HISTORY

The early settlers who came to America found a land of dense wilderness, interlaced with creeks, rivers, and streams. Within this wilderness was an extensive network of trails, many of which were created by the migration of the buffalo and used by the Native American Indians as hunting and trading routes. These primitive trails were at first crooked and narrow. Over time, the trails were widened, straightened and improved by settlers for use by horse and wagons. These became some of the first roads in the new land.

After the American Revolution, the National Government began to realize the importance of westward expansion and trade in the development of the new Nation. As a result, an era of road building began. This period was marked by the development of turnpike companies, our earliest toll roads in the United States. In 1792, the first turnpike was chartered and became known as the Philadelphia and Lancaster Turnpike in Pennsylvania. It was the first road in America covered with a layer of crushed stone. The boom in turnpike construction began, resulting in the incorporation of more than 50 turnpike companies in Connecticut, 67 in New York, and others in Massachusetts and around the country. A notable turnpike, the Boston-Newburyport Turnpike, was 32 miles long and cost approximately \$12,500 per mile to construct.

As the Nation grew, so did the need for improved roads. In 1806, the Federal Government passed legislation to fund the National Road, known as the Cumberland Road. This road would stretch from Maryland through Pennsylvania, over the Cumberland Mountains, to the Ohio River. For a period of time, these roads served the new Nation well. However, with the use of heavier wagons and the large movements of entire families across the country, a strain on the infrastructure was evident. The roads in this country were still dirt and gravel--paved, rutted and impassable in bad weather.

Toward the 1880s, America began to see the increased use of bicycles as a form of transportation, which led to the "Good Roads Movement," mainly through bicyclist clubs across the country. In addition, with the advent of the automobile, new and better roads were required. The Federal Government responded by creating the Office of Road Inquiry in 1893. This agency was responsible for collecting data, answering questions, and assisting in road improvements. Later, this infant agency grew to help finance road construction (Post Office Appropriation Act of 1912)--the beginning of the Federal-aid roads. Soon, connecting highways emerged from contributions from State and local governments as well as Federal financing. People were traveling further and more extensively.

World War I saw greater dependence on these vital roadways, especially the manufacturing centers. Following the war, the Federal Highway Act of 1921 provided financial assistance to the States to build roads and bridges. The need for a nationwide interconnecting system of highways became clearer. By the end of the 1920s, more than half of all American families

owned automobiles. Engineers were kept busy building highways, bridges, and tunnels, especially in the larger cities such as New York, Boston, Los Angeles, and San Francisco. Tolls were used on many roads, bridges, and tunnels to help pay for such a building boom. The Holland Tunnel in New York was completed in the mid-1920s and opened up routes into the heart of New York City. It was referred to as the "Eighth Wonder of the World." The Golden Gate Bridge in San Francisco, built in the 1930s, provided access into San Francisco from across the bay.

World War II created even greater reliance on our vital highway systems. The roads, bridges, and tunnels served as defense routes for the war effort. After the war, urban flight produced mass building of the suburbs and increased use of the automobile. The Federal-Aid Interstate System, enacted in 1956, provided for a coast-to-coast highway system, connecting important cities and industrial centers to one another. This post-war boom saw one of the largest building of highways in the United States. The use of the automobile grew to include not only trips to work but to social activities and recreational outlets as well.

By 1980, the Nation's highway transportation infrastructure began to show signs of age through heavy use. Congestion in major urban area streets and highways, bridges, and tunnels grew rapidly and added to the wear and tear of the physical street and highway plant. National attention on the need for maintenance and repair of our roads, bridges, and tunnels led to the 1981 Surface Transportation Assistance Act.

The Intermodal Surface Transportation Efficiency Act of 1991 (ISTEA) provided increased reliance on the use of private funds to construct additional toll facilities. As a result of ISTEA, tolls are permitted to a greater degree on Federal-aid facilities, including initial construction of non-Interstate System toll facilities and 4R (resurfacing, restoring, rehabilitation, reconstruction) work on toll facilities, including those on the Interstate System. Federal-aid funds can also be used for reconstruction or replacement of free bridges or tunnels (including the Interstate System) and conversion to toll; and reconstruction of free highways (except Interstate System) and conversion to toll.

Today, toll roads, bridges, and tunnels are, to a great extent, financed by tolls through turnpike commissions and authorities, city and county operating authorities, and State Departments of Transportation. These turnpike authorities are essential for financing, constructing, and maintaining the Nation's toll roads, bridges, and tunnels around the country. In recognition of the deployment of new toll technologies, information on electronic toll collection was added to this report in 1995. The number of toll facilities reported with electronic technology has increased from 49 in 1995 to 77 in 1997.

The Nation's highways are vital corridors for our economic and social progress. The cooperation between Federal, State, and local governments, as well as private entities, makes toll facility financing and construction a viable resource alternative as we move into the 21st Century.

