

HABITAT III

DRAFT NEW URBAN AGENDA

28 July 2016

QUITO DECLARATION ON SUSTAINABLE CITIES AND HUMAN SETTLEMENTS FOR ALL

1. We, the Heads of State and Government, Ministers and High Representatives, have gathered at the United Nations Conference on Housing and Sustainable Urban Development (Habitat III) from 17 to 20 October 2016 in Quito, Ecuador, with the participation of sub-national and local governments, parliamentarians, civil society, indigenous peoples and local communities, the private sector, professionals and practitioners, the scientific and academic community, and other relevant stakeholders, to adopt a New Urban Agenda.
2. By 2050 the world urban population is expected to nearly double, making urbanization one of the 21st century's most transformative trends. As the population, economic activities, social and cultural interactions, as well as environmental and humanitarian impacts, are increasingly concentrated in cities, this poses massive sustainability challenges in terms of housing, infrastructure, basic services, food security, health, education, decent jobs, and natural resources, among others.
3. Since the United Nations Conferences on Human Settlements in Vancouver in 1976 and in Istanbul in 1996, and the adoption of the Millennium Development Goals in 2000, we have seen improvements in the quality of life of millions of urban inhabitants, including slum and informal settlement dwellers. However, the persistence of multiple forms of poverty, growing inequalities, and environmental degradation, remain among the major obstacles to sustainable development worldwide, with social and economic exclusion and spatial segregation often an irrefutable reality in cities and human settlements.
4. We are still far from adequately addressing these and other existing and emerging challenges; and there is a need to take advantage of the opportunities of urbanization as an engine of sustained and inclusive economic growth, social and cultural development and environmental protection, and on its potential contributions to the achievement of transformative and sustainable development.
5. By readdressing the way cities and human settlements are planned, financed, developed, governed, and managed, the New Urban Agenda will help to end poverty and hunger in all its forms and dimensions, reduce inequalities, promote sustained, inclusive, and sustainable economic growth, achieve gender equality and the empowerment of all women and girls, improve human health and well-being, as well as foster resilience and protect the environment.
6. We take full account of our commitments in the 2030 Agenda for Sustainable Development, including the Sustainable Development Goals (SDGs), and the Addis Ababa Action Agenda of the Third International Conference on Financing for Development, as well as the Paris Agreement on climate change, the Sendai Framework for Disaster Risk Reduction 2015-2030, the Small Island Developing States Accelerated Modalities of Action (SAMOA) Pathway, the Istanbul Programme of Action for the Least Developed Countries for the Decade 2011-2020, and the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014-2024. We also take account of the Rio Declaration on Environment and Development, the World Summit on Sustainable Development, the World Summit for Social Development, the Programme of Action of the International Conference on Population and Development, the Beijing Platform for Action, and the United Nations Conference on Sustainable Development, and the follow up to these conferences.
7. We acknowledge the contribution of the sub-national and local governments in the definition of the New Urban Agenda and take note of the inputs of the second World Assembly of Local and Regional Governments.
8. This New Urban Agenda reaffirms our global commitment to sustainable urban development as a critical step for realizing sustainable development in an integrated and coordinated manner at global, regional, national, sub-national, and local levels, with the participation of all relevant actors. The implementation of the New Urban Agenda contributes to the implementation of the 2030 Agenda for Sustainable Development, in an integrated manner, and the achievement of the Sustainable Development Goals (SDGs) and targets, including SDG 11 of making cities and human settlements inclusive, safe, resilient, and sustainable.

Our shared vision

9. We anchor our vision in the concept of cities for all, referring to the equal use and enjoyment of cities, towns, and villages, seeking to promote inclusivity and ensure that all inhabitants, of present and future generations, without discrimination of any kind, are able to inhabit and produce just, safe, healthy, accessible, resilient, and sustainable cities and human settlements, as a common good that essentially contributes to prosperity and quality of life. Cities for all is also recognized as the Right to the City in some countries, based on a people-centered vision of cities as places that strive to guarantee a decent and full life for all inhabitants.
10. We aim to achieve cities and human settlements where all persons are able to enjoy equal rights and opportunities, as well as their fundamental freedoms, guided by the purposes and principles of the Charter of the United Nations, including full respect for international law. In this regard, the New Urban Agenda is grounded in the Universal Declaration of Human Rights, international human rights treaties, the Millennium Declaration and the 2005 World Summit Outcome. It is informed by other instruments such as the Declaration on the Right to Development.
11. We envisage cities and human settlements that:
 - (a) fulfill their social function, including the social and ecological function of land, with a view to progressively achieve the full realization of the right to adequate housing, as a component of the right to an adequate standard of living, without discrimination, the right to safe and clean drinking water and sanitation, as well as equal access for all to public goods and quality services in areas such as food security and nutrition, health, education, infrastructure, mobility and transportation, energy, air quality, and livelihoods;
 - (b) are participatory, promote civic engagement, engender a sense of belonging and ownership among all their inhabitants, prioritize family friendly and safe, inclusive, accessible, green, and quality public spaces, enhance social and intergenerational interactions, cultural expressions, and political participation, as appropriate, and foster social cohesion, inclusion, and safety in peaceful and pluralistic societies, where the needs of all inhabitants are met, recognizing the specific needs of those in vulnerable situations;
 - (c) achieve gender equality and empower all women and girls, ensuring women's full and effective participation and equal rights in all fields and in leadership at all levels of decision-making, and by ensuring decent work and equal pay for equal work, or work of equal value for all women, as well as preventing and eliminating all forms of discrimination, violence, and harassment against women and girls in private and public spaces;
 - (d) meet the challenges and opportunities of present and future sustained, inclusive and sustainable economic growth, leveraging urbanization for structural transformation, high productivity, value-added activities and resource efficiency, harnessing local economies, recognizing the contribution of the informal economy and supporting a sustainable transition to the formal economy;
 - (e) fulfill their territorial functions across administrative boundaries, and act as hubs and drivers for balanced sustainable and integrated urban and territorial development at all levels;
 - (f) promote age and gender responsive planning and investment for sustainable, safe, and accessible urban mobility for all and resource efficient transport systems for passengers and freight, effectively linking people, places, goods, services, and economic opportunities;
 - (g) adopt and implement disaster risk reduction and management, reduce vulnerability, build resilience and responsiveness to natural and man-made hazards, and foster mitigation and adaptation to climate change;
 - (h) protect, conserve, restore, and promote their ecosystems, water, natural habitats and biodiversity, minimize their environmental impact, and change to sustainable consumption and production patterns.

Our principles and commitments

12. To achieve our vision, we resolve to adopt a New Urban Agenda guided by the following interlinked principles:
 - (a) Leave no one behind, by ending poverty in all its forms and dimensions, including the eradication of extreme poverty, by ensuring equal rights and opportunities, socio-economic and cultural diversity, integration in the urban space, enhancing livability, health and well-being; promoting safety and eliminating discrimination and all forms of violence; ensuring public participation; and providing equal access for all to physical and social infrastructure and basic services.
 - (b) Sustainable and inclusive urban economies, by leveraging the agglomeration benefits of well-planned urbanization, high productivity, competitiveness and innovation; promoting full and productive employment and decent work for all, ensuring decent job creation and equal access for all to economic and productive resources and opportunities; preventing land speculation; and promoting secure land tenure.
 - (c) Environmental sustainability, by promoting clean energy, resource and land use efficiency in urban development, as well as protecting ecosystems and biodiversity, including adopting healthy lifestyles in harmony with nature; promoting sustainable consumption and production patterns; building urban resilience; reducing disaster risks; and mitigating and adapting to climate change.
13. We commit to an urban paradigm shift for a New Urban Agenda that will:
 - (a) readdress the way we plan, finance, develop, govern, and manage cities and human settlements, recognizing sustainable urban and territorial development as essential to the achievement of sustainable development and prosperity for all.
 - (b) recognize the important role of governments in the definition and implementation of inclusive and effective urban policies and legislation for sustainable urban development, and the equally important contributions of sub-national and local governments, as well as civil society and other relevant stakeholders, in a transparent and accountable manner.
 - (c) adopt sustainable, people-centered, age and gender responsive and integrated approaches to urban and territorial development by implementing policies, strategies, capacity development, and actions at all levels, based on fundamental drivers of change including:
 - i. Developing and implementing national urban policies or strategies within local-national partnerships, as appropriate, building integrated national systems of cities and human settlements, towards the achievement of national development targets;
 - ii. Strengthening urban governance, with sound institutions and mechanisms that empower and include urban stakeholders, as well as appropriate checks and balances, providing predictability and coherence in the urban development plans to enable social inclusion, sustained, inclusive, and sustainable economic growth and environmental protection;
 - iii. Reinvigorating long-term and integrated urban and territorial planning and design in order to optimize the spatial dimension of the urban form and to deliver the positive outcomes of urbanization;
 - iv. Supporting effective, innovative, and sustainable financing frameworks and instruments, enabling strengthened municipal finance and local fiscal systems in order to create, sustain, and share the value generated by sustainable urban development in an inclusive manner.

