

# E

## Nonhuman Primate Investigator Survey and Responses

---

**T**his appendix presents a copy of the committee’s survey of National Institutes of Health (NIH)–supported nonhuman primate (NHP) investigators alongside frequencies of responses to each survey question. These results tables are not inclusive of all analyses generated by the committee and presented in the body of the report and in Appendix B. Additionally, respondents were not required to answer all questions and, as such, the number of total responses will change on a question-by-question basis. See Appendix A for a description of the survey methodology.

### **SURVEY OF NIH-SUPPORTED RESEARCHER EXPERIENCES AND PERSPECTIVES ON NHP USE IN BIOMEDICAL RESEARCH**

#### **Background Information and Consent**

As part of the information-gathering activities of the congressionally mandated National Academies consensus study on the State of the Science and Future Needs for Nonhuman Primate Model Systems, you are being contacted because you are listed as a Principal Investigator (PI) on an active NIH grant or contract that we have identified as likely to use nonhuman primates. While this National Academies consensus study relies heavily on published reports and publicly available data, there are critical pieces of information which the study committee cannot gather from those sources. The goal of this survey is to fill in those gaps.

This survey will focus on the nonhuman primate models that you may use as part of your NIH-supported research, your personal experiences related to accessing nonhuman primates, and your predictions for the future use of nonhuman primates in your NIH-funded research. The risks for participating in this survey are low, although you may have concerns about providing information about research that could be perceived as controversial or that

you or your institution could be identified. We have taken the following steps to respond to these concerns and to protect your data.

You may choose not to answer some or all of the survey questions and can choose to stop the survey at any time or to save your progress and return to complete the survey. Your name, email, grant number, and any other identifiable information, including your employer or research institution's name, will not be included in the information provided to the committee or in its final report. Instead, your answers will be aggregated with those from other PIs with active NIH awards involving the use of nonhuman primate models. The original data that you and other respondents provide will be de-identified by a National Academies staff member (in particular, your grant number will be converted into a random alphanumeric code and no key will be kept of the link between the two). The de-identified data file will be stored on a password protected computer in a file that is only accessible via a single National Academies employee's VPN. All analysis will be carried out on the de-identified data by study staff with assistance from one committee member whose access to the data will be strictly limited. The de-identified data will be deleted permanently within 1 year following the publication of the final committee report.

There may be no direct benefit to you personally from participating in the survey. We nonetheless hope that you will choose to participate as your responses will help us to describe the current state of biomedical research involving the use of nonhuman primate models, prior and future contributions to science and health advancements, and the role of these models in future NIH-funded research.

If you have questions about your participation in this research or would like to speak with someone independent from the research team, please contact Dr. Constance Citro, Senior Scholar and Chair of the National Academies Institutional Review Board, at [CCitro@nas.edu](mailto:CCitro@nas.edu). If you have questions or if you do not wish to receive further communication about this study, please contact Autumn Downey, Study Director, at [ADowney@nas.edu](mailto:ADowney@nas.edu).

Please click below to indicate that you have read and understand this information and whether you agree to participate. [Answer required]

Thank you,  
Committee on the State of the Science and Future Needs for Nonhuman Primate Model Systems

- Yes, I have read the above material and I would like to participate.  
 No, I do not wish to participate.

**Page exit logic:** Skip / Disqualify Logic **IF:** One of the following answers is ("No, I do not wish to participate.") **THEN:** Jump to page 20 - Thank You! Flag response as complete

## Section 1: Nonhuman Primate Use and Research Information

**Question 1)** As part of your active NIH award(s), did you or do you use nonhuman primate models? If no, your response will be recorded and the survey will close. [Answer required]

- Yes  
 No

**Response Frequency**  
**Yes** 273

**Page exit logic:** Skip / Disqualify Logic **IF:** #1 Question “As part of your active NIH award(s), did you or do you use nonhuman primate models? If no, your response will be recorded and the survey will close.” is one of the following answers (“No”) **THEN:** Jump to page 20 - Thank You! Flag response as complete

