

# Using Wikidata integration on the Wikimedia projects to enhance GLAM-WIKI content sharing

Mike Peel & João Alexandre Peschanski  
**Wiki Movimento Brasil**

(MP is also WMF Board of Trustees, but not wearing that hat for this presentation!)

**GLAM WIKI  
CONFERENCE 2023**

# GLAM conundrum

Releasing media content from GLAM on Commons has been really successful and important over many years.

However, **it's important it doesn't only exist on Commons in a vacuum.**

Instead it must be integrated into the rest of the Wikimedia projects so that it is visible and widely used.

# GLAM methodology

Institutional  
outreach and  
validation

Legal analysis  
and copyright  
guidelines

Digitization and  
upload pipeline

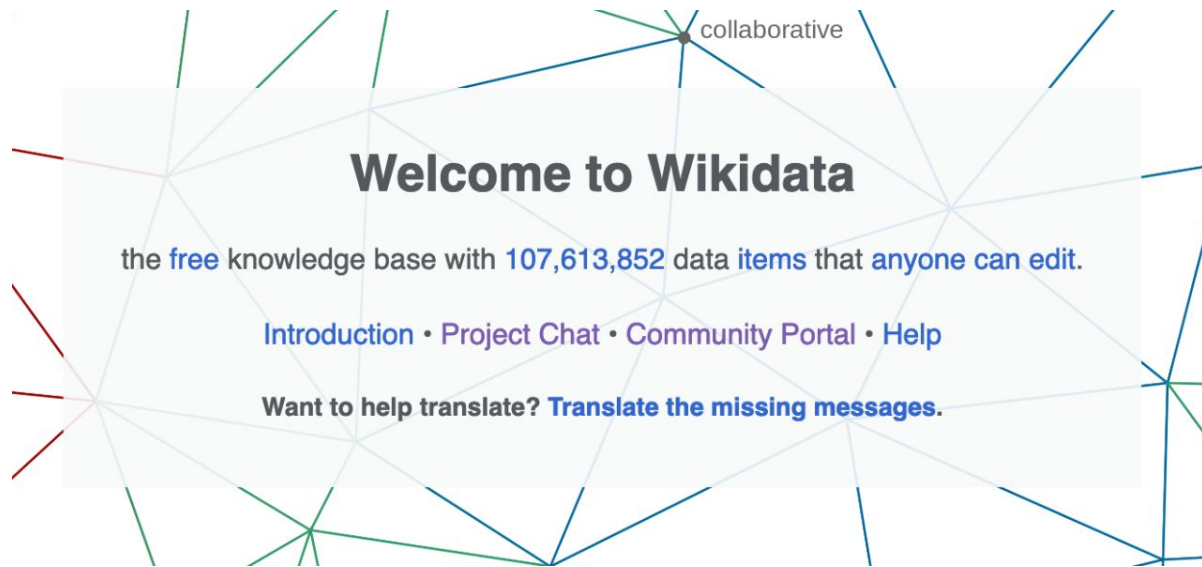

Content use  
initiatives and  
metrics

Through Wikidata, content that GLAMs share can **automatically be reused** and made **visible** across many projects in **many languages**

# Wikidata is an open collaborative knowledge base

It is a fast-growing Wikimedia project, especially relevant for academic and cultural contributions

# GLAM Wiki 2023 (Q118978159)... QIDs

[Ato Institucional n.º 6 →](#)

