WHAT IF YOU COULD ACCELERATE YOUR STAFF'S PRODUCTIVITY?

Provide efficient access to trusted answers

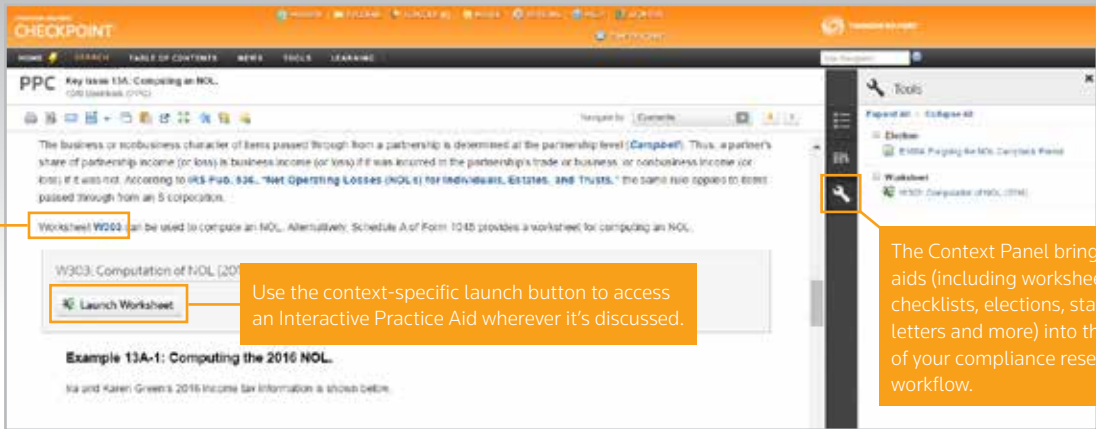

Tax compliance work is more challenging than ever before. Tax laws and regulations are incredibly complex and constantly changing, putting added pressure on you and your staff. Tax season continues to shrink as the IRS takes longer to release final forms and to start accepting tax returns due to identity theft and other issues. Interactions with the IRS are more time-consuming than ever due to the explosion of IRS post-filing notices. PPC 1040, 1041, 1065, 1120 and 1120S Deskbooks have been enhanced with Interactive Practice Aids presented in context so you can cut through your compliance workload with confidence and mitigate busy season pressures. Using an innovative Context Panel, you can easily see in one view all the Interactive Practice Aids available for a particular Key Issue or Illustration (including worksheets, checklists, elections, statements, letters and more) and launch them from wherever they are discussed.

Empower your staff with a proven path to action

Finding the right answer is often just half of the challenge. PPC Deskbooks — now with Interactive Practice Aids — provide a complete start to finish solution. Provide your staff with efficient access to the trusted answers they need and empower them with a proven path to the actions they need to take. Choose to complete Interactive Practice Aids directly within Checkpoint and save them to a Checkpoint folder or export them and work offline. Current linked references in Key Issues to individual Practice Aid documents have been maintained so you can easily preview a Practice Aid before deciding whether to launch its interactive version. This enhanced experience makes it easier than ever to ensure that your clients' tax returns are accurately, consistently and efficiently prepared.

SEE HOW IT WORKS

Take your workflow from answer to action when you launch the interactive version of a practice aid directly from a Key Issue or Illustration.

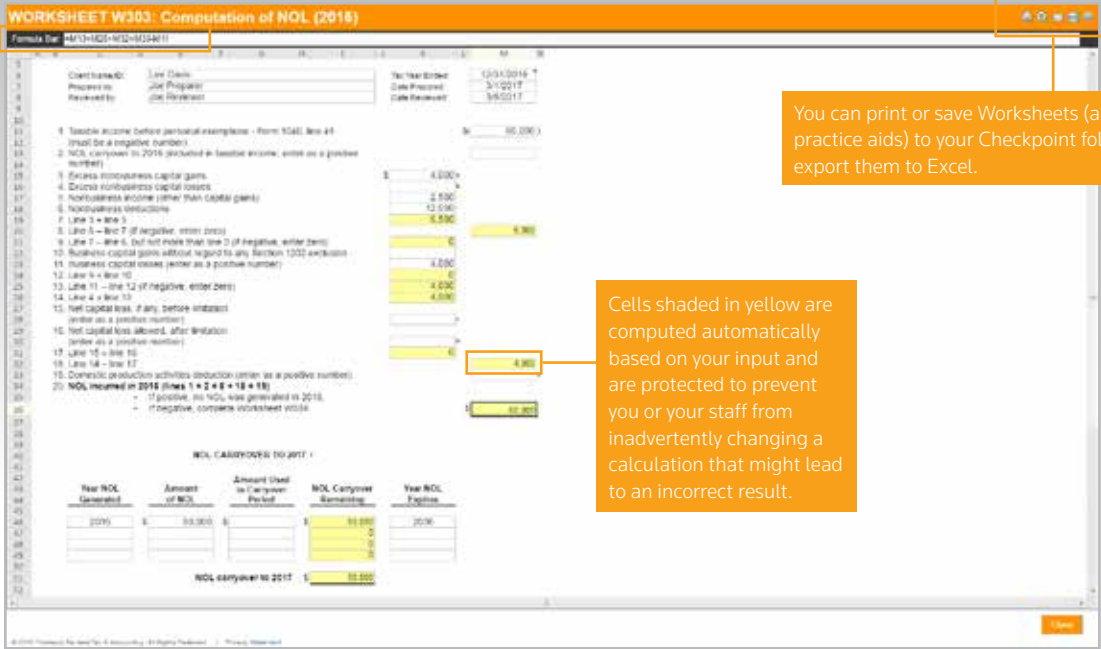

Linked references to practice aid documents enable you to easily preview a practice aid before deciding whether to launch its interactive version.

Use the context-specific launch button to access an Interactive Practice Aid wherever it's discussed.

The Context Panel brings practice aids (including worksheets, checklists, elections, statements, letters and more) into the context of your compliance research workflow.

Letters, Elections, Statements and Checklists are accessed within Checkpoint through an easy-to-use interview format with your choice of output to MS Word or as PDF files. Worksheets simulate MS Excel.

Use the formula bar to see how a calculation was derived.

You can print or save Worksheets (and other practice aids) to your Checkpoint folders or export them to Excel.

Cells shaded in yellow are computed automatically based on your input and are protected to prevent you or your staff from inadvertently changing a calculation that might lead to an incorrect result.

INTERACTIVE PRACTICE AIDS ARE EXCLUSIVE TO PPC DESKBOOKS FROM THOMSON REUTERS CHECKPOINT.
