Scorecard: House.....	12

Clean Water Action’s goal is to protect and restore our lakes, rivers and streams now and for future generations. We work to protect Minnesota’s health and water by making systemic change. We educate the public, develop grassroots leaders and mobilize our members to get involved in policy decisions.

We also provide tools to help Minnesotans understand how their elected officials are voting. This scorecard covers the 2017 and 2018 Minnesota legislative sessions and scores every Minnesota state legislator on votes that impact clean, renewable energy, water quality, and toxics in our environment.

How Legislators Were Scored

The votes included in this scorecard took place during 2017 & 2018. We only scored recorded votes in which each member of the Senate or House had the opportunity to participate. Both House and Senate legislators were scored on 4 votes in 2017 and 3 votes in 2018. Each vote was weighted equally, and missed votes were excluded. A pro-environment vote is indicated by the color green, an anti-environment vote by red. Any missed votes are indicated by a “ – ”.

What the Scorecard Shows

The 2017-2018 scorecard shows disappointingly low scores on the whole. While some legislators earned favorable scores, the reality is that both bodies of the Legislature and both parties continue to support legislation that put our water and environment at risk.

On average the Senate earned a failing score of 45%, with the House of Representatives earning an average score of 39%.

Review of caucus averages shows that Senate Democrats (89%) on average scored higher than Senate Republicans (0%) while House Democrats (90%) outperformed the House Republicans (1%) on environmental and public health issues.

On an individual basis, 24 members of the Senate and 38 members of the House of Representatives earned perfect scores, while 31 members of the Senate and 73 members of the House of Representatives earned zeros.

Most of the Leadership in the legislature, who should be leading by better example, scored very low, including Senate Minority Leader, Thomas Bakk (03, DFL) who earned a 29%. Both the Speaker of the House, Kurt Daudt (31A, R) and Majority Leader, Joyce Peppin earned zeros.

Clean Water Action State Director, Deanna White, explains that, “A lot of elected officials talk about their love for Minnesota’s water and our environment – but the proof is in their voting record. The sad truth is that many of our legislators are failing to protect our environment and our health. Minnesotans want them to do better.”

During the 2017 and 2018 legislative sessions our Legislature put the priorities of special interests first and ignored opportunities to act on legislation to advance clean energy, safeguard our water resources, and protect children and families from exposure to toxic chemicals.

Environmental issues haven’t always received the most attention at the capitol, especially when it comes to protective policies. Sadly, during the 2017 and 2018 legislative sessions there wasn’t much change. More often than not, environmental legislation becomes part of the give and take during final negotiations. Proactive policies never cross the finish line and compromises made behind closed doors often have negative consequences.

It’s time our elected officials take initiative, work together, and prioritize vital legislation that sustains the health of our environment and communities.

To find out who your legislators are, visit <https://www.gis.leg.mn/iMaps/districts>

2017 Legislative Priorities

- Waste tire moratorium
- Cleaning product ingredient disclosure
- Fragrance ingredient disclosure
- Increase Renewable Energy Standard

2018 Legislative Priorities

- Commercial Salt Applicator Bill
- Firefighter and Children’s Health Protection Act
- Residential lead testing and disclosure requirement
- Forever Green Initiative

Scorecard Votes: 2017 Session

HF 888: Environment and Natural Resources Policy and Finance Omnibus

HF 888 was one of the most sweeping anti-environmental bills to advance at the Capitol in years. Luckily, it was vetoed by Governor Mark Dayton on May 12. Clean Water Action opposed provisions that:

- Allow polluters to write their own draft Environmental Impact Statement (EIS). This is problematic because underlying draft EIS data is not subject to the Data Practices Act when prepared by a private regulated entity, which reduces public transparency and accountability of permitting.
- Deny citizens contested case hearings on mining projects. A contested case hearing allows Minnesotans access to a hearing based on evidence and expert testimony. The provisions limit access to contested case hearings on mining permits for any Minnesotan who does not own property affected by a proposed mine. Examples of those who would lose their right to contest mine permits include: Local governments not identified in an application for a permit to mine, but whose drinking water supply could be affected by water pollution, people renting a home or cabin that would be affected by a proposed mine, people who fish or hunt on public lands/waters that would be affected by a proposed mine.
- Exempt cities that build public water treatment facilities from having to make technological updates to comply with clean water standards for 16 years. This undermines the state's ability to protect our water from known and future contaminants that harm our health and environment.

Voting NO is pro-environment.

Senate Vote: HF 888 passed on May 9th, 2017; there were 34 yeas and 33 nays.

House Vote: HF 888 passed on May 9th, 2017; there were 79 yeas and 55 nays.

SF 1937: Jobs and Energy Omnibus

SF 1937 contained multiple policies that roll back Minnesota's progress on energy, by:

- Removing consumer protections for families, businesses, and farmers served by municipal and cooperative utilities who invest in their own energy facilities like rooftop solar and small wind. Cooperative customers have challenged fees as high as \$83 per month at the Minnesota Public Utilities Commission. The provision removes their ability to have those fees reviewed by independent experts at the Commission.
- Exemption of small utilities from the state's Conservation Improvement Program, leaving more than 62,000 rural customers without the same opportunities to cut energy waste and save money on their utility bills. Customer size does not determine how a utility may conserve energy.
- Assess fees on fully electric vehicles. Electric vehicle owners will now be assessed a tax of \$75 a year, an unfair penalty.
- Allow the Legislature to interfere with projects funded out of the Renewable Development Account, which paid for clean energy innovation projects. While Xcel Energy and the Public Utilities Commission have authority over which projects are recommended for funding, the Legislature can zero out funding for that slate of projects.

