conferencing, official ballots, and Voter Information Guides.<sup>163</sup> For Hindi, Japanese, Tagalog, Persian, Gujarati, vote centers offered translated reference ballots, language assistance materials, and third-party telephone support.<sup>164</sup>

Orange County residents had news updates and information from a variety of sources including language media outlets, and the County employed dedicated full-time staff to serve as liaisons to language communities.<sup>165</sup> The County also provides an inclusive language assistance card, which

not only described the availability of translated reference ballots, but listed all of language services available at vote centers.<sup>166</sup>

### **VoteCal Data Analysis**

Orange County had over 2 million eligible voters, more than 1.5 million or 73.8% of which participated in the 2020 General Election. From the primary election, we observed more than a 32-percentage point increase in voter turnout from the 41% rate.

**Figure 88: Participation in the 2020 General Election for Orange**

	<b>Orange</b>
Total Eligible Voters	2,082,962
Voted	1,536,889
Did Not Vote	546,073
Turnout	73.8%

Nearly 1.3 million or 81.8% of election participants chose to vote by mail. Orange’s vote-by-mail usage rate was under the 88.4% VCA counties average. Figure 89 below shows that 260 thousand or about 17% of voters went to a vote center to vote in person.

**Figure 89: Participation Using Voting Methods in the 2020 General Election for Orange**

## Sacramento County

Sacramento County is covered by §203 of the Voting Rights Act (VRA) for Chinese (including Taiwanese) and Spanish. The County is also covered by Cal. Elec. Code §14201 for Vietnamese, Korean, Tagalog, Hindi, Punjabi, Japanese, Hmong, Mien, Laotian, Telugu, and Urdu. The County's outreach efforts included distributing materials at grocery stores and COVID testing sites, used local print and e-newsletters, conducting webinars, and running multiple workshops.<sup>167</sup> They also contracted with Hanna Interpreting Services to translate official election material for all mandated languages.<sup>168</sup> In total, the County spent \$1,622,759.88.<sup>169</sup>

The County provided mailers in Spanish and Chinese<sup>170</sup> The County also automatically mailed facsimile ballots to voters that live in the 3% threshold for the county to provide language assistance or mailed upon request in Vietnamese, Tagalog, Hmong, Punjabi, Korean, Hindi, Laotian, Mien, Telugu, Urdu, or Japanese.<sup>171</sup> Sacramento has 38 permanent employees, 6 of whom 38 are bilingual.<sup>172</sup> For the General Election, the County hired 832 Spanish speaking poll workers, 158 Chinese speaking poll workers, 87 Vietnamese speaking poll workers, 118 Tagalog speaking poll workers, 64 Hmong speaking poll workers, 33 Punjabi speaking poll workers, 17 Korean speaking poll workers, 52 Hindi speaking poll workers, 2 Mien speaking poll workers, and 6 Telugu speaking poll workers.<sup>173</sup> These poll workers were placed in vote centers located in precincts in areas that corresponded where the high percentages of language minority voters live. Additionally, poll workers were trained to provide language assistance and informed of the rules for obtaining language assistance from third parties. Poll workers were trained to work with a bilingual Election Officer or call the elections office to provide language assistance in over 200 languages.<sup>174</sup> Most importantly, poll workers were trained to be patient, be compassionate, to pay attention, to not to finish voters' sentences, or to presume to know what voters were going to say.<sup>175</sup>

Sacramento County has a Language Access Advisory Committee (LAAC). It is composed of 10 members, met 6 times prior to the General Election, and meeting minutes after 2020 are

available upon request.<sup>176</sup> During the 2020 General Election the County received numerous assistant calls across several languages: 19,052 in English; 238 in Spanish; 33 in Chinese; 19 in Vietnamese; and 2 in Hmong.<sup>177</sup> Due to COVID-19, the County did not track how many voters were assisted at the polls by either a language interpreter or by someone they had brought. A ballot marking device called Dominion ICX that was programmed in English, Spanish, Cantonese, Mandarin, and Taiwanese was available at vote centers to assist voters in different languages if needed.<sup>178</sup> Additionally, the County partnered with Asian Resources, Inc (ARI), Asian Pacific Island American Public Affairs (APAPA), Council of Asian Pacific Islanders Together for Advocacy and Leadership (CAPITAL), League of Women Voter (LWV), and NextGen America to fulfill language needs.<sup>179</sup> The events that were held were Lunar New Year (Tet) Festivals, Día de los Muertos, United Latinos Town Hall, Yarmarka International Festival, Locke Asian Pacific Spring Festival, Filipino Fiesta, APAPA Voter Forum, and many more.<sup>180</sup> These events were well-attended, and at them, voters were informed of the different services available.

