Executive Summary

The World Bank is evolving to meet changing needs as countries are navigating intertwined crises, tackling global challenges, and working toward a vision of a world free of poverty on a livable planet.

The World Bank (International Bank for Reconstruction and Development or IBRD) is one of the world's largest sources of funding and knowledge for developing countries. We are implementing a new vision to better support country priorities while addressing global challenges, and to drive development with speed, scale, and impact.

This is the fifth impact report covering all bonds issued by the IBRD. The impact report is designed with IBRD bond investors in mind and illustrates how bond proceeds support the financing of sustainable development projects and programs in IBRD member countries and contribute to achieving the Sustainable Development Goals (SDGs). It covers IBRD bonds issued in fiscal year 2023 (FY23), which runs from July 1, 2022, to June 30, 2023.

The World Bank Treasury Investor Relations and Sustainable Finance team prepares the impact report annually, beginning after the World Bank's annual report is published. The team spends roughly six months on data collection, validation and analysis, research, consultation, drafting of content, and design. We work closely with accounting to validate the data set; our results team to collect and validate results metrics; our climate change experts to verify project-level climate data and metrics such as GHG emissions; and project teams to verify and understand project results, conversion calculations, and metrics. See below a timeline of how our reporting has evolved over time along with sustainable capital market developments.

Photo by Dikaseva/Unsplash

The impact report provides updates on the World Bank's strategy, key development topics and emerging themes, perspectives from management, and the latest on enhancements to our reporting alongside highlights of the Sustainable Development Bond (SDB) issuance program. This includes a summary of annual commitments and disbursements, and project results for IBRD-financed projects that are contributing to positive social impact alongside climate change mitigation and/or adaptation objectives.

Inside the Report

A New Vision and Mission. The World Bank is transforming to meet the global challenges facing member countries. In 2023, the World Bank set a new vision to create a world free of poverty on a livable planet highlighting the importance of addressing climate change and other global challenges as we partner with countries to overcome poverty. The new vision and mission are organized across five themes—People, Prosperity, Planet, Infrastructure, and Digital—shaping a new World Bank playbook with solutions to achieve this ambition and taking steps to increase our financing capacity to meet development needs.

Management Voices. Anshula Kant, World Bank Group Managing Director and Chief Financial Officer, provides an update on the World Bank's evolution to meet the intertwined challenges countries are facing as well as the steps we are taking to reach our ambition. Jorge Familiar, Vice President and Treasurer, shares how we are leveraging capital markets, highlighting key transactions and innovations, and engaging investors to support member countries in achieving their development goals while advancing sustainable capital markets development.

The Funding Program. This year the funding program totaled \$42.2 billion in issuance in 20 currencies. In addition to providing a quantitative summary of the issuance program (issuance volumes, maturity, currency), we also provide a narrative overview of the funding program. This includes program goals and a recap of our funding strategy, a look into annual funding volumes and liquidity, and other updates such as the types of debt products that make up the issuance program.

Enhancements. Based on feedback from investors and other stakeholders, we have made a few enhancements to the report this year. First, we have begun using Social Bond project categories in addition to World Bank sectors to present portfolio-level commitments and disbursements and in project-level reporting using an automated process that will evolve over time. In addition to the categories listed in the Social Bond Principles, we also include a category called Governance to describe projects that support World Bank client countries to build capable, efficient, open, inclusive, and accountable institutions aligned with our sustainable development mission. Second, we have included the green bond share in the SDB dataset in project-level reporting to help with disaggregation. Third, we reincluded the cumulative results of closed green bond projects since the inception of the World Bank Green Bond program in 2008 and added projected results of green bond projects in the implementation phase. Finally, we include a list of all bonds issued in FY23 and information on our methodology for sector/project category mapping and SDG mapping of projects in the Resources section of the report.

The Dataset. The SDB project dataset¹ in this report includes 690 IBRD-financed projects that had a new loan commitment or a disbursement in FY23; this includes 55 green bond projects. We add projects to the green bond project portfolio only after IBRD begins disbursing funds. IBRD pools all bond proceeds in one pool. After disbursement requests are made by member countries, we allocate the disbursements from this pool to either the SDB program or the green bond program depending on whether the projects are SDB projects or green bond projects. Most projects will have both social and green components. Disbursements for projects can be allocated partially to the green bond program (supporting the green component) and partially to the SDB program (supporting the sustainable development component), based on the share of climate co-benefits assigned to the project. This means that some IBRD-funded

¹ The dataset includes projects with disbursements or new commitments during FY23. Once IBRD has ceased disbursing funds to a project, it is excluded from the dataset but may still have outstanding loans. "Green bond projects" (or "green bond project portfolio") and "SDB projects" (or "SDB project portfolio"), refer to IBRD-funded projects, the financing of which, is supported by green bonds or SDBs respectively, and references to projects "included in" or "contained in" green bond or SDB programs must be interpreted accordingly. The net proceeds of the bonds described herein are not committed or earmarked for lending to or financing of any particular projects or programs. Payments on the bonds described herein are not funded by any project or program.

projects will therefore be part of both the green bond project portfolio and the SDB project portfolio. Project-level reporting, which is exclusively available on the World Bank website due to the size and comprehensiveness of the dataset, allows for disaggregation of green bond projects from SDB projects.

Portfolio-level Results. We present two sets of aggregated results for the SDB project portfolio. (1) the *projected* results of new projects approved in FY23, and (2) *actual* results achieved by active projects during the fiscal year. We aggregate results based on project/operation-level corporate reporting indicators in the World Bank Group's [Corporate Scorecard](#).² For the green bond project portfolio, we present *projected* results of active green bond projects and the *cumulative achieved* results of closed green bond projects as of June 30, 2023. These indicators reflect results reported by countries implementing IBRD-supported operations in the fiscal year. Some figures are ex-ante estimates such as net GHG emission reduction and energy/fuel savings rather than actual results. It is also important to note that this set of aggregated results represents a fraction of results of IBRD-supported operations, representing those which we can aggregate using the indicators presented in the scorecard. Additional project results are in the Project-level Reporting section of the report. Aggregated portfolio level results for the SDB project portfolio may also include some results of green bond projects.

Project-level Results. We publish detailed reporting at the project-level on the World Bank [website](#). Investors can download the tables in PDF format or request the Excel spreadsheets through a link on our website. We use the [Harmonised Framework for Impact Reporting](#) to present project-level data. This framework has continued to evolve since the World Bank convened other multilateral development banks (MDB) to develop and publish the original version in 2015. In this section we provide project descriptions, links to project documentation, commitment and disbursement figures, percentage of climate finance or “climate co-benefits” for projects approved from FY11 onward, project results, and SDG mapping.

Featured Projects. This year we highlight projects that exemplify how we are supporting countries to address key global challenges—such as biodiversity and nature, climate adaptation and mitigation, enabling digitalization, energy access, food and nutrition security, fragility and conflict, health emergency prevention and preparedness, and water security and access. We feature projects across the SDB and green bond project portfolios.

Other Resources. The impact report is an integral part of the World Bank's evolving suite of sustainability and results reporting. The Resources section of the report provides additional information about our approach to impact reporting, and an explanation of the alignment of the World Bank's Green Bond and SDB frameworks to the Green Bond Principles and Sustainability Bond Guidelines published by the International Capital Market Association (ICMA). We also describe and link to additional World Bank results and core sustainability reporting to provide additional context for investors and other stakeholders, such as the Global Reporting Initiative (GRI), the Sustainability Review, and the World Bank's Climate-Related Financial Disclosures aligned with the TCFD recommendations. Finally, we list the key groups that hold the World Bank accountable to its clients and shareholders.

External Review. For the second year, the report includes a post-issuance external review of the commitments and disbursements of IBRD-financed loans made possible by bond issuance. Management's attestation and the related schedule of commitments and disbursements along with the conclusions of the external review can be found at the end of the report.

Notes. Dollar (\$) figures in this document are U.S. dollar equivalent values unless otherwise specified.

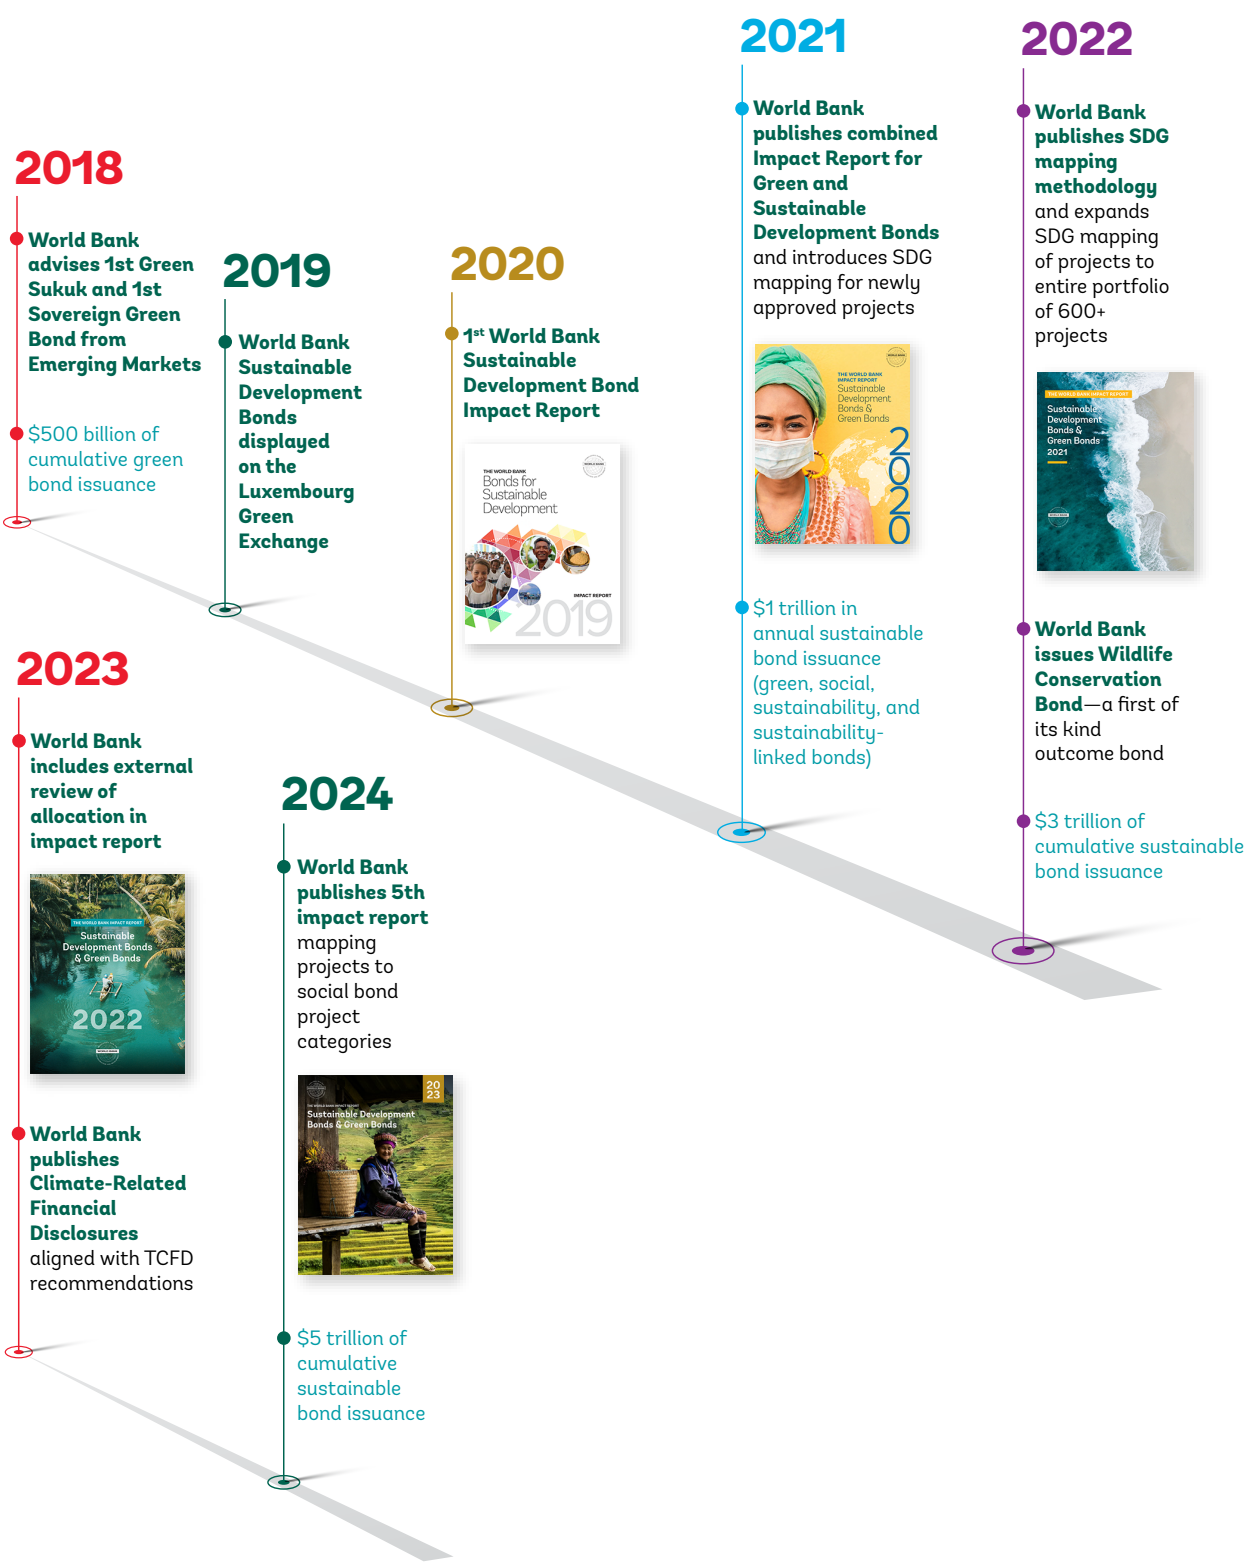

² FY23 is the last year of reporting using the current World Bank Group Corporate Scorecard, which presents results for the World Bank (IBRD and the International Development Association (IDA) results presented together), International Finance Corporation (IFC), and MIGA. The results in this report are a subset of those presented in the Corporate Scorecards as they include results of IBRD-financed operations including “blend” projects. Some countries that are IDA-eligible based on per capita income levels are also creditworthy for some IBRD borrowing. They are referred to as “blend” countries. As part of its evolution, the World Bank Group is developing a new scorecard and associated metrics to monitor results aligned with the World Bank Group's new vision and mission. The [new World Bank Group Corporate Scorecard](#) will span FY24-30, with 2024 serving as an initial transitional year, and concluding in the final reporting year of the SDGs.

