

Safety

I did inquire if Josh has received any further statements regarding threats towards him. His safe return is important to us and if there are people that have been threatening we would want to know about it.

We discussed community standards as per the Board Code of Conduct.

As I have previously mentioned, despite extending several requests to meet with you and Josh as part of the investigation, you elected not to meet with me. As a result, Josh provided no response regarding targeted comments he made toward some students that were brought to my attention.

Given the lack of participation in the investigation, and the discussed need to ensure the safety of other students in the school as well, we explained that Josh is to limit his contact with the two students that were previously targeted by his comments.

There will be no use of a student's dead name.

He will work out of Study Hall for his two afternoon classes. This will be under the direction of Josh's classroom teachers and will also be supported by our Student Success teacher.
