

## PROGRESSIVE JACKPOT WAGER

The Blazing 7's Progressive Wager is an optional \$5 side bet that must be made prior to the delivery of any cards. To begin each round, players must make a regular blackjack wager and if they desire to bet the progressive wager, they may do so by placing a \$5 chip on the red progressive sensor in front of their betting position. The sensor will illuminate to indicate the wager has been accepted. If a player receives two sevens in their first two cards and the player's third card dealt is a seven, the progressive wager is paid according to the pay table below. If a player receives two sevens in the first two cards and splits the hand, the Progressive Wager will be based on the two sevens and the third card dealt to the player. Bust hands that were dealt a first or second card seven dealt to the player will qualify for the Blazing 7's pay table. The bust card shall not count toward the player's Blazing 7's Progressive Wager. Placing the Blazing 7's progressive bet also makes you eligible for The Must Hit By Jackpot (MHB), sometimes referred to as a Mystery Jackpot which is configured in addition to the traditional progressive. The MHB\* has a configuration set between two values, the reset amount and the MHB amount. Using a random number generator, a random value is chosen between the two values that will become the jackpot-winning amount. Each player's progressive wager contributes a small amount to the MHB Jackpot. Once the accumulation of wagers puts the Jackpot over the winning amount, a random guest who wagered on the progressive will be awarded the MHB jackpot.

## Blazing 7's PROGRESSIVE WAGER PAY TABLE

|                                       |  |
|---------------------------------------|--|
| Three Suited 7's                      | <b>100% of Meter</b>   |
| Three 7's of the same color           | <b>10% of Meter</b>  |
| Three 7's - unsuited/different colors | <b>\$1,000</b>   |
| First two cards - two 7's             | <b>\$125</b>   |
| First two cards - one 7               | <b>\$10</b>  |
| Must Hit By                           | <b>100% of Must Hit By<br/>(*minimum win<br/>of \$250 &amp; must<br/>hit by \$500)</b> |

Original Wager is not returned.

## RULES AND REGULATIONS

  
**RIVERS**  
CASINO  
PITTSBURGH

GAMBLING PROBLEM? CALL 1-800-GAMBLER.

MUST BE 21 YEARS OF AGE OR OLDER TO BE INSIDE RIVERS CASINO.

The object of Blackjack, the most popular game in the casino, is to draw cards that will come closer than the dealer to 21, but not exceed 21. Blackjack may be played with multiple decks of cards. Some casinos are also using continuous shuffling machines.

---

## RULES

Cards are counted at their face value. All face cards count as 10. Aces count as either 1 or 11. A blackjack is a total of 21 on the original two cards. Blackjack pays 3 to 2 (one and a half times the bet). A blackjack cannot lose; it will push (tie) if the dealer also has blackjack.

When dealt any other two card combination, the player can stand (refuse additional cards), or, when it is one's turn, signal the dealer for a hit (receive additional cards). Players signal their desire to stand by waving their hand; they signal they would like an additional card by scratching the felt. If the player's hand is closer to 21 than the dealer's, the player wins. If the dealer's hand is closer to 21 than the player's, the house wins. In the event of a tie, neither hand wins nor loses. The dealer must stand on all 17's or higher.

## SPLITTING PAIRS

When the first two cards received are of the same value, the player has the option of splitting them to form two separate hands. Pairs may be split two times for a total of three hands. The wager on each hand must equal the original wager. Each hand may be hit as many times as desired. When splitting Aces, each Ace may receive one card only. Aces may be split only once on all Blackjack games.

## DOUBLE DOWN

Players have the option of increasing their original wager by Doubling Down after the first two cards are received. The Double Down wager may be an amount up to the amount of the original wager. The hand receives one additional card only. On shoe games a person may double down after the split.

## INSURANCE

When the dealer's up card is an Ace, the player may make an additional wager known as insurance. Insurance protects the player's hand against the possibility of the dealer having a blackjack. At the dealer's prompt, one may wager up to half of the original wager. The player is betting that the dealer's hole card has a value of 10; the insurance wager is paid 2 to 1. If the hole card is not a value of 10, the insurance wager loses. Remember: the insurance wager is completely separate from the original wager. The game continues as normal after Insurance activity is settled.

## SURRENDER

When it is their turn to act, players may forfeit half of their wager prior to taking a third card and only if the dealer does not have a blackjack.

## LUCKY LADIES SIDE BET

1. The optional Lucky Ladies wager will be placed in an area separate from the BlackJack original wager and designated as the Lucky Ladies wager.
2. Players must place a Blackjack wager if they place a Lucky Ladies wager.
3. Players may not place a wager on another player's Lucky Ladies wager.
4. The optional Lucky Ladies wager will win if the player's first two cards total 20, and will be paid in accordance with the posted Lucky Ladies pay table.
5. \$25,000 Maximum Payout Per Player Per Round. The \$25,000 Maximum Payout only applies to Lucky Ladies and does not affect any other wagers.

## LUCKY LADIES PAY TABLE

| First Two Cards   | Payout     |
|---|------------|
| Queen of Hearts Pair <small>(with Dealer Blackjack)</small> | 1,000 to 1 |
| Queen of Hearts Pair  | 200 to 1   |
| Matched 20  | 25 to 1    |
| Suited 20   | 10 to 1    |
| Any 20  | 4 to 1     |

(Only highest payout paid per player.  
Matched 20 is two identical cards.)

## XTREME 21+3 SIDE BET

Your traditional Blackjack bet is required while the three card bet is optional. After placing your wagers, you will be dealt two cards both face up. The dealer also receives one face up. If you made the xtreme 21+3 wager and these three cards form a winning combination then you have won a generous payout, but only one per hand, based on the Xtreme 21+3 Pay Table:

## XTREME 21+3 PAY TABLE

|                 |         |
|-----------------|---------|
| Straight Flush  | 30 to 1 |
| Three-of-a-kind | 20 to 1 |
| Straight        | 10 to 1 |
| Flush           | 5 to 1  |