### **VoteCal Data Analysis**

Sacramento County had over one million eligible voters, nearly 726 thousand or 68.4% of which participated in the General Election. While we observe an increase in turnout from the 41% rate in the primary, the County had a lower turnout than the VCA counties average and the fifth lowest among VCA counties.

### **Figure 96: Participation in the 2020 General Election for Sacramento**

## San Mateo County

San Mateo County is covered by §203 of the Voting Rights Act (VRA) for Chinese (including Taiwanese) and Spanish and is covered by the Cal. Elec. Code §14201 for Korean, Japanese, Hindi, Tagalog, and Burmese. To educate limited-English proficient (LEP) voters, the County mailed a postcard that had four languages on it to areas with lower than average voter registration, held workshops on registering and voting in eight languages, purchased mobile phone web advertising in seven languages, provided grants to several community-based organizations, and prepared flyers and bookmarks in six languages.<sup>181</sup> Moreover, the County purchased TV, radio, and web advertisements in Spanish with Univision and the Azteca Network, purchased radio, web, and print advertisements in Chinese with Sing Tao, and purchased Spanish language ads at three DMVs for five months.<sup>182</sup> They also collaborated with community groups to hold voter workshops, mailed postcards targeting areas with lower than average registration, and the Registration & Elections Division sent text messages to reach an estimated 25,000 young voters.<sup>183</sup> The County ended up spending \$23,196 in printing and postage, \$2,388.95 in translations, \$7,500 for mobile phone advertising, \$7,988 for printing, \$13,500 for TV, radio, and web advertising in Spanish, \$3,811 for radio, web, and print advertising in Chinese, and \$13,800 in DMV ads (half specifically for Spanish).<sup>184</sup>

San Mateo provided mailers for English, Spanish, and Chinese as mandated by SB 450.<sup>185</sup> They also provided facsimile ballots available upon request at vote centers for Japanese, Hindi, Korean, Tagalog, Burmese.<sup>186</sup> The County hired multiple staff members to work at vote centers, and some staff members spoke multiple languages.<sup>187</sup> Vote center staff were placed in proximity to their residence unless there was a special need for their skills, and all vote centers were assigned at least one multilingual staff member.<sup>188</sup> The vote center staff members were also trained to provide language assistance and taught how to provide language assistance from third parties. For instance, when dealing with a voter where there is no mutual intelligibility, training focused on directing these voters to tables with multilingual resources, and if the voter's

<sup>187</sup> These bilingual and multilingual staff members spoke: Bisaya (1); Burmese (2); Cantonese (16); Cebuano (1); Persian (1); French (1); Fuchien (1); Greek (1); Hebrew (1); Hindi (9); Hokkien (1); Ilonggo (1); Italian (2); Japanese (3); Kapampangan (2); Korean (4); Mandarin (19); Portuguese (3); Punjabi (3); Sinhalese (1); Russian (1); Turkish (1); Spanish (28); Tagalog (27); Tongan (1); Ukrainian (1); Urdu (1); and Vietnamese (2). *Id.*

<sup>188</sup> Dunn, *Supra*, note 184.

language is not available among these resources, workers were trained to contact third party translation vendors.<sup>189</sup>

The County made ballot marking devices available to voters as an additional resource. One of the new options for ballot marking devices used during the 2020 General Election was the Remote Accessible Vote by Mail (RAVBM) System. RAVBM allows voters to use any computer with access to the internet and a printer to mark their selections and print their ballot.<sup>190</sup> Additionally, Vote Center Representatives were trained to check-in voters, to provide printed ballots or cards for voters to use with the Ballot Marking Devices, and to clean and disinfect equipment.<sup>191</sup>

For the 2020 General Election, the County received 304 Spanish assistant calls and 123 Chinese assistant calls; no other non-English calls were received.<sup>192</sup> The County did not track how many voters were assisted at the polls by either a language interpreter or by someone they had brought. The County also contracted with language translation and media services to help educate voters about the election, including Foster City Islander (English); India Post (English); Myanmar Gazette (Burmese); Nextdoor (English); Nichi Bei (Japanese); and Nikkei West (Japanese).<sup>193</sup> Further, San Mateo has a Language Access Advisory Committee (LAAC) that helps with language accessibility issues in minority communities. The LAAC consists of four individual members and two organizations that rotate in attendance but do not publicly report meeting minutes.<sup>194</sup> San Mateo also contracted Telideo, who had language options and assistance for voters with disabilities in English, Spanish, and Chinese, as well as short videos in these same languages about how to use the new voting equipment.<sup>195</sup> The County contracted with Entercom and Ad Taxi for web ad placements, and ran print and web advertisements in English, Spanish, Chinese, Tagalog and Korean in-house.<sup>196</sup> Overall, the County invested [substantially?] in non-English advertising for voter education.

