USGBC Ergonomics Requirements for Innovation in Design (1 Point)

Summary Checklist for Display Screens

Ergonomics@Work's Health and Safety Guidelines for Computer Users are based on the ANSI/HFES 100-2007 Human Factors Engineering of Computer Workstations standard. The display screens need to meet the minimum requirements under this standard. Use the checklist below when purchasing the display screens for your department. Please attach the manufacturer specification sheets illustrating the features on the items purchased.

Item	Guidance	Checked
Display	The use of flat-screen or antiglare devices is encouraged	☐
	The user should have control over the tilt angle of the screen and its position on the work surface	☐
	The user must have the capability to change the height of the screen –provide the display with a height adjustable base	☐
	The display should be positioned such that light sources will not create glare	☐
