Introduction

Texas approached 2020 with the confidence of an economy that had been thriving for decades. With some of the lowest unemployment rates on record and the tightest labor market seen in years, the state seemed poised to continue its economic expansion. According to the Dallas Federal Reserve, the state also seemed to be in a position to overcome the potential weakening of oil prices. However, just three months into 2020, the COVID-19 pandemic brought about the steepest and fastest drop in Texas economic activity in modern history.¹

The state had been on a steady employment climb, reaching 13 million in February 2020 for the first time. The coronavirus then took hold in Texas in early March and businesses rapidly pulled back to slow its spread. By mid-March, the pandemic caused governments to shut down nonessential businesses, resulting in record-setting job loss.²

In April 2020, the global pandemic ushered in an employment loss of about 1.3 million jobs in Texas. The total level of employment fell to 11.6 million. With all these job losses, the state's unemployment rate jumped to 13.5 percent, up from 3.5 percent in January and February 2020. Many Texans transitioned to working from home while essential employees in the state continued to report to work. Despite those adjustments, Texas' key labor-market metrics still had their worst month on record. Every sector of the Texas economy lost jobs; the hardest hit sector was leisure and hospitality,³ down 61 percent according to Texas current employment statistics data.

The state now has enough labor market data to look in the rear view mirror and evaluate the initial fallout of the pandemic as it pertains to the workforce. Analyzing labor market trends in sub-state geographic regions over time can be used to pinpoint the industries and occupational areas most affected by COVID-19. This report references data compiled from Local Area Unemployment Statistics, Current Employment Statistics, and Help Wanted Online. The data sets in the report can be used to help assess the pandemic's impact on Texas jobs.

The civilian labor force and unemployment totals for each local workforce development area (LWDA) in Texas are displayed in Appendix A. These graphs allow users to visualize the timeframe and severity of the job loss impact locally. Appendix B contains both tables and line graphs exhibiting employment for each major industry by each Texas metropolitan statistical area (MSA). These MSA tables and charts are a useful tool to compare industry specific jobs levels in 2019 and 2020. Statewide data are also available in both appendices.

Data were not available to compare occupations within the industries most impacted by COVID-19. However, with the assistance of the Texas Workforce Commission (TWC),⁴ staff of the Texas Workforce Investment Council (Council) was able to access current occupation openings. Appendix C lists the top occupations currently needed by employers for each LWDA. This information showcases occupational hiring patterns at the local level.

The Texas Workforce Investment Council

The Texas Workforce Investment Council was created in 1993 by the 73rd Texas Legislature. As an advisory body to the Governor and the Legislature, the Council assists with strategic planning for and evaluation of Texas' workforce system. The Council promotes the development of a well-educated, highly skilled workforce for Texas and advocates for a workforce system that provides quality workforce education and training opportunities. The 19-member Council includes representatives from business, labor, education, community-based organizations, and the Council's five member state agencies.

Under Texas Government Code, Section 2308.101, the Council is responsible for promoting the development of a well-educated, highly skilled workforce and advocating the development of an integrated workforce development system to provide quality services addressing the needs of business and workers in Texas.

Methodology

A three-pronged data analysis approach was utilized to identify COVID-related job loss by region. Two federal-state data sources were used: local area unemployment statistics (LAUS) and current employment statistics (CES). The U.S. Bureau of Labor Statistics partners with TWC to produce monthly LAUS and CES data. Significant movement of these workforce variables may indicate the occurrence of an economic event—in this case, related to the pandemic. The labor market sources used in this report are developed and maintained by TWC.⁵ The third source for this report was the Help Wanted Online program (HWOL),⁶ which was used to determine what occupations employers are looking for currently. TWC also assisted Council staff in extracting data from the HWOL system.

The LAUS program produces monthly estimates of total employment and unemployment that are prepared for over 7,500 areas including state, county, and local workforce development areas. In Appendix A, LAUS data was used to display the labor force and unemployment totals by LWDA monthly in 2019 and 2020. LAUS data was examined to determine which workforce development areas underwent large unemployment gains during this timeframe. The data is organized by LWDA in alphabetical order and contains a civilian labor force and unemployment chart for each.

Visual comparisons of CES data by major industry are displayed in Appendix B. A linear graphic for each industry compares 2019 and 2020 data. The graphic is a double linear graph for each major industry, with the blue line representing 2019 employment and the red line representing 2020 employment. This CES data is available for each MSA in the state to show regional employment impacts by major industry sector. A monthly CES data table is also included for each MSA. These CES tables reveal industries in Texas regions where the largest changes in employment occurred from the onset of the pandemic until December 2020. All major industries within each MSA have been analyzed to determine which industries had the greatest amount of employment change.

While it is not possible to compare occupations for the industries most affected by the pandemic, the final section of this report is intended to examine hiring patterns by LWDA as a proxy. Appendix C lists which occupations employers in each LWDA are currently seeking. However, there may or may not be a correlation to industry job loss because of COVID-19, and not all the current job listings are related to refilling jobs lost due to the pandemic. Nevertheless, in order to assess demand, the focus is on job postings by region through the Help Wanted Online program. The resulting graphs show the top 25 occupations posted in descending order by LWDA for November 2019 and November 2020, which provides a comparison of local occupational labor market demand at a point in time before and during the pandemic.

⁵ Labor Market and Career Information, Texas Workforce Commission, <https://texaslmi.com/>.

⁶ The Conference Board Help Wanted Online data series provides timely monthly measures of labor demand (advertised vacancies) at the national, regional, state, and metropolitan area levels.