### **VoteCal Data Analysis**

San Mateo had more than 378 or 67.9% of its 557 thousand eligible voters participate in the General Election. This turnout rate was the third lowest among VCA counties.

## Santa Clara County

Santa Clara County is covered by Cal. Elec. Code § 14201 for Korean and Cambodian/ Khmer and by §203 Voting Rights Act (VRA) for Chinese (including Taiwanese), Filipino, Spanish, and Vietnamese. The County invested approximately \$1,875,000 in total advertising for voter education, including non-English Public Service Announcements (PSA's) containing information about the vote center model, mail voting, and the Office of the Registrar of Voters' toll-free hotline.<sup>197</sup> Non-English PSA's were transmitted through multilingual local television and community cable stations<sup>198</sup>, and by both regional and community newspapers.<sup>199</sup> Further, information on language access was distributed through the County's social media and department website, language minority community newsletters, and multilingual radio stations including: Univision; Celina Rodriguez; Sound of Hope; Sing Tao; Vien Thao; Radio Zindagi; and Korean American radio.<sup>200</sup> Additional strategies used to educate language assistance voters included public transit messaging on Valley Transportation Authority buses, television monitor messages at various Santa Clara County's Department of Motor Vehicles (DMV) locations, and advertisements by major league sports franchises in the surrounding area.<sup>201</sup>

Santa Clara County provided mailers for Chinese, Spanish, Vietnamese, Filipino, Tagalog, Korean, and Cambodian/Khmer as mandated by SB 450. The County also provided facsimile ballots in Spanish, Chinese, Tagalog, and Vietnamese.<sup>202</sup> The County Clerk & Register of Voters had several bilingual full-time staff employees at the time of the General Election.<sup>203</sup> During the voting period, the County actively recruited bilingual poll workers, often contacting previous volunteers they had on record, who were then allocated to their assigned vote centers with respect to the region's language access voter demographics.<sup>204</sup> Poll workers were trained to operate phone lines connecting to the County Clerk's bilingual staff and to the County's phone translation service.<sup>205</sup> Further, vote centers were equipped with a set number of laptops through which poll workers could access the County's voting information in four federally mandated languages.<sup>206</sup>

At vote centers, Santa Clara provided between three and six accessible Ballot Marking Devices (BMD).<sup>207</sup> The BMDs for each vote center had ADA compliant features and were programmed with all ballot types and mandated languages for Santa Clara County.<sup>208</sup>

Santa Clara’s language access advisory committee (LAAC) met four times from May 2020 to August 2020 in preparation for the 2020 General Election.<sup>209</sup> The committee’s meeting minutes were publicly recorded and are listed on their website.<sup>210</sup> Working with the LAAC, the County held bilingual voter education workshops that provided an opportunity for language access communities to receive information about the vote center model process and to obtain materials and assistance in nine languages.<sup>211</sup> Additionally, bilingual voter education workshops with Korean American Community Services were scheduled to begin at the end of 2019.<sup>212</sup> It is unclear if these workshops occurred due to Covid-19.

### **VoteCal Data Analysis**

Santa Clara had over 1.2 million eligible voters, more than 859 thousand or 68.3% of which participated in the 2020 General Election. The County’s turnout rate was the fourth lowest among VCA counties.

**Figure 111: Participation in the 2020 General Election for Santa Clara**

% Precinct Polling Place	0.0%
Early (In Person)	0
% Early	0.0%

Among VCA counties, Santa Clara has the highest composition of minority language voters at 7.3%.

**Figure 113: Eligible Voters by Language Type in the 2020 General Election for Santa Clara**

<b>Santa Clara</b>	
Total Eligible Voters	1,258,660
English	1,166,581
% English	92.7%
Total Minority Languages	92,079
% Minority Languages	7.3%

The minority language electorate is mostly split across three groups – Vietnamese, Spanish, and Chinese. Unlike other VCA counties, these three language groups make up more than 1.5% of the total eligible voters each.