Voting NO is pro-environment.

Senate Vote: SF 1937 passed on May 15th, 2017; there were 34 yeas and 30 nays.

House Vote: SF 1937 passed on May 15th, 2017; there were 75 yeas and 54 nays.

HF 234: Conservation Improvement Program Exemption

The legislation exempts municipal electric utilities with less than 1,000 retail customers and electric cooperative utilities with less than 5,000 members from the Conservation Improvement Program (CIP). This reduces the opportunities for cost-effective energy savings available to rural Minnesotans. The statewide associations for municipal and cooperative utilities did not support this provision.

Voting NO is pro-environment

Senate Vote: HF 234 passed on February 9th, 2017; there were 39 yeas and 26 nays.

House Vote: HF 234 passed on February 9th, 2017; there were 89 yeas and 37 nays.

HF 113: Natural Gas Plant Authorization

HF 113 allows Xcel to move forward with construction of a new natural gas plant to replace the Sherco coal plants set to be phased out by 2026. Clean Water Action opposed this legislation because it allows Xcel to bypass the Certificate of Need process which evaluates need as well as the alternatives available to satisfy that need. It also eliminates the consumer protections in place from the Minnesota Public Utilities Commission to keep costs low and avoid unnecessary investments.

Voting NO is pro-environment

Senate Vote: HF 113 passed on February 16th, 2017; there were 39 yeas and 25 nays.

House Vote: HF 113 passed on February 23rd, 2017; there were 80 yeas and 45 nays.

Scorecard Votes: 2018 Session

HF 2887/SF 2720: Nitrogen Fertilizer Rule Prohibition

In 1989 the legislature passed the Groundwater Protection Act, which directed the Minnesota Department of Agriculture (MDA) to promote voluntary pollution prevention by reducing the use of chemical fertilizer to grow crops. The MDA was also given the authority to impose rules that limit cropland pollution of drinking water supplies if voluntary measures did not suffice. In recent years, the MDA worked to develop and propose a rule in response to areas where nitrates in the water supply are approaching unsafe levels. This legislation would have prohibited the Department of Agriculture from adopting the Groundwater Protection Rule.

Voting NO is pro-environment.

House Vote: HF 2877 passed on April 16th, 2018; there were 69 yeas and 56 nays.

No Senate floor vote.

HF 3422/SF 2988: Wild Rice Sulfate Standard

Minnesota's sulfate standard was adopted in 1973 but has rarely been enforced. In 2011, the legislature directed the Minnesota Pollution Control Agency to develop a new standard. The MPCA updated the rule only for it to be rejected earlier this year by an administrative law judge. Governor Dayton vetoed the previous attempt to nullify the state's wild rice sulfate standard (HF 3280). In addition to conflicting with federal law, the bill:

- Prohibits protection until officially listed as a Wild Rice Water. Currently only 24 waters are named as Wild Rice Waters in rule. The MPCA, tribes and DNR have identified at least 1300-1600 that need protection from sulfate pollution and blocking the listing and protection of wild rice waters is in direct violation of the Clean Water Act.
- Requires significant list of scientific information to be gathered and analyzed for each water body before it can be listed as a Wild Rice Water, but provides \$0 for this work to be conducted.
- Creates barriers to using existing and new technologies to remediate sulfate pollution in wild rice waters.
- Requires evaluation of new technologies for sulfate control, but provides no funding for research.

Voting NO is pro-environment

Senate Vote: HF 3422 passed on May 20th, 2018; there were 39 yeas and 28 nays.

House Vote: HF 3422 passed on May 20th, 2018; there were 86 yeas and 42 nays.

HF 3759/SF 3150: Enbridge Line 3 Authorization

The legislation would have required the Public Utilities Commission to immediately permit Calgary-based Enbridge's proposed Line 3 crude oil pipeline project, effectively terminating a three-year regulatory process that's nearly complete. Oral arguments will be heard on June 18th regarding need and route, the last step in a deliberative process. The legislation was vetoed by Governor Dayton on May 19th.

Voting NO is pro-environment

Senate Vote: HF 3759 passed on May 16th, 2018; there were 35 yeas and 32 nays.

House Vote: HF 3759 passed on May 16th, 2018; there were 74 yeas and 53 nays.

HF 3708/SF 3504: Xcel Renewable Development Account

The legislation would have placed a cap on the total payments by Xcel Energy towards the Renewable Development Account. Instead of paying an annual 'per-cask fee' for each of its stored nuclear waste casks, Xcel Energy would have been limited to paying \$23 million in 2019, \$28 million in 2020, \$28 million in 2021, and \$20 million in 2020 and thereafter – effectively reducing the total payments by Xcel Energy for storing nuclear waste within the state of Minnesota.

Voting NO is pro-environment

Senate Vote: SF 3504 passed on May 14th, 2018; there were 37 yeas and 29 nays.

No House floor vote.