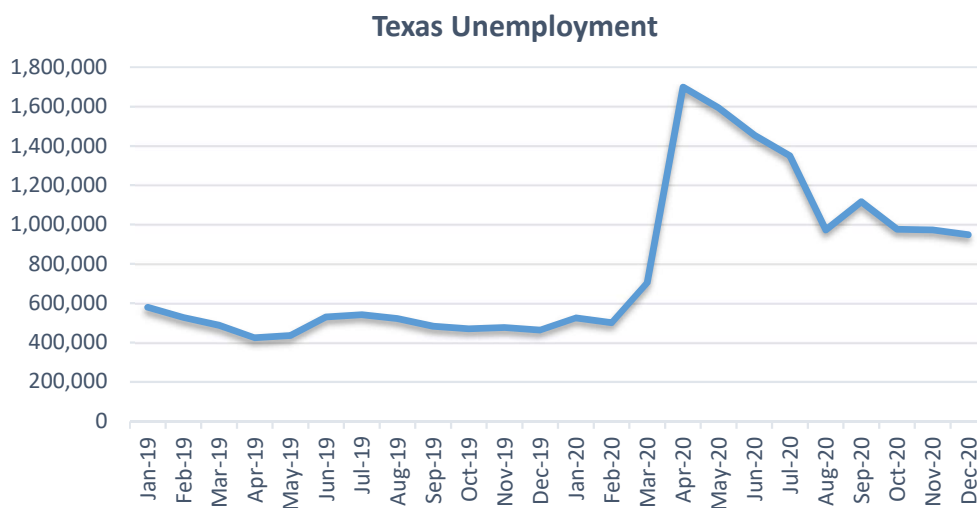

Unemployment

Statewide

Texas faced its tightest labor market in decades at the onset of 2020, with unemployment rates at a historically low 3.5 percent. There were few signs that a decline of the scale brought on by the COVID-19 pandemic was about to happen. COVID-19 took hold in Texas in March, and businesses quickly scaled back to slow its spread. Economic activity plunged leading into April as nonessential businesses across the state closed their doors or reduced operations.

Texas unemployment nearly quadrupled on an over-the-year basis from April 2019 to April 2020, with a steep over-the-month rise of 141.0 percent⁷ from March to April 2020 (Figure 1). The Texas unemployment rate peaked at 12.7 percent in April 2020, while the nationwide unemployment rate elevated to 14.4 percent. The unemployment rate in Texas settled down to 6.7 percent (948,550 unemployed) in December 2020, more than double the rate of 3.3 percent (464,113 unemployed) a year earlier.⁸ Moving forward, “economists estimate [that] a weakened global demand for oil, high unemployment and the ongoing public health crisis will continue to hamper Texas’ economic recovery.”⁹ The state’s unemployment rate is slightly above the rate during the peak of the 2008 Great Recession. The labor market continues to fluctuate, and as such recovery in Texas will take time to stabilize.

Regional

Since the end of the Great Recession, the state realized substantial job growth. When the pandemic hit, businesses had to close their doors, and Texas job gains dropped back to 2014 levels.¹⁰ The spike in unemployed workers was widespread across Texas during the early months of the pandemic. Every LWDA experienced a surge in unemployment in April 2020 (see Table 1). Some areas were hit harder than others. Eighteen LWDA experienced more than a 100 percent increase in unemployment from March to April 2020. LWDA containing the six largest civilian labor forces in Texas (Capital Area, Alamo, Tarrant County, Greater Dallas, North Central,

Although regional unemployment has recovered from the highs of April 2020, none of the 28 LWDAs have returned to their pre-pandemic unemployment level. Appendix A displays monthly unemployment levels by LWDA for 2019 and 2020.

Industry Employment

Statewide

Since the COVID-19 outbreak, the labor market has suffered primarily because consumers have curtailed their activity due to the public health threat. Despite that, Texas has been adding jobs since May 2020 (Figure 2). Even with hiring activity after the significant employment losses last spring due to the pandemic, Texas still had over 500,000 fewer jobs in December 2020 than a year prior.¹¹

¹¹ Texas Employment December 2019 [13,029,600] – Texas Employment December 2020 [12,453,100] = [576,500]

Figure 2: Texas Total Nonfarm Employment January 2019 – December 2020

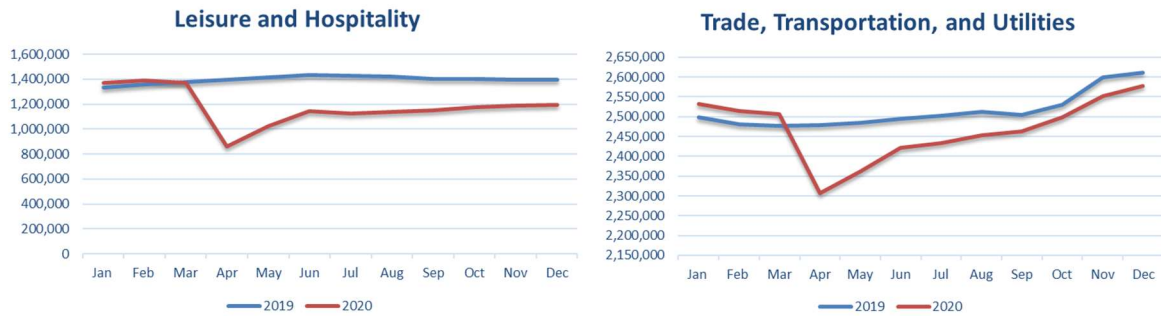

Source: TexasLMI.com, CES data, Texas Labor Market and Career Information, Texas Workforce Commission

Leisure and Hospitality and Trade, Transportation, and Utilities sustained the greatest job losses in April 2020, a decline of 510,300 and 199,600, respectively. In addition, the service sectors (Professional and Business Services and Educational and Health Services) and Retail Trade also underwent significant employment drops in April. The initial shutdown severely affected restaurants, travel and accommodations, and closely related businesses.¹²

Trade and transportation businesses slowed initially but added just over 216,000 jobs from May to December 2020. Neither Leisure and Hospitality nor Trade, Transportation, and Utilities have returned to their 2019 levels (Figures 3 and 4). Other sectors such as Construction and Manufacturing have also struggled to recover from the sharp declines in April.

