Used IL adjusted data instead of real data.

WI : upgrade software to version 3.

WI will send individual lane data instated of combined lane data.

solution: sum individual lane based on stationid + direction + lane + day

created combined lane data to find the matched key for 2002

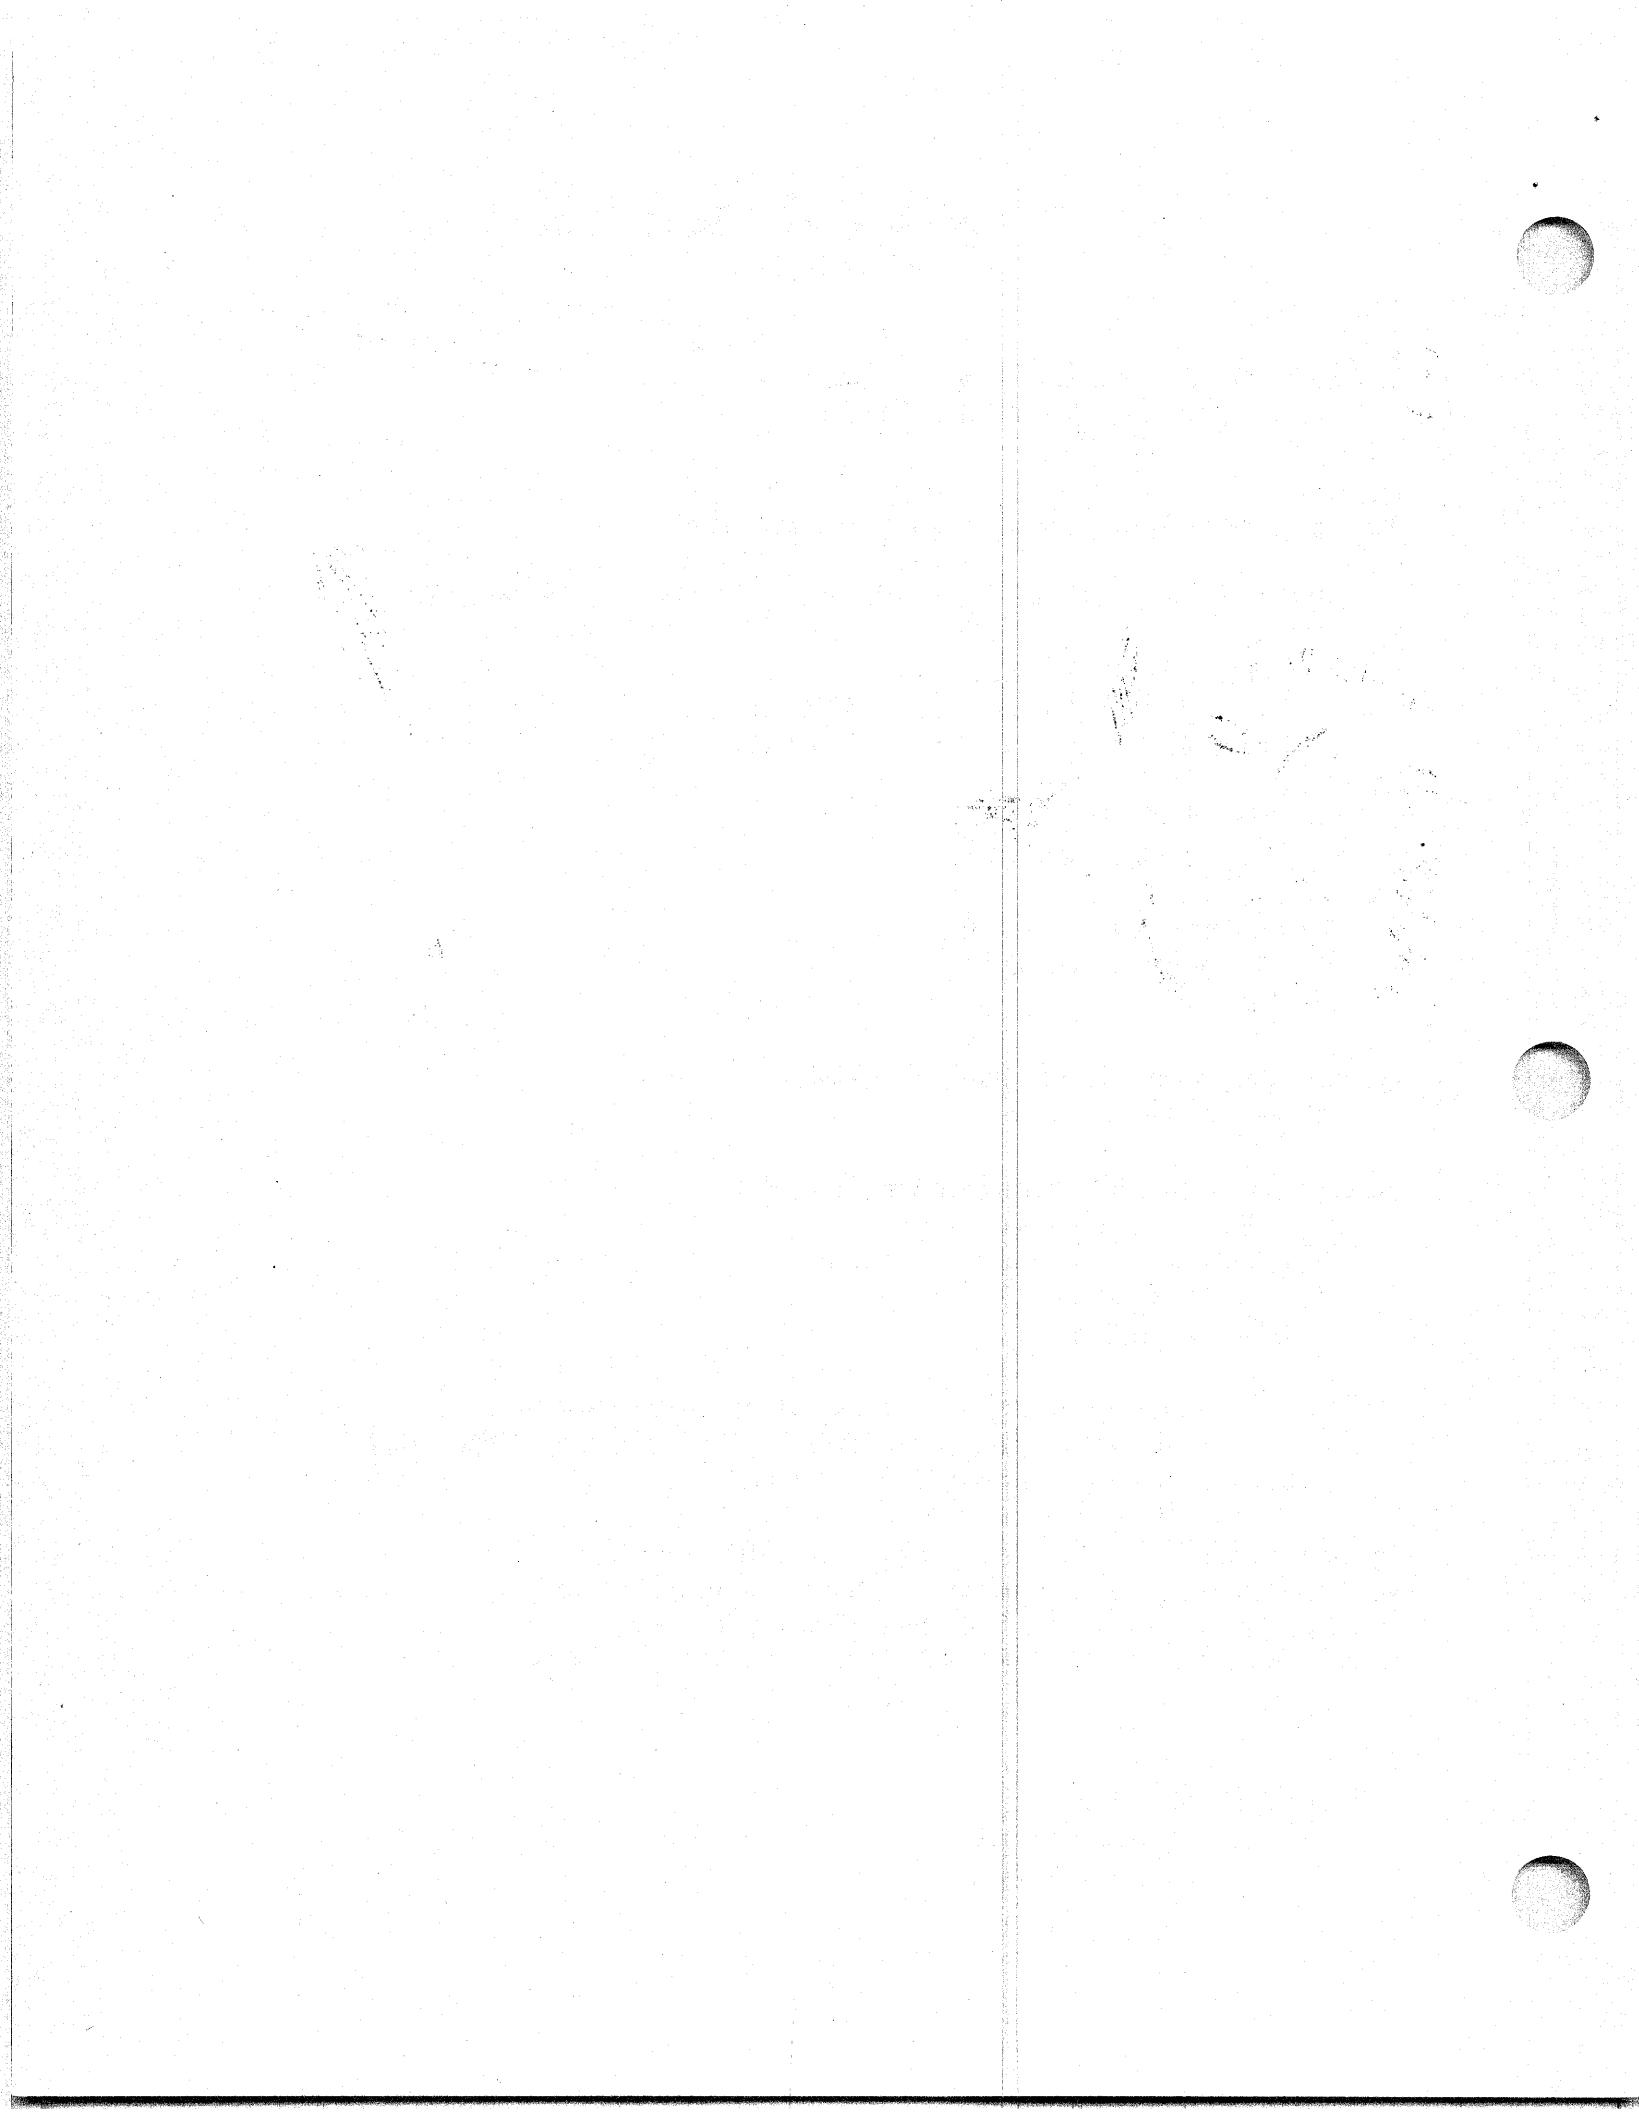

only 63 station read into VMT. Need to check the reason for station decrease.

Traffic Volume Trends is a monthly report based on hourly traffic count data. These data, collected at approximately 4,000 continuous traffic counting locations nationwide, are used to determine the percent change in traffic for the current month compared to the same month in the previous year. This percent change is applied to the travel for the same month of the previous year to obtain an estimate of travel for the current month.