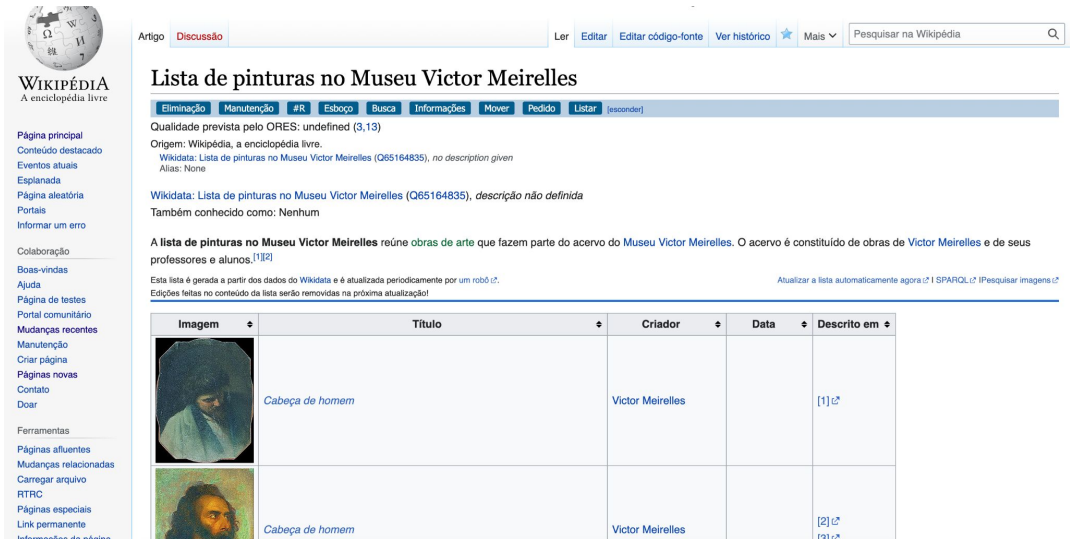

[\[editar no Wikidata\]](#)

- More complicated on Wikipedias
- Many different infoboxes covering different topics, different layouts etc.
- Consensus varies between Wikipedias (wide deployment on Catalan, tricky on English, others mixed).
- Some Wikipedias require referenced Wikidata information only (please add your references!)
- Automatically update when content is added to Wikidata. Add a picture on Wikidata -> it immediately appears in infoboxes across many languages.
- Improves cross-Wikimedia integration.

# Wikidata-powered lists on Wikipedia (and other projects)

GLAM WIKI  
CONFERENCE 2023

- Can quickly create lists using Wikidata information, based on Wikidata queries, that are transposed on (some) mainspace Wikipedias
- Whatever you can fetch using a Wikidata query, you can turn into a list (Listeriabot)
- As Wikidata updates, so does the list
- Works across different languages using the same dataset

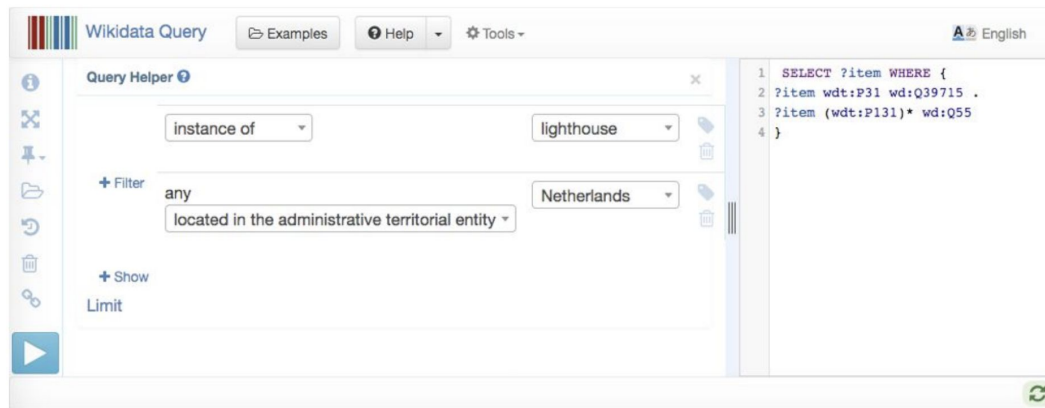

The screenshot shows a Wikipedia article page for 'Lista de pinturas no Museu Victor Meirelles'. The page includes a navigation bar with 'Artigo' and 'Discussão' tabs, a search bar, and a list of actions like 'Eliminar', 'Manutenção', 'Esboço', 'Busca', 'Informações', 'Mover', 'Pedido', and 'Listar'. The article text states that the list is generated from Wikidata data and lists two paintings by Victor Meirelles.