Impact Reporting Journey

The World Bank Treasury Investor Relations team started this journey with IBRD's first green bond in 2008. And you can see in the timeline below that sustainable capital markets have evolved tremendously since then with new initiatives, products, and guidance. Initially, we provided individual project stories and newsletters, complemented by the World Bank project database to report on impact to investors before guidance for impact reporting existed in the market. In March 2015, the World Bank, with the African Development Bank (AfDB), the European Investment Bank (EIB), and the International Finance Corporation (IFC), developed the first Harmonised Framework for Impact Reporting, which outlined core principles and recommendations, core indicators, and reporting templates for energy efficiency and renewable energy projects. Later in 2015, we published the World Bank Green Bond Impact Report using this guidance. Today, ICMA coordinates and maintains the [Harmonised Framework for Impact Reporting](#), for green bonds and social bonds.

We expanded impact reporting to cover Sustainable Development Bonds in 2020, thereby reporting on all IBRD bond issuance. In 2021, we merged reporting into a single impact report and developed a [methodology for mapping World Bank projects to the SDGs](#) in collaboration with the Stockholm Environment Institute that we published in 2022. Today, we are using AI tools such as machine learning and natural language processing models to cull relevant information from IBRD's large project dataset for mapping to the SDGs and market sectors and expanding our use of machine learning to gather richer information, automate manual processes, and aid harmonization.

2018

World Bank advises 1st Green Sukuk and 1st Sovereign Green Bond from Emerging Markets

\$500 billion of cumulative green bond issuance

2019

World Bank Sustainable Development Bonds displayed on the Luxembourg Green Exchange

Foreword

A Message from the Managing Director and World Bank Group Chief Financial Officer

The shocks of the last few years have been devastating for the world's most vulnerable people and the income gap between the world's wealthiest and poorest countries is widening for the first time in a century.³ Given this backdrop, it is not surprising that as a global community, we are behind in achieving the SDGs. There is greater urgency, now more than ever, to overhaul our efforts and strive for effective change and lasting impact.

No single institution can do this alone. Countries, development partners, the private sector, and civil society must work shoulder to shoulder. The World Bank has a central role to play.

In October 2023, the World Bank set a new vision and mission to create a world free of poverty on a livable planet—formalizing the mandate to both fight poverty and explicitly address climate change and other global challenges, leading the way among multilateral development finance institutions.

We are streamlining our approach in many ways, including reducing project preparation time and simplifying rules and processes. We have introduced a new scorecard centered on outcomes and evidence, ensuring we focus less on lending volumes and more on the number of girls in school, how many jobs are created, tons of CO₂ emissions avoided, and the amount of private sector dollars mobilized.

We have increased our financial capacity to meet development needs. We have adjusted our equity-to-loan ratio to

³ Chimes, T., Gootjes, B., Kose, A., Wheeler, C., 2024, [The Great Reversal: Prospects, Risks, and Policies in International Development Association Countries](#), World Bank.

“...the World Bank set a new vision and mission to create a world free of poverty on a livable planet—formalizing the mandate to both fight poverty and explicitly address climate change and other global challenges, leading the way among multilateral development finance institutions.”

secure up to \$40 billion in additional lending commitments over 10 years from IBRD's balance sheet while preserving our triple-A credit rating, which is essential to provide low-cost lending to member countries. We have also doubled the bilateral guarantee limit to \$20 billion.

Our efforts to increase capacity and make World Bank funding more efficient include introducing a shareholder hybrid capital instrument and the Portfolio Guarantee Platform. At our Spring Meetings earlier this year, the first group of 11 countries committed a total of \$11 billion to these instruments, which when using the World Bank's unique leveraging ability, have the potential to expand financial capacity by up to \$70 billion over 10 years. We have extended the maturity of IBRD loans up to 50 years and put in place a system to reduce interest rates for projects that address global challenges, which will be supported by the Livable Planet Fund.

Importantly, we are refocusing the World Bank as a knowledge hub. To do this, we are bringing the expertise of World Bank Group staff and their knowledge to the forefront of our country-driven model. This knowledge remains central to Country Partnership Frameworks, where we partner with governments to craft a focused development plan that merges countries' ambitions with World Bank expertise.

The progress and reforms I have outlined are part of an ongoing journey to become a better, bigger, and more effective World Bank. We are pleased to showcase in this report the significant impact the World Bank is having and what we aim to achieve. Investors' contribution to the World Bank's sustainable development mission through investment in IBRD bonds remains critical to supporting these efforts and closing the gap in achieving the SDGs.

[Anshula Kant](#), Managing Director and World Bank Group Chief Financial Officer

A Message from the Vice President and Treasurer

As the world reels from diverse, yet interconnected crises and economic uncertainty, the World Bank is steadfast in its support for member countries through long-term, on-the-ground engagements that deliver technical assistance, low-cost financing, and risk management in line with our mission to end poverty and boost shared prosperity on a livable planet. The World Bank's bond issuance platform and engagement with investors on the sustainability and impact of World Bank projects and programs are at the heart of these efforts.

This is IBRD's fifth impact report covering all bonds. We are pleased to deliver a comprehensive reporting of the bonds we have issued, the allocation of bond proceeds, and the impact of the 690 projects that our financing supports in member countries toward Paris Alignment and achieving the SDGs. In FY23, 93 percent of IBRD projects had a climate financing component, contributing to the reduction of 6.4 million tCO₂eq net GHG emissions annually, and active projects are providing 4 million people with new or improved electricity service and almost 68 million people with safety net programs, among other impressive positive impact. For a second year, we have included the results of an independent external review of the allocation of bond proceeds in the impact report to enhance transparency.

Since we published the first impact report covering all IBRD bond issuance at the height of the pandemic, and as a pioneer in the labeled bond market, we have striven to improve reporting each year based on feedback from investors and other counterparts, while we follow changes in sustainable capital markets and shifting reporting dynamics. We continue to invest time and resources to improve reporting and serve as a model for transparency and disclosure.

"...the World Bank is steadfast in its support for member countries through long-term, on-the-ground engagements that deliver technical assistance, low-cost financing, and risk management in line with our mission to end poverty and boost shared prosperity on a livable planet."

We are also working hard to improve efficiency and continue to provide financial innovation. We have introduced new products, like hybrid capital, to increase the World Bank's financial capacity. We continue to innovate with outcome bonds which provide investors with the opportunity to support specific development projects and outcomes with greater risk-sharing. We are engaging with credit rating agencies, banks, development partners, and investors to bring new financial tools to the market that not only scale up the amount of financing we can offer, but also to manage risk.

Since 2009, we have been helping member countries build financial resilience and enhance their response to natural disasters with transactions that transfer catastrophe risk to the financial markets. In FY23, we executed the single largest country catastrophe bond and swap transaction to provide Chile \$630 million in financial protection against earthquakes.

Developing countries are caught in the crosshairs of climate change. World Bank financing and continued innovation are essential to support climate action and transition. So, we have increased our climate finance target to devote 45 percent of FY25 annual financing for IBRD and IDA to climate-related projects, split equally between mitigation and adaptation, attacking methane emissions, and helping scale high-integrity carbon markets on forestry.

Our efforts are not just about financing and efficiency; we are realigning our activities and setting a model for MDB engagement. These efforts are ultimately about providing essential support to countries to reduce carbon emissions and build resilience while supporting inclusive and sustainable economic growth and poverty reduction that is aligned with our countries' Paris Alignment trajectories. Collaboration with investors and other capital market and development partnerships are at the core of our business, all in pursuit of our collective success.

[Jorge Familiar](#), Vice President and Treasurer

Introduction

FY23 Snapshot

A SELECTION OF RESULTS ACHIEVED BY PROJECTS IN FY23⁴

690

projects supported by IBRD financing

93%

of projects with dedicated climate components⁵ equivalent to 42% of IBRD commitments⁶

-6.4 million

tCO₂eq net GHG emissions annually⁷

67.9 million

people covered by social safety net programs

11.1 million

people provided with essential health, nutrition, and population services

4.3 million

people with access to improved water sources

\$42.2 billion

in bonds issued⁸

\$38.6 billion

in new lending committed⁹

\$266.8 billion

in bonds outstanding

\$25.5 billion

in funds disbursed

⁴ In FY23, Sustainable Development Bonds supported the financing of a portfolio of 690 IBRD projects that had a new commitment and/or a disbursement during the fiscal year. The majority of results highlights are a subset of the Achieved Results presented in the Impact section of this report, which include selected outcomes and outputs of IBRD-supported activities achieved by client countries during the fiscal year using [World Bank Corporate Scorecard Tier 2](#) indicators.

⁵ Dedicated climate components include what the World Bank calls "climate co-benefits." The calculation for climate co-benefits is based on the joint Multilateral Development Bank methodologies for tracking climate finance in adaptation and mitigation (published in the annual [Joint Report on Multilateral Development Banks' Climate Finance](#)). For more information please see: <https://www.worldbank.org/en/news/feature/2021/03/10/what-you-need-to-know-about-climate-co-benefits>. These figures refer to new commitments made in FY23.

⁶ World Bank FY23 Climate-Related Financial Disclosures: <https://thedocs.worldbank.org/en/doc/23a63a4bde452fe676c0843ab879405a-0340022023/original/World-Bank-FY23-Climate-Related-Financial-Disclosure.pdf>

⁷ The indicator refers to ex-ante annual net GHG emissions at the portfolio level, calculated as the sum of annual net emissions for projects approved during FY23. It applies to IBRD operations where agreed GHG accounting methodologies exist and is based on ex-ante estimation performed during project preparation.

⁸ Net proceeds of the bonds described herein are not committed or earmarked for lending to, or financing of, any particular projects or programs. Payments on the bonds described herein are not funded by any project or program.

⁹ New lending committed refers to commitments made by IBRD in FY23 net of cancellations and terminations.

About the World Bank

An Evolving World Bank

The **International Bank for Reconstruction and Development (IBRD)** was established in 1944 and is the original member of the World Bank Group.¹⁰ IBRD is an international organization and global development institution owned by 189 member countries. As the largest development bank in the world, it supports the mission of the World Bank Group by providing loans, guarantees, risk management products, and advisory services to middle-income and creditworthy low-income countries. This report focuses on IBRD bond issuance, projects, and results.

As the leading development financier for more than 75 years, the World Bank has made major contributions to poverty reduction and economic development around the world. However, the world is facing a set of intertwined challenges—including a climate crisis, debt, food insecurity, pandemics, and fragility—and a need to accelerate access to clean air, water, and energy. We cannot tackle poverty without evolving to become a better and bigger bank.

The World Bank's ambitious new vision and mission—**to create a world free of poverty on a livable planet**—acknowledges this confluence of challenges and positions us to help families put food on the table, send their children to decent schools, and enjoy the dignity of work. Our focus is on addressing global challenges, and driving development with speed, scale, and impact.

Speed, Scale, and Impact. We are building a faster, more agile World Bank, improving our operational effectiveness and efficiency. Our goal is to reduce project approval times by one-third before the end of 2024, and we already have made great progress. We have launched new financing tools that include the Portfolio Guarantee Platform, hybrid capital instruments, and the new Livable Planet Fund to boost lending capacity and enable the World Bank to take on more risk to help address shared global challenges. We are strengthening our collaboration with multilateral development groups and other partners to deepen and amplify our ability to make change.