Call for Action

14. While the specific circumstances of cities, towns, and villages vary, we affirm that the New Urban Agenda is universal in scope, participatory and people-centered, protects the planet, and has a long-term vision, setting out priorities and actions at the global, regional, national, sub-national, and local levels that governments and other relevant stakeholders in every country can adopt based on their needs.

15. We will work to implement this New Urban Agenda within our own countries and at the regional and global levels, taking into account different national realities, capacities, and levels of development, and respecting national legislations and practices, as well as policies and priorities.
16. We reaffirm all of the principles of the Rio Declaration on Environment and Development, including, inter alia, the principle of common but differentiated responsibilities, as set out in Principle 7 thereof.
17. We acknowledge that in implementing the New Urban Agenda, particular attention should be given to addressing the unique and emerging urban development challenges facing all countries, in particular developing countries, including African countries, least developed countries, landlocked developing countries and small-island developing States, as well as the specific challenges facing the middle income countries. Special attention should also be given to countries in situations of conflicts, as well as countries and territories under foreign occupation, post-conflict countries, and countries affected by natural and man-made disasters.
18. We recognize the need to give particular attention to addressing the specific challenges and multiple forms of discrimination faced by women and girls, children and youth, persons with disabilities, people living with HIV/AIDS, older persons, indigenous peoples and local communities, slum and informal settlement dwellers, homeless people, workers, smallholder farmers and fishers, refugees, returnees and internally displaced persons, and migrants.
19. We urge all national, sub-national, and local governments, as well as all relevant stakeholders, in line with national policies and legislation, to revitalize, strengthen, and create partnerships, enhancing coordination and cooperation to effectively implement the New Urban Agenda and realize our shared vision.
20. We adopt this New Urban Agenda as a collective vision and a political commitment to promote and realize sustainable urban development, and as a historic opportunity to leverage the key role of cities and human settlements as drivers of sustainable development in an increasingly urbanized world.

QUITO IMPLEMENTATION PLAN FOR THE NEW URBAN AGENDA

21. We resolve to implement the New Urban Agenda as a key instrument for national, sub-national, and local governments and all relevant stakeholders to achieve sustainable urban development.

A. THE TRANSFORMATIVE COMMITMENTS FOR SUSTAINABLE URBAN DEVELOPMENT

22. To fully harness the potential of sustainable urban development, we make the following transformative commitments through an urban paradigm shift grounded in the integrated and indivisible dimensions of sustainable development: social, economic, and environmental.

SUSTAINABLE URBAN DEVELOPMENT FOR SOCIAL INCLUSION AND ENDING POVERTY

23. We recognize that eradicating poverty in all its forms and dimensions, including extreme poverty, is the greatest global challenge and an indispensable requirement for sustainable development. We also recognize that the growing inequality and the persistence of multiple forms and dimensions of poverty, including the rising number of slum and informal settlement dwellers, is affecting both developed and developing countries, and that the spatial organization, accessibility, and design of urban space, as well as infrastructure and basic service provision, together with development policies, can promote or hinder social cohesion, equality, and inclusion.
24. We commit to urban development that is people-centered, protects the planet, and is age and gender-responsive, and to the realization of all human rights and fundamental freedoms, facilitating living together, ending all forms of discrimination and violence, and empowering all individuals and communities, while enabling their full and meaningful participation. We further commit to promote culture and respect for diversity, and equality as key elements in the humanization of our cities and human settlements.

25. We reaffirm our pledge that no one will be left behind, and commit to promote equally-shared opportunities and benefits that urbanization can offer, and enable all inhabitants, whether living in formal or informal settlements, to lead decent, dignified, and rewarding lives and to achieve their full human potential.
26. We commit to support refugees, internally displaced persons and migrants, regardless of migration status, as well as their host communities, taking into account national circumstances, ensuring full respect for human rights, and recognizing that, although the movement of large populations into towns and cities poses a variety of challenges, it can also bring significant social, economic, and cultural contributions to urban life. We further commit to strengthen synergies between international migration and development, at the global, regional, national, sub-national, and local levels by ensuring safe, orderly, and regular migration through planned and well-managed migration policies and to support local authorities in establishing frameworks that enable the positive contribution of migrants to cities and strengthened urban-rural linkages.
27. We commit to strengthen the coordination role of local governments and their collaboration with other public entities and non-governmental organizations, in the provision of social and basic services for all, including generating investments in communities that are most vulnerable to disasters affected by recurrent and protracted humanitarian crises. We further commit to promote adequate services, accommodation, and opportunities for decent and productive work for crisis-affected persons in urban settings, working with the local communities and local governments to identify opportunities for engaging and developing local, durable, and dignified solutions, while ensuring that aid flows also to affected persons and host communities to prevent regression of their development.
28. We acknowledge the need for governments and civil society to further support resilient urban services during armed conflicts. We also acknowledge the need to reaffirm full respect for international humanitarian law.
29. We commit to promote national, sub-national, and local housing policies that support the progressive realization of the right to adequate housing for all as a component of the right to an adequate standard of living, that address all forms of discrimination and violence, prevent arbitrary forced evictions, and focus on the needs of the homeless, persons in vulnerable situations, low income groups, and persons with disabilities, while enabling participation and engagement of communities and relevant stakeholders, in the planning and implementation of these policies.
30. We commit to promote the development of integrated and age and gender responsive housing policies and approaches across all sectors, in particular employment, education, healthcare, and social integration sectors, and at all levels of government, which incorporate the provision of adequate, affordable, accessible, resource efficient, safe, resilient, well-connected, and well-located housing, with special attention to the proximity factor and the strengthening of the spatial relationship with the rest of the urban fabric and the surrounding functional areas.
31. We commit to stimulate the supply of a variety of adequate housing options that are safe, affordable, and accessible for members of different income groups of society, taking into consideration socio-economic and cultural integration of marginalized communities, homeless persons, and those in vulnerable situations, preventing segregation. We will take positive measures to improve the living conditions of homeless people with a view to facilitating their full participation in society.
32. We commit to ensure equitable and affordable access to sustainable basic physical and social infrastructure for all, without discrimination, including affordable serviced land, housing, modern and renewable energy, safe drinking water and sanitation, safe nutritious and adequate food, waste disposal, sustainable mobility, healthcare and family planning, education, culture, and information and communication technologies. We further commit to ensure that these services are responsive to the rights and needs of women, children and youth, older persons and persons with disabilities, indigenous peoples and local communities, and others that are in vulnerable situations such as refugees, internally displaced persons and migrants. In this regard, we encourage the elimination of legal, institutional, socio-economic, or physical barriers.

