

# LUMENRAIL® SYSTEMS

## Painted Finish Options

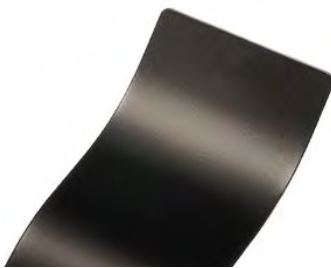

Wagner Architectural Systems provides several standard painted finish options for our Lumenrail® illuminated handrail systems. We use standard powder-coat finishes in an exterior grade, UV rated, thermo-cure, polyester resin from our finish applicator. These powder-coat finishes are applied over a stainless steel base material for structural integrity and code compliance.

Our Available Standard Color Options:

- Satin Black - SBL
- Gloss White - GWH
- Satin Architectural Bronze - BRZ
- RAL color matching – RAL-XXXX
- Matte Black - MBL
- Satin White - SWH
- Satin Polished Brass - SPB

*RAL indicates a standardized color matching system. Either a specific RAL designation or samples to match are required. Minimum order quantities (lbs.) apply.*