**Figure 114: Eligible Voters by Minority Language and Each Group’s Share of Eligible Voters in the 2020 General Election for Santa Clara**

Santa Clara			
	Eligible Voters by Language	Share of Total Eligible Voters	Share of Minority Language Voters
Vietnamese	38,941	3.1%	42.3%
Spanish	22,148	1.8%	24.1%
Chinese	19,945	1.6%	21.7%
Tagalog	5,544	0.4%	6.0%
Korean	2,686	0.2%	2.9%
Other (Not Listed)	1,806	0.1%	2.0%
Hindi	466	0.0%	0.5%
Japanese	337	0.0%	0.4%
Khmer	117	0.0%	0.1%
Thai	89	0.0%	0.1%

Voter turnout for minority language voters was noticeably lower at 63.4% than their English-speaking counterparts at 68.7%.

**Figure 115: Voter Turnout by Language in the 2020 General Election for Santa Clara**

Santa Clara				
	Total Eligible Voters	Voted	Did Not Vote	Turnout
English	1,167,039	801,638	365,401	68.7%
Vietnamese	38,817	25,713	13,104	66.2%

## Tuolumne County

Tuolumne County is covered by Cal. Elec. Code §14201 for Spanish but is not covered by §203 of the Voting Rights Act (VRA). The County spent over \$42,000 on advertising for voter education.<sup>213</sup> Tuolumne does not have any media outlets that are specific to the Spanish speaking community, so instead, the County established a list of community partners that could assist with educating and distributed Spanish-language materials provided by the California Secretary of State to this community.<sup>214</sup> Likewise, community partners educated Tuolumne’s Spanish-speaking community primarily through emails, newsletters, and by distributing flyers at public events or daily operations, such as riding public transportation.<sup>215</sup> Moreover, the local newspaper, The Union Democrat, also ran Spanish-language public service announcements (PSAs) informing voters about [language assistance? Voting in the county?] and promoting the toll-free voter assistance hotline.<sup>216</sup>

The Tuolumne County Elections Department held a bilingual voter education workshop to increase outreach to the County’s Spanish-speaking community and to boost voter participation in December 2019 election.<sup>217</sup>

For the 2020 General Election, at least one bilingual poll worker was hired and directed to work at the Jamestown vote center.<sup>218</sup> At all vote centers, two different ballot marking devices were used — the Image Cast X (ICX) and Image Cast Precinct Ballot Tabulators.<sup>219</sup> The County Clerk has not released how many assistance calls were received, but the Clerk claimed that the County does collect and store this data in their election management system.<sup>220</sup> The number of voters that were assisted at the polls by either a language interpreter or by someone they had brought it is unknown.

Tuolumne’s Language Access Advisory Committee (LAAC) has publicized their meeting minutes for meetings occurring from August 2019 through October 2019.<sup>221</sup> Whether the County provided mailers in a language other than English, and whether any facsimile ballots were given in a language other than English is unknown. Lastly, it is not known how many bilingual staff the County has or how the County conducts language assistance training for their poll workers.

## Los Angeles County

The languages mandated by California and federal law in Los Angeles County are Armenian, Chinese, Cambodian/Khmer, Persian, Korean, Spanish, Tagalog, Vietnamese, Hindi, Japanese, Thai, Russian, Bengali, Burmese, Gujarati, Indonesian, Mongolian, and Telugu.<sup>222</sup> This General Election, the County invested in non-English advertising for voter education and had a budget of \$25,000 for outreach.<sup>223</sup> Some of that outreach included voter registration drives, deputy registrar trainings, new citizenship ceremonies, and voting equipment demonstrations. The Community & Voter Outreach team provided 5.9 million eligible voters with voter registration opportunities and materials, conducted Deputy Registrar training for interested citizens to register voters, conducted petition drives, regularly attended naturalization ceremonies in Los Angeles County to welcome new citizens to register to vote, and had demonstrations for setting up a polling place, using InkaVote vote recorders, using Precinct Ballot Readers (PBRs) and using Audio Ballot Booths (ABBs).<sup>224</sup> The County also hired bilingual poll workers to assist LEP voters. The specific number of poll workers or bilingual staff members for the County is unknown. Poll workers trained with the new voting system. They attended a lab where they experienced interactive breakout sessions, which include additional hands-on-training with the Ballot Marking Device and the e-poll book.<sup>225</sup> On Election Day, most vote centers had access to ballot marking devices programmed with 13 languages, including audio ballots. Voters also had the option of calling a toll-free number to request that translated election materials be mailed to them.

