All results are for release after 9:00 AM/ET Sunday, April 10, 2016.

NEW YORK

The Fox News Poll is conducted under the joint direction of Anderson Robbins Research (D) and Shaw & Company Research (R).

The poll was conducted by telephone with live interviewers April 4-7, 2016 among a random state sample of 1,403 New York likely primary voters. Respondents were screened to identify likely primary voters.

Results for the full sample have a margin of error of plus or minus 2.5 percentage points. Results for the 801 likely Democratic primary voters have a margin of error of plus or minus 3.5 percentage points and results for the 602 likely Republican primary voters have a margin of error of plus or minus 4 percentage points.

Landline (748) and cellphone (655) numbers were randomly selected from a statewide voter file of registered New York voters using a probability proportionate to size method. This simply means phone numbers are proportionally representative to the number of voters in all regions across the state of New York. Fieldwork conducted by Braun Research, Inc. of Princeton, NJ.

An asterisk (*) is used for percentages of less than one-half percent.

A dash (-) represents a value of zero.

Some results may not add to 100% due to rounding.