33. We commit to promote increased security of tenure for all, recognizing the plurality of tenure types, and to develop fit-for-purpose, and age and gender and environment responsive solutions within the continuum of land and property rights, with particular attention to security of land tenure for women as key to their empowerment.
34. We commit to promote appropriate measures in cities and human settlements that facilitate access for persons with disabilities, on an equal basis with others, to the physical environment of cities, in particular to public spaces, public transport, housing, education and health facilities, to public information and communication, including information and communications technologies and systems, and to other facilities and services open or provided to the public, both in urban and rural areas.
35. We commit to promote safe, inclusive, accessible, green, and quality public spaces, including streets, sidewalks and cycling lanes, squares, waterfront areas, gardens, and parks that are multi-functional areas for social interaction and inclusion, human health and well-being, economic exchange, and cultural expression and dialogue among a wide diversity of people and cultures, and which are designed and managed to ensure human development, build peaceful, inclusive, and participatory societies, as well as promote living together, connectivity, and social inclusion.
36. We commit to sustainably leverage natural and cultural heritage in cities and human settlements, as appropriate, both tangible and intangible, through integrated urban and territorial policies and adequate investments at the national, sub-national, and local levels, to safeguard and promote cultural infrastructures and sites, museums, indigenous cultures and languages, as well as traditional knowledge and the arts, highlighting the role that these play in the rehabilitation and revitalization of urban areas, and as a way to strengthen social participation and the exercise of citizenship.
37. We commit to ensure a safe, healthy, inclusive, and secure environment in cities and human settlements for all to live, work, and participate in urban life without fear of violence and intimidation, taking into consideration that women and girls, and children and youth are often particularly affected. We will also work towards the elimination of harmful practices against women and girls, including children, early forced marriage and female genital mutilation.
38. We commit to embrace diversity in cities and human settlements, to strengthen social cohesion, intercultural dialogue and understanding, tolerance, mutual respect, gender equality, innovation, entrepreneurship, inclusion, identity and safety, and the dignity of all people, as well as to foster livability and a vibrant urban economy. We also commit to ensure that our local institutions promote peaceful and pluralistic co-existence within increasingly heterogeneous and multi-cultural societies.
39. We commit to promote institutional, political, legal, and financial mechanisms in cities and human settlements to broaden inclusive platforms, in line with national policies that allow meaningful participation in decision-making, planning, and follow-up processes for all, as well as an enhanced civil engagement and co-provision and co-production.
40. We support sub-national and local governments, as appropriate, in fulfilling their key role in strengthening the interface among all relevant stakeholders, offering opportunities for dialogue, including through age and gender responsive approaches, and with particular attention to the rights and needs of, and potential contributions from, all segments of society, including men and women, children and youth, older persons and persons with disabilities, indigenous peoples and local communities, refugees and internally displaced persons and migrants, regardless of migration status and without discrimination based on race, religion, ethnicity, or socio-economic status.

SUSTAINABLE AND INCLUSIVE URBAN PROSPERITY AND OPPORTUNITIES FOR ALL

41. We recognize that sustained, inclusive, and sustainable economic growth, with full and productive employment and decent work for all, is a key element of sustainable urban and territorial development and that cities and human settlements should be places of equal opportunities allowing people to live healthy, productive, prosperous, and fulfilling lives.

42. We recognize that urban form, infrastructure, and building design are among the greatest drivers of cost and resource efficiencies, through the benefits of economy of scale and agglomeration, and fostering energy efficiency, renewable energy, resilience, productivity, environmental protection, and sustainable growth in the urban economy.
43. We commit to develop vibrant, sustainable, and inclusive urban economies, building on endogenous potentials, competitive advantages, cultural heritage and local resources, as well as resource efficient and resilient infrastructure, promoting sustainable and inclusive industrial development, sustainable consumption and production patterns, and fostering an enabling environment for businesses and innovation, as well as livelihoods.
44. We commit to promote the role of affordable and sustainable housing and housing finance, including social habitat production, in economic development, and the contribution of the sector in stimulating productivity in other economic sectors, recognizing that housing enhances capital formation, income, employment generation and savings, and can contribute to driving sustainable and inclusive economic transformation at the national, sub-national, and local levels.
45. We commit to strengthen national, sub-national, and local institutions to support local economic development, fostering integration, cooperation, coordination, and dialogue across levels of governments and functional areas and relevant stakeholders.
46. We encourage effective participation and collaboration among all stakeholders, including local governments, the private sector, civil society, women and youth organizations, as well as those representing persons with disabilities, indigenous peoples, professionals, academic institutions, trade unions, employers' organizations, migrant associations, and cultural associations, in ascertaining the opportunities for urban economic development as well as in identifying and addressing existing and emerging challenges.
47. We commit to support territorial systems that integrate urban and rural functions into the national and sub-national spatial frameworks and the systems of cities and human settlements, promoting sustainable management and use of natural resources and land, ensuring reliable supply and value chains that connect urban and rural supply and demand to foster equitable regional development across the urban-rural continuum and fill the social and economic gaps.
48. We commit to encourage urban-rural interactions and connectivity by strengthening sustainable transport and mobility, technology and communication networks and infrastructure, underpinned by planning instruments based on an integrated urban and territorial approach in order to maximize the potential of these sectors for enhanced productivity, social, economic, and territorial cohesion, as well as safety and environmental sustainability. This should include connectivity between cities and their surroundings, peri-urban and rural areas, as well as greater land-sea connections, where appropriate.
49. We commit to promote the development of urban spatial frameworks, including urban planning and design instruments that support sustainable management and use of natural resources and land, appropriate compactness and density, polycentrism, and mixed uses, through infill or planned urban extension strategies as applicable, to trigger economies of scale and agglomeration, strengthen food system planning, enhance resource efficiency, urban resilience, and environmental sustainability.
50. We encourage spatial development strategies that take into account, as appropriate, the need to guide urban extension by planning for the provision of infrastructure and services, sustainable population densities, and compact design and integration of new neighborhoods in the urban fabric.
51. We commit to promote safe, inclusive, accessible, green, and quality public spaces as drivers of social and economic development, sustainably leveraging their potential to generate increased social and economic value, including property value, and to facilitate business, public and private investments, and livelihoods opportunities for all.
52. We commit to encourage the generation and use of renewable and affordable energy and transport infrastructure, achieving the benefits of connectivity and reducing the financial, environmental, and public health costs of inefficient mobility, congestion, air pollution, urban heat island effect, and noise. We also

commit to give particular attention to the energy and transport needs of all people, particularly the poor and those living in informal settlements. We also note that reductions in renewable energy costs give cities and human settlements an effective tool to lower energy supply costs.

53. We commit to foster healthy societies by promoting access to adequate, inclusive, and quality public services, social infrastructure and facilities, such as health-care services, including sexual and reproductive health-care services to reduce newborn child and maternal mortality.
54. We commit to increase economic productivity by providing the labor force with access to income-earning opportunities, as well as the knowledge, skills and educational facilities that contribute to an innovative and competitive urban economy. We also commit to increase economic productivity through the generation of full and productive employment, decent work, and livelihood opportunities in cities and human settlements.
55. We commit to promote full and productive employment, decent work for all, and livelihood opportunities in cities and human settlements with special attention to the needs and potential of women, youth, persons with disabilities, indigenous peoples and local communities, refugees and internally displaced persons, and migrants, particularly the poorest and those in vulnerable situations, promote non-discriminatory access to income-earning opportunities
56. We commit to promote an enabling, fair, and responsible business environment, based on the principles of environmental sustainability and inclusive prosperity, promoting investments, innovations, and entrepreneurship. We also commit to address the challenges faced by local business communities, through supporting micro-, small- and medium-sized enterprises and cooperatives throughout the value chain, in particular businesses and enterprises in the social and solidarity economy, operating in both the formal and informal economies.
57. We commit to recognize the contribution of the informal working poor in the informal economy, particularly women, including the unpaid, domestic, and migrant workers to the urban economies, taking into account national circumstances. Their livelihoods, working conditions and income security, legal and social protection, access to skills, assets and other support services, and voice and representation should be enhanced. A progressive transition of workers and economic units to the formal economy will be developed by adopting a balanced approach, combining incentives and compliance measures, while promoting preservation and improvement of existing livelihoods.
58. We commit to sustain and support urban economies to progressively transition to higher productivity through high value added sectors, promoting diversification, technological upgrading, research and innovation, including the creation of quality, decent, and productive jobs, including through promoting cultural and creative industries, sustainable tourism, performing arts, and heritage conservation activities, among others.
59. We commit to harness the urban demographic dividend, where applicable, and to promote access for youth to education, skills development and employment to achieve increased productivity and shared prosperity in cities and human settlements. Girls and boys, young women and young men, are key agents of change in creating a better future and when empowered, they have great potential to advocate on behalf of themselves and their communities. Ensuring more and better opportunities for their meaningful participation will be essential for the implementation of the New Urban Agenda.
60. We commit to address the social, economic, and spatial implications of ageing populations, where applicable, and harness the ageing factor as an opportunity for new decent jobs and sustained, inclusive, and sustainable economic growth, while improving the quality of life of the urban population.