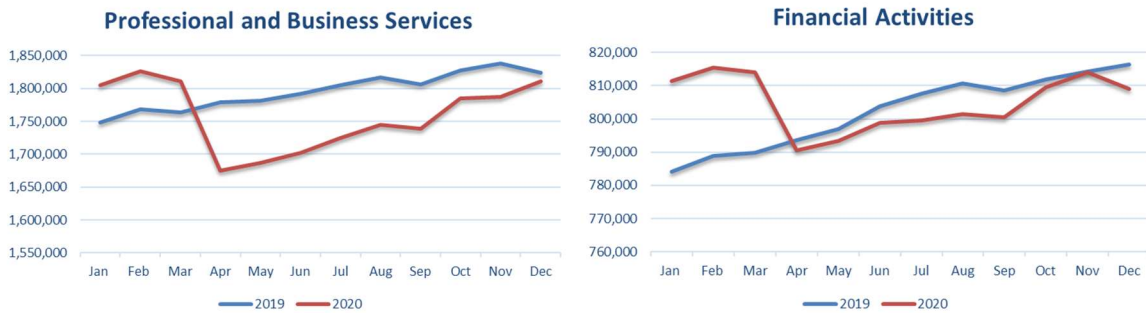

¹² Michael Wolf, "BLS Employment Projections and the Pandemic," U.S. Bureau of Labor Statistics, December 2, 2020, <https://www.bls.gov/emp/publications/pandemic-scenarios.htm>.

Figures 3 and 4: Texas Employment for Leisure and Hospitality and Trade, Transportation, and Utilities

Figures 5 and 6: Texas Employment for Professional and Business Services and Financial Activities
January 2019 – December 2020

Source: TexasLMI.com, CES data, Texas Labor Market and Career Information, Texas Workforce Commission

According to the U.S. Bureau of Labor Statistics, a few segments of the Texas labor market held up well in 2020. The Financial Activities industry sector increased by 18,600 jobs from April to December. The Professional and Business Services industry added 136,200 jobs for the same time period (Figures 5 and 6). Professional and Business Services is a very large sector of the Texas economy that includes legal services, accounting, tax preparation, architecture, and engineering. Both industry sectors rallied from the initial drop in employment numbers to numbers that nearly equaled pre-pandemic levels (Figures 5 and 6).

Looking forward, the Dallas Federal Reserve reported that “Texas job growth slowed in November as COVID-19 cases and hospitalizations increased sharply. Due to the recent surge in COVID-19, we expect a weak first quarter in 2021. However, as vaccines become more widely available, job growth should accelerate. We expect Texas job growth will be above trend but not fast enough to return to pre-COVID levels by year-end.”¹³

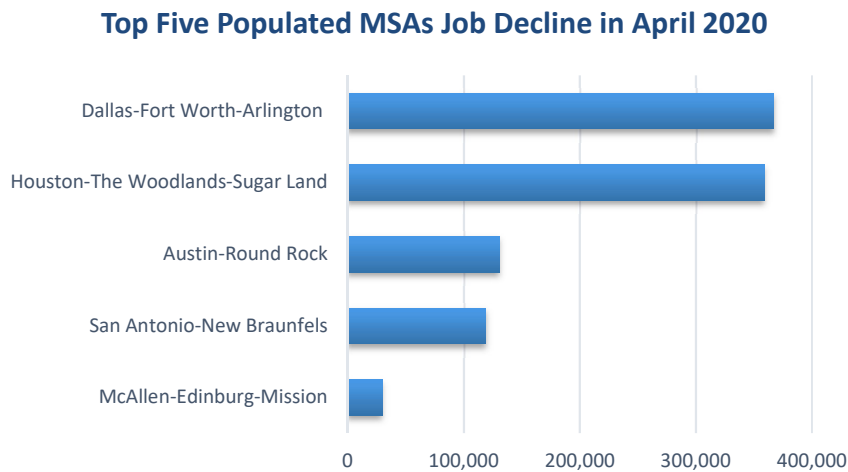

¹³ Keith R. Philips, “Texas Employment Forecast,” Federal Reserve Bank of Dallas, December 18, 2020, <https://www.dallasfed.org/research/forecast/2021/>.

Regional

Regionally, Leisure and Hospitality was the main industry sector impacted from the onset of the pandemic. This industry sector was the most severely affected industry in 23 of the 25 metro areas in Texas in April 2020. This sector was essentially shut down across the state when many businesses related to travel and accommodations and food service closed. The threat of COVID-19 severely restricted businesses with heavy face-to-face customer interaction and onsite food and beverage consumption.

The Longview and Midland metropolitan statistical areas were outliers, sustaining their largest declines in the Mining, Logging, and Construction sector, losing 2,000 and 5,300 jobs, respectively, in April 2020. The five largest MSAs in the state posted a total employment loss of 1,005,900 combined across all major industries. The Dallas-Fort Worth-Arlington MSA declined by 367,300 jobs, followed by Houston-The Woodlands-Sugar Land with a decrease of 359,200 (Figure 7). Please refer to Appendix B for detailed tables and line graphs exhibiting employment by major industry for all 25 MSAs.

Figure 7: Employment Decline for the Top Five Metropolitan Statistical Areas, April 2020

Source: TexasLMI.com, CES Data, Texas Labor Market and Career Information, Texas Workforce Commission

Current Regional Hiring Patterns

Data were not available for comparing occupations within the industries most impacted by COVID-19. As an alternative, the final section of this report displays job posting patterns by LWDA. There may or may not be a direct correlation between current hiring patterns and jobs lost due to the pandemic. However, job posting patterns can be used to compare labor demand from a point in time before the pandemic (November 2019) and a point in time a year later (November 2020). This information highlights the occupations that employers are currently seeking, and how that has changed over the year in each region.

The Help Wanted Online (HWOL) data used in this report revealed two trends in job posting patterns. Based on the HWOL data displayed in Appendix C, there were substantially more postings for healthcare related occupations, specifically for Registered Nurses, Nursing and Medical Assistants, and Licensed Vocational Nurses, across all 28 LWDA's in November 2020 than in November 2019. Also, there was a large and widespread increase in employer demand for Heavy and Tractor-Trailer Truck Drivers (Table 2).

