HOW TO USE THE TIME ZONE TABLE.

The list below identifies the time zone of each city on the map (zones are labeled A through O). To compare the time between two cities, use the time zone table on this page. The time zones form the vertical columns of the table. Read the table horizontally to determine the time of day between any two time zones. For example, if it is 10 am in Minneapolis (Zone E), the time in London can be found by moving across to column H; it is 4 pm.