The private sector is essential. Investors such as pension funds, insurance companies, banks, asset managers, and central banks and official institutions play an immeasurable role by investing in World Bank bonds to support lending to member countries for sustainable development programs.

Knowledge is key, so we are refocusing on the World Bank as a knowledge bank, providing clients with rapid access to policy advice and expertise. We have also launched the [Private Sector Investment Lab](#) to identify barriers and potential solutions to private investment in emerging markets. And we are bringing greater transparency to risk data through the [Global Emerging Markets Risk Database](#) (GEMs).¹¹

It is all underpinned by accountability and focus. Our new [Corporate Scorecard](#) is pointed toward outcomes and evidence and will provide a clear picture of progress on all aspects of our vision and mission. We will begin reporting on a subset of new outcome-oriented metrics in June 2024 and roll out the complete scorecard in October 2024.

Accelerating Climate Action

Accelerating and integrating climate action and development is central to the World Bank's new playbook. The World Bank Group's [Climate Change Action Plan 2021-2025](#) lays out its strategy to increase climate finance to reduce emissions, strengthen climate change adaptation, and align financial flows with the goals of the Paris Agreement. We are committing to transformative public and private investments in five key systems—energy; agriculture, food, water, and land; cities; transport; and manufacturing—that generate 90 percent of GHG emissions and face significant adaptation challenges.

¹⁰ International Bank for Reconstruction and Development (IBRD), International Development Association (IDA), International Finance Corporation (IFC), Multilateral Investment Guarantee Agency (MIGA), and International Centre for Settlement of Investment Disputes (ICSID)

¹¹ <https://www.gemriskdatabase.org/>

The Action Plan committed the World Bank Group to reach an average of 35 percent of its annual financing for climate-related projects by 2025. For IBRD and IDA, half of this was to be dedicated to adaptation. The World Bank Group is pushing to do more to battle climate change and do it faster. In December 2023, we announced a new commitment to devote **45 percent of IBRD and IDA annual financing to climate-related projects** for the fiscal year that runs from July 1, 2024, to June 30, 2025.

The World Bank is also integrating nature into climate action, and the Action Plan recognizes that a combined approach that addresses both climate and nature risks is needed. We are stepping up investments in nature-based solutions and integrated management of ecosystems, and supporting development of wealth accounting, economy-ecosystem-climate modelling, and efforts to bridge the biodiversity financing gap. The World Bank is [piloting](#) a methodology to systematically identify, monitor, and track nature-positive IBRD- and IDA-financed investments and our contributions to the implementation of the Kunming-Montreal Global Biodiversity Framework in a way that is tailored to the development context. The adoption of the new World Bank Group Corporate Scorecard will help better track the impact of this financing on nature.

Paris Alignment

The World Bank began **aligning 100 percent of new operations, starting from July 1, 2023 to the goals of the Paris Agreement.**

Paris Alignment means that World Bank Group financial support for any country, public or private entity, as applicable, will be consistent with the objectives of the Paris Agreement and a country's pathway toward low GHG emissions and climate-resilient development. Paris Alignment is assessed in the broader context of the World Bank Group's mission and vision, equity concerns, and the principle of common but differentiated responsibilities and respective capabilities, considering countries' different national circumstances.

The World Bank Group's [Paris Alignment](#) process entails an integrated vetting approach—screening, managing, and reducing climate risks for both mitigation and adaptation—for every project, using publicly disclosed [Instrument Methods](#) (World Bank) and [Sector Notes](#) in line with the [MDB Paris Alignment Approach](#).

Addressing Global Challenges

The World Bank has identified several key global challenges to focus on in the next few years. These challenges are unique as they affect many countries and have cross-border implications. The costs of addressing them are high and borne by individual countries, while the benefits are often shared across borders, putting them at risk of being under-addressed. Addressing the following challenges will be key to advancing the World Bank’s new vision and mission:

The World Bank selected these eight areas considering the need to prioritize global public goods; address the most pressing needs facing many countries at once (often because of global factors); and the World Bank’s comparative advantage to provide support. While these are not the only challenges affecting many countries, without addressing them, sustained progress on poverty, shared prosperity, and a livable planet will not be possible. The list will be reviewed and will evolve over time, as circumstances change.

The Impact section provides examples of projects that are contributing to solutions in each of these eight areas with examples provided from both the SDB and green bond project portfolios.

Sustainable Development Bonds

ACHIEVED RESULTS

In FY23, the proceeds from Sustainable Development Bonds contributed to **\$25.5 billion** in disbursements¹² to projects helping member countries make progress toward national priorities and the SDGs. Below is a selection of actual results reported for projects in FY23:¹³

Sustainable & Inclusive Growth

6.7 million people with enhanced access to transportation services

4.9 million students with direct interventions to enhance learning

1.1 MW of generation capacity of energy constructed or rehabilitated

8.9 million beneficiaries of job-focused interventions¹⁴

4 million people with new/improved electricity service

Of which:

- **800,329 beneficiaries** of financial services¹⁵
- **631,791 farmers** accessing agricultural assets/services
- **5.2 million teachers** recruited/trained
- **731,570 beneficiaries** of job-focused interventions
- **913,982 students** benefiting from direct interventions to enhance learning¹⁶
- **544,482 people** benefiting from labor market programs

101,513 people with new/enhanced access to broadband internet

¹² The IBRD Sustainable Development Bond project portfolio comprises 690 projects including those that closed during FY23.

¹³ These results include outputs and outcomes of IBRD-supported activities. Results are reported for active IBRD and blend operations and those that closed within the reporting period. Some countries that are IDA-eligible based on per capita income levels are also creditworthy for some IBRD borrowing. They are referred to as "blend" countries. The results reported are those achieved by client countries, with support from the World Bank, during the fiscal year except for net GHG emissions which is based on ex-ante estimates rather than actual results. These results represent a subset of results and are dynamic from year to year. Annual data may fluctuate significantly due to the size or number of projects reporting data during a given fiscal year. These results are mainly drawn from Corporate Results Indicators (CRIs), which are sector outcome or output indicators that can be measured and monitored at the project level and aggregated across operations and countries. CRIs are integrated in the results frameworks of individual operations. CRIs can be supplemented by customized, project-specific results indicators. More information on the definition of each indicator can be found at <https://scorecard.worldbank.org/>.

¹⁴ This indicator is a composite indicator consisting of six CRIs, including one with the same indicator name that captures the number of beneficiaries of a broad range of job-focused interventions.

¹⁵ Indicates financial services specifically focused on job creation, job quality, and youth employment.

¹⁶ These results are for technical and vocational education and training, and tertiary learning only.

2 million people and
141,423 businesses
benefiting from financial services¹⁷

273,138 ha
with new/improved irrigation or
drainage services

487,502 farmers
adopting improved agricultural
technology

Human Capital

67.9 million people
covered by social safety
net programs

10.7 million people
with improved sanitation services

11.1 million people
with essential health, nutrition,
and population services

3.4 million people
with improved urban
living conditions

4.3 million people
with access to improved
water sources

¹⁷ These results are also included in the results reported for the composite indicator, “beneficiaries of job-focused interventions.”

Sustainable Development Bonds

PROJECTED RESULTS

In FY23, IBRD made **\$38.6 billion** in new commitments across **123 operations** to help World Bank member countries make progress toward national priorities and the SDGs. Below is a selection of estimated results¹⁸ these projects are expected to deliver over the project lifecycle:

Sustainable & Inclusive Growth

34 million people with new/improved electricity service

116,500 farmers adopting improved agricultural technology

3,350 MW of generation capacity of energy constructed or rehabilitated

190,100 beneficiaries of job-focused interventions

5.1 million people with new/enhanced access to broadband internet

Of which:

- **30,000 beneficiaries** reached with financial services¹⁹
- **77,500 farmers** accessing agricultural assets/services
- **72,300 people** accessing job opportunities
- **10,300 teachers** recruited/trained

420,000 people with enhanced access to transportation services

¹⁸ The expected results, presented above, have been aggregated using a set of World Bank Corporate Results Indicators in the [World Bank Group Corporate Scorecards](#) and therefore represent a subset of expected results from new operations approved in FY23. These results include outputs and outcomes of IBRD-supported activities. Results are reported for IBRD and Blend operations approved in FY23. Some countries that are IDA-eligible based on per capita income levels are also creditworthy for some IBRD borrowing. They are referred to as "blend" countries. These results are drawn from Corporate Results Indicators (CRIs), which are sector outcome or output indicators that can be measured and monitored at the project level and aggregated across operations and countries. More results from these projects are available on the impact report [website](#).

¹⁹ These are financial services specifically focused on job creation, job quality, and youth employment. Beneficiaries include both individuals and businesses.

30,000 people and
86,000 businesses

benefitting from financial services²⁰

Human Capital

6.3 million people
with social safety net programs

3.2 million people
with improved sanitation services

853,200 people
with essential health, nutrition, and
population services

39.7 million people
with access to improved
water sources

5 million students
with direct interventions to
enhance learning

Resilience

27 billion MJ
of energy or fuel use saved

-6.4 million tCO₂eq
net GHG emissions annually²¹

²⁰ These results are also included in the results reported for the composite indicator, "beneficiaries of job-focused interventions."

²¹ The indicator refers to ex-ante annual net GHG emissions at the portfolio level, calculated as the sum of annual net emissions for projects approved during FY23. It applies to operations where agreed GHG accounting methodologies exist and is based on ex-ante estimation performed during project preparation.

Green Bonds

ACHIEVED RESULTS

Since 2008, the proceeds from World Bank Green Bonds²² contributed to **\$16.3 billion** in disbursements to projects helping member countries pursue a transition to low-carbon and climate resilient development and growth. Below is a selection of the cumulative results reported for green bond projects that closed on or before June 30, 2023:

27.3 million tCO₂eq

GHG emissions avoided/
reduced annually

27.5 million people

benefitted from
green bond projects²³

Renewable Energy and Energy Efficiency

9.2 billion MWh

annual energy savings

4,876 MW

of renewable energy capacity added

Clean Transportation

202 km

of rail tracks/BRT/public transport/
pedestrian walkways constructed/
rehabilitated

²² The World Bank Green Bond project portfolio comprises 139 projects, including projects that have closed, and two that were cancelled. The green bond project results presented above are selected cumulative results of closed projects with an Implementation Completion Report available during the reporting period (as of March 2024). The results do not represent all countries or regions where the World Bank supports the financing of projects and should not be considered a comprehensive accounting of results. Additional project results are presented in the Project-level Reporting which can be downloaded in PDF or requested in Excel directly on the website's impact reporting. The full set of project results can be found at <http://projects.worldbank.org>.

²³ This is an aggregate of beneficiaries across sectors for closed projects in the green bond project portfolio. In each project, if there are multiple interventions and their respective beneficiaries, only the highest count of beneficiary is accounted for to avoid double counting. More detailed intervention specific beneficiaries at the project level are available in the green bond tables on the World Bank Impact Report [website](#).

Water and Wastewater Management

44 million m³

of annual water savings

23 million m³

of wastewater treated, reused, or avoided annually

Solid Waste Management

3.3 million tons

of waste prevented, minimized, reused or recycled annually

Living Natural Resources and Land Use

7.8 million ha

of area under sustainable management practices

Green Bonds

PROJECTED RESULTS

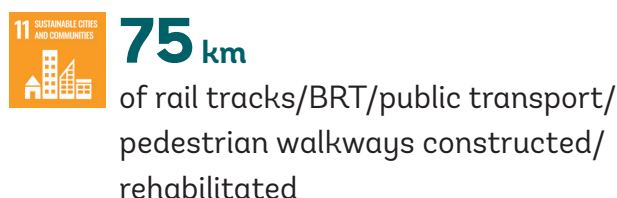

In FY23, the proceeds from World Bank Green Bonds²⁴ contributed to **\$955 million** in disbursements to projects helping member countries pursue a transition to low-carbon and climate resilient development and growth. Below is a selection of projected results reported for active green bond projects as of June 30, 2023:

Renewable Energy and Energy Efficiency

Clean Transportation

²⁴ The current World Bank Green Bond project portfolio comprises 139 projects, including projects that have closed, and two that were cancelled. The green bond project results presented above are selected cumulative results of closed projects with an Implementation Completion Report available during the reporting period (as of March 2024). The results do not represent all countries or regions where the World Bank supports the financing of projects and should not be considered a comprehensive accounting of results. Additional project results are presented in the Project-level Reporting which can be downloaded in PDF or requested in Excel directly on the website's impact reporting. The full set of project results can be found at <http://projects.worldbank.org>.

²⁵ This is an aggregate of beneficiaries across sectors for active projects in the green bond project portfolio. In each project, if there are multiple interventions and their respective beneficiaries, only the highest count of beneficiary is accounted for to avoid double counting. More detailed, intervention-specific beneficiaries at the project level are available in the green bond tables on the World Bank Impact Report [website](#).