Data Explanation

This report contains selected information on toll facilities in the United States. The information is based on a survey of facilities in operation, financed, or under construction as of January 1, 1997.

Tables T-1 and T-2 include, where known:

- The direction of toll collection.
- The type of electronic toll collection system, if available.
- Whether the facility is part of the National Highway System (NHS).

Table T-1 contains information such as the name, financing or operating authority, location and termini, feature crossed, length, and road system for toll roads, bridges, tunnels, and ferries that connect highways.

- Parts 1 and 3 include the Interstate System route numbers for toll facilities located on the Dwight D. Eisenhower National System of Interstate and Defense Highways.
- Parts 2 and 4 include a functional system identification code for non-Interstate System toll bridges, roads, and tunnels.
- Part 5 includes vehicular toll ferries.

Table T-2 contains a list of those projects under serious consideration as toll facilities, awaiting completion of financing arrangements, or proposed as new toll facilities that are being studied for financial and operational feasibility.

Also included are tables containing data on receipts and disbursements of toll facilities. These tables are published in the *1995 Highway Statistics*:

- Table SF-3B, Receipts of State-Administered Toll Road and Crossing Facilities
- Table SF-4B, Disbursements of State-Administered Toll Road and Crossing Facilities

- Tables LGF-3B, Receipts of Local Toll Facilities
- Tables LGF-4B, Disbursement of Local Toll Facilities

This report is not intended to be a complete reference on toll facilities nor is it intended to duplicate data published by other organizations. Nearly all of the publicly owned toll authorities publish reports that contain such information as width and clearance on bridges, type of structure, road limits, year built or put in service, traffic volumes, cost, toll rates, etc.

Information on ferries such as seasonal or hourly operating schedules has been included when easily obtainable. Complete information on schedules and on the number and capacity of boats in operation may be obtained directly from the operating authority.

1/ The length of structures includes approaches and connecting links which were financed as an integral part of the toll project. The length of toll bridges includes approach sections which may be used toll free by local residents. The length of such sections is identified as "nontoll" in the remarks column.

2/ Excludes toll transactions that require stopping (i.e., cash, ticket, or token payment).

Summary of Interstate System Toll Roads in Operation in the United States												
		Total Interstate System		Less Non-Toll Interstate System		Total Interstate System						
Road System		Mileage	Kilometers	Mileage	Kilometers	Mileage	Kilometers					
Rural		1972.3	3174.1	1.8	2.9	1970.5	3171.2					
Urban		881.2	1418.2	80.1	128.9	801.1	1289.2					
Total		2853.5	4592.3	81.9	131.8	2771.6	4460.5					
1/ The length of roads includes approaches and connecting links which were financed as an integral part of the toll project. The length of toll roads includes sections which may be used toll free by local residents. The length of such sections is identified as "nontoll" in the remarks column.								2/ Excludes toll transactions that require stopping (i.e., cash, ticket, or token payment).

1/ The length of structures includes approaches and connecting links which were financed as an integral part of the toll project. The length of toll bridges includes approach sections which may be used toll free by local residents. The length of such sections is identified as "nontoll" in the Remarks column. 2/ Rural Functional Class Codes -- 02 - Principal Arterial, 06 - Minor Arterial, 07 - Major Collector, 08 - Minor Collector, 09 - Local; Urban Functional Class Codes -- 12 - Other Freeways & Expressways, 14 - Other Principal Arterial, 16 - Minor Arterial, 17 - Collector, 19 - Local. 3/ If facility is not entirely on the National Highway System (NHS), the length breakdown is in the Remarks column. 4/ Excludes toll transactions that require stopping (i.e., cash, ticket, or token payment). 5/ Toll/Fee is collected at one of the five possible entry points to pay for road maintenance. If food/drink is purchased at one of the restaurants/bars along 17-mile scenic drive, the toll/fee is refunded.

1/ This table lists those toll facilities known to have been recommended for feasibility studies by State governors, highway departments, legislative committee. Those marked with an asterisk have been authorized for construction by the respective State legislatures or toll authorities.
2/ If facility is not entirely on the National Highway System, the length breakdown is in the remarks column.

3/ Excludes toll transactions that require stopping (i.e., cash, ticket, or token payment).
4/ Not all to be paid by toll.
5/ Includes bridge over Broad Creek.

Grand Total		5,046,662	1,410,261	352,559	3,772,225	116,157	337,000	192,946	1,064,968	-	5,835,855

1/ Tables SF-3B and SF-4B are concerned solely with receipts and disbursements for State and quasi-State toll facilities. See Tables LGF-3B and LGF-4B for data on public and quasi-public facilities operated by or for local governments. See Tables SB-2T and SB-3T for information on toll facility bond indebtedness. See Table SF-21 for general note on SF table series.

2/ Any differences between beginning balances and previous year's closing balances are the result of accounting adjustments, or inclusion of funds not previously reported.

3/ Private companies have contracted with the State to build and operate these facilities. At a later date, they will be transferred to the State. The amounts shown represent only the State's oversight costs.

