## * $\$ FOX NEWS I VOTER ANALYSIS

## 2021 Virginia Gubernatorial Election

Survey Number of Interviews: 2,634
Final results as of 11/18/2021 10:55am

The Fox News Voter Analysis is based on a survey conducted by NORC at the University of Chicago with Virginia registered voters. The poll features interviews from a probability sample drawn from a registered voter list and interviews from a nonprobability sample, and includes both voters and nonvoters for enhanced analytical purposes. The data collection was multimode (landline, cellphone, and online) and the full sample was calibrated to be representative of the population of registered voters [as well as to be consistent with the actual election results]. Results among all Virginia voters interviewed have a margin of sampling error of plus or minus 2.5 percentage points including the design effect.

## How to Read these Tables

The percentages in the first column, labeled "Total," show the proportion of the electorate. This column is read down vertically. The percentages in the remaining columns are read across horizontally. These percentages show how that group of voters divided their support among the candidates.

| Question | Answer | Total | Democrat Terry McAuliffe | Republican Glenn Youngkin | Other Princess Blanding |
| :---: | :---: | :---: | :---: | :---: | :---: |