**Question 2)** For how many **active NIH-funded awards or contracts** for which you are a PI have you used or are you planning to use nonhuman primates? If you are a PI on more than 10 active NIH awards, please indicate that you have more than 10 awards. We will only be asking for information on 10 NIH awards. [Answer required]

- 1
- 2
- 3
- 4
- 5
- 6
- 7
- 8
- 9
- 10
- >10

<b>Number of Awards</b>	<b>Response Frequency</b>
1	273
2	139
3	63
4	30
5	16
6	5
7	4
8	3
9	2
10	0
>10	0
<b>Total awards</b>	535
<b>Unique respondents</b>	273

NOTE: These responses are based on the number of responses received to Question 2 only. Information for six of the awards indicated in this table was not completed and were excluded from further analysis.

**Page entry logic:** This page will show when: #2 Question “For how many **active NIH-funded awards or contracts** for which you are a PI have you used or are you planning to use nonhuman primates? If you are a PI on more than 10 active NIH awards, please indicate that you have more than 10 awards. We will only be asking for information on 10 NIH awards.”

*Award 1 (Questions for Awards 1-10)*

NOTE: Identical questions are repeated for Awards 2-10, depending on the number of awards reported by the respondent in Question 2. For the purposes of this document, these questions (3-12) are only included once. All response frequencies listed below are aggregated across all awards reported by respondents.

**Question 3)** What is the NIH grant or contract number for this award? Note: this information will be de-identified before analysis.

---

**Question 4)** Indicate your position on this award. Select all that apply.

- Sole PI  
 Contact PI on a multi-PI grant  
 Non-contact PI on a multi-PI grant  
 Other: \_\_\_\_\_

	<b>Response Frequency</b>
Sole PI	230
Contact PI on a multi-PI grant	173
Non-contact PI on a multi-PI grant	89
Other	30
<b>Total unique awards</b>	<b>517</b>
<b>Unique respondents</b>	<b>262</b>

NOTE: A total of 10 responses were excluded from the analysis due to duplication of 8 awards reported by investigators working on multi-investigator grants.

**Question 5)** Please fill out the question below to indicate which species you used for this award. Select all that apply.

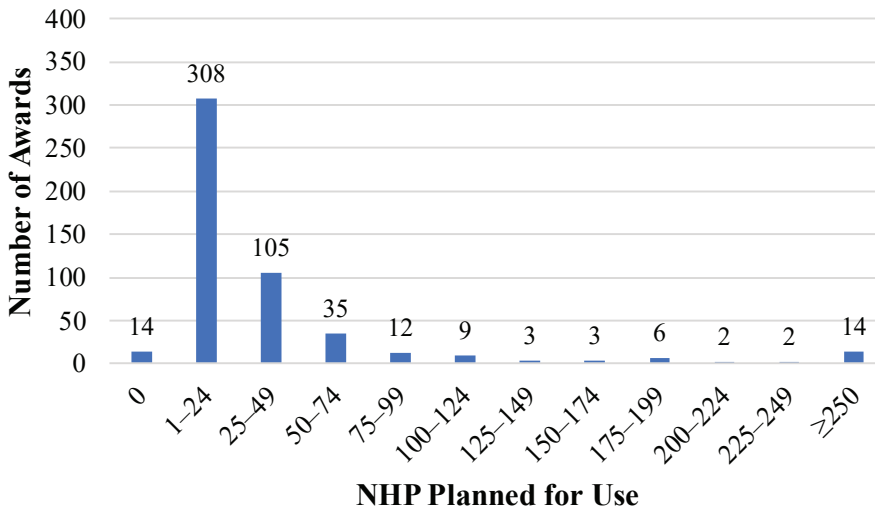

- African Green, Vervet, or Grivet  
 Baboon  
 All Owl Monkey Species  
 All Capuchin Species  
 Common Marmoset  
 Macaque – Crab Eating, Cynomolgus, or Longtailed  
 Macaque – Japanese  
 Macaque – Pigtailed  
 Macaque – Rhesus  
 Sooty Mangabey  
 Squirrel Monkey  
 Titi Monkey  
 White Capped Mangabey  
 Other – Write In: \_\_\_\_\_
-

