Chrome Enterprise Recommended

directprint.io

Chrome Enterprise Recommended Solution Overview with **directprint.io**

Print deployment, management and analysis. Secure. All in one place. Designed for Google environments.

Dealing with print in organizations can be challenging for administrators and users.

Our secure, serverless, technology solves the complexity of deployment, management and analysis of print within your organization.

And your end users benefit from simple, predictable printing.

Our unique and seamless integration with Google Workspace and ChromeOS provides admins with frictionless deployment and robust, secure local printing with an option to add cloud print capabilities.

Make powerful business decisions from a single source. Our intuitive cloud platform provides instant access to real-time data, and activity by user, department, device and more.

Discover the benefits

Security, Control and Policy Management out of the box.

- **Secure Print & Advanced Finishing** supported across new and old printers.

- **Point and click printer allocation and policy management** to users, groups, devices or OUs.

- **Cloud prints** never leave your Chrome Enterprise infrastructure.

- **Instant, highly-detailed reports** allow you to track print activity across your organization.

One Partner. One Cloud Platform. Simple, Predictable Printing.

- **Full directory integration** with Google Workspace allows IT admins to deploy, secure, control and track print activity.

- **ChromeOS integration** means Managed Guest Session, User session or Kiosk mode is supported.

- **Zero-touch universal print driver** installation without compromise.
