

Trainer's Responsibility Rule

It is against the policy of Western Regional Off-Track Betting Corporation d/b/a Batavia Downs ("Western") for a trainer or other person to administer a mixture, compound or solution that contains confectionary sugar, sodium bicarbonate derivatives or alkalizing agents (of bicarbonate of soda and sugar in any of their form) in any manner to a horse within twenty-four (24) hours of a racing program at which such horse is programmed to race.

It is against the policy of Western for a trainer or other person to administer a drug or foreign substance nasogastrically, orally or by any means of manual dosing to a horse, or using a tubing device, jug, or by intravenous means within twenty-four (24) hours of the start a racing program at which such horse is programmed to race.

It shall be the trainer's responsibility to prevent such administration.

The undersigned acknowledges that they have read and do understand the New York Gaming Commission's policy and procedures on TCO₂ testing and agree to indemnify and hold harmless Western and its agents or assigns for any damages or claims resulting from testing or a breach of this policy.
