EXPLANATORY NOTE

This publication contains data on fatal and injury accidents and fatally and nonfatally injured persons involved in motor vehicle traffic accidents for calendar year 1981. The 1981 data are classified, as were the 1976 data, by the realigned highway systems described below. Because of reporting problems related to the transition to new system definitions in 1976, complete data are not available for all highway systems. Beginning with the 1979 report, the definition of a fatal injury was changed and is defined as any injury which results in death within 30 days of the accident. The 1978 and earlier reports in this series defined a fatal injury as any injury that resulted in death within 1 year of the accident.

Highway Systems

In the Federal-Aid Highway Act of 1973, the Congress introduced new definitions of highway systems based on general functional classifications, i.e., arterial, collector, and local. The new definitions became effective July 1, 1976. These functional classifications differ from the classifications used by the 50 States and the District of Columbia for calendar years 1967-1975. In addition to the highway system classifications for 1976 data, the data for Federal-Aid Urban Highways for 1977 and later years were to be reported separately for arterials and collectors.

The classifications of highways for calendar year 1981 are:

1. Interstate (Arterial)
2. Other Federal-Aid Primary (Arterial)
3. Federal-Aid Urban (Arterial)
4. Federal-Aid Urban (Collector)
5. Federal-Aid Secondary (Collector)
6. Non-Federal-Aid (Arterial)
7. Non-Federal-Aid (Collector)
8. Non-Federal-Aid (Local)

Each of the functional classifications is further described as rural and urban except that Federal-Aid Urban highways are only in urban places, and Federal-Aid Secondary highways are only in rural places.

With one exception, no direct comparison of the data can be made between the classifications used beginning with the 1976 data and the classifications used in earlier years.^{1/} The Interstate data for 1976 and later years are comparable to the system identified as the Interstate-Final during previous years.

Compilations

The tables summarize the data for fatal and nonfatal injuries in motor vehicle traffic accidents for calendar year 1981 by highway and by State. These tables are compiled from reports submitted to the Federal Highway Administration by the 50 States, the

^{1/} Fatal and Injury Accidents Rates on Federal-Aid and Other Highway Systems, 1967 through 1975.

the District of Columbia, the Commonwealth of Puerto Rico, and the territories of American Samoa, Guam, and the Virgin Islands.^{2/}

The first table (page 1 shows U.S. estimates by highway system. These estimates exclude the Commonwealth of Puerto Rico and the territories of American Samoa, Guam, and the Virgin Islands. Because of the incomplete reporting for 1981, estimates were used for some States in compiling this table.

The tables on pages 2-29 present motor vehicle traffic accident data by State for each highway system. The top part of each table includes those States for which complete data have been reported. In those States which have reported no mileage for a given functional class, a dash has been shown in all columns including those for mileage, travel, accidents or injuries, and corresponding rate. In those States which have reported mileage and travel for a particular functional class, but no accidents or injuries, the latter values are indicated by a zero with a corresponding zero in the rate column. The bottom part of each table indicates those States that have not reported complete data for a given functional class. The first set of these tables (pages 2-8) presents fatal accident data by State for each highway system, and the second set (pages 9-15) presents data on nonfatal injury accidents by State for each highway system. Similarly, the third set (pages 16-22) and the fourth set (pages 23-29) present data for fatalities and nonfatally injured persons, respectively.

The table shown on page 30, STATE TOTALS-1981, presents totals reported by the 50 States and the District of Columbia. There are eight States which did not submit totals for all categories of data. The table also shows totals and rates for pedestrian fatalities and pedestrian nonfatal injuries by State. While the reporting requirements specify that the pedestrian data are to be reported by system, many States were unable to report the data in this manner for 1981. Since incomplete data were reported by some States, the sums for certain columns do not reflect the estimates U.S. total. Where the State's fatality data were missing, data from the National Highway Traffic Safety Administration's Fatal Accident Reporting System (FARS) were used.

The data reported by the Commonwealth of Puerto Rico and the U.S. Territories are summarized on page 31.

The rates shown in these tables are uniformly carried out to two decimal places. This apparent precision surpasses the degree of accuracy of much of the data on which the computed rates are based. Collection and classification of information about miles of highway, vehicle miles of travel, and motor vehicle traffic accidents is a highly complex undertaking in which thousands of persons participate. because of this complexity and the necessity of subjective judgments at many points in the process, the computed rates should be regarded as approximations, not as precise measurements.

In addition to the fatalities reported in this publication, about 1,100 deaths per year occur in motor vehicle nontraffic accidents. Such accidents may, for example, occur in private driveways or involve off-the-road recreational or farm vehicles. The inclusion of nontraffic deaths in some of the figures published by the National Safety Council explains much of the difference between the statistics published by that organization and the statistics in this publication.

^{2/} Highway Performance Monitoring System, Motor Vehicle Accident Summary, Federal Highway Administration.

