

Lynhaven Neighborhood Slow Zone Pilot Project

Bryan Hayes
City of Alexandria
July 2022

How We Got Here

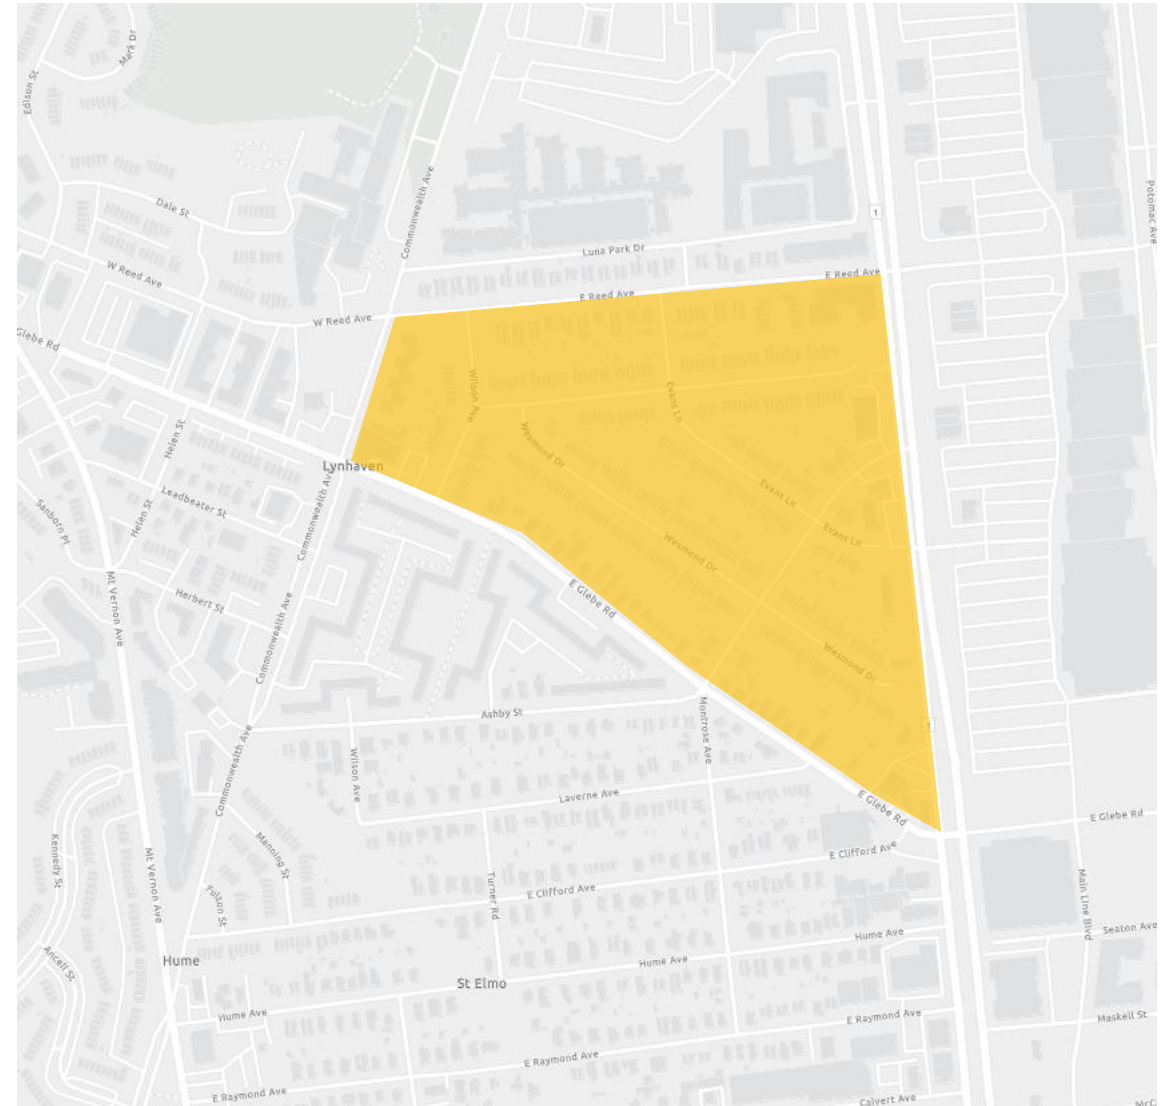

Project Background

- What we heard
 - Speeding on Montrose Avenue
 - Cut-through traffic on Montrose Avenue and other internal streets
 - Drivers not stopping for people crossing the street
- Adopted Vision Zero Action Plan, 2017
 - Key strategy is neighborhood slow zones
- Slow zones approved by City Council in March
 - Less than 25 mph, as low as 15 mph in *certain districts*
 - Criteria to be developed after pilot project

Neighborhood Slow Zone Pilot Project

- ✓ Draft design developed
- ✓ Information shared via flyers and neighborhood listserv
- ✓ Community feedback process underway

Pilot will assess vehicle volumes, vehicle speeds, and community feedback to inform criteria for future neighborhood slow zones.

Design Treatments

Gateway Treatments

Combination of pavement markings and custom signs to communicate slow zone

Speed Cushions

Slow vehicle speeds, discourage cut-through traffic, and encourage stopping for pedestrians

New Crosswalks

Provide clear pedestrian route and reinforce drivers stopping for pedestrians

Reduced Speed Limit?

Reduces vehicle speeds and communicates slow zone

3-4 parking spaces proposed to be removed for new crosswalk

Design Overview

● New crosswalk

★ Painted curb extension + gateway signs

▲ Speed cushion

Project Next Steps

Mid-Summer
Continue collecting community
feedback through **July 17**

Mid-Summer
Modify design plans

Late Summer
Share updated plans with
community

Send feedback to Alexandria.Carroll@AlexandriaVA.gov

Additional Transportation Updates

Glebe Road Speed Management

- Speed radar signs at regular intervals on Glebe Rd
- Updates:
 - Signs have been delivered
 - Task order issued for contractor to install signs (Glebe Rd + other locations citywide)

Glebe Road Crossing Improvements

- Rectangular Rapid Flashing Beacons (RRFBs) to be installed for uncontrolled crosswalks across Glebe Rd at intersection with Montrose & Ashby
- Updates:
 - Signs have been delivered
 - Task order issued for contractor to install signs (Glebe Rd + other locations citywide)

Glebe/Montrose/Ashby Intersection Improvements

- Upcoming large stormwater capacity project, with potential for green infrastructure
- Coordinated effort to integrate transportation improvements with stormwater project
- Follow project progress at:
<https://www.alexandriava.gov/stormwater-management/storm-sewer-capacity-projects>

Thank you!