Imagem	Título	Criador	Data	Descrito em
	<i>Cabeça de homem</i>	Victor Meirelles		[1] <sup>?</sup>
	<i>Cabeça de homem</i>	Victor Meirelles		[2] <sup>?</sup> [3] <sup>?</sup>

# Wikidata queries

- SPARQL querying is powerful, but writing them in the right format can be tricky
  - [Wikidata:Request\\_a\\_query](#) can help!
- Only Wikidata content: can't edit the lists locally, and local changes will be lost
- Querying is powerful in general for GLAMs to identify and visualize trends in their collections (web semantics)

query.wikidata.org

The screenshot shows the Wikidata Query interface. The main area is a 'Query Helper' with the following configuration:

- Property: instance of
- Value: lighthouse
- Filter: any
- Property: located in the administrative territorial entity
- Value: Netherlands

The SPARQL query on the right is:

```
1 SELECT ?item WHERE {
2 ?item wdt:P31 wd:Q39715 .
3 ?item (wdt:P131)* wd:Q55
4 }
```

# Cite Q for automatically generated citations

- Currently millions of Wikidata items for journal articles - part of Wikicite
- Can use this information to build structured references using Wikidata QID
- Can be used in any language!
- Automatically link to DOIs, author names, etc.
- Can auto-update all, e.g., preprint -> publication, or if a paper is withdrawn/replaced

```
<ref>{{Cite journal|author = J. E. Carlstrom|title = The 10 Meter South Pole Telescope |journal = Publications of the Astronomical Society of the Pacific |volume = 123 |issue = 903 |pages = 568–581 |arxiv = 0907.4445 |display-authors=etallyear = 2011 |doi = 10.1086/659879 |bibcode=2011PASP..123..568C}}</ref>
```

# Structured Data on Commons

- Wikimedia Commons also has structured data
- Defined for each file, includes caption & properties
- Stores information about copyright, camera, location, depicts, etc.
- Used by file page templates, e.g., {{Art Photo}}
- Queryable at <https://commons-query.wikimedia.org/> (but need to be logged in)

### São Paulo - Jardim da Luz I

A obra *São Paulo - Jardim da Luz I*, de autoria de Guilherme Gaensly, retrata elementos como Jardim da Luz, sua harmonia e flores. A fotografia de 8,9 cm de altura por 13,9 cm de largura, produzida em fototipia no Brasil em 2 de outubro de 1903, integra a Coleção Museu Paulista.

**Ficha da imagem:**

- Título:** *São Paulo - Jardim da Luz I*
- Criador:** Guilherme Gaensly
- Tipo:** cartão postal, impressão e fototipia
- Data:** 2 de outubro de 1903
- País de origem:** Brasil
- Dimensões:** 8,9 cm de altura por 13,9 cm de largura
- Material da obra:** fototipia
- Integra:** Coleção Museu Paulista
- Localização:** Museu Paulista
- Número de inventário:** 1-17916-0000-0000
- Identificador no Google Arts & Culture:** [\\_gEBO\\_BwSdyKXA](#)

## Antonio Galves (Q17489997)

Jefferson Antonio Galves was a Brazilian mathematician, professor of the Institute of Mathematics and Statistics of the University of São Paulo (USP) and member of the Brazilian Academy of Sciences. His field of studies was related to statistical models, in particular models that have stochasticity and variable range of memory. Galves was also the leader of NeuroMat, a research center established in 2013 at USP that is dedicated to integrating mathematical modeling and theoretical neuroscience. (Read more on English Wikipedia)

