

SOLUTION BRIEF

NETWORK SERVICES

Take Control of Network Connectivity

Users expect fast online experiences – or they'll leave. Managed network services deliver a secure, high-performance and resilient network, customized for your business now and in the future.

Connectivity is a Key Link for Business Growth

"The network is the computer." When a network is down, business stops. However, advanced network technologies such as direct high-speed connections to telecoms and cloud providers remain a pipe dream for many networking teams.

Network availability, performance, security, and resilience are each of the greatest importance. With so many priorities, how can you get the network your business needs?

Create a Faster, Smarter Network

Whether you're serving up lots of content, have unpredictable network traffic or want to leverage IoT as part of a digital transformation initiative, TierPoint can deliver reliable low-latency connectivity even in second- and third-tier markets.

- Maximize resiliency with multiple Tier 1 carriers in our carrier-neutral facilities
- Position data closer to your users
- Connect directly to Azure and AWS clouds
- Balance workloads across your entire network
- Enhance business continuity and disaster recovery
- Access network design and management expertise
- Increase agility with rapid deployment and 24x7 service

Stand Out with High Performance and Low Latency Connections

Improve user experiences with TierPoint's coast-to-coast network of data centers with high-carrier density, direct connections to public clouds, fast last-mile connectivity, and local processing for IoT.

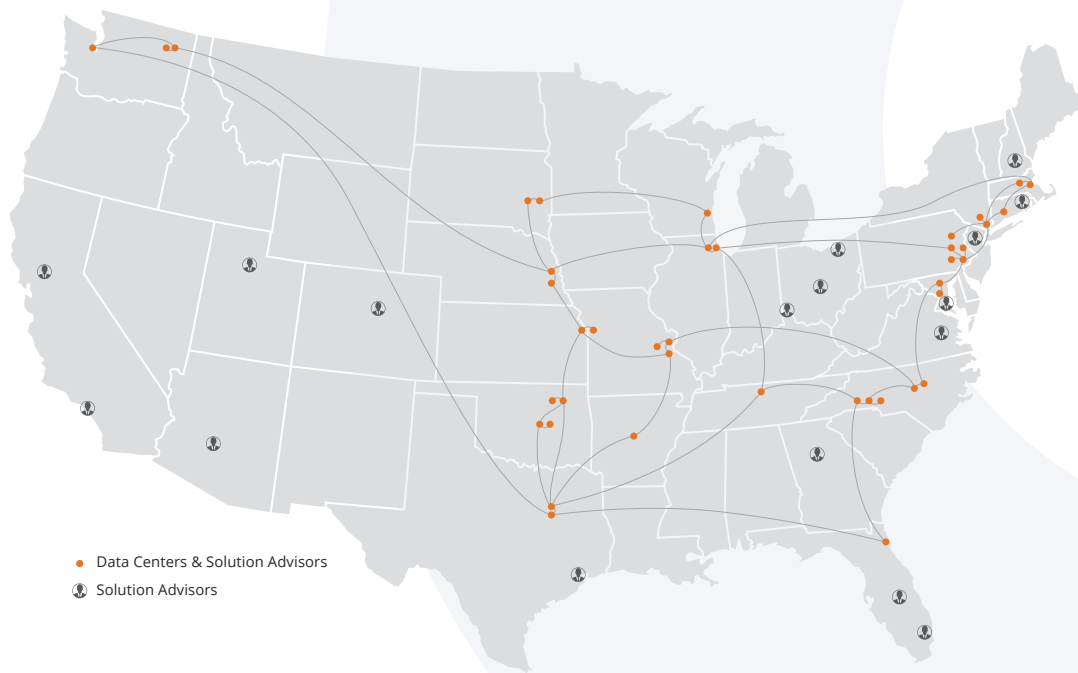

Maximize Uptime and Resilience

Ensure availability and resilience with premier network engineering, fiber infrastructure served by multiple Tier 1 carriers, redundant power, physical security, and 24x7 performance monitoring in our secure data center facilities.

Achieve Agility and Burstability

We offer software-defined networks (SDN), and multiple types of industry-standard fiber and copper cross-connects that enable you to tap into advanced networking technologies including burstable bandwidth and failover and recovery services.

Our Nationwide Network Brings the Internet Closer to You

Ready, Set, Connect!

TierPoint has the expertise to simplify and strengthen each component of your network: within the data center, between data centers, to and from AWS and Azure clouds, with users at the network edge, and across your whole network. And we can manage your network to ensure it will work consistently for your business.

TierPoint can provide you with the following networking services and more, with easy portal-based management:

Internet Bandwidth

Choose from many high-quality options in a carrier-neutral setting. Enjoy BGP-capable connections with IPv4 and IPv6 support and redundant hand-offs – all monitored in the TierPoint Portal.

Interconnect Express (ICX)

Create a high-performing network with direct connections between our data centers, even in second- and third-tier markets, with SLAs up to 99.99%.

Cloud Connect Express (CCX)

Confidently leverage public clouds with low-latency, secure connections across segmented networks to Microsoft Azure and Amazon Web Services (AWS) clouds.

Load Balancing Services

Optimize network performance and maximize asset utilization across your entire network – including cloud and on-premises – based on geographic proximity and infrastructure health.

Cross Connects

Connect internet, private line and other network services with industry-standard cabling systems. TierPoint offers multiple types of physical cross connects, including copper and fiber.

Content Delivery Networks (CDNs)

Create a superior experience. CDNs help you deliver a faster website that absorbs unexpected load spikes and speeds page loading of videos, images and large files.
