“I represent a state that, much like a prizefighter, punches above its weight in terms of its contributions to the U.S. economy. The same could be said about EDA. This small agency packs a big punch and makes an outsized impact across our country.

“Despite all of the exceptional work that EDA has done in every one of our states, the agency has not been reauthorized by Congress since 2004 – nearly two decades ago. That’s too long for an agency with such an important mission to go without renewed authorization.

“Through reauthorization, we have an opportunity to modernize and improve EDA’s ability to foster additional economic growth.

“EDA has an impact in communities large and small, in urban areas as well as rural ones. I look forward to working with our colleagues on this committee to ensure that EDA has the necessary tools to help those communities punch above their weight...”

Chairman Tom Carper

“This critical funding from the American Rescue Plan’s Indigenous Communities program will help the Ute Mountain Ute tribe access healthy food and drive economic opportunity for workers, entrepreneurs, and families.”

U.S. Senator Michael Bennet

“Tribal communities are central to EDA’s mission of economic investment and long-term development that benefit every part of our nation. By working in a true partnership with our Tribal community neighbors we are helping reverse generations of underinvestment. Moreover, we are empowering a new generation to excel in good-paying jobs that help lift up entire regions.”

Carolee Wenderoth, Tribal Engagement Coordinator, U.S. Economic Development Administration

EXAMPLE PROJECT

In FY2023, EDA awarded **\$2,642,744 in Public Works funding to the Utilities Board of the City of Tuskegee** to support construction of a new electrical distribution substation in Macon County, Alabama. The project will provide the necessary power to support the Tuskegee Commerce Park, currently in development, and an automotive manufacturing facility. Once completed, the project will enhance economic growth, provide job opportunities to the city, and advance economic stability throughout the region.

“We didn’t have so much as a screwdriver for an automotive program. Through EDA funding, we now operate a 23,000-square foot facility, with 20 automotive bays.”
John Holley, Dean of Technologies, Calhoun Community College

EXAMPLE PROJECT

In FY2022, EDA invested **\$3,036,465** in American Rescue Plan Act (ARPA) – Indigenous Communities funds the **Coeur d'Alene Tribe** to support the installation of a water supply system to replace defective water utilities infrastructure in the town of De Smet, Idaho. The Coeur d'Alene Reservation is located in the northern part of Idaho and the improved infrastructure will deliver a quality water supply that will create conditions that are economically favorable for the Plummer, Idaho region. The project work consists of replacing an aging and undersized water system infrastructure and water storage reservoirs.

“The goal of our business development center program is to get businesses rooted and establish a firm foundation for their companies. The facilities have been a blessing for the communities.”

Rick Miller, a Project Manager with East-Central Idaho Planning & Development Association

EXAMPLE PROJECT

In FY2023, EDA awarded **\$1,688,625 in Public Works funds to support Kaskaskia Regional Port District (KRPD)** with the construction of a new laydown space at their KRPD 2 Terminal, to support the movement of equipment and supplies of current industrial park tenants while allowing for future growth in Red Bud, Illinois. KRPD is a source of regional economic growth, and freight transportation is a key industry cluster. The new infrastructure will ease congestion at the fast-growing port, which will help create jobs, recruit new industries into the area, and advance economic resiliency throughout the region.

EXAMPLE PROJECT

In FY2023, EDA awarded **\$1,700,425 in Public Works funds to support the Town of Oxford** with making water infrastructure upgrades to support manufacturing in Benton County, Indiana. The project will increase capacity and reliability of water service to meet the increased needs of a local pharmaceutical manufacturer.

“Because our programming is subsidized by the EDA grant, it lowered the barrier-to-entry that welcomes any and all Indiana residents with an entrepreneurial mindset. The program not only boasts participants across age, gender, and race, but it also attracts ideas and entrepreneurs not typically seen in venture capital.”

**Landon Young, Executive Director
for University Initiatives
and Entrepreneur-in-Residence
at Elevate Ventures**

\$525k+	Build to Scale	1

EXAMPLE PROJECT

In FY2022, EDA awarded **\$9,968,028 in Economic Adjustment Assistance – 2019 Disaster Supplemental funds to support the City of Davenport** with the construction of a flood prevention levy wall and pumping system to protect the regional wastewater treatment facility during future flood and stormwater events in Scott County, Iowa. The new earthen berm-structure and stormwater-pumping system upgrades will provide the region with reliable and resilient wastewater treatment during major storm and flooding events and maintain the region's competitiveness during and after natural disasters.

"EDA's nimbleness set it apart from other federal agencies. EDA representatives worked directly with communities to determine the greatest needs and the most appropriate role for EDA assistance. The flexibility of EDA funding allowed the agency to support a comprehensive approach toward recovery and long-term resiliency, from staffing through recovery coordinators, to infrastructure through public works. Throughout Iowa, and especially in the ECICOG region, the goal was to 'build back better.' EDA was a key partner in bringing that goal to reality."
Doug Elliott, Executive Director, East Central Iowa Council of Government

“This Tech Hub designation is a tribute to our cutting edge Minnesota businesses and our incredible workers. It will provide federal support for partnerships between Minnesota hospitals, research institutions, and medical technology companies to accelerate innovation, improve healthcare, and create good jobs.”

U.S. Senator Amy Klobuchar

EXAMPLE PROJECT

In FY2023, EDA awarded **\$1,485,000 in Economic Adjustment Assistance – Assistance to Coal Communities funds to support the city of Oak Park Heights** with making water infrastructure improvements, to include a new municipal well and pumphouse to ensure uninterrupted water service throughout the city. The project will increase water capacity to service current and future businesses in Washington County, Minnesota. The closure of a coal-burning power generation facility will negatively impact the regional economy. This project will help the city meet industrial demand for water services and recover from the coal plant's closure.