## NeuroMat (Q18477654)

The Research, Innovation, and Dissemination Center for Neuromathematics is a Brazilian research center established in 2013 at the University of São Paulo that is dedicated to integrating mathematical modeling and theoretical neuroscience. Among the core missions of NeuroMat are the creation of a new mathematical system to understanding neural data and the development of neuroscientific open-source computational tools, keeping an active role under the context of open knowledge, open science and scientific dissemination. The research center is headed by Antonio Galves, from USP's Institute of Mathematics and Statistics, and is funded by the São Paulo Research Foundation (FAPESP). As of 2019, the co-principal investigators are Oswaldo Baffa Filho (USP), Pablo A. Ferrari (USP/UBA), Fernando da Paixão (UNICAMP), Antonio Carlos Roque (USP), Jorge Stolfi (UNICAMP), and Cláudia D. Vargas (UFRJ). Ernst W. Hamburger (USP) was the former director of scientific dissemination. NeuroMat's International Advisory Board consists of David R. Brillinger, Leonardo G. Cohen (NIH), Markus Diesmann (Jülich), Francesco Guerra, Wojciech Szpankowski (Purdue). (Read more on English Wikipedia)

# Histropedia

- Interactive timelines of nearly everything!
- Wikidata back-end, interactive display
- <http://histropedia.com>, example:  
<http://histropedia.com/timeline/41trtpg9bg0t/Botanists-active-in-South-America>

# Wiki Loves Monuments

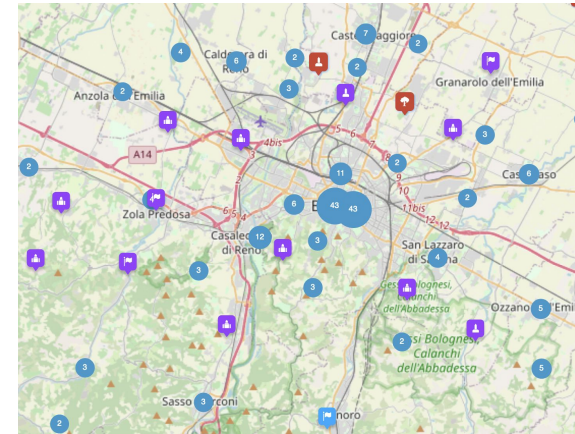

GLAM WIKI  
CONFERENCE 2023

- Monuments database is now on Wikidata
- Easy to expand with new monuments, bringing lists e.g., from different municipalities, together for the first time
- Automatic monument lists & maps, etc.
- Using {{MonumentID}} on Commons - can discover uploads with no image on Wikidata
- Wikidata connection leads to more diverse contributions and image uses; possibly the largest cultural heritage repository ever made

# Roundtripping online repositories and Wikidata

(Info from Dalton Martins / IBRAM)

- Wikidata can be integrated into online GLAM repositories (i.e, Tainacan in Brasil) in a federated data circuit
- We are facing four main challenges for the development of the circuit ([FAPESP 21/06767-8](#)):
  - Data reconciliation
  - Workflow for publishing data (creating items and uploading images via Tainacan)
  - Monitoring workflow and contributions
  - Monitoring data reuse (indicators, metrics)

GLAM WI  
CONFERE

# Wikidata Labs

- Regular labs focused on different Wikidata topics (much more detail than covered here!)
- Initial presentation + afternoon workshop
- 38 so far, in either Portuguese or English:  
[https://www.wikidata.org/wiki/Wikidata:Wikidata\\_Labs](https://www.wikidata.org/wiki/Wikidata:Wikidata_Labs) (including recordings!)
- 39th on Tuesday 21st November, hybrid (São Paulo/online) on the Wikimedia ecosystem:  
[https://w.wiki/85J\\$](https://w.wiki/85J$)

GLAM WIKI  
CONFERENCE 2023

**WIKIDATA LAB XXXIX**  
STRUCTURING THE WIKIMEDIA ECOSYSTEM

This training aims to share resources and capabilities for the integration of Wikidata with other Wikimedia projects.

In this event, part of the Wikidata Labs series, there will be a presentation and a series of practical activities and discussions on structuring the Wikimedia ecosystem.

The event is aimed at training the community of editors of Wikimedia projects. The training coordination will be carried out by the wikimedian Mike Peel, in English.