ENVIRONMENTALLY SUSTAINABLE AND RESILIENT URBAN DEVELOPMENT

61. We recognize that cities and human settlements face unprecedented threats from unsustainable consumption and production patterns, loss of biodiversity and pressure on ecosystems, pollution, and natural and man-made disasters, and climate change and its related risks, undermining the efforts to end poverty in all its forms and dimensions and to achieve sustainable development. Given cities' demographic

trends and their central role in the global economy in the mitigation and adaptation efforts related to climate change and in the use of resources and ecosystems, the way they are planned, financed, developed, built, governed, and managed has a direct impact on sustainability and resilience well beyond the urban boundaries.

62. We also recognize that urban centers worldwide, especially in developing countries, often have characteristics that make them and their inhabitants especially vulnerable to the adverse impacts of climate change and other natural and man-made hazards, including to extreme weather events, flooding, subsidence, storms, including dust and sand storms, heat waves, water scarcity, droughts, water and air pollution, vector borne diseases, and sea level rise particularly affecting coastal areas, delta regions, and small island developing States, among others.
63. We commit to facilitate the sustainable management of natural resources in cities and human settlements in a manner that protects and improves the urban ecosystem and environmental services, reduces greenhouse gas emissions and air pollution, and promotes disaster risk reduction and management, while fostering sustainable economic development and all persons' well-being and quality of life, through environmentally sound urban and territorial planning, infrastructure, and basic services.
64. We commit to use a smart city approach, which makes use of opportunities from digitalization, clean energy and technologies as well as innovative transport technologies, thus providing options for inhabitants to make more environmentally friendly choices and boost sustainable economic growth.
65. We commit to promote the creation and maintenance of well-connected and well-distributed networks of open, multi-purpose, safe, inclusive, accessible, green, and quality public spaces to improve the resilience of cities to disasters and climate change, reducing flood and drought risks and heat waves, and improving food security and nutrition, physical and mental health, household and ambient air quality, reducing noise, and promoting attractive and livable cities and human settlements and urban landscapes, prioritizing the conservation of endemic species.
66. We commit to give particular consideration to urban deltas, coastal areas, and other environmentally sensitive areas, highlighting their importance as ecosystems' providers of significant resources for transport, food security, economic prosperity, ecosystem services and resilience, and integrating appropriate measures to factor them into sustainable urban and territorial planning and development.
67. We commit to preserve and promote the ecological and social function of land, including coastal areas which support cities and human settlements, and foster ecosystem-based solutions to ensure sustainable consumption and production patterns; so that the ecosystem's regenerative capacity is not exceeded. We also commit to promote sustainable land use, combining urban extensions with adequate densities and compactness preventing and containing urban sprawl, as well as preventing loss of productive land and fragile and important ecosystems.
68. We commit to support local provision of goods and basic services, leveraging the proximity of resources, recognizing that a heavy reliance on distant sources of energy, water, food, and materials can pose sustainability challenges, including vulnerability to service supply disruptions, and that local provision can enable better access for inhabitants to resources.
69. We commit to strengthening the sustainable management of resources --including land, water (oceans, seas, and freshwater), energy, materials, forests, and food, with particular attention to the environmentally sound management and minimization of all waste, hazardous chemicals, pollutants, including air and short lived climate pollutants, greenhouse gases, and noise —in a way that considers urban-rural linkages and functional supply and value chains vis-à-vis environmental impact and sustainability, and strives to transition to a circular economy.
70. We commit to long term urban and territorial planning processes and spatial development practices that incorporate integrated water resources planning and management, considering the urban-rural continuum at the local and territorial scales, and including the participation of relevant stakeholders and communities.

71. We commit to promote conservation and sustainable use of water by rehabilitating water resources within the urban peri-urban and rural areas, reducing and treating waste water, minimizing water losses, promoting water reuse, increasing water storage, retention, and recharge, taking into consideration the water cycle.
72. We commit to promote environmentally sound waste management and to substantially reduce waste generation by reducing, re-using, and recycling (3Rs) of waste, minimizing landfills, and converting waste to energy when waste cannot be recycled. We further commit to reduce marine pollution through improved waste and waste water management in coastal areas.
73. We commit to support sub-national and local governments, as appropriate, to develop sustainable, renewable, and affordable energy, energy efficient buildings and construction modes, and to promote energy conservation and efficiency, which are essential to enable the reduction of greenhouse gas and black carbon emissions, achieve sustainable consumption and production patterns, and help to create new decent jobs, improve public health, and reduce the costs of energy supply.
74. We commit to make sustainable use of natural resources and to focus on the resource-efficiency of raw and construction materials like concrete, metals, wood, minerals, and land, establish safe material recovery and recycling facilities, and promote development of sustainable and resilient buildings, prioritizing the usage of local, non-toxic and recycled materials, and lead-additive-free paints and coatings.
75. We commit to strengthen the resilience of cities and human settlements, including through the development of quality infrastructure and spatial planning by adopting and implementing integrated, age and gender-responsive policies and plans in line with the Sendai Framework for Disaster Risk Reduction 2015-2030, mainstreaming holistic and data-informed disaster risk reduction and management at all levels, reducing vulnerabilities and risk, especially in risk-prone areas of formal and informal settlements, including slums, enabling households, communities, institutions and services to prepare for, respond to, adapt to, and rapidly recover from the effects of hazards, including shocks or latent stresses. We will promote the development of infrastructure that is resilient, resource efficient, and which will reduce the risks and the impact of disasters, including in slums and informal settlements.
76. We commit to support shifting from reactive to more proactive risk-based, all-hazards and all-of-society approaches, such as raising public awareness of the risk and promoting ex-ante investments to prevent risks and build resilience, while also ensuring timely and effective local responses, to address the immediate needs of inhabitants affected by natural and man-made disasters, and conflicts. This should include the integration of the "Build Back Better" principles in the post-disaster recovery process to integrate resilience-building, environmental and spatial measures, and the lessons from past disasters and new risks into future planning.
77. We commit to promote international, national, sub-national, and local climate action, including climate change adaptation and mitigation, and to support cities and human settlements, their inhabitants and all local stakeholders to be key implementers. We further commit to support building resilience and reducing emissions of greenhouse gases as well as emissions of short lived climate pollutants, from all relevant sectors. Such measures should be consistent with the goals of the Paris Agreement on climate change, including holding the increase in the global average temperature to well below 2 degrees Celsius above pre-industrial levels, and pursuing efforts to limit the temperature increase to 1.5 degrees Celsius above pre-industrial levels.
78. We commit to support the medium to long term adaptation planning process, as well as city-level climate vulnerability and impact assessments to inform adaptation plans, policies, programmes, and actions that build resilience of urban inhabitants, including through the use of ecosystem based adaptation.

B. EFFECTIVE IMPLEMENTATION

79. We recognize that the realization of the transformative commitments set out in the New Urban Agenda will require an enabling policy framework at the national, sub-national and local levels, integrated by

participatory planning and management of urban spatial development, and effective means of implementation, complemented by international cooperation as well as capacity development efforts, including the sharing of best practices, policies, and programs among governments at all levels.

80. We invite international and regional organizations, including the United Nations system, development partners, international and multilateral financial institutions, regional development banks, the private sector and other stakeholders, to enhance coordination of their urban development strategies and programmes to apply an integrated approach to sustainable urbanization, mainstreaming the implementation of the New Urban Agenda.
81. We strongly urge states to refrain from promulgating and applying any unilateral economic, financial, or trade measures not in accordance with international law and the Charter of the United Nations that impede the full achievement of economic and social development, particularly in developing countries.