	<b>Response Frequency</b>
African Green, Vervet, or Grivet	10
Baboon	32
All Owl Monkey Species	2
All Capuchin Species	3
Common Marmoset	30
Macaque – Crab Eating, Cynomolgus, or Longtailed	75
Macaque – Japanese	8
Macaque – Pigtailed	30
Macaque – Rhesus	366
Sooty Mangabey	0
Squirrel Monkey	12
Titi Monkey	1
White Capped Mangabey	0
Other	10
<b>Total unique awards</b>	<b>517</b>
<b>Unique respondents</b>	<b>262</b>

NOTE: More than one species was reported for some awards. Additionally, a total of 10 responses were excluded from the analysis of total awards due to duplication in awards reported by investigators working on multi-investigator grants.

**Question 6)** How many nonhuman primates were planned for use when drafting this NIH award application? [Validation: Must be numeric]

	<b>Response Overview</b>
Mean Nonhuman Primates Planned for Use	48
Median Nonhuman Primates Planned for Use	16
Minimum Nonhuman Primates Planned for Use	0
Maximum Nonhuman Primates Planned for Use	2300
<b>Total unique awards</b>	<b>513</b>
<b>Unique respondents</b>	<b>260</b>

NOTE: Responses were grouped into the ranges presented on the X axis.

**Question 7)** How many nonhuman primates were ultimately used or are currently being used, if research is ongoing? [Validation: Must be numeric]

	<b>Response Overview</b>
Mean Nonhuman Primates Used	35
Median Nonhuman Primates Used	10
Minimum Nonhuman Primates Used	0
Maximum Nonhuman Primates Used	2300
<b>Total unique awards</b>	501
<b>Total unique respondents</b>	257

NOTE: Responses were grouped into the ranges presented on the x axis.

**Question 8)** If the number of nonhuman primates planned differs from the number of animals used, was this related to any of the following? Select all that apply.

- Change of study design
- Availability of nonhuman primates
- Cost of nonhuman primates
- N/A
- Other: \_\_\_\_\_

	<b>Response Frequency</b>
Change of study design	67
Availability of nonhuman primates	174
Cost of nonhuman primates	68
N/A	166
Other	126

<b>Unique respondents</b>	<b>250</b>

**Page entry logic:** This page will show when: #2 Question "For how many **active NIH-funded awards or contracts** for which you are a PI have you used or are you planning to use nonhuman primates? If you are a PI on more than 10 active NIH awards, please indicate that you have more than 10 awards. We will only be asking for information on 10 NIH awards." is one of the following answers ("2", "3", "4", "5", "6", "7", "8", "9", "10", ">10")

#### *Questions for All NIH Awards Involving the Use of Nonhuman Primates*

NOTE: Numbering of questions below reflects numbering if information about 10 NIH awards using NHPs were added.

**Question 113)** Which of the following options best describes the institution at which you carry out your research?

- ( ) National Primate Research Center
- ( ) National resource or academic center with breeding colony
- ( ) Other academic center
- ( ) Federal laboratory
- ( ) Commercial organization

	<b>Response Frequency</b>
National Primate Research Center	82
National resource or academic center with breeding colony	23
Other academic center	153
Federal laboratory	1
Commercial organization	13
<b>Unique respondents</b>	<b>272</b>

**Question 114)** For any of your active NIH awards, have you had issues with obtaining non-human primates in a timely fashion?

