Interconnect Express Multi Point (ICX MP)

Connect IT Systems and Services Between TierPoint Data Centers

Internet connectivity often comes up short on speed, latency, reliability, and privacy. Interconnection bandwidth allows you to bypass the Internet and exchange data directly between TierPoint data centers using private low-latency network bandwidth. Resilient, high-speed connectivity facilitates cloud, colocation, and disaster recovery solutions and promotes user satisfaction.

TierPoint's Interconnect Express Multi Point (ICX MP) provides high-performance managed bandwidth between TierPoint data centers at speeds up to 10 Gbps. ICX connectivity is scalable, redundant, provisioned rapidly, and backed by the SLA of your choice: 99.9% for single links and 100% for redundant links.

Minimize Risk

Ensure continuous high-availability bandwidth for your customers, employees, and business ecosystem. ICX delivers the highest levels of network performance and reliability, proactively monitored and managed.

Improve Agility

Avoid the wait of a network buildout with quick-to-provision interconnection bandwidth that is ready for you. Connection speeds available range from 50 Mbps to 10 Gbps.
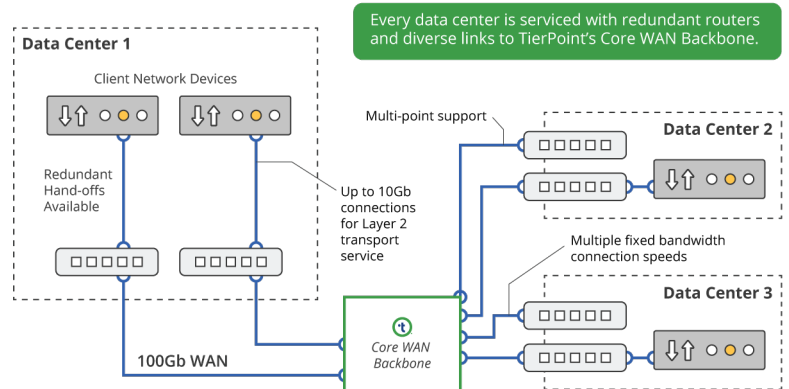

Increase Flexibility

Place workloads with confidence, where they are best suited for your hybrid IT strategy. Increase bandwidth temporarily for short-term projects such as cloud migration.

Support Disaster Recovery

Provide an ideal connectivity solution for your backup and replication of data between data centers.

Highly Available Data Centers

We support our data center clients with a 99.99% uptime availability SLA plus an industry-leading SLA of 100% uptime for data center infrastructure components, including HVAC systems, power systems, and managed bandwidth with redundant connections.

Every data center is serviced with redundant routers and diverse links to TierPoint's Core WAN Backbone.

Data Center 1

Client Network Devices

Redundant Hand-offs Available

Multi-point support

Data Center 2

Up to 10Gb connections for Layer 2 transport service

Multiple fixed bandwidth connection speeds

Data Center 3

100Gb WAN

Core WAN Backbone

Cost-Effective, Flexible Interconnection Bandwidth

With interconnection bandwidth tailored to the needs of your business and managed by our network experts, TierPoint Interconnect Express provides a cost-efficient means to strengthen your network without adding complexity or expanding internal resources.

Trusted Service Provider – Receive proactive network management from our team of experts. We understand the importance of your network to the health of your IT environment.

Rapid Deployment – Deploy within days instead of weeks or months from a third-party carrier to quickly execute your business growth plans.

Hybrid IT Approach – Enable your hybrid IT strategy with resilient connectivity between TierPoint colocation, multitenant cloud, private cloud, and public cloud onramps.

Reliability – Ensure the highest level of availability for your distributed workflows, compute, apps, users, security data, analytics, and content.

Transparency – Achieve visibility into your current and historic bandwidth utilization and network performance metrics through the TierPoint Portal.

Consistency – Benefit from a single vendor and single point of contact for the integrated support of your cloud, colocation and network assets.

Technology – Choose from TierPoint's Layer 2 (MAC) managed service or use your own routers to create a Layer 3 (IP) connection. Protocols supported include Ethernet and Dense Wavelength Division Multiplexing (WAVE).

Flexibility – From public cloud to fully-managed TierPoint infrastructure solutions, we design a custom, optimized solution to support each customer's unique business strategy.

Extend Your Interconnectivity to The Cloud - Cloud Connect Express (CCX) is a logical extension of the ICX service. This easy and cost-effective managed network service for public cloud connectivity makes it convenient for you to improve the reliability of your cloud connections with higher bandwidth and lower latency, support your network security requirements, and rapidly connect to leading public cloud providers.

Interconnect Express is provisioned and ready for customer use in every TierPoint data center.

Power Your Digital Breakaway

We are cloud-forward and data center-strong, a champion for untangling the hybrid complexity of modern IT, so you can free up resources to innovate, exceed customer expectations, and drive revenue. For a full scope of TierPoint services, visit tierpoint.com.