Terms used in these tables are defined as follows:

An injury is any bodily harm received by a person in a motor vehicle traffic accident.

A fatal injury is any injury that results in death within 30 days of the accident. Previous reports in this series defined a fatal injury as any injury that resulted in death within 1 year of the accident.

A nonfatal injury is any injury other than a fatal injury.

A fatal accident is a motor vehicle traffic accident resulting in one or more fatal injuries.

A nonfatal injury accident is a motor vehicle traffic accident that results in one or more injuries, but no fatal injuries.

A fatality is the death of any person who suffers a fatal injury.

A nonfatally injured person is one who suffers a nonfatal injury in either a fatal accident or a nonfatal injury accident.

Vehicle miles are the miles of travel by all types of motor vehicles, as determined by the State highway departments on the basis of actual traffic counts and established estimating procedures.

The fatal accident rate, nonfatal injury accident rate, fatality rate, and nonfatal injury rate are, respectively, the number of fatal accidents, nonfatal injury accidents, fatalities, and nonfatally injured persons per 100 million vehicle miles of travel.

An urban highway is any road or street within the boundaries of an urban area. An urban area is an area including and adjacent to a municipality or urbanplace with 5,000 or more population. the boundaries or urban areas are fixed by the State highway departments, subject to the approval of the Federal Highway Administration, for purposes of the Federal-Aid highway program.

A rural highway is any road or street which is not an urban highway.

The characteristics of the functional classes of highways referred to in this compilation of 1981 data are briefly described as follows:

Arterial highways serve major traffic movements or major traffic corridors. While they may provide access to abutting land, their primary function is to serve traffic moving through the area.

Local highways are those highways whose principal function is to provide direct access to abutting land.

Collector highways are those highways which link local highways to arterial highways.

The characteristics of the several Federal-aid highway systems referred to in this report are briefly described as follows:

Federal-Aid Primary, Secondary and Urban highway systems are those for which Federal-Aid highway matching funds may be spent by the States.

The Federal-Aid Primary system is a system of connected main roads important to interstate, statewide, and regional travel, consisting of rural arterial routes and their extensions into or through urban areas.

The Interstate System is a part of the Federal-Aid Primary system. It is a system of freeways (i.e., expressways with fully controlled access) connecting and serving the principal cities of the continental United States.

The Federal-Aid Secondary system consists of rural collector routes.

The Federal-Aid urban system consists of urban arterial and collector routes, exclusive of urban extensions of the Federal-Aid Primary system.

Paper and microfiche copies of Fatal and Injury Accident Rates on Federal-Aid and Other Highway Systems for the years 1967 through 1972 may be purchased from the U.S. Department of Commerce, National Technical Information Service (NTIS), Springfield, Virginia 22151. Accession numbers are: 1967--PB-206 147; 1968--PB-206 148; 1969--PB-206 151; 1970--PB-206 152; 1971--PB-218 136; 1972--PB-231 145. The 1973, 1974, and 1975 issues may be purchased from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. The 1976, 1977, 1978, 1979, and 1980 issues are available from the Federal Highway Administration, Office of Highway Safety (HHS-30), Washington, D.C. 20590.

^{1/} U.S. ESTIMATES EXCLUDE THE COMMONWEALTH OF PUERTO RICO AND THE TERRITORIES OF AMERICAN SAMOA, GUAM, AND VIRGIN ISLANDS. ESTIMATES FOR FATAL ACCIDENTS, FATALITIES, NONFATAL INJURY ACCIDENTS AND NONFATALY INJURED PERSONS ARE BASED ON THE PARTIAL DATA REPORTED BY STATES WHICH ARE DISPLAYED IN THE FOLLOWING TABLES, TOGETHER WITH TOTALS REPORTED BY MOST STATES.

^{2/} MILEAGE AND TRAVEL DATA ARE FROM THE HIGHWAY PERFORMANCE MONITORING SYSTEM (HPMS) FOR 1981. FEDERAL-AID HIGHWAY MILEAGE IS FROM HPMS UNIVERSE DATA AS OF MARCH 1, 1983 AND VEHICLE-MILES OF

TRAVEL ARE FROM THE HPMS AREAWIDE SUMMARY TABLES AS OF MARCH 1, 1983. FEDERAL HIGHWAY ADMINISTRATION ESTIMATES WERE MADE FOR MAJOR HIGHWAY CATEGORIES WHERE COMPLETE FUNCTIONAL OR FEDERAL-AID SYSTEM DATA WERE NOT REPORTED.

^{3/} RATES ARE PER 100 MILLION VEHICLE MILES.

^{4/} TOTALS OF NON-FATAL INJURY ACCIDENTS AND NON-FATALY INJURED PERSONS WERE ESTIMATED BY FHWA FOR FLORIDA, MARYLAND, MASSACHUSETTS, MISSISSIPPI, RHODE ISLAND, VERMONT, AND FOR THE NON-STATE MILEAGE OF MISSOURI.