Water and Wastewater Management

17 million m³
of annual water savings

12 million m³
of wastewater treated, reused, or avoided annually

12,440 tons or m³
of raw/untreated sewage sludge treated & disposed of

Solid Waste Management

2.2 million tons
of waste prevented, minimized, reused or recycled annually

Living Natural Resources and Land Use

22.6 million ha
of area under sustainable management practices

Featured Projects

China

P164047

Forest Ecosystem Improvement in the Upper Reaches of Yangtze River Basin Program

Sichuan Province is a global biodiversity hotspot covering half the upstream area of the Yangtze River including critical forestlands. The most significant of China's forestry programs is the Large-Scale Greening Sichuan Program (LSGS), which aims to improve the natural ecosystem by afforestation and other landscape restoration interventions. This project is embedded in the LSGS and seeks to improve the quality and effectiveness of selected forestry operations by establishing the required institutional capacity in project areas, supporting innovative new planting techniques and forest management practices, mainstreaming international and national best practices into provincial operations improving the sustainability and efficiency of forest financial mechanisms. The project aims to restore forest ecosystems, improve the delivery of public goods and services, and increase carbon capture.

 **IBRD Commitment:** \$150 million

 **Expected results include:**

- 784,333 tCO₂eq emissions reduced annually
- 130,000 ha of mixed-species plantation established through afforestation and restoration of degraded forests
- 100,000 ha of monoculture forests restored using a diversified forest structure
- 86 provincial country and forest farms long-term forest management plans developed
- Sequestration of 23.52 million tCO₂eq over the program's lifetime

 **Biodiversity component:** 87%

 **Climate co-benefits:** 100%

 **Closing:** 2024

Notes: While listed under a single heading these projects are cross-sectoral and could be listed under more than one heading. The projects featured in this section are for illustrative purposes only. No assurance can be provided that disbursements for projects with these or similar characteristics will be made by the World Bank in the future. Net proceeds of the bonds described herein are not committed or earmarked for lending to or financing of any particular projects or programs. Payments on the bonds described herein are not funded by any project or program.

📍 Türkiye

P179345

Climate Resilient Forests Project

Türkiye's systems to manage wildfires have struggled to cope with the increased scale and intensity of wildfires, which are being exacerbated by climate change. This heightened risk undermines Türkiye's climate change mitigation efforts and endangers the delicate balance of its forests and communities' stability. The project aims to strengthen institutional capacity for integrated fire management, increase resilience of forests and people to wildfires in 14 high-risk provinces that are home to about 20 million people, and respond promptly and effectively in the event of an eligible crisis or emergency. This project showcases Türkiye's application of a 5R (Review, Risk Reduction, Readiness, Response and Recovery) integrated forest management approach for shaping climate resilient forest landscapes..

💰 **IBRD commitment:** \$400 million

👤 **Target Population:** Rural communities in/around forest lands, particularly those vulnerable to wildfires/climate change impacts

★ **Expected results include:**

- 6,800,000 ha of high-risk forest area with increased wildfire resilience
- 21,000 vulnerable households benefitting from improved livelihood opportunities
- 80,000 km of forest roads maintained for increased forest and wildfire resilience
- 2,000 women-led enterprises in forest villages supported financially
- 40,000 ha of land area under sustainable land management practices to increase climate and wildfire resilience
- 6,000,000 people provided increased protection against wildfires

🌿 **Biodiversity component:** 35%

📍 Indonesia

P178009

Mangroves for Coastal Resilience Project

Mangroves are the focus of this project because of their importance for livelihoods, biodiversity, and climate mitigation and adaptation. Indonesia's mangrove ecosystems are the largest and most productive in the world, accounting for 22 percent of the total global mangrove area. They also store 3.14 billion tons of CO₂eq or the equivalent of approximately 2.5 billion passenger vehicles driven for one year. Despite their significant value, mangroves are threatened by deforestation and unsustainable use. Over the past 30 years, Indonesia lost approximately 800,000 hectares of mangroves. The project is designed to support the government of Indonesia's ambition to rehabilitate 600,000 hectares of mangroves by 2024. Initially focused on four provinces—East Kalimantan, North Kalimantan, North Sumatra, and Riau—the integrated conservation, rehabilitation, and livelihood improvement model can be replicated throughout the country.

💰 **IBRD Commitment:** \$400million

★ **Expected results include:**

- 9,749 people using sustainable livelihood activities
- 2,255,593 tCO₂eq emissions reduced annually
- 45,000 ha mangrove area rehabilitated and managed
- 28,500 people participating in cash-for-work activities

🌱 **Climate co-benefits:** 89%

📍 Morocco

P178763

Morocco Climate Operation: Support to the Nationally-Determined Contribution

Morocco's revised Nationally-Determined Contribution (NDC) reflects a commitment to increased climate action, emphasizing adaptation and a 45.5 percent GHG emission reduction by 2030. The NDC deepens and expands the Kingdom's ambitions in terms of adaptation and notably includes new areas: meteorology, sensitive environments (coastline, mountains, and oases), habitat/land-use planning, and health. Building on recommendations in the [Country Climate and Development Report](#), this project aims to implement a "whole of government" approach by strengthening Morocco's institutional capacity to implement its NDC and enhancing climate resilience for vulnerable groups and ecosystems.

💰 **IBRD commitment:** \$350 million

👤 **Target Population:** Vulnerable groups

★ **Expected results include:**

- 1,000,000 farmers and their families with national health insurance coverage
- 26,600 ha of vulnerable ecosystems benefiting from climate-resilient land use interventions
- 20,000 beneficiaries of small hydraulic infrastructures in the targeted oasis areas
- 1,000,000 million people participating in awareness campaigns on climate issues
- National Green Taxonomy adopted for the financial sector
- Green sovereign bond issued in accordance with international standards

🌱 **Climate co-benefits:** 81%

📍 Argentina

P178067

Buenos Aires—Belgrano Sur Passenger Railway Line Modernization Project

The Belgrano Sur Line project finances the electrification of the railway line, while also working on rail yard upgrades and track renovations. The shift from diesel fueled trains to electric trains is expected to result in an estimated reduction of GHG emissions of 758,000 tons of CO₂ eq. In addition to the project's environmental benefits, it also delivers socioeconomic benefits by providing public transport accessibility to areas with the lowest socioeconomic status in the Buenos Aires Metropolitan Area and has potential for increased demand due to the highly populated areas it serves and the absence of quality public transport alternatives. The project also supports institutional strengthening of the transport ministry, which will ultimately improve the reliability and efficiency of the urban rail network, user safety and personnel security, and access for women.

💰 **IBRD Commitment:** \$600 million

★ **Expected results include:**

- 18,945 tCO₂eq emissions reduced annually
- 83,557 passengers per day
- 25,067 social fare passengers per day on the Belgrano Sur Line

🌱 **Climate co-benefits:** 99%

Egypt

P172548

Greater Cairo Air Pollution Management and Climate Change Project

This project aims to reduce air and climate emissions from critical sectors and increase resilience to air pollution in Greater Cairo. The overall approach is to support a combination of institutional and investment actions to address the major determinants of air and climate pollutants. The solid waste management component supports the development of new and/or upgrading of existing waste management infrastructure in one major facility, closes and rehabilitates a dumpsite, and strengthens the regulatory framework for waste management. Other project components include piloting electric buses and implementing behavior change activities in the communities.

 **IBRD Commitment:** \$200 million

 **Expected results include:**

- 461,000 tCO₂eq emissions reduced annually
- 30% reduction in GHG emissions (tCO₂eq) from municipal solid waste and 23% reduction from public buses
- 20% reduction of large-scale solid waste fires per year
- 1 municipal solid waste dumpsite closed and rehabilitated
- 18 million people benefiting from improved air quality

 **Climate co-benefits:** 85%

 **Closing:** 2027

📍 Argentina

P178609

Strengthening Data Infrastructure to Close the Digital Gap

The project helps finance broadband infrastructure to reach unconnected communities that currently lack digital infrastructure, while particularly targeting rural areas and the female population, both of which are currently underserved with quality digital infrastructure. The project also aims to strengthen digital skills to better equip individuals and businesses for the jobs and economy of the future and finances a decentralized network of data centers to strengthen efficiency and resilience of data infrastructure.

💰 **IBRD commitment:** \$200 million

👤 **Target Population:** Communities in unconnected and underserved areas, particularly women and vulnerable groups

★ **Expected results include:**

- 350,000 people provided with new or enhanced access to broadband internet (50% female)
- 15,000 individuals trained in digital skills (incl. 10,000 women and girls, and 1,000 people with disabilities)
- 3,000 civil servants and government employees trained in digital skills (70% female)
- 2,000 individuals utilizing advanced digital skills to secure new employment opportunities or receive promotions or additional responsibilities as a result of training received under the project (50% female)
- 1,500 new rural schools covered by broadband

📍 Cabo Verde

P170236

Renewable Energy and Improved Utility Performance Project

The project aims to reduce the cost of power generation through increased penetration of cheaper renewable energy sources and the restructuring of a private commercial electricity utility. Moving away from using imported fossil fuels, this project finances investments to integrate additional Variable Renewable Energy (VRE) into the grid and provide sustainable and resilient electricity services to public health buildings. It also provides transaction advisory services for the restructuring and privatization of the local electricity and water company and technical assistance and capacity building to the National Directorate of Industry, Commerce and Energy for improved energy system planning. Ultimately, this project aims to lower the cost of electricity services, increase energy independence, and reduce exposure to volatile petroleum price fluctuations and GHG emissions.

💰 **IBRD Commitment:** \$3.5 million

★ **Expected results include:**

- 6,781 MWh renewable energy produced annually
- 3.9 MW renewable energy capacity added
- 9,000 tCO₂eq emissions reduced annually
- Power system losses decreased from 26.1% to 18%

🌍 **Climate co-benefits:** 100%

📍 South Africa

P177398

Eskom Just Energy Transition Project

The project aims to address South Africa's reliance on coal by providing support to decommissioning and repurposing the Komati coal-fired power plant. The project will repurpose the plant with renewable energy sources such as solar, wind, and batteries, enhancing power supply quality and grid stability. It will help create new jobs, retain existing ones during the transition, and offer reskilling opportunities for the 661 affected employees. The project also focuses on minimizing social and economic risks for workers and communities by promoting stakeholder engagement and diversifying local economies to reduce coal dependency, benefiting around 15,000 local community members. This pioneering initiative will provide valuable lessons for future social protection programs and support the public utility in building technical capacities for decommissioning further coal-fired power plants.

💰 **IBRD commitment:** \$439.5 million

👤 **Target Population:** Employees of Komati power plant and community members affected by plant decommissioning

★ **Expected results include:**

- 100% of workers at Komati retrained or re-deployed
- 374,970 tCO₂eq emissions reduced annually
- 2,521 MW of energy capacity from renewable energy sources and batteries installed
- 100 new renewable energy jobs directly created
- 40 suppliers, contractors, and enterprises receiving supportive measures (50% female-led)

🌱 **Climate co-benefits:** 100%

Food and Nutrition Security

Photo by Tubagus Topan/Unsplash

📍 Indonesia

P180491

Investing in Nutrition & Early Years Phase 2 Program

Malnutrition, especially child undernutrition, is at the core of Indonesia's human capital challenges. Stunting rates, linked to early-life deprivations, including inadequate maternal services, nutrition, and healthcare, are higher than expected for the country's income level. With previous World Bank support, Indonesia has already made considerable progress in reducing stunting. This project aims to enhance the coverage and quality of essential health and nutrition services to further reduce stunting in Indonesia by, deepening the partnership and support for the second phase of Indonesia's Stunting Reduction Program (2013–2030). It also seeks to finance efforts to improve institutional capacity and accountability to sustain and protect the progress already made in the reduction of stunting.

💰 **IBRD commitment:** \$600 million

👤 **Target Population:** Pregnant women and children under age five, especially in vulnerable communities

★ **Expected results include:**

- 35,000 villages achieving good performance in the acceleration of stunting reduction
- 300 districts rewarded for good performance on acceleration of stunting reduction during Annual National Stunting Summit
- 7,552 junior and senior high schools in priority districts distributing iron-folic acid supplements
- 20,000 villages trained to improve anthropometric surveillance
- 725,000 children under five receiving a full set of basic immunizations in identified priority districts

📍 Angola

P180631

Human Resources for Universal Health Coverage in Angola

The project aims to improve the capacity and availability of Angola's healthcare workforce, ultimately contributing to the country's goal of achieving universal health coverage. Project objectives include increasing the number of healthcare workers with certified postgraduate level training and retaining health professionals in public healthcare facilities after completing postgraduate training. To achieve this, the project helps finance improved policies and curricula, strengthened training and education facilities, and the implementation of e-learning and telemedicine platforms.