BUILDING THE URBAN GOVERNANCE STRUCTURE: ESTABLISHING A SUPPORTIVE FRAMEWORK

82. We acknowledge the principles and strategies contained in the International Guidelines on Decentralization and Access to Basic Services for all, adopted by the Governing Council of UN-Habitat in 2007.
83. We will anchor the effective implementation of the New Urban Agenda in inclusive, implementable, and participatory urban policies, as appropriate, to mainstream sustainable urban and territorial development as part of integrated development strategies and plans, supported, as appropriate, by national, sub-national, and local, institutional and regulatory frameworks, ensuring that they are adequately linked to transparent and accountable finance mechanisms.
84. We will foster stronger coordination and cooperation among national, sub-national, and local governments, including through multilevel consultation mechanisms and by clearly defining the respective competences, tools, and resources for each level of government.
85. We will promote coherence between goals and measures of sectoral policies, including rural development, land use, food security, management of natural resources, provision of public services, water and sanitation, environment, energy, housing and mobility policies, at different levels and scales of political administration, across administrative borders and considering the appropriate functional urban areas, in order to strengthen integrated approaches to urbanization and implement integrated urban and territorial planning strategies that factor them in.
86. We will take measures to establish legal and policy frameworks, based on the principles of equality and non-discrimination, to better enable local governments to effectively implement national urban policies, as appropriate, and to empower them as policy and decision makers, ensuring appropriate fiscal, political, and administrative decentralization based on the principle of subsidiarity.
87. We will support strengthening the capacity of sub-national and local governments to implement effective local and metropolitan multi-level governance, across administrative borders, and based on functional territories, ensuring the involvement of sub-national and local governments in decision making, providing them with necessary authority and resources to manage critical urban, metropolitan, and territorial concerns. We will promote metropolitan governance that is inclusive and encompasses legal frameworks and reliable financing mechanisms, including sustainable debt management. We will take measures to ensure women's full and effective participation and equal rights in all fields and in leadership at all levels of decision-making, including in local governments.
88. We will support local governments in determining their own administrative and management structures, in line with national legislation and policies, as appropriate, in order to adapt to local needs. We will encourage appropriate regulatory frameworks and support to local governments in partnering with communities, civil society, and the private sector to develop and manage basic services and infrastructure ensuring that public interest is preserved and concise goals, responsibilities, and accountability mechanisms are clearly defined.

89. We will promote participatory age and gender responsive approaches at all stages of the urban and territorial policy and planning processes, from conceptualization to design, budgeting, implementation, monitoring, evaluation, and review, rooted in new forms of direct partnership between governments at all levels and civil society, including through broad-based and well-resourced permanent mechanisms and platforms for cooperation and consultation open to all, using information and communications technologies and accessible data solutions.

PLANNING AND MANAGING URBAN SPATIAL DEVELOPMENT

90. We take note of the principles and strategies for urban and territorial planning contained in the International Guidelines on Urban and Territorial Planning, adopted by the Governing Council of UN-Habitat at its 25th session in April 2015.
91. We will implement integrated planning that aims to balance short-term needs with long-term desired outcomes of a competitive economy, high quality of life, and sustainable environment. We will also strive to build-in flexibility in our plans in order to adjust to changing social and economic conditions over time. We will implement and systematically evaluate these plans, while making efforts to leverage innovations in technology and to produce a better living environment.
92. We will support implementing integrated, polycentric, and balanced territorial development policies and plans, encouraging cooperation and mutual support among different scales of cities and human settlements, strengthening the role of small and intermediate cities and towns in enhancing food security and nutrition systems, providing access to sustainable, affordable, adequate, resilient, and safe housing, infrastructure, and services, and facilitate effective trade links, across the urban-rural continuum, ensuring that small scale farmers and fishers are linked to local, sub-national, national, regional, and global value chains and markets. We will also support urban agriculture and farming as well as responsible local sustainable consumption and production, and social interactions through enabling accessible networks of local markets and commerce as an option to contribute to sustainability and food security.
93. We will encourage implementing sustainable urban and territorial planning, including city-region and metropolitan plans, to encourage synergies and interactions among urban areas of all sizes, and their peri-urban and rural surroundings, including those that are cross-border, and support the development of sustainable regional infrastructure projects that stimulate sustainable economic productivity, promoting equitable growth of regions across the urban-rural continuum. In this regard we will promote urban-rural partnerships and inter-municipal cooperation mechanisms based on functional territories and urban areas as effective instruments to perform municipal and metropolitan administrative tasks, deliver public services, and promote both local and regional development.
94. We will implement planned urban extensions, infill, as well as renewal, regeneration, and retrofitting of urban areas, as appropriate, including upgrading of slums and informal settlements, promoting integrated and participatory approaches involving all stakeholders and inhabitants, avoiding spatial and socio-economic segregation and gentrification, while preserving cultural heritage and preventing and containing urban sprawl.
95. We will promote integrated urban and territorial planning, including planned urban extensions based on the principles of equitable, efficient, and sustainable use of land and natural resources, compactness, polycentrism, appropriate density and connectivity, multiple use of space, as well as mixed social and economic uses in the built-up areas, to prevent urban sprawl to reduce mobility challenges and needs, service delivery costs per capita, and harness density, economies of scale and agglomeration, as appropriate.
96. We will support the implementation of urban planning strategies, as appropriate, that facilitate a social mix through the provision of affordable housing options with access to quality basic services and public spaces for all, enhancing safety and security, favoring social and inter-generational interaction and the appreciation of diversity.

97. We will support the provision of well-designed networks of safe, inclusive, accessible, green, and quality public spaces and streets, free from crime and violence, including sexual harassment, considering the human scale and measures that allow for the best possible commercial use of street-level floors, fostering local markets and commerce, both formal and informal, as well as not-for-profit community initiatives, bringing people into the public spaces, promoting walkability and cycling towards improving health and well-being.
98. We will integrate disaster risk reduction, and climate change adaptation and mitigation considerations and measures into age and gender responsive urban and territorial development and planning processes, including low-carbon, resilience-based, and climate effective design of spaces, buildings, and constructions, services and infrastructure, promote cooperation and coordination across sectors, as well as build capacity of local authorities to develop and implement disaster risk reduction and response plans, such as risk assessments on the location of current and future public facilities, and formulate adequate contingency and evacuation procedures.
99. We will integrate inclusive measures for urban safety, and crime and violence prevention into all urban planning strategies and initiatives, with particular attention to slums and informal settlements, as well as to vulnerability and cultural factors in the development of public security, and crime and violence prevention policies, including by preventing and countering the stigmatization of specific groups as posing inherently greater security threats.
100. We will promote compliance with legal requirements through strong inclusive management frameworks and accountable institutions that deal with land registration and governance, applying a transparent and sustainable management and use of land, property registration, and sound financial system. We will support local governments and relevant stakeholders, through a variety of mechanisms, in developing and using basic land inventory information, such as a cadaster, valuation and risk maps, as well as land and housing price records to generate the high-quality, timely, and reliable disaggregated data by income, sex, age, race, ethnicity, migration status, disability, geographic location, and other characteristics relevant in national context, needed to assess changes in land values, while ensuring that these data will not be used for discriminatory policies on land use.
101. We will foster the progressive realization of the right to adequate housing, as a component of the right to an adequate standard of living. We will develop and implement housing policies at all levels, incorporating participatory planning, and applying the principle of subsidiarity, as appropriate, in order to ensure coherence among national, sub-national, and local development strategies, land policies, and housing supply.
102. We will promote housing policies based on the principles of social inclusion, economic effectiveness, and environmental protection. We will enhance the public supply of land for affordable and sustainable housing, including land in central and consolidated areas of cities with adequate infrastructure, and encourage mixed-income development to promote social inclusion and cohesion.
103. We will encourage developing policies, tools, mechanisms, and financing models that promote access to a wide range of affordable, sustainable housing options including rental and other tenure options, as well as cooperative solutions such as co-housing, community land trust, and other forms of collective tenure, that would address the evolving needs of persons and communities, in order to improve the supply of housing, especially for low-income groups and to prevent segregation and arbitrary forced evictions and displacements, guaranteeing the provision of dignified and adequate re-allocation. This will include support to incremental housing and self-build schemes, with special attention to slums and informal settlements upgrading programs.
104. We will support increased allocation of financial and human resources for the upgrading and, to the extent possible, the prevention of slums and informal settlements with strategies that go beyond physical and environmental improvements, to ensure that slums and informal settlements are integrated into the social, economic, cultural, and political dimensions of cities. These strategies should include, as applicable, access to sustainable, adequate, safe, and affordable housing, basic and social services; and safe, inclusive,

accessible, green, and quality public spaces; and they should promote security of tenure and its regularization, as well as measures for conflict prevention and mediation.