The event will be in-person. Please, if you are interested in participating in the event, register on the registration page. There is no registration fee. Limited places.

Organization: **WMB** (Wikimedia Brasil)

Event website: [w.wiki/85J\\$](https://w.wiki/85J$)

Support: **FAPESP**

Local: CEPID NeuroMat - Av. Prof. Luciano Gualberto, 1171, USP - Cidade Universitária, Nucleo/IME building.  
Date: November 21, 2023 (Tuesday) at 13h UTC.

**WIKIDATA LAB XXXIX:  
ESTRUTURANDO O  
ECOSSISTEMA WIKIMEDIA**

**21/11, terça - 10h**  
EVENTO PRESENCIAL | SÃO PAULO

**VAGAS LIMITADAS!  
INSCREVA-SE:**

# Getting content into Wikidata

In general:

- QuickStatements (CSV-like import) - <https://www.wikidata.org/wiki/Help:QuickStatements>
- Pywikibot (Python library) - <https://www.mediawiki.org/wiki/Manual:Pywikibot>
- OpenRefine (see other talks about this!)

For journals:

- Zotero to export to QuickStatements format, then import to Wikidata (See <https://w.wiki/pi2>) - <https://www.wikidata.org/wiki/Wikidata:Zotero>
- Import using SourceMD using PMID or DOI (use the old version; not ISBN or ORCID at the moment) <https://www.wikidata.org/wiki/Wikidata:SourceMD>

# Getting content into Wikidata - gamification

Can also 'gamify' adding info to Wikidata, see:

<https://wikidata-game.toolforge.org/distributed/>

## Latin America in Wikidata Contest 2023 - GLAM

In the 2023 edition of the Latin America in Wikidata contest, we invite you to contribute to Wikidata by improving content related to cultural heritage in Latin America.

There are two game modes. In this case, you will have to complete the days in which the heritage institutions are open to the public. If you know the correct answer but it does not appear among the options, you can touch the name of the institution to go to the element in Wikidata and edit this property manually. The manual editions in the account for the contest but are a great contribution. The contest is from November 14, 2023 at 00:01 UTC on December 14, 2023 at 23:59 UTC, until the items are closed available. It arises from the collaboration between Wikimedia Argentina, Wikimedistas de Bolivia, Wikimedia Chile, Wikimedia Colombia, Wikimedia Mexico, Wikimedistas de Uruguay and Wikimedia Venezuela.

# Getting content out of Wikidata

## On-wiki:

- Lua Scribunto interface
  - [https://www.mediawiki.org/wiki/Extension:Wikibase\\_Client/Lua](https://www.mediawiki.org/wiki/Extension:Wikibase_Client/Lua)
- Can access directly in Lua codes, or in templates
  - `{{#statements:P1476|from=Q191380}}` will display "Notre-Dame de Paris"
- Module:WikidataIB - flexible Wikidata module

## Off-wiki:

- API:  
[https://www.mediawiki.org/wiki/API:Main\\_page](https://www.mediawiki.org/wiki/API:Main_page)
- Wikidata Query Service:  
[https://www.wikidata.org/wiki/Wikidata:SPARQL\\_query\\_service](https://www.wikidata.org/wiki/Wikidata:SPARQL_query_service)
- Pywikibot (Python library) -  
<https://www.mediawiki.org/wiki/Manual:Pywikibot>

# What we still need

GLAM WIKI  
CONFERENCE 2023

- Better Wikidata-Wikimedia integration that is easier for more people to use
- Wikidata metrics - usage, quantifying improvements by activities
- More training opportunities to share Wikidata knowledge and how-to
- More scholarly publications - when you do something cool with Wikidata, publish about it and share best-practices with others!
- Conversations around GLAM and Wikidata ethos, for example, around decolonisation data modeling ([Indigenous Artists and Wikidata](#))

**Questions?** And, what are we missing?  
What are possible **future opportunities**  
for Wikidata integration?

Thank You :-)
