

Launched in 2021, the Flood Mitigation Grant Program provides up to 50% of the total costs of eligible floodproofing measure(s) and associated costs, up to a maximum amount of \$5,000, per property.

As of October 2023, condominium and homeowner associations are eligible to receive up to \$25,000 for mitigation practices on common areas.

In an effort to reach more property owners, applicants are no longer required to provide documentation of past flooding to receive grant funding.