4/ Include the Carquinez, Benicia-Martinez, Antioch, and Richmond-San Rafael Bridges.

5/ Includes the San Francisco-Oakland Bay, San Mateo-Hayward, and Dumbarton Bridges.

6/ Facility still in planning stage. Incorrectly shown as under construction in last year's table.

7/ Includes Chesapeake Bay, Francis Scott Key, Potomac River and Susquehanna River Bridges; Baltimore Harbor and Fort McHenry Tunnels.

8/ Includes the Trenton-Morrisville, New Hope-Lambertville, Interstate 78, Easton-Phillipsburg, Portland-Columbia, and Milford-Montague Bridges.

9/ Includes the Newburgh-Beacon, Mid-Hudson, Rip Van Winkle, Kingston-Rhinecliff and Bear Mountain Bridges.

10/ Includes the George Washington, Bayonne and Goethals Bridges; Holland and Lincoln Tunnels.

11/ Includes the Walt Whitman, Ben Franklin, Betsy Ross and Commodore Barry Bridges.

12/ Under construction. Facility to replace existing toll-free bridge.

13/ Freed from tolls on 6/1/95.

14/ Full name of the authority is West Virginia Parkways, Economic Development and Tourism Authority.

1/ Tables SF-3B and SF-4B are concerned solely with receipts and disbursements for State and quasi-State toll facilities. See Tables LGF-3B and LGF-4B for data on public and quasi-public facilities operated by or for local governments. See Tables SB-2T and SB-3T for information on toll facility bond indebtedness. See Table SF-21 for general note on SF table series.

2/ Includes direct expenditures for nonhighway purposes and transfers to other agencies for both highway and nonhighway purposes. The amount used for nonhighway purposes can be determined by taking total tolls from SF-3B and subtracting tolls used for highways on Tables SF-21 and tolls used for mass transportation on table MT-1.

3/ Private companies have contracted with the State to build and operate these facilities. At a later date, they will be transferred to the State. The amounts shown represent only the State's oversight costs.

4/ Include the Carquinez, Benicia-Martinez, Antioch, and Richmond-San Rafael Bridges.

5/ Includes the San Francisco-Oakland Bay, San Mateo-Hayward, and Dumbarton Bridges.

6/ Facility still in planning stage. Incorrectly shown as under construction in last year's table.

7/ Includes Chesapeake Bay, Francis Scott Key, Potomac River and Susquehanna River Bridges; Baltimore Harbor and Fort McHenry Tunnels.

8/ Includes the Trenton-Morrisville, New Hope-Lambertville, Interstate 78, Easton-Phillipsburg, Portland-Columbia, and Milford-Montague Bridges.

9/ Includes the Newburgh-Beacon, Mid-Hudson, Rip Van Winkle, Kingston-Rhinecliff and Bear Mountain Bridges.

10/ Includes the George Washington, Bayonne and Goethals Bridges; Holland and Lincoln Tunnels.

11/ Includes the Walt Whitman, Ben Franklin, Betsy Ross and Commodore Barry Bridges.

12/ Under construction. Facility to replace existing toll-free bridge.

13/ Freed from tolls on 6/1/95.

1/ This table summarizes the disbursements for publicly owned toll facilities operated by local governments, local road and bridge districts and specially created authorities. See Table LGF-3B for names of operating authorities. See Table LGF-21 for general note on local highway finance series.

2/ Includes direct expenditures for nonhighway purposes and transfers to other State and local agencies for both highway and nonhighway projects.

3/ Lee County Bridges consists of the Cape Coral Bridge, the Midpoint Bridge,

and the Sanibel Bridge and Causeway.

4/ Transfers shown include amounts used for maintenance, operations and debt service of the New York City Transit Authority, the Metropolitan Transportation Authority and the Triborough Transportation Project.

5/ Harris County Toll Facilities consists of the Harris County Toll Road and the Jesse Jones Memorial Toll Bridge.

Appendix

The data for this report were obtained by the field offices of the Federal Highway Administration (FHWA) in cooperation with the State highway agencies. The material was collected and organized by the Office of Highway Information Management. Comments are welcomed and may be submitted to:

Highway Systems Performance Division (HPM-20)
Federal Highway Administration
400 Seventh Street, SW.
Washington, D.C. 20590.
202-366-5068

Other organizations that compile data related to toll facilities include:

The **International Bridge, Tunnel and Turnpike Association (IBTTA)** maintains an address directory of its membership and serves as an information clearing house and research center. It also conducts surveys and studies and publishes a variety of reports, statistics, and analyses.

IBTTA
2120 L Street, NW., Suite 305
Washington, D.C. 20037
202-659-4620

The **American Automobile Association (AAA)** compiles a directory of toll facilities containing such current information as rates, load limits, frequency of service, etc.

American Automobile Association
1000 AAA Drive
Heathrow, Florida 32746-5063