- Yes  
 No

	<b>Response Frequency</b>
Yes	176
No	94
No Answer	3
Unique Respondents	273

**Question 115)** Have these issues been related to any of the following challenges? Select all that apply.

- Infrastructure issues (e.g., lack of access to appropriate equipment for conducting research)  
 Funding and costs associated with obtaining nonhuman primates  
 Transportation  
 Availability from my preferred source  
 Availability of specific demographics of animals (e.g., age classes, sex)  
 Availability of animals with specific genotypes or genetic diversity  
 Other – Write In: \_\_\_\_\_

Logic: Hidden unless: #114 Question “For any of your active NIH awards, have you had issues with obtaining nonhuman primates in a timely fashion?” is one of the following answers (“Yes”)

	<b>Response Frequency</b>
Infrastructure issues (e.g., lack of access to appropriate equipment for conducting research)	50
Funding and costs associated with obtaining nonhuman primates	76
Transportation	32
Availability from my preferred source	87
Availability of specific demographics of animals (e.g., age classes, sex)	126
Availability of animals with specific genotypes or genetic diversity	27
Other	44
<b>Unique respondents</b>	<b>175</b>

**Question 116)** Did issues with obtaining nonhuman primates result in any of the following? Select all that apply.

- Delays in research  
 Alterations to study design (including reduction of sample size)  
 Loss of grant funding or termination of study  
 Other – Write In: \_\_\_\_\_

Logic: Hidden unless: #114 Question "For any of your active NIH awards, have you had issues with obtaining nonhuman primates in a timely fashion?" is one of the following answers ("Yes")

	Response Frequency
Delays in research	158
Alterations to study design (including reduction of sample size)	92
Loss of grant funding or termination of study	6
Other	15
<b>Unique respondents</b>	<b>173</b>

## Section 2: Researcher Perspectives on the Future of Nonhuman Primate Research

**Question 117)** For future grant applications to be submitted in the next 5 years, do you anticipate using nonhuman primates as part of your research?

- ( ) Yes  
( ) No

Logic: Show/hide trigger exists.

	Response Frequency
Yes	258
No	14
Unique Respondents	272

**Question 118)** What species are you most likely to use? Check all that apply. [Validation: Max. answers = 3 (if answered)]

- African Green, Vervet, or Grivet  
 Baboon  
 All Owl Monkey Species  
 All Capuchin Species  
 Common Marmoset  
 Macaque – Crab Eating, Cynomolgus, or Longtailed  
 Macaque – Japanese  
 Macaque – Pigtailed  
 Macaque – Rhesus  
 Sooty Mangabey  
 Squirrel Monkey  
 Titi Monkey  
 White Capped Mangabey  
 Other – Write In: \_\_\_\_\_

Logic: Hidden unless: #117 Question “For future grant applications to be submitted in the next 5 years, do you anticipate using nonhuman primates as part of your research?” is one of the following answers (“Yes”)

	<b>Response Frequency</b>
African Green, Vervet, or Grivet	15
Baboon	28
All Owl Monkey Species	2

<b>Unique respondents</b>	<b>259</b>

**Question 120)** From your perspective, what do you see as the major **challenges** facing non-human primate research and/or researchers in the next 10 years? [Free text response]

---

<b>Unique respondents</b>	<b>Response Frequency</b>
	264

**Question 121)** From your perspective, what do you see as the major **opportunities** facing nonhuman primate research and/or researchers in the next 10 years? [Free text response]

<b>Unique respondents</b>	<b>Response Frequency</b>
	253

**Question 122)** There is an increasing push for openness in science with the goal of improving scientific rigor. Please indicate any such practices in which you are engaged as related to research using nonhuman primates using the check list below. Select all that apply.

Sharing data (i.e., raw or aggregate data is deposited in trusted repository minimally upon submission or publication of a manuscript)

Analytic methods (code) sharing (i.e., code to run analyses is deposited in a trusted repository)

Research materials sharing (i.e., materials required to carry out experiment are deposited in a trusted repository or available via some other publicly known method)

Design and analysis transparency (i.e., publications detail sufficient experimental details to recreate experiments, including the use of standardized checklists like the ARRIVE guidelines, reporting of variables such as social housing conditions of animals, etc.)

Pre-registration of studies

Pre-registration of analysis plans

Engagement in replicating existing studies

Meta-analytic or quantitative reviews of existing literature

Other – Write In: \_\_\_\_\_

	<b>Response Frequency</b>
