

Exhibit C
Sample Posted Notice - Sealant Warning
“CONTRACTOR-POSTED NOTICE—FOR OCCUPANTS”

Dear Resident,

Important steps are being taken to lower the risk to residents in this building.

The work has required **application of sealants**.

Wet Caulk/Sealants. Take care to not step in or touch sealants until they are dry.

Vapor From Sealants: Common construction sealants used to prevent radon entry at foundations and other locations will normally emit vapors that contain modest amounts of certain chemicals generally referred to as volatile organic compounds. The emissions occur mostly during application, but also to a lesser extent as they dry to form an airtight bond. While these chemicals are commonly used, some sensitive individuals may experience discomfort or other health effects when exposed to such chemicals. Safety Data Sheets (SDS) are available upon request.

Symptoms that may indicate sensitivity to these vapors may include: nausea, headaches, dizziness, drowsiness and/or an allergic reaction. Special consideration should be made for the very young or elderly who cannot communicate symptoms experienced. **If symptoms are observed:** Leave the area immediately to breathe fresh air. Avoid further exposure. If symptoms persist, get medical attention.

We thank you for your cooperation in helping to ensure safe and healthy homes.

Sincerely,
 Radon Company, Anytown, USA