105. We will support efforts to define and reinforce inclusive and transparent monitoring systems for reducing the proportion of people living in slums and informal settlements, taking into account the experiences gained from previous efforts to improve the living conditions of slum and informal settlement dwellers.
106. We will promote the development of adequate and enforceable regulations in the housing sector, including, as applicable, resilient building codes, standards, development permits, land use by-laws and ordinances, and planning regulations, combating and preventing speculation, displacement, homelessness, and arbitrary forced evictions, ensuring sustainability, quality, affordability, health, safety, accessibility, energy and resource efficiency, and resilience. We will also promote differentiated analysis of housing supply and demand based on high-quality, timely, and reliable disaggregated data at the national, sub-national, and local levels, considering specific social, economic, environmental, and cultural dimensions.
107. We will promote the implementation of sustainable urban development programs with housing and people's needs at the center of the strategy, prioritizing well-located and well-distributed housing schemes in order to avoid peripheral and isolated mass housing developments detached from urban systems, regardless of the social and economic segment for which they are developed.
108. We will take measures to improve road safety and integrate it into sustainable mobility and transport infrastructure planning and design. Accompanied by awareness raising initiatives, we will promote the safe system approach called for in the United Nations Decade of Action for road safety, with special attention to the needs of all women and girls, as well as children and youth, older persons and persons with disabilities, and those in vulnerable situations. We will adopt, implement, and enforce policies and measures to actively protect and promote pedestrian safety and cycling mobility, with a view to broader health outcomes, particularly the prevention of injuries and non-communicable diseases, and we will develop and implement comprehensive legislation and policies on motorcycles safety, given the disproportionately high and increasing numbers of motorcycle deaths and injuries globally, particularly in developing countries. We will promote a safe and healthy journey to school of every child as a priority in line with the UN Convention of the Rights of the Child.
109. We will promote access for all to safe, age and gender responsive, affordable, accessible, and sustainable urban mobility and land and sea transport systems, enabling meaningful participation in social and economic activities in cities and human settlements, by integrating transport and mobility plans into overall urban and territorial plans and promoting a wide range of transport and mobility options, in particular through supporting:
 - (a) a significant increase in accessible safe, efficient, affordable, and sustainable infrastructure for public transport as well as non-motorized options such as walking and cycling, prioritizing them over private motorized transportation;
 - (b) equitable Transit-Oriented Development (TOD) that minimizes the displacement in particular of the poor and features affordable, mixed-income housing and a mix of jobs and services;
 - (c) better and coordinated transport-land use planning, leading to a reduction of travel and transport needs, enhancing connectivity between urban, peri-urban, and rural areas, including waterways and transport and mobility planning, particularly for small islands developing States and coastal cities;
 - (d) urban freight planning and logistics concepts that enable efficient access to product and services, minimizing the impact of the environment and the livability of the city and maximizing their contribution to economic growth.
110. We will take measures to develop mechanisms and common frameworks at the national, sub-national, and local levels to evaluate the wider benefits of urban and metropolitan transport schemes, including impacts on the environment, the economy, social cohesion, quality of life, accessibility, road safety, public health, and climate change mitigation goals, among others.
111. We will support the development of these mechanisms and frameworks, based on sustainable urban transport and mobility policies, for sustainable, open, and transparent procurement and regulation of

transport and mobility services in urban and metropolitan areas, including new technology that enables shared mobility services, as well as the development of clear, transparent, and accountable contractual relationships between local governments and transport and mobility service providers including on data management, which further guarantee public interest, protect individual privacy, and define mutual obligations.

112. We will support better coordination between transport and urban and territorial planning departments, in mutual understanding of planning and policy frameworks, at the national, sub-national, and local levels, including through sustainable urban and metropolitan transport and mobility plans. We will provide support to sub-national and local governments to develop the necessary knowledge and capacity to implement and enforce such plans.
113. We will support sub-national and local governments to develop and expand financing instruments, enabling them to improve their transport and mobility infrastructure and systems, such as Bus Rapid Transit systems, rail systems, cycling lanes, pedestrian zones, and technology-based innovations in transport and transit systems to reduce congestion and pollution while improving efficiency, connectivity, accessibility, safety, and quality of life.
114. We will promote adequate investments in accessible and sustainable infrastructure and service provision systems for water, hygiene and sanitation, sewage, solid waste management, urban drainage, reduction of air pollution, and storm water management, in order to improve health and ensure universal and equitable access to safe and affordable drinking water for all; as well as access to adequate and equitable sanitation and hygiene for all; and end open defecation, with special attention to the needs and safety of women and girls and those in vulnerable situations. We will seek to ensure that this infrastructure is climate resilient and forms part of integrated urban and territorial development plans, including housing and mobility, among others, and is implemented in a participatory manner, considering innovative, resource efficient, accessible, context specific, and culturally-sensitive sustainable solutions.
115. We will equip public water and sanitation utilities with the capacity to implement sustainable water management systems, including sustainable maintenance of urban infrastructure services, through capacity development with the goal of progressively eliminating inequalities, and promoting both the universal and equitable access to safe and affordable drinking water for all, and adequate and equitable sanitation and hygiene for all.
116. We will promote energy efficiency and sustainable renewable energy, and support local governments to apply them in public buildings, infrastructures and facilities, as well as in taking advantage of their direct control, where applicable, of local infrastructure and codes, to foster more efficient use of energy in end-use sectors, such as residential, commercial, and industrial buildings, industry, transport, waste and sanitation. We also encourage the adoption of building performance codes and standards, renewable portfolio targets, energy efficiency labelling, retrofitting of existing buildings and public procurement policies on energy, among other modalities as appropriate, to achieve energy efficiency targets. We will also prioritize smart grid, district energy systems and community energy plans to improve synergies between renewable energy and energy efficiency.
117. We will support decentralized decision-making on waste disposal to promote universal access to sustainable waste management systems. We will support the promotion of extended producer responsibility schemes, including waste generators and producers in the financing of urban waste management systems and reducing the hazards and social economic impacts of waste streams and increasing recycling rates through better product design.
118. We will promote the integration of food and nutrition needs of urban residents, particularly the urban poor, in urban and territorial planning, to end hunger and malnutrition. We will promote coordination of food security and agriculture policies across urban, peri-urban, and rural areas to facilitate the production, storage, transport, and marketing of food to consumers in adequate and affordable ways to reduce food losses and to prevent and reuse food waste. We will further promote the coordination of food policies with energy, water, transport, waste, and other policies in urban areas to maximize efficiencies and minimize waste.

119. We will include culture as a priority component of urban plans and strategies in the adoption of planning instruments, including master plans, zoning guidelines, building codes, coastal management policies, and strategic development policies that safeguard a diverse range of tangible and intangible cultural heritage and landscapes, and will protect them from potential disruptive impacts of urban development.
120. We will support leveraging cultural heritage for sustainable urban development, and recognize its role in stimulating participation and responsibility, and promote innovative and sustainable use of architectural monuments and sites with the intention of value creation, through respectful restoration and adaptation. We will engage indigenous peoples and local communities in the promotion and dissemination of knowledge of tangible and intangible cultural heritage and protection of traditional expressions and languages, including through the use of new technologies and techniques.

