## **INDIVIDUAL MEMBER'S REPORT**

### ***a.) Keith Bienvenu***

Board Member, Keith Bienvenu, stated that the Board needed to get everything in line for the upcoming mandatory apprenticeship program. Executive Director, John Barker, stated that initially the Board voted to approve the mandatory apprenticeship program. He stated that he was under the impression that this could not be done by vote of the Board and that it would need to go through the rule making process. He also stated that after speaking with the Board's legal counsel that it is more involved than he thought. Louis Robein explained that the statutes of the Board are permissive and that they have always provided that the Board shall recognize a system of qualifications. Board Member, Keith Bienvenu, brought up concerns about the changes to qualifications that when the issue gets out, the rural legislatures will say that you should recognize it but it is not mandatory. Louis Robein explained that the law is somewhat ambiguous on what the Board may do and what it shall do. Board Member, Jerry Payne, stated that the law states that the Board may accept vouchers or may not. Mr. Robein stated that if the Board decided to do away with the vouchers all together, there may be a considerable amount of backlash. Mr. Payne stated that in order to reduce the amount of backlash, is to accept new apprentices, which have no plumbing experience whatsoever, into the required apprenticeship program. Mr. Robein asked about those helpers who have already invested some time in to earning the required experience to qualify for the Journeyman exam. Secretary-Treasurer, Rickey Fabra, stated that there would have to be some sort of direct entry into the apprenticeship program so that they would get full credit for experience earned. Mr. Bienvenu stated that when the Master Plumber was established by the Board there were a few things that were questionable. He stated that for the sake of the Plumbing Board everything needs to be in order before we can proceed with the Apprenticeship program. He also stated that it was his opinion that the Board needed to go through all the necessary steps to make sure that everything was right so the Plumbing Board is not put in jeopardy. Mr. Robein informed the Board that the framework for making change is there. Henry Heier stated that his concern was the programs that do not qualify for an apprenticeship program. He informed the Board about the different types of apprenticeship programs. Board Member, Jerry Payne, stated that the

voucher system currently in place is very dishonest and the way to correct this is to move to the apprenticeship program. Mr. Fabra stated that the deadline to put the apprenticeship program in place keeps getting pushed back and that the Board needs to make sure that the proper notification is being sent out about the transition from the voucher system to the apprenticeship program. Mr. Bienvenu stated that there is no need for a motion to be taken on this matter because the Board has already approved it. Legal counsel agreed to take over this matter.