Table 2: Top Advertised Occupations by Texas Local Workforce Development Area
November 2019 and November 2020

LWDA	Occupations Nov-19	Number of Postings	Occupations Nov-20	Number of Postings
Alamo	Registered Nurses	834	Registered Nurses	1,188
Borderplex	Registered Nurses	388	Registered Nurses	497
Brazos Valley	Registered Nurses	80	Registered Nurses	72
Cameron	Registered Nurses	162	Registered Nurses	121
Capital Area	Software Developers	1,177	Software Developers	1,033
Central Texas	Registered Nurses	106	Heavy Truck Drivers	213
Coastal Bend	Registered Nurses	156	Heavy Truck Drivers	358
Concho Valley	Registered Nurses	11	Heavy Truck Drivers	104

South Plains	Registered Nurses	203	Heavy Truck Drivers	400
South Texas	Heavy Truck Drivers	124	Heavy Truck Drivers	502
Southeast Texas	Retail Salespersons	94	Registered Nurses	77
Tarrant County	Retail Salespersons	794	Registered Nurses	954
Texoma	Registered Nurses	68	Registered Nurses	76
West Central	Retail Salespersons	55	Heavy Truck Drivers	330

Source: The Conference Board's Help Wanted Online, Labor Market and Career Information, Texas Workforce Commission

In addition to registered nurses, truck drivers were in demand in late 2020. This demand positioned the Trade, Transportation, and Utilities industry sector as one of the fastest industries in Texas to regain workers lost during the initial pandemic downturn. According to the chief economist for American Trucking Associations, nearly every good consumed in the United States is put on a truck at some point, and in 2019, more than 70 percent of all freight was transported by trucks, equaling nearly 12 billion tons of goods.¹⁴ An effect of the pandemic has been that consumer behavior shifted towards purchasing items online. This sharp increase in e-commerce magnifies the need for truck drivers. HWOL data shows that Heavy and Tractor-Trailer Truck Drivers was the top posted occupation in 12 of the 28 Texas LWDA's in November 2020.

For further comparison, Appendix C lists the top 25 occupations posted for each local workforce development area in November 2019 and November 2020.

¹⁴ "Economics and Industry Data," American Trucking Associations, 2021, <https://www.trucking.org/economics-and-industry-data>.

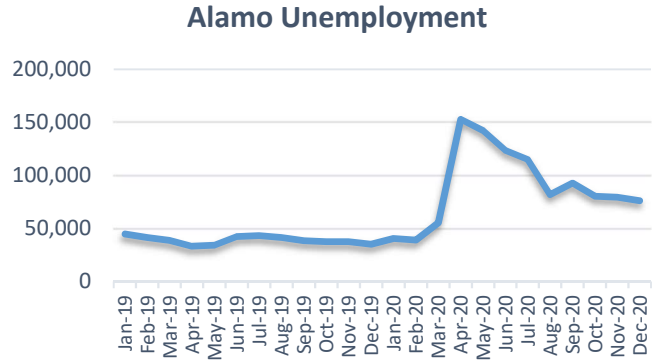

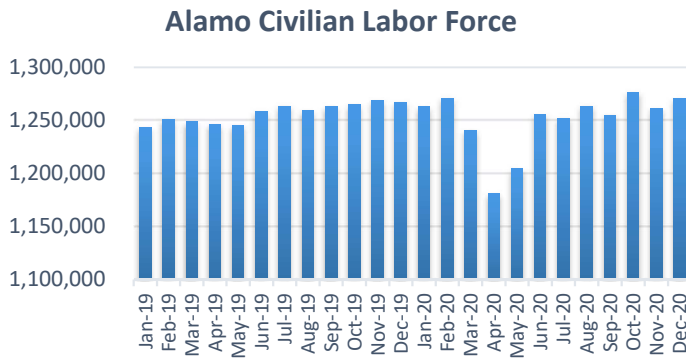

Concluding Comment

The data sets in this report can be used to assess the Texas labor market's reaction to the pandemic, both statewide and at the local level. Council staff will continue to monitor these data sets for future updates related to COVID-19 and the labor market.

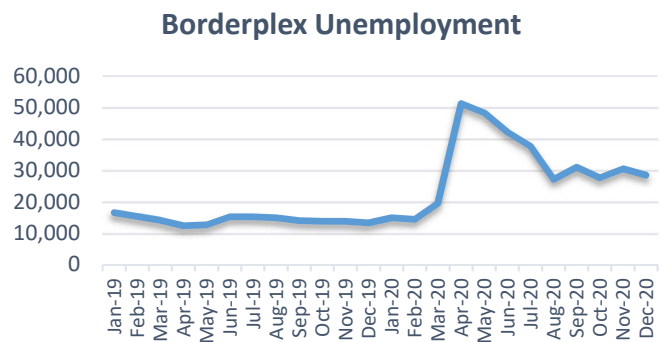

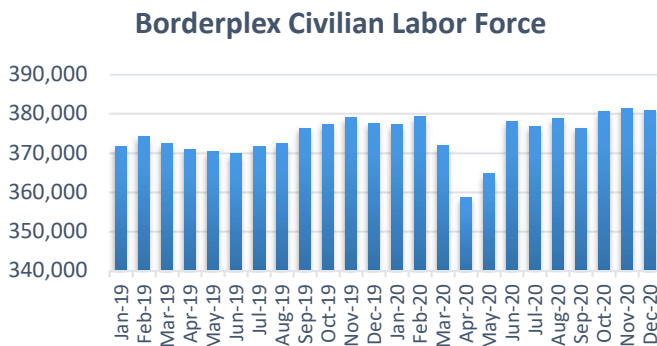

Appendix A: Civilian Labor Force and Unemployment by Local Workforce Development Area

Local Area Unemployment Statistics data were used in this section to display the labor force and unemployment totals by local workforce development area for each month in 2019 and 2020. These charts can be used to identify the local areas that experienced the largest unemployment gains during the onset of the pandemic. The local workforce development areas are listed in alphabetical order. Note: The civilian labor force and unemployment figures in the following charts are actual, without seasonal adjustment.