MEANS OF IMPLEMENTATION

121. We recognize that the implementation of the New Urban Agenda requires an enabling environment and a wide range of means of implementation including access to science, technology, and innovation and enhanced knowledge sharing on mutually agreed terms, capacity development, and mobilization of financial resources, tapping into all available traditional and innovative sources at the global, regional, national, sub-national, and local levels as well as enhanced international cooperation and partnerships among Governments at all levels, the private sector, civil society, and the United Nations System, and other actors, based on the principles of equality, non-discrimination, accountability, respect of human rights, including the right to development, and solidarity, especially with those that are the poorest and most vulnerable.
122. We reaffirm the commitments on means of implementation included in the 2030 Agenda for Sustainable Development and the Addis Ababa Action Agenda for Financing for Development.
123. We will support UN-Habitat and other relevant stakeholders to generate evidence-based and practical guidance for the implementation of the New Urban Agenda and the urban dimension of the Sustainable Development Goals, in close collaboration with Member States and through the mobilization of experts, and building on the legacy of the Habitat III preparatory process, including the General Assembly of Partners for Habitat III and the regional and thematic meetings, to consolidate links with existing knowledge and urban solution platforms relevant to the New Urban Agenda.
124. We will support and strengthen UN-Habitat to develop normative knowledge and provide capacity development and tools to national, sub-national, and local governments in designing, planning, and managing sustainable urban development.
125. We will support the establishment by UN-Habitat of a multi trust fund for capacity development in support of sustainable urban development, to be accessed by developing countries, including African countries, least developed countries, landlocked developing countries, small island developing States, as well as middle income-countries in the contexts of their particular challenges.
126. We recognize that sustainable urban development, guided by national urban policies and strategies, as appropriate, can benefit from integrated financing frameworks that are supported by an enabling environment at all levels. We acknowledge the importance of ensuring that all financial means of implementation are firmly embedded into coherent policy frameworks and fiscal decentralization processes where available, and that adequate capacities are developed at all levels.
127. We support context-sensitive approaches in financing urbanization and in enhancing financial management capacities at all levels of government, adopting specific instruments and mechanisms necessary to achieve sustainable urban development, recognizing that each country has the primary responsibility for its own economic and social development.
128. We will mobilize endogenous resources and revenues generated through the capture of benefits of urbanization, as well as the catalyzing effects and maximized impact of public and private investments in order to improve the financial conditions for urban development and open access to additional sources recognizing that, for all countries, public policies and the mobilization and effective use of domestic

resources, underscored by the principle of national ownership, are central to our common pursuit of sustainable urban development, including implementation of the New Urban Agenda.

129. We call on business to apply their creativity and innovation toward solving sustainable development challenges in urban areas, acknowledging that private business activity, investment and innovation are major drivers of productivity, inclusive growth and job creation and that private investment, particularly foreign direct investment along with a stable international financial system are vital complement to development efforts.
130. We will support appropriate policies and capacities that enable sub-national and local governments to register and expand their potential revenue base, such as through multi-purpose cadasters, local taxes, fees and service charges, in line with national policies, while ensuring that women and girls, children and youth, older persons, persons with disabilities, indigenous peoples and local communities, and poor households, are not disproportionately affected.
131. We will promote sound and transparent systems of financial transfers from national government to sub-national and local governments based on their needs, priorities, functions, mandates, and on performance-based incentives, as appropriate, providing them with adequate, timely, and predictable resources and enhancing their own abilities to raise revenues and manage expenditures.
132. We will support the development of vertical and horizontal models of distribution of financial resources to decrease inequalities across territories, within urban centers, and between urban and rural areas, as well as to promote integrated and balanced territorial development. In this regard, we emphasize the importance of improving transparency of data on spending and resource allocation as a tool to assess progress towards equity and spatial integration.
133. We will promote policy frameworks to capture and share the increase in land and property value generated as a result of urban development processes, infrastructure projects, and public investments. Measures could be put in place, as appropriate, to prevent its solely private capture as well as land and real estate speculations, as appropriate. We will reinforce the link among fiscal systems, urban planning, as well as urban management tools, including land market regulations. We will work to ensure that efforts to generate land-based finance do not result in unsustainable land use and consumption.
134. We will support sub-national and local governments to implement transparent and accountable expenditure control instruments, based on legislative control and public participation, as appropriate, in support of open and fair tendering processes, procurement mechanisms, and reliable budget execution, as well as preventive anti-corruption measures to promote integrity, accountability, effective management, and access to public property and land, in line with national policies.
135. We will support the creation of robust legal and regulatory frameworks for sustainable national and municipal borrowing, on the basis of sustainable debt management, supported by adequate revenues and capacities, by means of local creditworthiness as well as expanded sustainable municipal debt markets when appropriate. We will consider the establishment of appropriate financial intermediaries for urban financing, such as regional, national, sub-national, and local development funds or development banks, including pooled financing mechanisms, which can catalyze public and private, national, and international financing. We will support measures to reduce the cost of capital and to stimulate the private sector and households to participate in sustainable urban development and resilience-building efforts, including access to risk transfer mechanisms.
136. We will support the development of appropriate and affordable housing finance products; and encourage the participation of a diverse range of multilateral financial institutions, regional development banks and development finance institutions; cooperation agencies; private sector lenders and investors, cooperative, money lenders and microfinance banks to invest in affordable and incremental housing in all its forms.
137. We will also consider establishing urban and territorial transport infrastructure and service funds at the national level, based on a variety of funding sources, ranging from public grants to contributions from other public entities and the private sector, ensuring coordination among actors and interventions as well as accountability.

138. We invite international multilateral financial institutions, regional development banks, development finance institutions, and cooperation agencies to provide financial support, including through innovative financial mechanisms, to programs and projects to implement the New Urban Agenda, particularly in developing countries.
139. We support access to different multilateral funds, including the Green Climate Fund, the Green Environmental Fund, Green Adaptation Fund, Climate Investment Fund, among others, to secure resources for climate change adaptation and mitigation plans, policies, programmes, and actions for sub-national and local governments. We will collaborate with sub-national and local financial institutions, as appropriate, to develop climate finance infrastructure solutions and to create appropriate mechanisms to identify catalytic financial instruments.
140. We will explore and develop feasible solutions for climate and disaster risks in cities and human settlements, including through collaborating with insurance and reinsurance institutions and other relevant actors, with regard to investments in urban and metropolitan infrastructures, buildings, and other urban assets, as well as for local populations to secure their shelter and economic needs.
141. We support the use of international public finance, including Official Development Assistance (ODA) among others, to catalyze additional resource mobilization from all available sources, public and private, for sustainable urban and territorial development, including by mitigating risks for potential investors recognizing that international public finance plays an important role in complementing the efforts of countries to mobilize public resources domestically, especially in the poorest and most vulnerable countries with limited domestic resources.
142. We will expand opportunities for North-South, South-South and triangular regional and international cooperation, as well as sub-national decentralized, and city-to-city cooperation, as appropriate, to contribute to sustainable urban development, developing capacities and fostering exchanges of urban solutions and mutual learning at all levels and by all relevant actors.
143. We will promote capacity development as a multifaceted approach that addresses the ability of multiple stakeholders and institutions at all levels of governance, and combines the individual, societal, and institutional capacity to formulate, implement, enhance, manage, monitor, and evaluate public policies for sustainable urban development.
144. We will promote the strengthening of the capacity of national, sub-national, and local governments, including local government associations, as appropriate, to work with women and girls, children and youth, older persons, and persons with disabilities, indigenous peoples and local communities, and those in vulnerable situations as well as with civil society, the academia, and research institutions in shaping organizational and institutional governance processes, enabling them to effectively participate in urban and territorial development decision-making.
145. We will support local government associations as promoters and providers of capacity development, recognizing and strengthening, as appropriate, both their involvement in national consultations on urban policies and development priorities, and their cooperation with sub-national and local governments, along with civil society, private sector, professionals, academia and research institutions, and their existing networks, to deliver on capacity development programmes by means of peer-to-peer learning, subject-matter related partnerships, and collaborative actions such as inter-municipal cooperation, on a global, regional, national, sub-national, and local scale, including the establishment of practitioners' networks and science-policy interface practices.
146. We will promote capacity development programs to help sub-national and local governments in financial planning and management, anchored in institutional coordination at all levels, including environmental sensitivity, and anti-corruption measures, embracing transparent and independent oversight, accounting procurement, reporting, auditing, and monitoring processes, among others, and to review sub-national and national performance and compliance, with particular attention to age and gender responsive budgeting and the improvement and digitalization of accounting processes and records, in order to promote result-based approaches, and to build medium to long-term administrative and technical capacity.

