QUICK REFERENCE GUIDE

Updated July 11, 2022

Add an Inline Prompt to a Report in the EPM Data Warehouse

After you run and save an existing report or analysis, you can return to it and update it in the EPM Data Warehouse. One option is to add an inline prompt in the Prompts tab.

A prompt allows you to customize which data is returned in the analysis or report. Inline prompts allow you to filter specific report fields without editing the analysis. Inline prompts occur at the analysis/report level. They are embedded in the individual report and not stored in the Catalog. They are not reusable in another report.

Before you create any prompts, it is important to understand what you want the prompt to do, what the data set is, and how you want it to be displayed.

IMPORTANT! You can only add fields, filters, and prompts using the current Subject Area. For example, you can't add an FMS prompt to a report created from a SCM Subject Area.

This guide demonstrates how to create and use an inline prompt from the Prompts tab.

The Appendix summarizes Oracle's guidelines for choosing an operator and Default selection fields in the New Prompt/Update Prompt window.

Steps to complete:

- Step 1: Navigate to the EPM Data Warehouse
- Step 2: Check the report to make sure the desired data set is prompted
- Step 3: Create a new inline prompt, update it as needed, and save it
- Step 4: Use the inline prompt on the report

Steps to create and use an inline prompt from the *Catalog*

This guide uses an existing report that allows an agency to view purchase orders by document type. The inline prompt will allow an agency to run the report by document type on the *Prompts* tab.

Step 1: Navigate to the EPM Data Warehouse

1. Follow this navigation to the EPM Data Warehouse.

Navigation Options	Navigation Path
Navigation Collection	Administrative Portal, Data Warehouse, Data Warehouse

SWIFT STATEWIDE INTEGRATED FINANCIAL TOOLS

- 2. Use the global menu to search for or navigate to the desired report. Select *Catalog, Favorites*, or *Dashboards* to search for your desired report. For this guide, we'll use the *Catalog* to find the report.
- 3. Find the report and select the *Edit* link below it.

Catalog			Home Catalog
User View 👻 🛛 🖥 🗸 🔹	6 iti 陷	् ⊞ ▼	B / A · C · X I K Location /My Folders
J Folders	E: ita	Type All	▼ Sort Last Modified Descending ▼
My Folders		9	Procurement Payment by PO Doc Type Last Modified 7/5/2022 3:08:30 PM Open Edit More ▼

Step 2: Check the report to make sure the desired data set is prompted

1. Open the *Criteria* tab and check the *Filters* section. The data set that you want to use in a prompt must be filtered "as prompted."

▲ Filters	
PO Id is prompted AND Budget Period is equal to / is in 2022	
AND PO Document Type Long Desc s prompted	

- 2. If the data set is not prompted, add it.
 - a. Go to the *Selected Columns* section and open the **Menu** icon. It looks like a gear. Select "Filter."

Selected Columns		
Business Unit - Purchase Order	PO Header	Sup
PO Business Unit 🔅	🚦 PO Document Type Long Desc 🐯 🚦 PO Id 🅸	
	†↓ Sort	
	fx Edit formula	
	Column Prope	erties
✓ Filters	To Filter	

b. The EPM Data Warehouse displays the *New Filter* window. Open the *Operator* section and choose "is prompted." Then select **OK**.

New Filter	r @ x
Column	PO Document Type Long Dt fx
Operator	is prompted 🔹
	OK Cancel

SWIFT STATEWIDE INTEGRATED FINANCIAL TOOLS

- c. The EPM Data Warehouse updates the *Filters* section with the prompted label.
- d. Save updates to this report using the **Save** icon at the top right of the page.

Procurement Payment by PO Doc Type			Signed In As	•	
Criteria	Results	Prompts	Advanced		0

Step 3: Create a new inline prompt, update it as needed, and save it

- 1. Open the *Prompts* tab in your existing report. The *Prompts* tab consists of two panes: *Definition* and *Display*.
- **Definition pane**: This pane lists your inline prompts for the report. You can also preview your report. You can add, edit, and delete inline prompts. You can also change the layout of the *Report Prompt* page.
- **Display pane**: This pane shows you how the *Report Prompt* page will look as you add inline prompts.

Tax on POs by Budget Years								
Criteria Results Prompts Advanced								
▶ De	▶ Definition							
► Dis	play							

- 2. To add a new inline prompt, open the *Definition* pane.
 - a. Select the **New Prompt** icon, which is a green plus sign. The EPM Data Warehouse opens prompt options.