Appendix B: Number of Jobs by Major Industry Sector for each Texas Metropolitan Statistical Area

This section uses data from the U.S. Bureau of Labor Statistics Current Employment Statistics (CES) program. CES produces detailed industry estimates of nonfarm employment, hours, and earnings of workers on payrolls. The data sets are intended to show regional impacts on industry employment during the pandemic. This appendix includes a table listing monthly CES data for each local workforce development area and can be used to pinpoint industries in these Texas regions with the largest changes in employment during the pandemic. In addition, line graphs for each major industry are built in for a visual comparison of the number of jobs in 2019 and 2020.

Data on the following pages include CES data by major industry within each Texas metropolitan statistical area displayed from January 2019 to December 2020. The Texas metropolitan statistical areas are listed in alphabetical order.

Abilene Metropolitan Statistical Area Number of Jobs by Major Industry January 2019 – December 2020

Abilene Metro Area Number of Jobs by CES Industry Sector	Jan-19	Feb-19	Mar-19	Apr-19	May-19	Jun-19	Jul-19	Aug-19	Sep-19	Oct-19	Nov-19	Dec-19
Mining, Logging, and Construction	4,900	5,000	5,000	5,100	5,100	5,200	5,500	5,600	5,600	5,600	5,500	5,300
Manufacturing	3,200	3,200	3,300	3,300	3,200	3,200	3,300	3,200	3,200	3,200	3,200	3,300

Appendix C: Top Occupation Job Postings by Texas Local Workforce Development Area

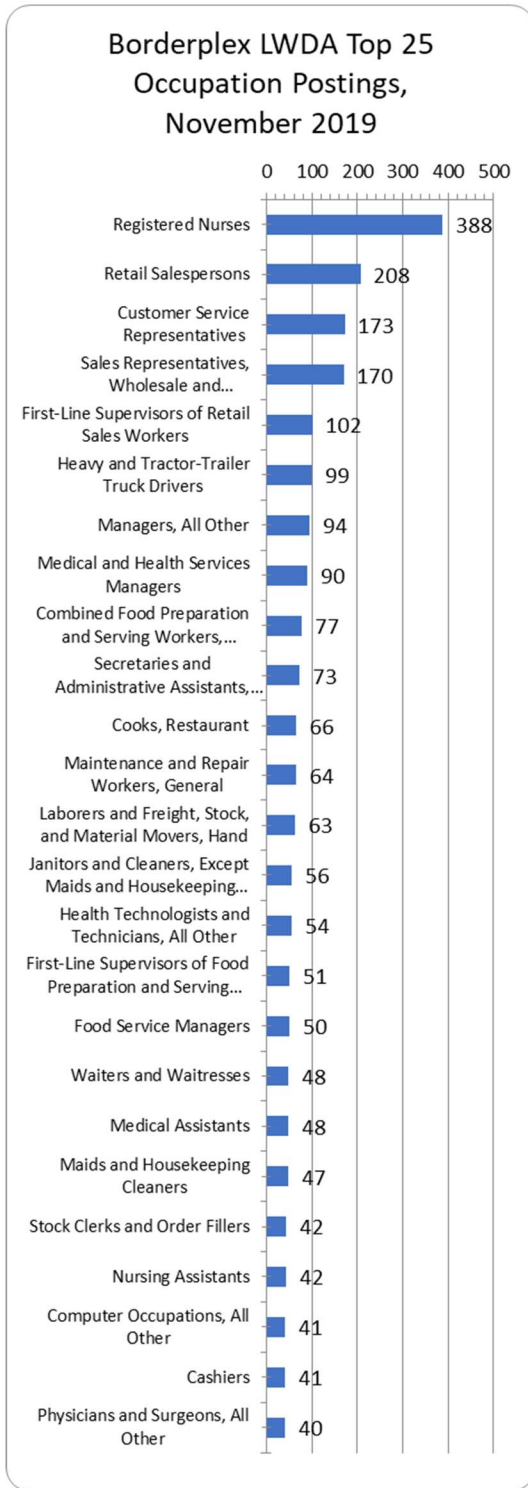

The top 25 occupation postings data for each local workforce development area (LWDA) were compiled through the Help Wanted Online (HWOL) program. This data series provides timely monthly measures of labor demand (advertised vacancies) at the national, state, and local area levels.

While it is not possible to compare occupations for the industries most affected by the pandemic, this section shows the hiring patterns by LWDA even though there may or may not be a correlation to industry job loss because of COVID-19. In order to assess hiring patterns, the focus is on job postings by region through HWOL. The following charts show the top 25 occupations posted in descending order and organized alphabetically for November 2019 and November 2020. This appendix illustrates a pre-COVID-19 snapshot and a current snapshot for comparison within each LWDA. The data in the charts on the following pages are from the Conference Board's HWOL program, retrieved through the assistance of the Labor Market and Career Information division of the Texas Workforce Commission.

Alamo Area Local Workforce Development Area (LWDA) Top Occupation Postings
November 2019 and November 2020

Borderplex Local Workforce Development Area (LWDA) Top Occupation Postings
November 2019 and November 2020

Brazos Valley Local Workforce Development Area (LWDA) Top Occupation Postings
November 2019 and November 2020

Cameron Local Workforce Development Area (LWDA) Top Occupation Postings
November 2019 and November 2020

