HOW TO INTERPRET YOUR RESULTS

- If **all** -- or virtually all (all but 1-2) -- of the responses you checked are in **Column B**, you can probably safely treat this individual as an **independent contractor** and pay them through Purchasing/ Accounting rather than through HR/Payroll.
- If **most** of the responses you checked are in **Column A**, you should put this individual on the bi-weekly **payroll** through HR/Payroll as a temporary **employee**. If this work will be a continuing assignment (longer than 6 months), consider establishing a time-limited or regular position.
- If you checked **more than a couple** of responses in **Column A**, you should probably be safe, rather than sorry (from an IRS tax liability & penalty perspective), and pay the individual as an **employee**, through Payroll.

***WHY?** Even though these "20 questions" come from the IRS's own guidelines, the IRS won't publish any helpful "bright-line" cutoffs for employers to use, such as, "More than X out of 20 means you must treat the person as an employee." As is typical with the IRS, they make employers guess, and then, if they come audit you and decide you guessed wrong, they hold you liable for misclassification of workers as independent contractors. The IRS believes employers have incentives to misclassify employees in order to avoid the employer-matching contributions for FICA taxes, etc. And getting caught misclassifying workers could mean big IRS fines & penalties for your department.*
