

STEM Rising: Elevating STEM at the Energy Department

STEM Rising is an initiative of the U.S. Department of Energy's Office of Public Affairs to showcase the agency's extensive programs, events, competitions, and resources for science, technology, engineering, and mathematics (STEM) learning and workforce development. Innovation requires innovators. Ensuring a STEM-ready workforce is a core value of the Department of Energy and central to our mission.

Our agency has hundreds of programs throughout our 17 National Laboratories, National Nuclear Security Administration, and our program offices, serving Kindergarten through workforce levels. With STEM Rising, we have easy ways to track news and opportunities from these programs, like:

- **Visit** the STEM Rising website for a portal to STEM resources: www.energy.gov/STEM
- **Read** the STEM Rising blog:
- <https://www.energy.gov/listings/stem-rising-blog>
- **Subscribe** to the STEM Rising newsletter: <https://www.energy.gov/stem-rising-newsletter>
- **Watch** videos from the STEM Rising YouTube playlist: <https://bit.ly/2Bdzj6P>
- **Follow** the hashtag #STEMRising on Twitter, Facebook, and LinkedIn

Diversity and inclusion in the STEM workforce produces better results, is a moral imperative, and is a mission imperative. Learn about the ways the U.S. Department of Energy is ensuring a diverse and inclusive energy workforce of today and tomorrow on the All in STEM webpage at energy.gov/all-stem

Tour the National Laboratories with us and explore their STEM programs at energy.gov/VirtualLabTours