💰 **IBRD commitment:** \$200 million

👤 **Target Population:** Healthcare workers, and ultimately, the poor and vulnerable

★ **Expected results include:**

- 29,000 healthcare workers with certified post-graduate level training from accredited facilities
- 9,000 administrative and hospital support staff receiving in-service training
- 3,000 grants/scholarships provided for post-graduate training abroad in internationally accredited universities
- 100,000 additional specialist consultations per year
- 7 provinces that have established provider-to-provider telemedicine

📍 Ukraine

P180245

Health Enhancement and Lifesaving (HEAL) Ukraine Project*

The project aims to address the urgent health needs in Ukraine resulting from Russia's invasion of Ukraine and the COVID-19 pandemic. These include restoring and improving access to essential healthcare and addressing new needs for health services. It focuses on mental health and rehabilitation services, strengthening primary healthcare, modernizing hospital care, and supporting capacity-building, digitalization, and innovations in the health system. The project aims to provide immediate support for health system recovery with a gradual transition to long-term support and reforms.

💰 **IBRD commitment:** \$103.5 million

👤 **Target Population:** People displaced by war and/or suffering from war-related socio-economic and health vulnerabilities

★ **Expected results include:**

- 500,000 people receiving mental health services
- 400 facilities reconfigured to provide new or enhanced mental health services
- 3,000 primary healthcare personnel trained on management of gender-based violence cases
- 5,000,000 vaccinations administered to children under age 7, according to the national vaccination schedule
- 25 hospitals renovated
- 200 health facilities renovated by the project to incorporate solar panels or other green technologies

📍 Lebanon

P180334

Green Agri-food Transformation for Economic Recovery (GATE) Program

The Lebanese agri-food sector is facing critical challenges, including increased input costs, fragmented value chains, deteriorating public services, and climate change impacts. The project aims to strengthen the resilience and competitiveness of the agri-food sector and promote sustainable transformation through a farmer-centric, demand-driven, and integrated approach focused on rural agricultural areas. It includes components on climate-smart investments in agri-food value chains that include improving access to finance, restoration of basic public services and infrastructure, and improving the policy enabling environment. The project supports job creation in rural areas, inclusive and climate-smart agricultural value chains, and enhanced food safety.

💰 **IBRD commitment:** \$200 million

👤 **Target Population:** Underserved rural communities, including women, young people, small and medium-sized farms, and small and medium-sized enterprises

★ **Expected results include:**

- 12,000 farmers adopting climate-smart agricultural technologies (3,000 female)
- 8,000 ha with new or improved irrigation or drainage services
- 110 municipalities with improved service delivery (i.e., solid waste, wastewater, rural roads)
- 450 farmers' groups receiving matching grants for the implementation of climate-informed business plans
- 15,000 farmers and farm workers receiving training on climate-smart production practices
- 35,000 tons in daily wastewater treatment capacity added

Water Security and Access

Photo by Raj Dhiman/Unsplash

India

P179039

Karnataka Sustainable Rural Water Supply Program

Despite efforts to provide tap connections to all households by 2024, 45 percent of rural households in the Indian region of Karnataka remained unserved. Rural water infrastructure typically suffers from the design-neglect-rebuild cycle. The underlying reasons for low service levels and sustainability issues are the low capacity and weak performance among local institutions, known as *gram panchayats*. The Program aims to improve access to safely managed drinking water and to strengthen institutional capacity for more sustainable and reliable rural water service delivery across all 31 rural districts of Karnataka. The Program seeks to build capacity, demonstrate excellence, and benchmark the performance of the nearly 5,000 *gram panchayats*, specifically on improving operational and maintenance capacity, and enhancing financial sustainability of water service delivery.

💰 **IBRD commitment:** \$363 million

👤 **Target Population:** Rural communities

★ **Expected results include:**

- 10 million additional people living in rural areas provided with access to safely managed drinking water
- 2 million additional functional household tap connections installed
- 500 tanks rejuvenated in water-scarce select districts
- 5,000 *gram panchayats* with sustainably functioning water service
- 3,500 *gram panchayats* with water tariff collection rate above 90%
- 5,000 *gram panchayats* adhering to enhanced water quality testing, monitoring, and public dissemination criteria

Tunisia

P162957

Tunisia Sanitation PPP Support Project

Tunisia faces considerable water stress and scarcity, intensified by climate change. Its water resources are further pressured by insufficient water reuse due to limited and poor wastewater treatment. The project aims to improve access to and quality of wastewater management services by helping improve infrastructure and operations at wastewater management facilities. It also supports capacity building of Tunisia's national wastewater management utility to develop and manage public-private-partnership (PPP) contracts for the delivery of water and sanitation services.

 **IBRD commitment:** \$112.8 million

 **Target Population:** Communities affected by water stress

 **Expected results include:**

- 2,028,000 direct project beneficiaries
- 387,600 people provided with access to improved sanitation services (50% female)
- 64,506,000 m³/year wastewater treated
- 95% of treated wastewater meeting quality standards for discharge and reuse

 **Climate co-benefits:** 100%

Project-Level Reporting

Detailed project-level reporting is posted on the World Bank impact report [website](#). There, investors can download project tables in PDF format or request the tables in Excel format. The project tables pictured below for reference provide project objectives, results, and committed and disbursed amounts among other details, including project-level SDG mapping for the Sustainable Development Bond and Green Bond project portfolios. Project results should be read in conjunction with the Resources section of this report, which describes the reporting approach.

We use the [Harmonised Framework for Impact Reporting](#) that the World Bank initiated together with other issuers in 2015, and related sector-specific templates, if available, for reporting provided under the auspices of the ICMA Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines.

World Bank (IBRD) Sustainable Development Bonds (SDB) | FY23 Impact Report | Projects Tables

The SDB project portfolio includes also Green Bond projects because they are part of the whole IBRD-financed project portfolio. For impact reporting purposes, SDB investors can filter out the projects included in the Green Bond program by using the Green Bond filter in the SDB project tables. The table contains active and closed projects in FY23. Active projects are #1-583 and closed projects are #584- 890.

Issuance Programs

Funding Overview

The World Bank (IBRD) has been issuing bonds in the international capital markets since 1947. World Bank loans are financed through equity and bond issuances. World Bank bonds mobilize private capital to support the World Bank's development goals and finance sustainable development activities. The World Bank is rated triple-A by the major credit rating agencies, and our bonds are viewed as high-quality investments in the global capital markets. The World Bank's funding strategy is aimed at achieving the best long-term value on a sustainable basis for member countries. This approach has enabled IBRD to borrow at favorable market terms and pass the savings on to borrowing member countries.

IBRD's annual funding volumes vary from year to year, and funds raised are used to support the financing of IBRD's development projects and programs in member countries. Funds not deployed for lending are maintained in IBRD's investment portfolio to supply liquidity for IBRD's operations, to provide flexibility in accessing the market, and support IBRD's triple-A credit rating. IBRD's commercial credit risk management for the liquid asset investment portfolio incorporates environmental, social, and governance (ESG) criteria. In addition, IBRD incorporates third-party ESG scores for investments and counterparties in the portfolio as an input to decision-making and monitoring. Investors can find World Bank Sustainable Development Bonds on the Bloomberg terminal tagged with the sustainability instrument indicator—a yellow sun—starting from July 1, 2018, the first fiscal year IBRD published an impact report covering all bonds.

Fiscal Year 2023. IBRD issues short-term debt (maturing in one year or less) and medium- and long-term debt (with a maturity of greater than one year). As of June 30, 2023, the borrowing portfolio was \$266.8 billion, \$9.9 billion higher than June 30, 2022. The increase was primarily due to new debt issuances during the year. In FY23, IBRD raised a total of \$42.2 billion of medium- and long-term debt with an average maturity of 6.3 years and diversified across 20 currencies: 65 percent in U.S. dollars, 15 percent in euros, and others including emerging market currencies.

Figure 3. Cumulative Commitments by Region

Notes: Amounts may not add up due to rounding. Not all countries included in a regional grouping are World Bank borrowing countries.

/a Committed Amount indicates the World Bank (IBRD) aggregate loan amount net of cancellations in USD eq billion. Loans denominated in other currencies are converted to USD eq using the exchange rate as of the month-end prior to the negotiation date. Similarly, cancellations of loans denominated in other currencies are converted to USD eq using the exchange rate on the value date of the cancellation.

/b Disbursed Amount indicates the total World Bank (IBRD) bond proceeds in USD eq billion allocated to support the financing of disbursements to eligible projects. Disbursements of loans denominated in other currencies are converted to USD eq using the exchange rate on the value date of the transactions under the loan.

Green Bonds

COMMITMENTS & DISBURSEMENTS²⁶

In FY23, the World Bank made commitments totaling **\$2.2 billion** and disbursed **\$955 million** to green bond eligible projects. Since 2008, the World Bank has committed **\$21.7 billion²⁷** and disbursed **\$16.3 billion** across **139 projects** in **38 countries** as of June 30, 2023. Approximately **\$12.8 billion** in World Bank Green Bonds were outstanding as of June 30, 2023.²⁸

Table 4. Commitments and Disbursements by Sector

\$ millions

	Cumulative			Fiscal Year
	Committed		Disbursed & Outstanding	Disbursed
	Mitigation	Adaptation		
Total	13,999	6,894	12,784	955

Biodiversity	274	791	812	128
Percentage	67%	33%		

Figure 4. Cumulative Commitments by Sector

²⁶ These figures represent the commitments and disbursements of the current green bond portfolio. Annual green bond commitment and allocation figures include repaid amounts but exclude flows for canceled projects.

²⁷ This figure represents the historic amount committed to projects in the World Bank Green Bond program since 2008, including the projects which were fully repaid.

²⁸ The World Bank has issued over \$18 billion in green bonds since 2008. An amount equal to the net proceeds of the green bonds is credited to a special account that supports IBRD's lending for eligible projects. So long as the green bonds remain outstanding and the special account has a positive balance, periodically and at least at the end of every fiscal quarter, funds are deducted from the special account and added to IBRD's lending pool in an amount equal to all disbursements from that pool made during such quarter with respect to eligible projects.

Table 5. Cumulative Commitments and Disbursements by Region

\$ millions

	Cumulative		Fiscal Year
	Committed/a	Disbursed & Outstanding/b	Disbursed
Total	20,893	12,784	955

Africa	315	77	24

Figure 5. Cumulative Commitments by Region

Notes: Amounts may not add up due to rounding. Not all countries included in a regional grouping are World Bank borrowing countries.

/a Aggregate committed amount net of cancellations for eligible projects for which the loans are disbursing.

/b Total green bond proceeds allocated to support financing of disbursements to eligible projects net of loan repayments. Not adjusted for matured bonds that were not replaced with new green bonds.

Sustainable Development Goals: Impact & Engagement

Thematic Engagements with Investors

We use the Sustainable Development Bond issuance program to engage investors on the World Bank's development mandate, which include different areas of interest like nature and biodiversity, climate change, health and education, and sustainable communities, among others. World Bank bond proceeds support the financing of sustainable development activities which contribute to the achievement of the SDGs.

In addition to issuing regular Sustainable Development Bonds, the World Bank structures innovative transactions—like outcome bonds and catastrophe bonds—to mobilize additional private capital for development. All bond proceeds support the financing of IBRD sustainable development projects and programs in developing countries, with structured bonds including specific features to create additional impact. The World Bank's [Sustainable Development Bond Framework](#) is consistent with the [Sustainability Bond Guidelines](#) published by ICMA and provides investors with information on how IBRD bonds support sustainable development.

Below is a selection of development topics and SDGs and a selection of transactions executed in FY23.²⁹

Climate

The World Bank is the world's largest financier of climate action in developing countries delivering a record \$38.6 billion in climate finance in FY23 —\$16.2 billion of that for IBRD— supporting efforts to end poverty on a livable planet. On July 1, 2023, IBRD and IDA's commitment to align our financing flows with the goals of the Paris Agreement formally kicked in, effectively mainstreaming climate into everything we do. We help countries curb carbon emissions and build resilience to extreme weather. This includes supporting the development and implementation of Nationally Determined Contributions and Long-Term Strategies and advocating for policy reforms and dialogue to support climate action in member countries. And we have an ambitious new goal to devote 45 percent of IBRD and IDA financing to climate action for FY25, deployed equally between mitigation and adaptation.

Biodiversity

Biodiversity is a cornerstone of development, and its loss threatens hard-won development gains. Biodiversity provides safety nets, making communities and businesses more resilient to natural and economic shocks, ranging from climate change to conflict. Scaling up financing from all sources is needed to halt and reverse nature loss and support high-impact projects. The World Bank is a leading multilateral financier of biodiversity. In FY23, direct investments in biodiversity in IBRD countries totaled \$1.3 billion. We are also developing new standards and providing data and decision-support tools for governments and financial institutions to identify nature-related risks and opportunities to "green" global finance. What's more, the World Bank screens all investment projects for nature risks and applies a precautionary approach to project design with a dedicated environmental and social standard, [Biodiversity Conservation and Sustainable Management of Living Natural Resources](#).