NOTE. Column is the most used inline prompt. A *Column Prompt* enables you to build very specific value prompts to either stand alone on the dashboard or the report. It also allows you to expand or refine existing dashboard and report filters.

- b. Select the Column Prompt.
- c. Then choose one of the data fields on the far-left menu. For this example, we'll select "PO Document Type."

d. The EPM Data Warehouse opens the *New Prompt* window. Update the fields in this window as needed.

IMPORTANT! There may be some trial and error to get an inline prompt to work as desired. View the Appendices in this guide for the *New Prompt* window fields such as *Operator* and *User Input*.

- i. Check the *Custom Label* box if you want to update the *Label* field.
- i. Update the *Label* field as needed.
- ii. Add text in the *Description* field as needed.
- iii. Update the *Operator f*ield. Select an option. For this example, update it to "is equal to/is in."
- iv. Update the *User Input* field to the option that best fits. For this example, we'll select "Check Boxes."

New Prompt:		0	×
Prompt For Column	"PO Header"."PO Document f_X		
Label	PO Document Type		
Description	Custom Label		
Operator	is equal to / is in		Ŧ
User Input	Check Boxes	•	
Options			

- b. Update the *Options* section of the *New Prompt* window to add values for the new inline prompt. The options you see depend upon the *User Input* selected value.
 - i. Open the *Default selection* field. This field allows you to specify the desired value(s).
 - ii. For this example, we'll check the *Check Boxes Values* box for "Require user input."
 - iii. After completing the required fields that you need for the inline prompt, select **OK**.

Options General More		
Check Boxes Values	All Column Values	•
	 nclude "All Column Values" choice in the list Require user input 	
	imit values by All Prompts

Operator	Guidelines
is between	Valid for a column that contains numbers or dates. Specify two values. Result includes only records where the data in the column is between the two values in the filter.
is equal to / is in	Valid for a column that contains text, numbers, or dates. Specify a single value or multiple values. Results include only records where the data in the column matches the value in the filter.
is greater than	Valid for a column that contains numbers or dates. Specify a single value or multiple values. Results include only records where the data in the column is greater than or the same as the value in the filter.
is greater than or equal to	Valid for a column that contains numbers or dates. Specify a single value or multiple values. Results include only records where the data in the column is greater than or the same as the value in the filter.
is less than	Valid for a column that contains numbers or dates. Specify a single value. Results include only records where the data in the column is less than the value in the filter.
is less than or equal to	Valid for a column that contains numbers or dates. Specify a single value or multiple values. Results include only records where the data in the column is less than or the same as the value in the filter.
is not equal to / is not in	Valid for a column that contains text, numbers, or dates. Specify a single value or multiple values. Results include only records where the data in the column does not match the value in the filter.
is ranked first	Valid for a column that contains text or dates. Specify a single value. Results include only the first N records, where N is a whole number specified as the value in the filter. This operator is for ranked results.
is ranked last	Valid for a column that contains text or dates. Specify a single value. Results include only the last N records, where N is a whole number specified as the value in the filter. This operator is for ranked results.

Appendix B: Guidelines for Choosing the Default Selection Menu in the New Prompt/Update Prompt Window

Source: https://docs.oracle.com/cd/E17904_01/bi.1111/e10544/prompts.htm#BIEUG2845

Field Name	Field Description
Check Boxes	Provides a list of all prompt values where a small, selectable box displays before each value item. Use this option for a prompt that contains a smaller set of data.
Choice List	Provides a collapsed list of all prompt values. Use this option when there is a long list of values when you want the ability to search for a specific value. You can set it up to accept only one prompt value or multiple prompt values.
List Box	Provides a list of all prompt values. Use this option for a prompt that contains a large set of data.
Radio Buttons	Provides a list of all prompt values where a Radio button is displayed before each prompt value. Use this option when there is a short list of values, and you want to select only one prompt value.
Slider	Depending upon the operator that you select, this option allows the user to select multiple values by specifying a range of values, or all values that are lesser than, greater than, or equal to a specified value. Use it for numerical data values only.
Text Field	The Text Field input option provides the users with a field to type a specific prompt value. You cannot use this option for multiple prompt values. Only the field and the field label display for this option. Use it in instances where the user will know the prompt value and not have to search for it, or for prompts with numeric values.