Los Angeles County provided mailers in Armenian, Chinese, Persian, Hindi, Japanese, Khmer/Cambodian, Korean, Russian, Spanish, Tagalog, Thai, and Vietnamese as mandated by SB 450.<sup>226</sup> Further, the County had an Interactive Sample Ballot tool that does not store any identifiable information and allowed voters to access, review, and mark their selections prior to going to a vote center.<sup>227</sup> There was also an E-Sample Ballot available to voters that was an electronic version of their Sample Ballot, was accessible via email, and was then emailed to voters 30 days prior to Election Day.<sup>228</sup> Both were available in 13 languages. Los Angeles partnered with PlaceWorks to identifying vote centers using a geospatial analysis and held two

<sup>228</sup> *Id.*

rounds of grassroots community meetings specifically for persons with disabilities and minority language communities to ensure public input and involvement.<sup>229</sup>

The County has a Language Access Advisory Committee (LAAC) that helps advocate for language access needs. The committee is comprised of 22 representatives: Asian American Advancing Justice – Los Angeles; CA Common Cause; CAUSE, CHIRLA; City Clerk of Glendale; City Clerk of Pasadena; City Clerk of Sierra Madre; City of Bellflower; City of West Hollywood; Deputy Mayor of City of Bell; FarsiVote; Khmer Girls in Action; Korean American Coalition; L.A. City; LWV; Los Angeles; NALEO; National Iranian American Council (NIAC); Pars Equality Center; South Asian Network; South Asian Network (SAN); Thai CDC; and UCP.<sup>230</sup> The LAAC has quarterly meetings, but the meeting minutes are not publicly reported. Additionally, Los Angeles County contracted for language translation and media services. Multilingual media stations such as ABC, CBS, KTLA, FOX, NBC, Telemundo, Univision, iheart media, POWER 106, Entercom, Entravision, Los Angeles Times, LA Daily News, Daily Breeze, Pasadena Star News, Long Beach Press-Telegram and more.<sup>231</sup> The media services were used to raise awareness and educate residents about the upcoming election and language services, provide public service announcements and informational interviews, to promote departmental events, coordinate interviews and to disseminate election information.<sup>232</sup>

### **VoteCal Data Analysis**

As show in figure 127 below, Los Angeles County had nearly 7.3 million eligible voters, over 4.2 million, or 58.9%, of whom voted in the General Election. Compared to the other VCA counties, this is the lowest turnout rate.

% Early	0.0%

In terms of a breakdown by language, Los Angeles has nearly 400 thousand, or 5.4%, non-English speaking voters.

**Figure 129: Eligible Voters by Language Type in the 2020 General Election for Los Angeles**

Los Angeles	
Total Eligible Voters	7,264,034
English	6,868,730
% English	94.6%
Total Minority Languages	395,304
% Minority Languages	5.4%

Spanish speaking voters make up 66.9% of minority language voters and 3.6% of total eligible voters. Chinese and Korean speaking voters are the next largest language groups, comprising 13.2% and 10.6% respectively of Los Angeles County minority language voters. No other minority language group makes up more than four percent of non-English speakers.

**Figure 130: Eligible Voters by Minority Language and Each Group’s Share of Eligible Voters in the 2020 General Election for Los Angeles**

Los Angeles			
	Eligible Voters by Language	Share of Total Eligible Voters	Share of Minority Language Voters
Spanish	264,292	3.6%	66.9%
Chinese	52,343	0.7%	13.2%
Korean	41,919	0.6%	10.6%
Vietnamese	14,279	0.2%	3.6%

Thai	2,512	0.0%	0.6%
Khmer	1,259	0.0%	0.3%
Hindi	593	0.0%	0.2%

Unlike the VCA Counties averages discussed earlier, the County had a 58.4% turnout rate among English speakers, the lowest for any language group. Every other language group had a turnout

rate higher than the County average, meaning that English speaking voters played a significant role in decreasing the turnout average. Other than Thai speaking voters and voters speaking another language not listed, Spanish speaking voters had the third highest turnout.

**Figure 131: Voter Turnout by Language in the 2020 General Election for Los Angeles**

Los Angeles

**Conclusion**

Our analysis of the VoteCal data for the 2020 General Election and responses provided by county officials shows that all VCA counties satisfied the minimum legal requirements to provide language access and outreach to language minority communities. As detailed above, one of the primary findings of this report is that turnout rates were comparable for limited-English voters and their English-speaking counterparts during the 2020 General Election.

Furthermore, non-English and English-speaking voters selected to vote by mail at similar rates. In other words, voting by mail, as the preferred method of participation, had consistent usage across languages. Given the increased pressure on counties to process mail ballots, our analysis shows that there was no discernible disparity in the mail ballot rejection rate regardless of primary language.

Practices that can be improved, based on the findings of this report, including creating a consistent and uniform process for data collection. All VCA counties should be required to track, collect, and maintain the same types of information around voter characteristics, methods of participation, and language access. Mandating and maintaining consistent data is important and will facilitate further research efforts.