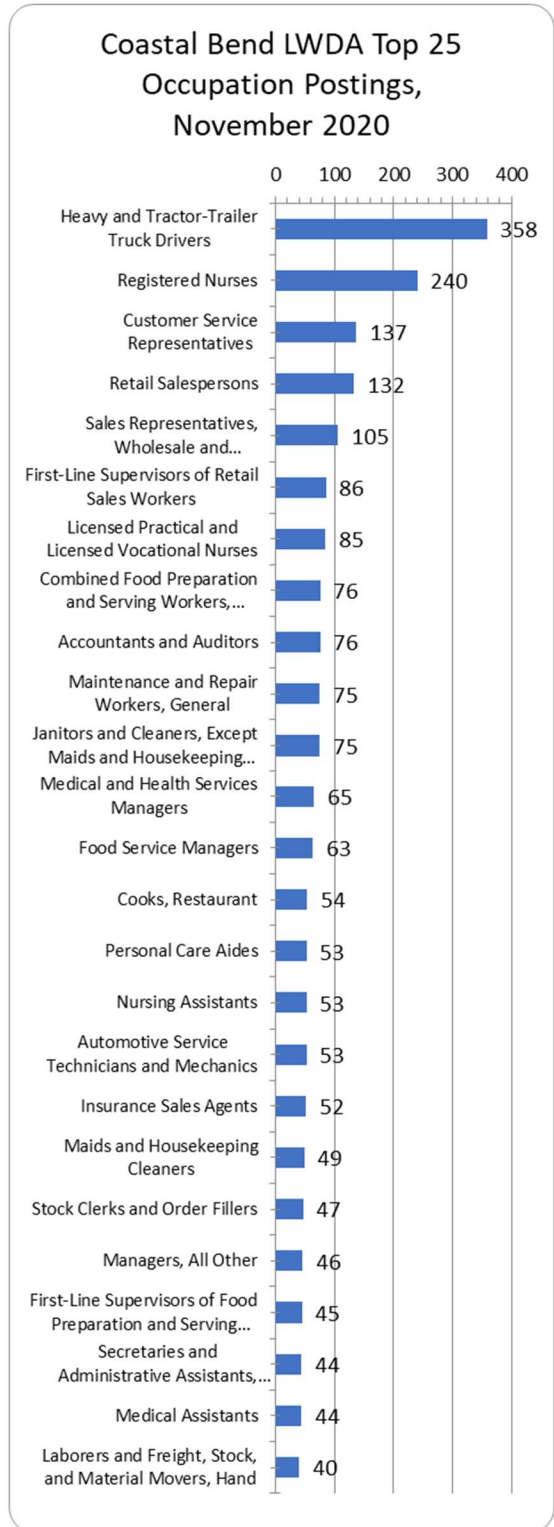

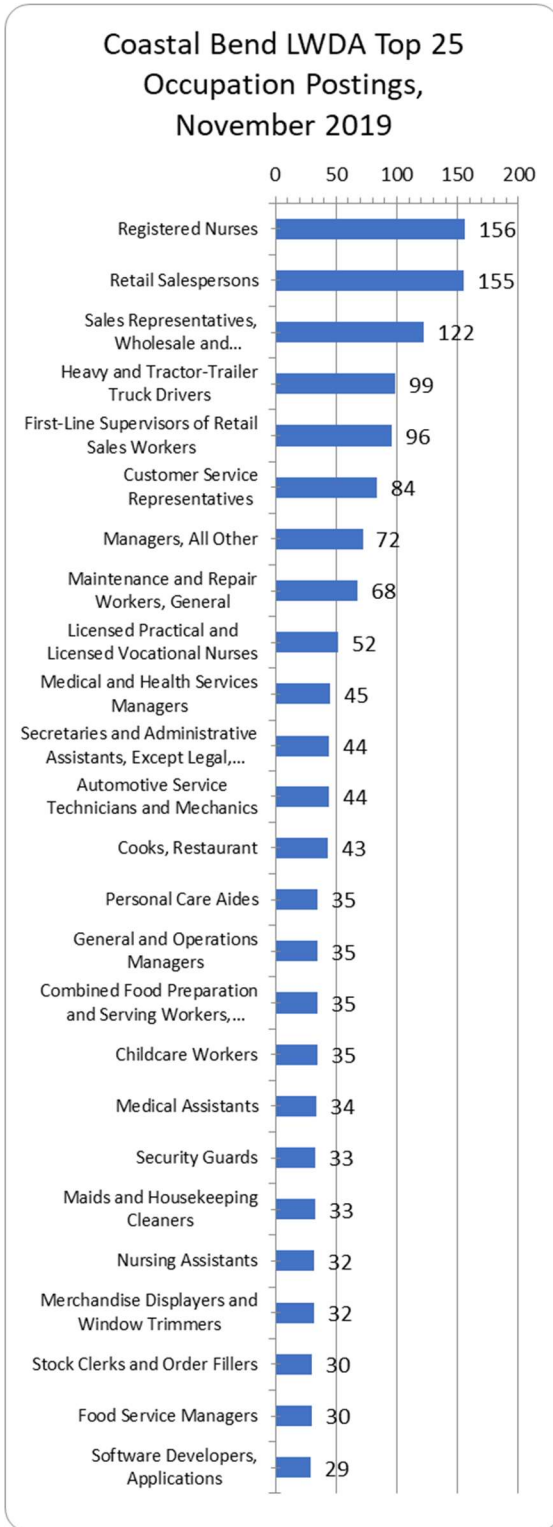

Capital Area Local Workforce Development Area (LWDA) Top Occupation Postings
November 2019 and November 2020

