## **Adding Route Controls to Existing FMS Roles**

Route controls are used to identify what an approver can access - department IDs, business units, source codes. If route controls have been omitted on FMS roles assigned to a user, you can have them added by following these instructions. Note: This process is used only to add route controls to roles that the user already has, not to add roles.

### Steps

- 1. Create an Excel spreadsheet with no headers.
- 2. In Column A, enter the eight-digit employee ID of an existing user. Include the leading zeros.
- 3. In Column B, enter the name of an FMS security role that the user already has. This is case-sensitive. You may copy and paste role names from *Role Descriptions for Agencies*. Visit <a href="http://mn.gov/mmb-stat/documents/swift/security/state-agency-security-roles.pdf">http://mn.gov/mmb-stat/documents/swift/security/state-agency-security-roles.pdf</a>, and then click Role Descriptions for Agencies.
- 4. In Column C, enter the route control profile name. For valid values, see your agency SWIFT accounting coordinator.
- 5. The SWIFT agency readiness manager or SWIFT agency security administrator must attach the spreadsheet to an email message and send it to <a href="mailto:Sema4.Security@state.mn.us">Sema4.Security@state.mn.us</a>.
- 6. If you have questions about the spreadsheet, contact Sema4.Security@state.mn.us.

### **Spreadsheet Example**

| $\mathcal{A}$ | Α        | В                        | С          |
|---------------|----------|--------------------------|------------|
| 1             | 00123456 | M_FS_WF_AP_APPR_01       | DPT7949747 |
| 2             | 00123456 | M_FS_WF_AP_APPR_01       | DPT7949748 |
| 3             | 00123456 | M_FS_WF_GL_AGY_01        | DPT7949747 |
| 4             | 01020304 | M_FS_WF_AR_WOAPPROVAL_01 | SOCT79     |
| 5             | 02030405 | M_FS_WF_PO_POAPPROVAL_03 | DPT7949748 |
| 6             | 02030405 | M_FS_WF_PO_POAPPROVAL_03 | DPT7949749 |
| 7             | 03040506 | M_FS_WF_PO_QA            | SOCT79     |

# **Important Dos and Don'ts**

#### Do:

- Use this process only to add route controls to roles that the user already has.
- Make sure the employee ID, role name, and route control are absolutely accurate. If not, the process will not work and the spreadsheet will be returned to the agency.

#### Don't

- Add route controls for roles that the user doesn't already have. To add roles, use the Request for Access
  to SWIFT Statewide Systems form at <a href="http://www.mn.gov/mmb/accounting/swift/security/security-forms.jsp">http://www.mn.gov/mmb/accounting/swift/security/security-forms.jsp</a>.
- Change or delete route controls.
- Add new users. New users must complete a *Request for Access to SWIFT Statewide Systems* form at <a href="http://www.mn.gov/mmb/accounting/swift/security/security-forms.jsp">http://www.mn.gov/mmb/accounting/swift/security/security-forms.jsp</a>.
- Add/change associated information such as user preferences.
- Include any other information or columns on the spreadsheet.

#### What Happens Next

- Your request will be reviewed by SWIFT staff, and may be modified prior to entry.
- The route controls will be added via an automated process.
- You will be notified when the spreadsheet has been processed.
- After processing is completed, please review the users' route controls for accuracy.