²⁹ Examples provided herein are for illustrative purposes only and no assurance can be provided that disbursements for projects with these specific characteristics will be made by the World Bank during the term of the bonds described herein. Net proceeds of the bonds described herein are not committed or earmarked for lending to, or financing of, any particular projects or programs. Payments on the bonds described herein are not funded by any project or program.

Food & Nutrition Security

The goal of ending global hunger by 2030 is off track. Conflicts, climate change, and high food prices are driving food and nutrition insecurity, pushing millions into extreme poverty, and reversing hard-won development gains. Urgent action is needed to make the world's food systems more productive, sustainable, and resilient—and achieve global food security. The World Bank has scaled up its short- and long-term responses to the food crisis—providing solutions estimated to benefit 335 million people. At the end of FY23, IBRD was supporting \$8.8 billion in commitments to help address the food and nutrition security crisis.

Health

The World Bank is committed to advancing universal health coverage in developing countries by improving health systems and ensuring affordable, quality care for all, especially the most vulnerable. In April 2024, we announced plans to support countries in delivering quality, affordable health services to 1.5 billion people by 2030. This is part of a larger global effort to provide a basic standard of care through every stage of a person's life—infancy, childhood, adolescence, and adulthood. Our \$34 billion global health portfolio includes over 210 projects, including \$16.7 billion for IBRD countries, to strengthen service delivery and health financing while supporting countries to mitigate the health risks of climate and pandemics.

Education

A major learning crisis—exacerbated by the COVID-19 pandemic—is hindering skills development and leaving young people unprepared for today's workforce. To build human capital and end poverty, countries must urgently address the education emergency. The World Bank is one of the largest financiers of education worldwide, supporting resilient, equitable, and inclusive learning systems. In FY23, IBRD committed \$1.4 billion for education programs, technical assistance, and other projects.

Gender Equality

Gender equality for all people is a matter of fairness and justice and is also essential for development. Yet women face systemic disadvantages in access to jobs, resources, finance, and information, as well as income gaps, and uneven legal treatment. Women, girls, sexual and gender minorities, and marginalized groups are shouldering a disproportionate impact of the world's intertwined development crises. The World Bank is developing and scaling innovative approaches to advance gender equality and increase women's economic empowerment. There has been a dramatic rise in the share of World Bank operations that qualify for the gender 'tag'—in FY23, 95 percent of projects included specific interventions to identify, address, and measure progress towards addressing gender constraints. The World Bank will continue to apply the gender tag's outcome-oriented approach to identify entry points to advance gender equality, design specific interventions to address constraints, and track progress toward gender outcomes. Complementing the emphasis on gender equality in project design, the World Bank will strengthen accountability for gender outcomes during implementation and in strategic country engagement.

Water

Over 2 billion people lack safe drinking water, 3.6 billion people lack safe sanitation, and at least 1.8 billion people face significant flood risk. Climate change will exacerbate water risks worldwide, as rising temperatures lead to more unpredictable weather and extreme weather events. By 2050, the global economy could face \$5.6 trillion in losses due to worsening droughts, storms, and torrential rain in some of the world's largest economies. Growing populations, higher demand for water for energy, agriculture, industry, and human consumption are exacerbating the situation. The World Bank is helping countries strengthen their water security and climate adaptation through integrated planning, reforms, and investment in water supply, sanitation, irrigation, water resources management, and disaster risk reduction. Importantly, we are committed to prioritizing speed, scale, and impact in our efforts to help countries develop inclusive water solutions that benefit all segments of the population. In FY23, IBRD committed \$5.3 billion in water projects focusing on sustaining water resources, delivering services, and building resilience for a Water-Secure World for All.

Sustainable Transport

Transport is fundamental to supporting

economic growth, creating jobs, and connecting people to essential services like healthcare or education. There is also an urgent need to reduce the climate impact of transport which constitutes about a quarter of global GHG emissions, and improve road safety as road crashes are the leading cause of death for people aged 5–29. To harness the full potential of sustainable mobility, the World Bank is helping client countries develop transport infrastructure and services that are safe, green, efficient, and inclusive. The World Bank is the largest provider of development financing for transport in low- and middle-income countries, with a focus on climate-smart transport systems. All transport projects approved in FY23 included climate co-benefits, which means they directly contribute to reducing countries' GHG emissions and/or enhancing climate resilience. The World Bank is also focusing on improving road safety as a key objective for the transport sector, with investments to save lives, preserve human capital, lower carbon emissions, support gender equality, and promote economic development. At the end of FY23, the active IBRD portfolio of road and urban transport projects totaled \$11.2 billion.

Sustainable Cities

Cities are central to the transition to greener and more resilient economies and livelihoods. They are home to 56 percent of the global population—a number expected to rise to 70 percent by 2050—and over 80 percent of global economic activity. Cities also consume over two-thirds of the world's energy and produce over 70% of energy related CO₂ emissions. They also bear the brunt of crises such as pandemics, conflict, displacement, and climate change, which can exacerbate risks and compound inequalities. And cities in lower-income countries suffer the most from climate-related shocks and stresses due to poor management of urbanization. The World Bank supports climate-smart development and works with cities and governments to establish robust financial frameworks and institutions to deliver better infrastructure and services, attract investment, reduce emissions, adapt to climate risks, and foster inclusive, low-carbon, climate-resilient, and sustainable economies. In FY23, IBRD committed \$2.7 billion for sustainable urban development programs and projects.

See the Impact section of this report for examples of projects delivering impact on the ground in some of these thematic areas and in response to global challenges.

Innovation, Risk-Sharing, & Impact

Building Resilience, Enhancing Preparedness

In addition to providing financing and technical assistance to help countries build resilience and respond to catastrophes and other national emergencies, the World Bank issues catastrophe (cat) bonds under IBRD's [Capital at Risk Notes](#) program, a supplement of the World Bank's Sustainable Development Bond program. Cat bonds allow client countries exposed to natural disaster risks to transfer a portion of that risk to bond investors with payouts triggered if a disaster event meets certain pre-defined criteria.

As of June 30, 2023, IBRD has executed \$5.8 billion in risk transfer operations. This includes IBRD's largest transaction consisting of a cat bond and a swap transaction to provide [Chile](#) \$630 million in financial protection against earthquakes.

Accessing Additionality, Boosting Impact

While also supporting IBRD's portfolio of

sustainable development activities, IBRD [Outcome Bonds](#) provide investors with the opportunity to support specific development projects and outcomes. These outcome bonds harness private capital and transfer project performance risk to investors, who are rewarded if the underlying activities are successful.

In 2023, Environmental Finance recognized IBRD's [Emission Reduction-Linked Bond](#), which supports the manufacture and distribution of water purifiers to schools and institutions in Vietnam as "[Impact project/investment of the year: Climate](#)," and the [Wildlife Conservation Bond](#), which supports black rhino conservation and local job creation in South Africa with the "[Award for innovation—bond structure \(sustainability bond\)](#)" and as "[Initiative of the year—sustainability bond: IBRD](#)."

 Indicates World Bank Green Bond

Impact Reporting Approach

The intention of impact reporting is to help investors develop a more detailed understanding of the results from World Bank–financed projects eligible for funding through World Bank Sustainable Development Bonds and Green Bonds. Key results indicators have been selected and, where possible, quantified, but it is important to appreciate the inherent limitations of data reported. The main considerations to adequately interpret results of the SDB program and the Green Bond program are described in this section.

The World Bank uses the [Handbook: Harmonised Framework for Impact Reporting](#) published by ICMA that builds on the original framework initiated by the World Bank and others, published in 2015, and related templates in the Project-Level Reporting annex to this impact report. These templates, organized by sector, are designed for harmonization of impact reporting, and the proposed indicators may not fully reflect the purpose of the World Bank-financed projects in the sectors presented above. It is important to view the “other indicators” offered, which indicate green and social “co-benefits” of the projects. Moreover, as the consultative process for developing harmonized impact reporting templates advances, the core indicators might be subject to changes. Projects categorized in the remaining sectors are more heterogeneous. The report provides project-specific indicators based on available information on the scale of results.

Sustainable Development Bonds

Key Assumptions and Approach

RESULTS INDICATORS The indicators used in the project tables of this report have been selected from among other expected development results and are intended to illustrate the type and scale of expected results in a variety of sectors and country contexts. The results indicators presented for aggregated Impact Highlights are drawn from the World Bank Corporate Scorecard, Tier 2 results, and Corporate Results Indicators. These are sector outcome or output indicators that can be measured and monitored at the project level and aggregated across operations and countries. More information on the definition of each “Tier 2” indicator can be found at <https://scorecard.worldbank.org/>.

SCOPE OF RESULTS Unless otherwise indicated, reporting is based on ex-ante estimates of impacts at the time of project appraisal and mostly for direct project effects. The Project Impact Highlights in this report include selected results that are aggregated where possible and do not represent all countries or regions where the World Bank supports the financing of projects. Project Impact Highlights should not be considered a comprehensive accounting of results. Additional project results are presented in the Project-by-Project section of the report, and the full set of project results can be found at <http://projects.worldbank.org>.

UNCERTAINTY An important consideration in estimating impact indicators and projecting results is that they are based on assumptions. While technical experts aim to make sound and conservative assumptions that are reasonable based on the information available at the time, the actual impact of projects generally diverges from initial projections. In general, behavioral changes or shifts in baseline conditions can cause deviations from projections.

COMPARABILITY Caution should be taken in comparing projects, sectors, or whole project portfolios because baselines (and base years) and calculation methods may vary significantly. The cost structures between countries will also vary, so that developing cost-efficiency calculations (such as results per dollar invested) could, for example, place smaller countries with limited economies of scale at a disadvantage and will not take into consideration the country-specific context.

Omissions and Qualitative Results

Because the selected projects aim to provide social and developmental benefits as well as climate and environmental ones, they will have impacts across a much wider range of indicators than were captured in the previous section. Therefore, exclusively focusing on the reported indicators will leave out other important development impacts. Where quantitative data is unavailable, qualitative indicators have been included to illustrate other beneficial impacts. The intention of impact reporting is to help investors develop a more detailed understanding of the results from World Bank-financed projects. Several key results indicators have been selected and, where possible, quantified, but it is important to appreciate the inherent limitations of data reported.

PERIOD OF INCLUSION IN REPORT Projects are added to the impact report in the fiscal year of approval. The dataset includes projects with disbursements or new commitments during the fiscal year. Once IBRD has ceased disbursing funds to a project, it is excluded from the dataset but may still have outstanding loans. Due to the size of the dataset, the detailed project tables are available on the World Bank Treasury website.

REPORTING FOR CO-FINANCED PROJECTS The World Bank often co-finances projects with the client country and/or other lenders. The results for the individual project are based on the total project including all financiers. The World Bank's share of the total financing is included for each project.

AGGREGATIONS OF GHG ESTIMATES When reported in the "Project Appraisal," "Implementation Status and Results," and/or "Implementation Completion and Results" reports, the GHG emission reductions for projects are reported in tons of CO₂ equivalent. The World Bank, in conjunction with other international finance institutions, developed a harmonized approach for GHG accounting. At the same time, the World Bank developed internally consistent GHG accounting methodologies to track ex-ante gross and net emissions in investment projects across relevant sectors and over their economic lifetime. Starting in FY19, the World Bank Group began reporting aggregated annual net GHG emission reductions in the 2019 Corporate Scorecard. Given these recent developments in GHG accounting, the basis for estimating CO₂ equivalent emission reductions for projects approved prior to FY19 may vary.

ALL REPORTED RESULTS ARE FROM PUBLICLY AVAILABLE SOURCES Reporting is based on publicly available impacts for the projects disclosed in "Project Appraisal," "Implementation Status and Results," and "Implementation Completion and Results" reports. To facilitate comparability of the reported results, the reporting units have been converted where such conversion is based on a standard conversion factor. For a broader country context on developmental impacts of projects, view the full set of project documentation available on the World Bank website at <http://projects.worldbank.org>.

MAPPING OF PROJECTS TO THE SUSTAINABLE DEVELOPMENT GOALS AND SECTORS The World Bank uses a methodology developed in partnership with the Stockholm Environment Institute (SEI)³⁰ to map projects to the SDGs. The methodology employs a custom training dataset and a random forest machine learning model to map project-level results indicators to the SDGs. When projects at the early stage lack results indicators, detailed project information from PDF files is extracted using natural language processing techniques, ensuring data suitability. This methodology was also leveraged to map projects to project categories using ICMA's mapping of sub-SDG targets for the Green Bond and Social Bond Principles.³¹ Notably, project activities classified by the World Bank as Public Administration such as fiscal reforms, trade policies, capacity building, etc. are classified as Governance in terms of project category, enhancing the comprehensiveness of the training dataset.