147. We will promote capacity development programs on the use of legal land-based revenue and financing tools as well as on real estate market functioning for policymakers and local public officials focusing on the legal and economic foundations of value capture, including quantification, capturing, and distribution of land value increments.
148. We will promote the systematic use of multi-stakeholder partnerships in urban development processes, as appropriate, establishing clear and transparent policies, financial and administrative frameworks and procedures, as well as planning guidelines for multi-stakeholder partnerships.
149. We will promote capacity development initiatives to empower and strengthen skills and abilities of the women and girls, children and youth, older person and persons with disabilities, indigenous peoples and local communities, as well as persons in vulnerable situations for shaping governance processes, engaging in dialogue, and promoting and protecting human rights and anti-discrimination, to ensure their effective participation in urban and territorial development decision-making.
150. We will promote the development of national information and communications technology policies and e-government strategies as well as citizen-centric digital governance tools, tapping into technological innovations, including capacity development programs, in order to make information and communications technologies accessible to the public, including women and girls, children and youth, persons with disabilities, older persons and persons in vulnerable situations, to enable them to develop and exercise civic responsibility, broadening participation and fostering responsible governance, as well as increasing efficiency. The use of digital platforms and tools, including geospatial information systems, will be encouraged to improve long term integrated urban and territorial planning, and access to urban and metropolitan services.
151. We will support science, research, and innovation, including a focus on social, technological, digital and nature-based innovation, robust science-policy interfaces in urban and territorial planning and policy formulation, as well as institutionalized mechanisms for sharing and exchanging information, knowledge and expertise, including the collection, analysis, and dissemination of geographically-based, community-collected, high-quality timely and reliable data, disaggregated by income, sex, age, race, ethnicity, disability, geographic location, and other characteristics relevant in national, sub-national, and local contexts.
152. We will strengthen the data and statistical capacities at national, sub-national, and local levels to effectively monitor progress achieved in the implementation of sustainable urban development policies and strategies and to inform decision-making and appropriate reviews. Data collection procedures should be open, transparent, and consistent with the purpose of respecting privacy rights and all human rights obligations and commitments. Progress towards a global people-based definition of cities and human settlements may support this work.
153. We will support the role and enhanced capacity of sub-national and local governments in data collection, mapping, analysis, and dissemination, as well as promoting evidence-based governance, building on a shared knowledge base using both globally comparable as well as locally generated data, including through censuses, household surveys, population registers, community-based monitoring processes and other relevant sources, disaggregated by income, sex, age, race, ethnicity, disability, geographic location, and other characteristics relevant in national, sub-national, and local contexts.
154. We will foster the creation, promotion, and enhancement of open, user-friendly, and participatory data platforms using technological and social tools available to transfer and share knowledge among national, sub-national, and local governments and relevant stakeholders, including non-state actors and people, to enhance effective urban planning and management, efficiency, and transparency through e-governance, information and communications technologies assisted approaches, and geospatial information management.

C. FOLLOW-UP AND REVIEW

155. We will carry out a periodic follow-up and review of the New Urban Agenda, ensuring coherence at the national, regional, and global levels, in order to track progress, assess impact and ensure its effective and timely implementation, accountability to our citizens and transparency, in an inclusive manner.
156. We encourage voluntary, country-led, open, inclusive, multilevel, participatory, and transparent follow-up and review of the New Urban Agenda. It should take into account contributions of national, sub-national, and local levels of government, and be supplemented by contributions from the United Nations system, regional and sub-regional organisations, major groups and relevant stakeholders, and should be a continuous process aimed at creating and reinforcing partnerships among all relevant stakeholders and fostering exchanges of urban solutions and mutual learning.
157. We acknowledge the importance of local governments as active partners in the follow-up and review of the New Urban Agenda at all levels, and encourage them to jointly develop with national and sub-national governments, as appropriate, implementable follow-up and review mechanisms at the local level, including through relevant associations and appropriate platforms. We will consider strengthening, where appropriate, their capacity to contribute in this respect.
158. We stress that the follow-up and review of the New Urban Agenda must have effective linkages with the follow-up and review of the 2030 Agenda for Sustainable Development to ensure coordination and coherence in their implementation.
159. We reaffirm the role and expertise of the United Nations Human Settlements Programme (UN-Habitat), within its mandate, as a focal point for sustainable urbanization and human settlements, in collaboration with other United Nations system entities, recognizing the linkages between sustainable urbanization, and inter alia sustainable development, disaster risk reduction and climate change.
160. We invite the General Assembly to request the Secretary-General, with contributions from [States members of the United Nations and members of the specialized agencies and of the International Atomic Energy Agency], to report on the progress of the implementation of the New Urban Agenda every four years, with the first report to be submitted during the 72nd session.
161. This report will provide a qualitative and quantitative analysis of the progress made in the implementation of the New Urban Agenda and internationally-agreed goals and targets relevant to sustainable urbanization and human settlements. This analysis will be based on the activities of national, sub-national and local governments, UN-Habitat and its Governing Council, other relevant entities of the United Nations system, relevant stakeholders in support of the implementation of the New Urban Agenda. This report should incorporate, to the extent possible, the inputs of multilateral organizations and processes where appropriate, civil society, the private sector and academia. It should build on existing platforms and processes such as the World Urban Forum convened [under/by] UN-Habitat. It should avoid duplication, and respond to local, sub-national, and national circumstances, capacities, needs and priorities.

[Note for information: The report would need to be submitted to ECOSOC by the second quarter of 2018 in order to feed into the HLPF under the General Assembly in September 2019. The UN-Habitat Governing Council, which meets biennially, will next meet in 2017]

162. The preparation of this report will be coordinated by UN-Habitat, in close collaboration with other relevant entities of the United Nations system, ensuring an inclusive United Nations system-wide coordination process. This report will be submitted to the General Assembly through the Economic and Social Council. [FOOTNOTE] This report will also feed into the High-Level Political Forum on Sustainable Development under the auspices of the General Assembly, with a view towards ensuring coherence, coordination and collaborative linkages with the follow-up and review of the 2030 Agenda for Sustainable Development.

FOOTNOTE: This report is intended to replace the report of the Secretary-General to the Economic and Social Council on the coordinated implementation of the Habitat Agenda. This report is also intended to be part of, and not additional to, the report of the Secretary-General requested by the General Assembly in its resolution under the relevant agenda item.

163. We will continue strengthening mobilization efforts through partnerships, advocacy, and awareness activities on the implementation of the New Urban Agenda using existing initiatives such as World Habitat Day and World Cities Day, as well as considering establishing new initiatives to mobilize and generate support from civil society, citizens, and stakeholders. We recognize the importance of continuing to engage in the follow-up and review of the New Urban Agenda with sub-national and local governments associations represented at the World Assembly of Local and Regional Governments.

164.

<p>We reaffirm General Assembly resolution 56/206 and other relevant resolutions including 31/109, 32/16, 251/177, 67/216, 68/239 and 69/226. We decide to strengthen the United Nations Human settlement Program (UN-Habitat) in the manner outlined below, and invite the General Assembly to adopt a resolution at its 71st session to give it effect.</p> <ul style="list-style-type: none"> • Establishing universal membership in its Governing Council to strengthen its relevance, responsiveness, governance and accountability to Member States and designating this universal body as the forum to discuss the follow-up and review of the new urban agenda and to give recommendations in order to achieve its full implementation; • Ensuring secure, stable, adequate, increased and predictable financial resources, both from the regular and non-regular budget of the United Nations and voluntary contributions to fulfill its mandate; • Supporting the organization's effectiveness to provide capacity development, particularly developing countries, and to facilitate the access of governments at all levels to technology throughout the process of designing, planning, implementing and follow-up and review of the New Urban Agenda; • Empowering UN-Habitat as the United Nations institution that leads and mobilizes all actors, including the United Nations system, on the sustainable urban development agenda and the implementation of mandates on cities and human settlements. 	<p>We invite the United Nations General Assembly at its 71st session, to reaffirm the expertise and the existing mandate of the UN-Habitat.</p> <p>Acknowledging the need for a revitalized process, we further invite the United Nations General Assembly at its 72nd to request that the Secretary General commissions an independent assessment to:</p> <ul style="list-style-type: none"> - Recommend measures to enhance the accountability, effectiveness, efficiency and oversight of the UN-Habitat Programme; - Review UN-Habitat's normative and operational mandate in the light of commitments and actions linked to the New Urban Agenda; - Assess UN-Habitat's work with the local and subnational authorities and with stakeholders, in order to tap the full potential of partnerships in implementing the New Urban Agenda.
--	---

165. We encourage the General Assembly to consider holding the fourth United Nations Conference on Housing and Sustainable Urban Development in 2036 within a renewed political commitment to assess and consolidate progress of the New Urban Agenda.
