## State and Local Government Revenues

The state general fund forecast represents only a portion of public sector revenues and spending in Minnesota. In broad terms, the “Price of Government” is a measure of the cost of all general government services statewide. It answers the question: **How much do Minnesotans pay to state and local governments in total?** It is comprehensive and includes nearly all revenues generated by state and local units of government as well as public school districts. All state taxes, property taxes, special assessments, fees, and charges are included. Federal taxes are not included. The measure serves as a financial index for the cost of public services in Minnesota.

The annual receipts collected by each unit of government are considered to represent the aggregate cost that Minnesota taxpayers pay for public services. The “Price of Government” measures that cost for each fiscal year relative to Minnesota Personal Income. The result is stated as a percentage of total statewide personal income. For fiscal year 2024, it is projected at 14.8 percent.

## Minnesota Price of Government

State and Local Revenues as % of MN Personal Income

Because the price of government focuses on revenues collected by the state, local governments, and school districts, it is designed to be a performance measure for both taxpayers in general and policymakers during the budget development process.

The following table shows the revenues collected at each level of government, excluding federal grants, and excluding intergovernmental revenues such as state aid to school districts, cities, and counties. The results are called “own source” revenues and represent the taxes, fees, and charges at each level of government.

In FY 2024, of all payments Minnesotans will make in taxes, fees and charges, the state will collect 62 percent. Counties, cities, and townships will collect about 30 percent, while school districts will collect about 8 percent. However, once intergovernmental aids are considered, the state will spend only 35 percent of the total, while non-school local governments will spend 38 percent, and school districts will spend 27 percent.

### WHO COLLECTS?

### WHO SPENDS?

A table showing price of government data follows. It includes major taxes and other revenue sources for FY 2010 through FY 2027 shown by level of government.

Personal income data is obtained from the Bureau of Economic Analysis. Minnesota personal income is the income that Minnesota residents get from paychecks, employer-provided supplements such as insurance, business ownership, rental property, social security and other government benefits, interest, and dividends.