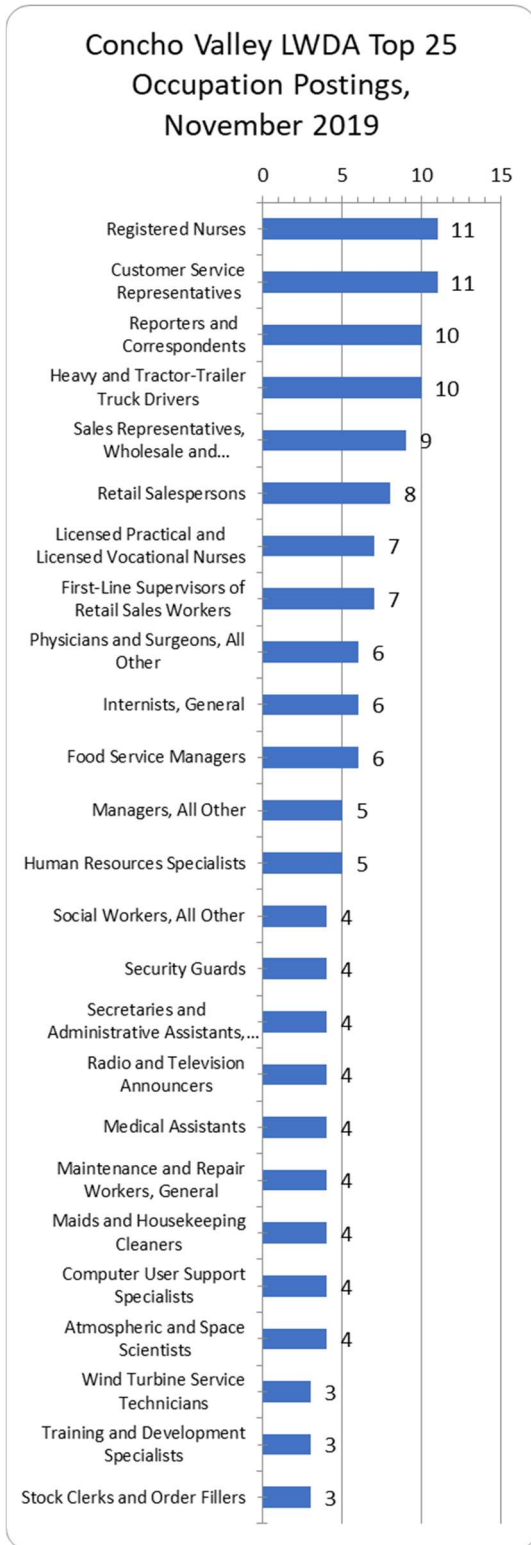

Central Texas Local Workforce Development Area (LWDA) Top Occupation Postings
November 2019 and November 2020

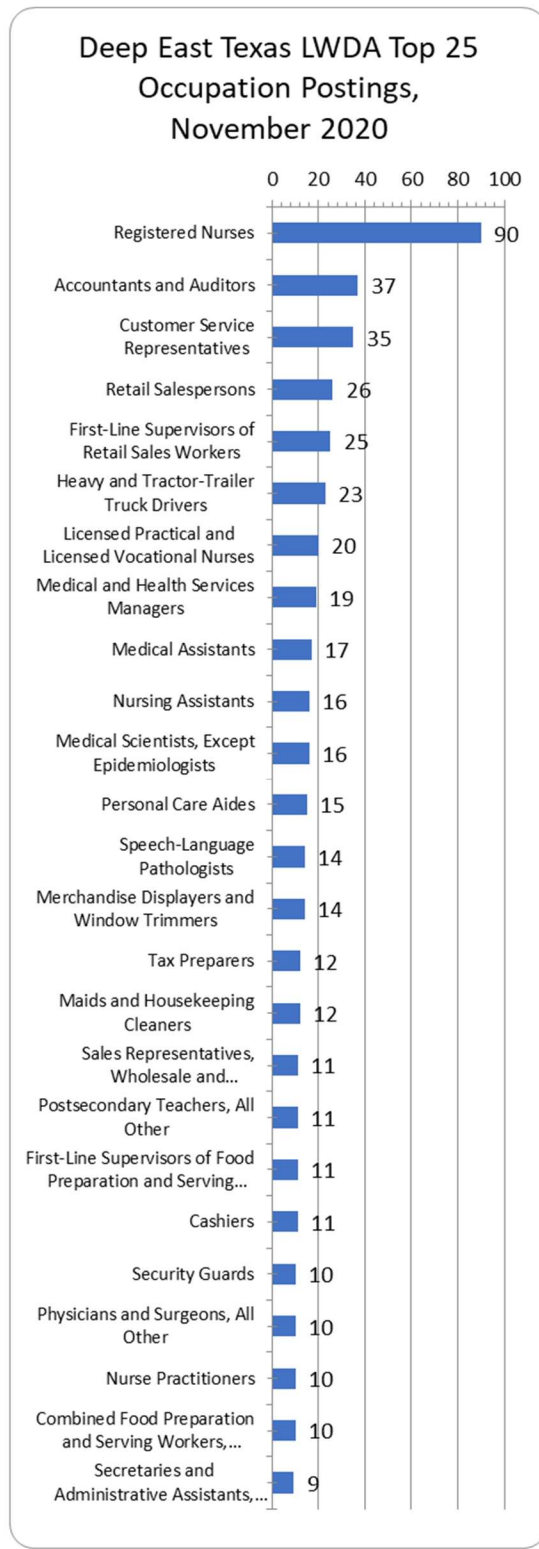

Coastal Bend Local Workforce Development Area (LWDA) Top Occupation Postings
November 2019 and November 2020

Concho Valley Local Workforce Development Area (LWDA) Top Occupation Postings
November 2019 and November 2020

