

Configure, Deploy and Manage Your Entire Application Infrastructure in a Secure and Compliant Way

BROCHURE

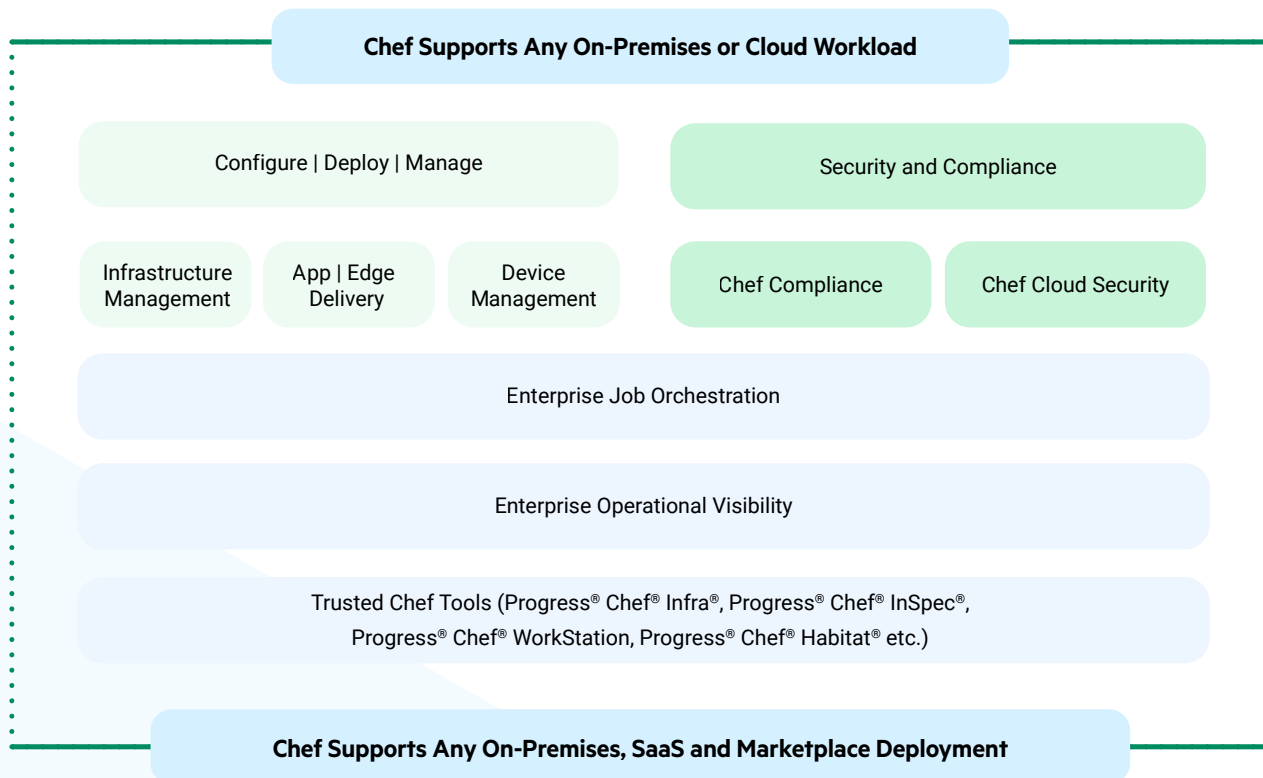

What Can Progress Chef Do For You?

← At scale, in all environments, with velocity →

The Progress Chef Portfolio

The Progress® Chef® portfolio includes solutions for infrastructure management, application delivery (including edge devices), support for cloud-to-edge security and continuous compliance solutions—accessible through a unified interface for thorough fleet-wide visibility and control.

Progress Chef for Infrastructure Management

Chef uses a policy-as-code approach to streamline configuration management in any environment—on-premises, cloud or hybrid—regardless of underlying infrastructure or OS. With Chef, IT operations teams can have a consolidated, real-time and in-depth view of the state of their posture across their fleet, no matter the scale or number of devices.

Key Features :

- More secure, scalable and consistent configurations
- Automated remediation
- Support for multiple environments
- Centralized governance
- Support for high-security, low-trust environments
- Continuous delivery pipeline

Progress Chef for Security and Compliance Automation

Chef helps organizations streamline how they maintain compliant IT infrastructure, whether on-premises or in the cloud. It leverages certified, curated audit and remediation content catering to standard benchmarks such as CIS, DISA-STIGs and internal regulations across diverse IT fleets.

Key Features :

- Streamlined IT compliance audits
- Continuous compliance
- Scalability of security and compliance with automation
- Misconfiguration detection on any asset
- Visibility into compliance and security posture

Progress Chef for Cloud Security

Chef enables DevSecOps teams to shift security left, allowing organizations to scan, monitor and remediate configuration issues in their multi-cloud accounts across on-premises and cloud-native environments. It also empowers IT teams to audit cloud accounts and container/K8 platforms at scale, enabling consistent, unified, multi-cloud and Kubernetes security.

Progress Chef for Job Orchestration

The Chef job orchestration tool will provide IT operators, InfoSec engineers and other administrators with the ability to execute and verify actions (however) on set/subset of nodes (wherever), at any time interval (whenever), including immediately, subsequently or at periodic intervals.

Progress Chef for App Delivery

Chef enables companies to apply a technology-agnostic approach to defining, packaging and delivering applications and infrastructure from any cloud to any edge at scale and achieve real-time results.

Why Progress Chef?

Customer Testimonials

 Meta

“For us, the reason that Chef was so attractive was its incredible flexibility”

Phil Dibowitz, Production Engineer, Meta

Intility

“Core to Intility’s value is the ability to drive employee productivity which aligns to Chef’s vision of making the IT operators’ lives better.”

Stian Froystein, Linux Technical Lead, Intility

GreenwayHealth™

“Chef’s biggest impact is in application management and the fact that our engineering team is freed up to focus on the more critical issues that have a direct effect on customers”

Adam Epps, Manager of Systems Engineering Operations, Greenway Health