Green Bonds

The World Bank issued its first Green Bond Impact Report in 2015, and impact reporting continues to evolve from year to year. The initial reporting template and set of indicators presented were the product of engagement with investors, which benefited from the efforts of multilateral development banks to harmonize metrics for GHG accounting³² and reporting on climate finance activities. The World Bank led a collaborative initiative with other issuers to create the first harmonized template with core indicators for the Renewable Energy and Energy Efficiency sectors, which was published in March 2015. The template has since evolved and been adopted by many other issuers. This consultative process of developing harmonized impact reporting templates has advanced under the auspices of the Green Bond Principles and its working groups and continues to evolve to cover other indicators and relevant sectors.

The indicators for this report have been selected among other expected development results and are intended to illustrate the type and scale of expected results in a variety of sectors and country contexts. To better reflect individual country challenges, demands, and resources, the report focuses on presenting a diverse set of countries, projects, and sectors rather than cumulative impacts.

Key Assumptions and Approach

The following key assumptions and approach were used in preparing this report.

- **EX-ANTE PROJECTIONS:** Quantitative estimates for target results represent ex-ante projections developed during project design mostly for direct project impacts once projects are at normal operating capacity. The target results include expected results for projects approved by the Board but still in the implementation phase. The impact report thus serves as an illustration of expected results made possible through green bond eligible projects, but it is not intended to and does not provide actual results achieved in a specific year or reporting period. Target results have been updated with actual results at project completion. Where the amounts are based on actual results, this is noted in the project tables.
- **PERIOD OF INCLUSION IN THE REPORT:** Impact reporting will be provided for projects for so long as they are part of the World Bank Green Bond project portfolio. This means projects are added to the impact report once green bond proceeds have been allocated to support the financing of disbursements to the project and removed once the client has repaid the respective loan. Projects may also be removed from future reports if the World Bank decides to remove a project from its green bond project portfolio³³. In the latter case, any green bond proceeds previously allocated to support the financing of disbursements to that project will be credited back to the Special Account for green bond proceeds and allocated to support the financing of disbursements to other green bond eligible projects as part of the routine allocation process.
- **REPORTING FOR CO-FINANCED PROJECTS:** The World Bank often co-finances projects with the client country and/or other lenders. The results for the individual project are based on the total project including all financiers. The World Bank's share of the total financing is included for each project.
- **PARTIAL PROJECT ELIGIBILITY:** In cases where a project is only partially green bond eligible, the committed amount reported reflects only that portion that is green bond eligible. Allocations to support disbursements to such projects are made on a pro rata basis.
- **AGGREGATION OF GHG ESTIMATES:** When reported in the "Project Appraisal," "Implementation Status and Results," and/or "Implementation Completion and Results" reports, the GHG emission reductions for projects are reported in tons of CO₂ equivalent. The World Bank, in conjunction with other International Finance

32 See the Joint Report on Multilateral Development Banks' Climate Finance at <https://thedocs.worldbank.org/en/doc/9234bfc633439d0172f6a6eb8df1b881-0020012021/original/2020-Joint-MDB-report-on-climate-finance-Report-final-web.pdf>.

33 As part of the World Bank's due diligence in monitoring projects included in its Green Bond project portfolio, it may elect to remove a project. Possible reasons for removing a project from the Green Bond project portfolio include, but are not limited to, cancellation of the project or significant implementation delays.

Institutions, developed a harmonized approach for GHG accounting.³⁴ At the same time, the World Bank developed internally consistent GHG accounting methodologies to track ex-ante gross and net emissions in investment projects across relevant sectors and over their economic lifetime. Starting in FY19, the World Bank is reporting aggregated annual net GHG emission reductions in the 2019 Corporate Scorecard³⁵. Given these recent developments, the basis for estimating CO₂ equivalent emission reductions for projects approved prior to FY19 may vary.

- **ALL REPORTED RESULTS ARE FROM PUBLICLY AVAILABLE SOURCES:** Reporting is based on publicly available impacts for the projects disclosed in “Project Appraisal,” “Implementation Status and Results,” and “Implementation Completion and Results” reports. To facilitate comparability of the reported results, the reporting units have been converted where such conversion is based on a standard conversion factor.

Alignment with Market Standards

SUSTAINABLE DEVELOPMENT BOND PROCESS

World Bank Sustainable Development Bonds are aligned with the **Sustainability Bond Guidelines**,³⁶ coordinated by ICMA.

Use of Proceeds

All World Bank bonds support the financing of a combination of green and social, “sustainable development” projects, programs, and activities in IBRD member countries. Each project is designed to achieve both positive social and environmental impacts and outcomes in line with the World Bank Group’s mission to end extreme poverty and boost shared prosperity on a livable planet.

The World Bank works in every major area of development in partnership with member governments to find sustainable solutions to local and global development challenges. The list below provides examples of projects that meet the eligibility criteria to be supported by the World Bank’s Sustainable Development Bonds and we have classified projects as social or green to show alignment with the Sustainability Bond Guidelines.

Examples of projects, programs and activities that can be classified as “social projects” include, but are not limited to those that aim to:

- Improve healthcare, nutrition, and childhood development
- Improve equitable access to education, raise students’ retention and completion rates, improve learning conditions in schools, train teachers and improve teachers’ foundational skills
- Advance food security
- Strengthen social security, pension, and legal systems
- Improve access for individuals and businesses to affordable financial products and services such as transactions and payment services, savings, credit, and insurance
- Support and improve access to affordable housing through regulatory and policy reform and improving access to finance
- Create more and higher-quality jobs, and connect disadvantaged people to jobs by eliminating barriers and building skills
- Improve the effectiveness of formal technical and vocational training, short-term skills development, and apprenticeship programs
- Provide financial, technical and advisory support to countries that have decided to transition from coal to cleaner sources of energy

³⁶ <https://www.icmagroup.org/sustainable-finance/the-principles-guidelines-and-handbooks/sustainability-bond-guidelines-sbg/>

Examples of projects, programs and activities that can be classified as “green projects” include, but are not limited to those that aim to:

- Advance climate-smart agriculture, improve agricultural infrastructure and support services, strengthen food value chains, and increase market access for smallholder farmers
- Manage water holistically for sustained water resource utilization, improved delivery of services and building resilience
- Address biodiversity conservation and challenges of pollution and natural resource degradation
- Help resource-rich developing countries benefit from the increasing demand for minerals and metals, while ensuring that mining is managed to minimize its environmental and climate footprint
- Prepare national plans and legislation to protect the environment and manage disaster risk
- Contribute to climate mitigation (solar and wind installations, new technologies that reduce GHG emissions, rehabilitation of power plants and transmission facilities to reduce emissions, clean transportation, sustainable waste management, carbon reduction through reforestation and prevention of deforestation) and climate adaptation (protection against flooding, improvements in food security, climate-resilient agriculture, sustainable forest management, and prevention of deforestation).

The foregoing classification of the examples as either social or green is for convenience only. Many of the projects, programs, and activities described above include social and green components by design and will produce a mix of green and social outcomes. Additional examples of eligible projects, programs, and activities can be found at: <https://www.worldbank.org/en/topic>.

Target populations:

World Bank-financed projects aim to protect and empower vulnerable groups—including women and girls, the poor, disabled people, and youth—to reduce poverty, improve living standards, and raise incomes and productivity.

Process for Evaluation & Selection of Eligible Operations

All World Bank operations are designed to achieve positive environmental and social impacts and outcomes consistent with the World Bank mission to end poverty and boost prosperity on a livable planet. Operations are approved after an extensive internal review process that integrates sustainability policies and environmental and social requirements. This is complemented by comprehensive project disclosure, portfolio management and review processes that are designed to provide timely feedback to enhance, improve, and, if necessary, adjust operations to achieve positive impacts in line with desired outcomes.

Management of Proceeds

The proceeds of all World Bank bonds are invested in accordance with IBRD’s liquidity asset management investment policy, which incorporates environmental, social, and governance criteria for investment decision-making and monitoring. Disbursement requests for eligible operations take place in accordance with IBRD’s established policies and procedures. Disbursements are often made over a period of several years, depending on when each project/program milestone is reached. The use of the net proceeds is tracked by IBRD on a continuous basis and IBRD reports on the use of proceeds on an annual basis.

Reporting

The World Bank is committed to producing an annual impact report within one year following the close of the fiscal year (June 30) describing the operations supported by the financing generated by World Bank bonds issued during the previous fiscal year. This report provides information on allocation of bond proceeds and reports on results across a range of measurable outcomes, highlighting a selection of project development indicators. Impact reports are available on the World Bank Treasury website: <http://treasury.worldbank.org>.

Green Bond Process

World Bank Green Bonds are aligned with the **Green Bond Principles**,³⁷ coordinated by ICMA. The World Bank's green bond eligibility criteria were independently reviewed in 2015 by the Center for International Climate and Environmental Research at the University of Oslo (CICERO).

The World Bank Green Bonds are a subset of our Sustainable Development Bond Program. World Bank Green Bonds follow the same rigorous process as all World Bank bonds and are subject to an additional step to select green bond-eligible projects that promote the transition to low-carbon and/or climate resilient growth in World Bank client countries.

Use of Proceeds

World Bank Green Bonds support the funding of eligible projects that promote the transition to low-carbon and climate resilient growth in IBRD member countries. Eligible projects may include those that mitigate climate change including investments in low-carbon and clean technology programs, such as energy efficiency and renewable energy programs and projects or adaptation to climate change, including investments in climate-resilient growth.

Examples of climate-mitigation projects include, without limitation:

- Rehabilitation of power plants and transmission facilities to reduce GHG emissions
- Solar and wind installations
- Funding for new technologies that permit significant reductions in GHG emissions
- Greater efficiency in transportation, including fuel switching and mass transport
- Waste management (methane emission) and construction of energy-efficient buildings
- Carbon reduction through reforestation and avoided deforestation

Examples of climate adaptation projects include, without limitation:

- Protection against flooding (including reforestation and watershed management)
- Food security improvement and stress-resilient agricultural systems that slow deforestation
- Sustainable forest management and avoided deforestation

Process for Evaluation & Selection of Eligible Operations

Green Bond-eligible projects go through a rigorous review and approval process to ensure that they align with the World Bank Group's mission and meet countries' development priorities. The process includes: (i) screening to identify potential environmental or social impacts and designing policies and concrete actions to mitigate any such impacts; (ii) approval by the Board of Executive Directors—a resident Board with 25 chairs representing member countries; and (iii) regular

³⁷ <https://www.icmagroup.org/sustainable-finance/the-principles-guidelines-and-handbooks/green-bond-principles-gbp>

monitoring and evaluation. Additionally, World Bank environmental specialists screen all projects to assess climate co-benefits. This assessment is integral to identifying projects that meet World Bank Green Bond project eligibility criteria.

Management of Proceeds

Green Bond proceeds are credited to a special cash account and invested in accordance with IBRD's liquidity asset management investment policy, which incorporates environmental, social, and governance criteria for investment decision-making and monitoring, until used for the support of the World Bank's financing of eligible Green Bond projects. Disbursement requests for eligible projects take place in accordance with IBRD's established policies and procedures. Disbursements are often made over a period of several years, depending on when each project milestone is reached. As disbursements are made for Green Bond projects, corresponding amounts from the special account are allocated to the general lending pool on at least a quarterly basis.

Reporting

The World Bank has published an impact report since 2015 and before that used its investor newsletter to report results. The World Bank is committed to producing an annual impact report within one year following the close of the fiscal year (June 30) describing the operations supported by the financing generated by World Bank Green Bonds issued during the previous fiscal year. This report provides information on the allocation of bond proceeds and reports on results across a range of measurable outcomes, highlighting a selection of individual project development indicators. Impact reports are available on the World Bank Treasury website: <http://treasury.worldbank.org>.

World Bank Annual & Sustainability Reporting

The [Annual Report](#) provides insights and financial data on the World Bank's activities and contributions to development progress for the fiscal year. Information and results are presented thematically and by region, and fiscal year data is presented separately for IBRD and IDA. The annual report also summarizes key sustainability considerations and data on our operations and corporate practices. The World Bank also provides a [climate-related disclosure](#), covering IBRD and IDA, aligned with the recommendations of the Task Force on Climate-related Financial Disclosures, in the annual report. Before FY22, starting in 2009, the World Bank Group was the first and only multilateral development bank to disclose through the CDP (formerly known as Carbon Disclosure Project), which covers climate change management, climate change risks and opportunities, GHG emissions accounting, and energy and fuel use.

The World Bank [Corporate Responsibility Strategic Plan](#) focuses on the World Bank's efforts to review mandates and progress on corporate responsibility at the World Bank; evaluate the current corporate responsibility landscape and trends; engage stakeholders for input on corporate responsibility issues; identify implementation priorities; and establish a rolling three-year implementation plan for corporate responsibility.

