Chrome Enterprise Recommended

printix
a **KOFAX** company

Simplify ChromeOS Printing with Printix

Cloud-based management of your office, BYOD, mobile and remote user printing, in concert with ChromeOS.

Printix extends your Google Workspace to provide users with a print ready experience, that's quick and easy to use and ChromeOS secure.

Remove the cost of managing print servers, and associated fees and move to a low cost, subscription-based service.

Replace manual IT tasks with automatic updating and configuration based on Workspace profile.

As a native cloud-based service, Printix uses self-healing and cloud security, to provision high availability and document security without complexity.

Utilizing manufacturer OEM drivers, printing "just works" with all features available or auto applied.

In the market for over 5 years, Printix is proven and suitable for businesses and schools of any size.

Discover the benefits

Remove print infrastructure, IT administration and save more

Users can print from any device to any printer, from anywhere with the ability to use Printix App for mobile printing and secure print release.

With SSO, Printix knows who the user is, where they are located and the printers authorized and available for access, based on Workspace profile.

Regardless of location, users always get what they need to reliably print from Chromebook, Mac, PC, Android or iOS phone or tablet.