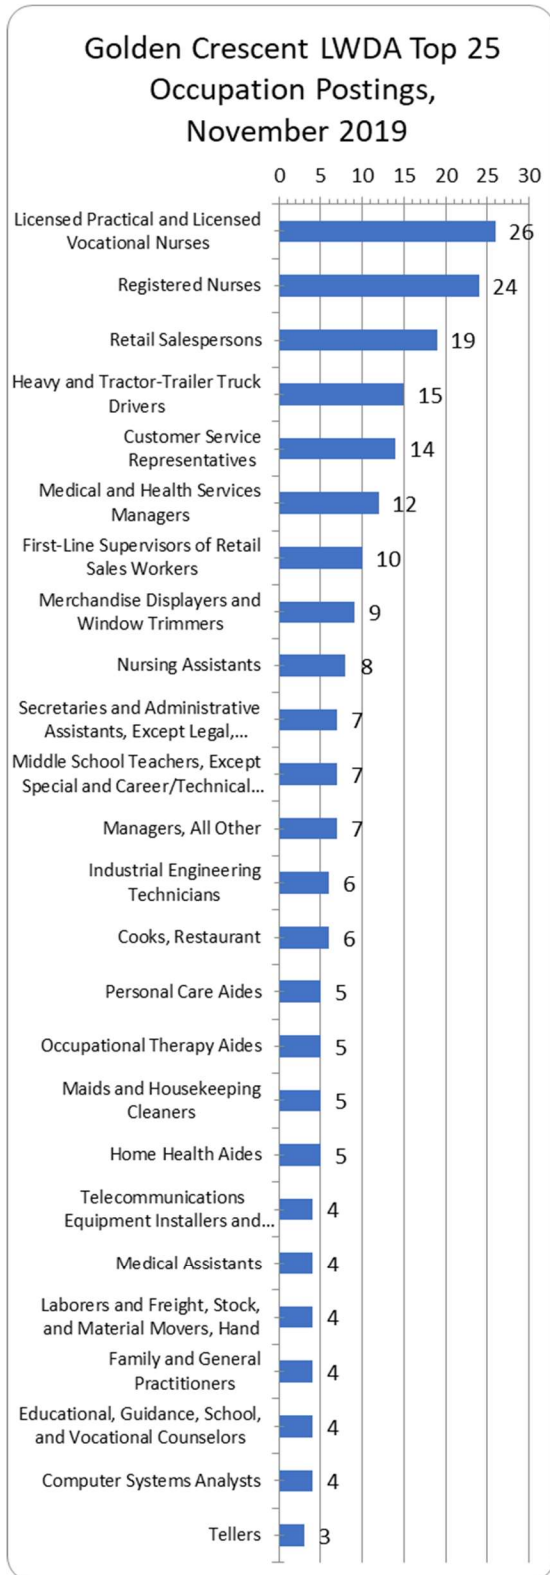

Deep East Texas Local Workforce Development Area (LWDA) Top Occupation Postings
November 2019 and November 2020

East Texas Local Workforce Development Area (LWDA) Top Occupation Postings
November 2019 and November 2020

Golden Crescent Local Workforce Development Area (LWDA) Top Occupation Postings
November 2019 and November 2020

Greater Dallas Local Workforce Development Area (LWDA) Top Occupation Postings
November 2019 and November 2020

Gulf Coast Local Workforce Development Area (LWDA) Top Occupation Postings
November 2019 and November 2020

Heart of Texas Local Workforce Development Area (LWDA) Top Occupation Postings
November 2019 and November 2020

Lower Rio Grande Valley Local Workforce Development Area (LWDA) Top Occupation Postings
November 2019 and November 2020

Middle Rio Grande Local Workforce Development Area (LWDA) Top Occupation Postings November 2019 and November 2020

North Central Local Workforce Development Area (LWDA) Top Occupation Postings
November 2019 and November 2020

Northeast Local Workforce Development Area (LWDA) Top Occupation Postings
November 2019 and November 2020

North Texas Local Workforce Development Area (LWDA) Top Occupation Postings
November 2019 and November 2020

Panhandle Local Workforce Development Area (LWDA) Top Occupation Postings
November 2019 and November 2020

Permian Basin Local Workforce Development Area (LWDA) Top Occupation Postings
November 2019 and November 2020

Rural Capital Area Local Workforce Development Area (LWDA) Top Occupation Postings
November 2019 and November 2020

Southeast Texas Local Workforce Development Area (LWDA) Top Occupation Postings
November 2019 and November 2020

South Plains Local Workforce Development Area (LWDA) Top Occupation Postings
November 2019 and November 2020

South Texas Local Workforce Development Area (LWDA) Top Occupation Postings
November 2019 and November 2020

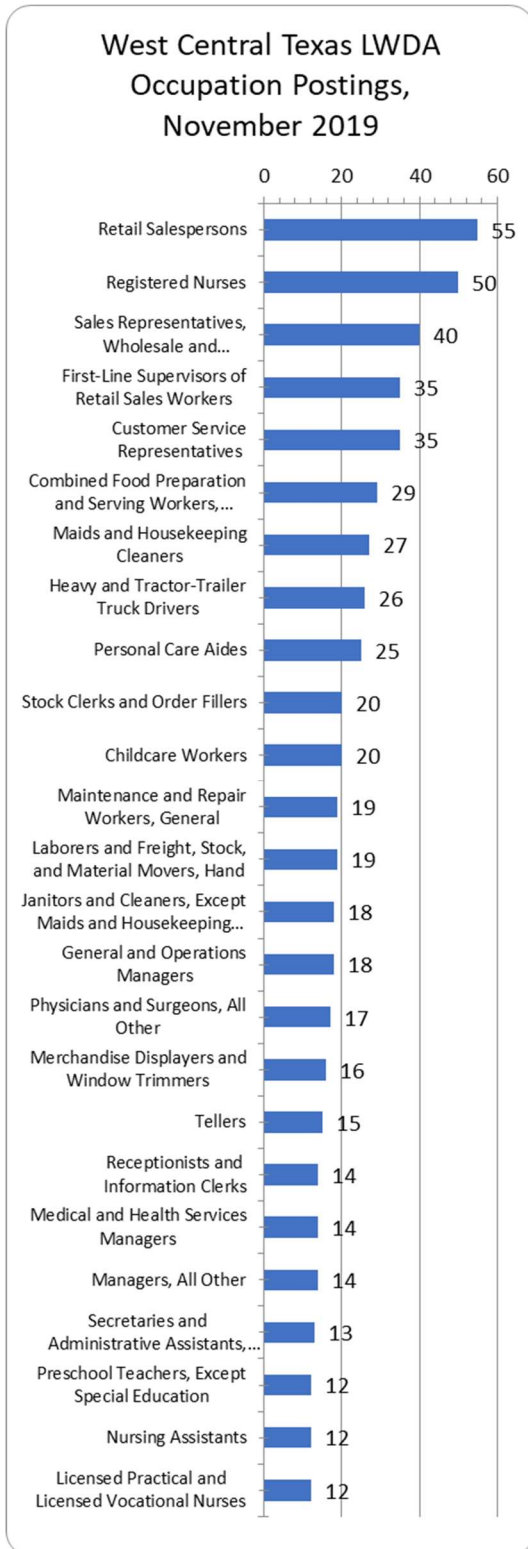

Tarrant County Local Workforce Development Area (LWDA) Top Occupation Postings
November 2019 and November 2020

Texoma Local Workforce Development Area (LWDA) Top Occupation Postings
November 2019 and November 2020

West Central Texas Local Workforce Development Area (LWDA) Top Occupation Postings
November 2019 and November 2020