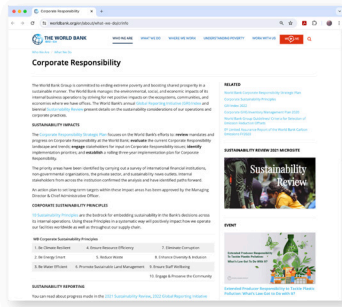

The World Bank Group [Corporate Scorecards](#) have provided an overarching view of the results and performance indicators of three institutions: IBRD and IDA presented collectively, IFC, and MIGA. The World Bank Group is developing a new [Corporate Scorecard](#) to track progress on our new vision and mission. For the first time, the work of all World Bank Group financing institutions will be tracked through the same set of indicators. The new scorecard will track the Bank's vision of ending poverty on a livable planet. The new scorecard will be implemented in phases, representing an important milestone for the World Bank Group to redouble its focus on accountability and impact.

This [World Bank GRI Index](#) is an inventory of the sustainability considerations used in World Bank lending and analytical services as well as our corporate practices. This sustainability disclosure index was prepared in accordance with the GRI Standards. The GRI Index covers activities carried out during the World Bank’s fiscal year (July 1 to June 30).

The World Bank’s biennial [Sustainability Review](#) reflects on the work of the World Bank’s operations and corporate sustainability initiatives through the lens of the World Bank’s Core Values: Impact, Integrity, Respect, Teamwork, and Innovation. These Core Values and the Code of Ethics have been the foundation of the World Bank’s work and sets the highest standards of behaviors, actions, and mindset.

The latest World Bank sustainability reports are available on the [Sustainability Reporting](#) website. More information on how the World Bank manages its internal operations to safeguard the wellbeing of staff, ecosystems, communities, and the economies where we work is available on the World Bank’s [corporate responsibility](#) website.

Accountability Mechanisms

Several key groups hold the World Bank accountable to our clients and shareholders, ensure the highest performance standards in development effectiveness, protect the integrity of the projects financed, and continually improve the efficacy of our internal operations.

- The **Accountability Mechanism** was established by the World Bank's Board of Directors in 2020. It is independent from World Bank management, reporting directly to the Board, and houses both the **Inspection Panel** and the new **Dispute Resolution Service**, which was also created in 2020. The Accountability Mechanism is headed by a secretary tasked with overseeing the processing of complaints, which may be addressed through a compliance investigation carried out by the Inspection Panel or by a dispute resolution process facilitated by the Dispute Resolution Service. The Accountability Mechanism provides an avenue for individuals and communities who believe they have been or are likely to be harmed by a project funded by IBRD or IDA to express their concerns and have them reviewed and addressed. The Inspection Panel's annual reports are available online at inspectionpanel.org.
- The **Group Internal Audit (GIA)** provides independent, objective, and insightful risk-based assurance and advice to protect and enhance the value of the World Bank Group. GIA provides senior management and the Board with an independent view and reasonable assurance that processes for managing and controlling risks—as well as their overall governance—are adequately designed and functioning effectively. GIA's annual and quarterly reports are available online at worldbank.org/internalaudit.
- The **Grievance Redress Service (GRS)** is an avenue for individuals and communities to submit complaints directly to World Bank management if they believe a World Bank-supported project has or is likely to have adverse effects on them, their community, or their environment. The GRS enhances the World Bank's responsiveness and accountability by enabling individuals and communities to engage with the World Bank and borrowing countries to address issues that have not been resolved by project-level grievance mechanisms. Its annual reports are available online at <https://www.worldbank.org/en/projects-operations/products-and-services/grievance-redress-service>.
- The **Independent Evaluation Group (IEG)** aims to strengthen the World Bank Group's development effectiveness through evaluations that assess results and performance and provide recommendations for improvements. IEG's evaluations contribute to accountability and learning, helping inform the World Bank Group's directions, policies and procedures, and country partnership frameworks. IEG reports are available online at ieg.worldbankgroup.org.

- The **Integrity Vice Presidency** (INT) investigates allegations of fraud, corruption, collusion, coercion, and obstruction in World Bank Group–financed projects, including those involving World Bank Group staff and corporate vendors. INT’s annual report is available online at worldbank.org/en/about/unit/integrity-vice-presidency.

The World Bank monitors IBRD’s operational performance through the **World Bank Corporate Scorecard** and regular opportunities to discuss progress on operations with the World Bank’s Executive Directors. The World Bank Corporate Scorecard is available online at scorecard.worldbank.org.

Boards of Directors’ work programs, calendars, and meeting minutes are available at worldbank.org/en/about/leadership/directors.

INDEPENDENT ACCOUNTANT'S REPORT

President and Board of Executive Directors
 International Bank for Reconstruction and Development:

We have reviewed management of the International Bank of Reconstruction and Development's ("IBRD") assertion that for loans that had commitments or disbursements during the year ended June 30, 2023, \$38.6 billion was committed, net, and \$25.5 billion was disbursed, net, by IBRD for World Bank Projects during the one-year period ended June 30, 2023; and that for loans that had commitments or disbursements during the year ended June 30, 2023, \$153.5 billion was cumulatively committed, net of cancellations and terminations, and \$75.9 billion was cumulatively disbursed, net of refunds, over the life of the loan, by IBRD for World Bank Projects; as listed and defined in the World Bank Projects Commitment and Disbursement Schedule (the "Schedule"). Our responsibility is to express a conclusion on management's assertion based on our review.

Our review was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants ("AICPA"). Those standards require that we plan and perform the review to obtain limited assurance about whether any material modifications should be made to the Schedule in order for it to be presented in accordance with the definitions in the Schedule (the "Criteria"). The procedures performed in a review vary in nature and timing from and are substantially less in extent than, an examination, the objective of which is to obtain reasonable assurance about whether the Schedule is presented in accordance with the Criteria, in all material respects, in order to express an opinion. Accordingly, we do not express such an opinion. Because of the limited nature of the engagement, the level of assurance obtained in a review is substantially lower than the assurance that would have been obtained had an examination been performed. We believe that the review evidence obtained is sufficient and appropriate to provide a reasonable basis for our conclusion.

We are required to be independent and to meet our other ethical responsibilities in accordance with relevant ethical requirements related to the engagement.

The procedures we performed were based on our professional judgement. In performing our review, we performed analytical procedures, inquiries, and other procedures as we considered necessary in the circumstances. For selections of the projects listed in the Schedule, we performed tests of mathematical accuracy of computations and compared the commitments and disbursements to underlying records.

Information included on Page 1 through 78 and Page 108 of the World Bank IBRD Impact Report were not subject to our review and, accordingly, we do not express a conclusion or any form of assurance on such information. Further, any information relating to forward-looking statements, targets, goals, progress

against goals, and linked information was not subject to our review and, accordingly, we do not express a conclusion or any form of assurance on such information.

Based on our review, we are not aware of any material modifications that should be made to management's assertion that for loans that had commitments or disbursements during the year ended June 30, 2023, \$38.6 billion was committed, net, and \$25.5 billion was disbursed, net, by IBRD for World Bank Projects during the one-year period ended June 30, 2023; and that for loans that had commitments or disbursements during the year ended June 30, 2023, \$153.5 billion was cumulatively committed, net of cancellations and terminations, and \$75.9 billion was cumulatively disbursed, net of refunds, as presented in the Schedule are in accordance with the Criteria described in the Notes of the Schedule.

Management's Assertion Regarding Commitments and Disbursements for World Bank Projects

The International Bank for Reconstruction and Development (“IBRD” or “World Bank”) is responsible for the completeness, accuracy, and validity of the World Bank Projects Commitment and Disbursement Schedule (the “Schedule”). IBRD management asserts that for loans that had commitments or disbursements during the year ended June 30, 2023, USD\$ 38.6 billion was committed and USD\$ 25.5 billion was disbursed by IBRD for World Bank Projects during the one-year period ended June 30, 2023 (as listed in the Schedule). Additionally, IBRD management asserts that for loans that had commitments or disbursements during the year ended June 30, 2023, USD\$ 153.5 billion was committed and USD\$ 75.9 billion was disbursed, cumulatively over the life of the loan, by IBRD for World Bank Projects (as listed in the Schedule).

Notes on the World Bank Projects Commitment and Disbursement Schedule

IBRD Net Commitments during the year ended June 30, 2023: Represents the dollar value of the amount approved by the Board of Executive Directors to be extended as loans by IBRD, net of Cancellations and Terminations (as defined below) during the year ended June 30, 2023.

IBRD Net Disbursements during the year ended June 30, 2023: Represents the dollar value of the amount transferred to the borrower, net of refunds made in cash by the borrower for unused funds during the year ended June 30, 2023.

IBRD Cumulative Net Commitments: Represents the dollar value of the amount approved by the Board of Executive Directors to be extended as loans by IBRD, net of Cancellations and Terminations (as defined below), cumulatively over the life of the loan.

IBRD Cumulative Net Disbursements: Represents the dollar value of the amount transferred to the borrower, net of refunds made in cash by the borrower for unused funds, cumulatively over the life of the loan.

Cancellations: The portion of the undisbursed balance that is no longer available for future disbursement after signing of the loan agreement by the borrower.

Terminations: When the agreement for the approved loan was not signed by the borrower and the commitment amount for the related loan is then terminated.

Foreign Currency: The schedule is expressed in terms of U.S. dollars for the purpose of reporting commitments and disbursements. Commitments are reported at original U.S. dollar, i.e., the dollar equivalent as per the Board of Executive Directors approved loan agreement. Disbursements are reported at historical U.S. dollar, i.e., translated at exchange rates at the date of disbursements.

Regions: The World Bank uses regional groupings in its reporting noted in the following tables.

East Asia and Pacific

American Samoa	Korea, Rep.	Philippines
Australia	Lao PDR	Samoa
Brunei Darussalam	Macao SAR, China	Singapore
Cambodia	Malaysia	Solomon Islands
China, The People's Republic of	Marshall Islands	Taiwan, China
Fiji	Micronesia, Fed. Sts.	Thailand
French Polynesia	Mongolia	Timor-Leste
Guam	Myanmar	Papua New Guinea
Hong Kong SAR, China	Nauru	Tonga
Indonesia	New Caledonia	Tuvalu
Japan	New Zealand	Vanuatu
Kiribati	Northern Mariana Islands	Vietnam
Korea, Dem. People's Rep.	Palau	

Europe and Central Asia

Albania	Gibraltar	Norway
Andorra	Greece	Poland
Armenia	Greenland	Portugal
Austria	Hungary	Romania
Azerbaijan	Iceland	Russian Federation
Belarus	Ireland	San Marino
Belgium	Isle of Man	Serbia
Bosnia and Herzegovina	Italy	Slovak Republic
Bulgaria	Kazakhstan	Slovenia
Channel Islands	Kosovo	Spain
Croatia	Kyrgyz Republic	Sweden
Cyprus	Latvia	Switzerland
Czech Republic	Liechtenstein	Tajikistan
Denmark	Lithuania	Türkiye
Estonia	Luxembourg	Turkmenistan
Faroe Islands	Moldova	Ukraine
Finland	Monaco	United Kingdom
France	Montenegro	Uzbekistan
Georgia	Netherlands	
Germany	North Macedonia	

Latin America and The Caribbean

Antigua and Barbuda	Curacao	Paraguay
Argentina	Dominica	Peru
Aruba	Dominican Republic	Puerto Rico
Bahamas, The	Ecuador	Sint Maarten (Dutch part)
Barbados	El Salvador	St. Kitts and Nevis
Belize	Grenada	St. Lucia
Bolivia	Guatemala	St. Martin (French part)
Brazil	Guyana	St. Vincent and the Grenadines
British Virgin Islands	Haiti	Suriname
Cayman Islands	Honduras	Trinidad and Tobago
Chile	Jamaica	Turks and Caicos Islands
Colombia	Mexico	Uruguay
Costa Rica	Nicaragua	Venezuela, RB
Cuba	Panama	Virgin Islands (U.S.)

Middle East and North Africa

Algeria	Jordan	Qatar
Bahrain	Kuwait	Saudi Arabia
Djibouti	Lebanon	Syrian Arab Republic
Egypt, Arab Rep.	Libya	Tunisia
Iran, Islamic Rep.	Malta	United Arab Emirates
Iraq	Morocco	West Bank and Gaza
Israel	Oman	Yemen, Rep.

North America

Bermuda	Canada	United States
---------	--------	---------------

South Asia

Afghanistan	Bhutan	Maldives	Pakistan
Bangladesh	India	Nepal	Sri Lanka

Sub-Saharan Africa

Angola	Ethiopia	Niger
Benin	Gabon	Nigeria
Botswana	Gambia, The	Rwanda
Burkina Faso	Ghana	São Tomé and Príncipe
Burundi	Guinea	Senegal
Cabo Verde	Guinea-Bissau	Seychelles
Cameroon	Kenya	Sierra Leone
Central African Re-public	Lesotho	Somalia
Chad	Liberia	South Africa
Comoros	Madagascar	South Sudan
Congo, Dem. Rep.	Malawi	Sudan
Congo, Rep	Mali	Tanzania
Côte d'Ivoire	Mauritania	Togo
Equatorial Guinea	Mauritius	Uganda
Eritrea	Mozambique	Zambia
Eswatini	Namibia	Zimbabwe