Recompete Strategy Development Grant	1

EXAMPLE PROJECT

In FY2023, EDA awarded **\$3,000,000 in Public Works funds to support construction of a new industrial training facility on the campus of East Mississippi Community College**, to prepare workers for manufacturing and industrial service sectors in Scooba, Mississippi. The facility will allow students and trainees the opportunity to earn certificates and associate degrees in electrical technology, welding and fabrication, HVAC maintenance, and more.

“Mississippi’s community college system has a well-deserved reputation for excelling at job and career training. By adding this EDA grant to the funding mix, East Mississippi Community College will be able to improve its capabilities to prepare more Mississippians for in-demand industrial careers.”

U.S. Senator Cindy Hyde-Smith

The EDA data provided herein should be viewed as a snapshot of the data available at the time of the data request and are subject to any changes, or updates as reflected within future reports and data requests. This includes, but is not limited to, revisions to the number, dollar amount, program classification and estimated impacts of specific grant awards.

All data as of 2/23/2024; State totals are based on the location of the grantee; All dollar amounts rounded.

1 Applicant estimated at the time of award.

2 Projects may be counted multiple times across themes if they align to multiple themes.

3 Projects are identified as benefitting communities highly dependent on the coal industry, including those funded via the Assistance to Coal Communities program.

EXAMPLE PROJECT

In FY2023, EDA awarded **\$1,981,419 in Economic Adjustment Assistance funds to support the Port of Hood River** with constructing a roadway in Hood River County River, Oregon, to help increase the port's capacity and boost its ability to serve regional businesses. The project work includes the construction of an approximately 550 linear feet and approximately 64 feet wide road, relocation, and the reconfiguration of approximately 750 linear feet and 60 feet wide road. In addition, there will be an installation of water, sewer, storm water, electrical, gas, and communications utilities infrastructure, and construction of a public transit hub central transfer facility.

"[Support from EDA] allows us to work with communities in a way that moves the discipline of economic development forward. That partnership of bringing the capacity of higher education into practice is so important."

Bob Parker, former Exec Director of Oregon's Institute for Policy Research and Engagement (IPRE)

The EDA data provided herein should be viewed as a snapshot of the data available at the time of the data request and are subject to any changes, or updates as reflected within future reports and data requests. This includes, but is not limited to, revisions to the number, dollar amount, program classification and estimated impacts of specific grant awards.

All data as of 2/23/2024; State totals are based on the location of the grantee; All dollar amounts rounded.

1 Applicant estimated at the time of award.

2 Projects may be counted multiple times across themes if they align to multiple themes.

3 Projects are identified as benefitting communities highly dependent on the coal industry, including those funded via the Assistance to Coal Communities program.

4 Tech Hubs designees are also eligible to apply for EDA's Tech Hubs Phase 2 Notice of Funding Opportunity.

In FY2023, EDA awarded **\$1,989,210 in Economic Adjustment Assistance – Assistance to Coal Communities funds to support the Pennsylvania College of Technology** in renovating the Building Technology Center and constructing the Clean Energy Center House to support workforce development in Williamsport, Pennsylvania. The project will support the college's ability to develop and train skilled workers to increase capacity to develop workers that can compete for standard skilled labor positions and new emerging skills positions, including those supporting the region's strong eco-manufacturing sector. Once completed, the project will help guide the region towards creating opportunities for high-wage jobs and increasing access to higher education.

“This EDA investment will allow Utah State University Eastern and Carbon County to expand the Aviation Campus Workforce Development Project, offering workforce training and academic programs to students and workers from all over the state – strengthening regional career options.”

U.S. Senator Mitt Romney

EXAMPLE PROJECT

In FY2023, EDA awarded **\$1,381,500 in Economic Adjustment Assistance – Assistance to Coal Communities funds to support the building of an aircraft maintenance technician campus training facility and hangar in Carbon County, Utah.**

Carbon County is partnering with Utah State University Eastern to address the local and regional workforce training needs in the region by establishing the Aviation Campus Workforce Development program, which will support the transition of displaced coal workers into other high-paying occupations that will further serve regional growth. Graduates of the training program will not only be qualified for well-paying career options in aviation maintenance, but also will be able to pursue careers in alternative energy development, automotive mechanical work, and other industries.

EXAMPLE PROJECT

In FY2023, EDA awarded **\$2,638,075 in Public Works funds to support the Lac Du Flambeau Band** with constructing a molding plant for a Tribally owned enterprise in Vilas County, Wisconsin. The new molding facility will exist at the Lac du Flambeau Industrial Park. The project will consist of many components such as site preparation, installation of concrete floor, plumbing, electrical, fire protection systems, heating ventilation and air conditioning. Once completed, the project will help the Lac Du Flambeau Tribe to no longer depend on outsourced work due to the creation of more manufacturing jobs for the Reservation.

EXAMPLE PROJECT

In FY2023, EDA awarded **\$3,000,000 in Economic Adjustment Assistance – Assistance to Coal Communities funds to support the construction of a Health Science Wing on the main campus of Western Wyoming Community College** in Rock Springs, Wyoming. The project includes construction of a new addition and renovation of existing classrooms, which will increase enrollment and completions for the health science programs in response to a demand for skilled healthcare workers in the region. In addition, the project will improve the teaching environments in accordance with accrediting recommendations and requirements.

“One thing that entrepreneurs are very excited about is that the EDA grant is allowing us to expand across the state and to have someone physically in smaller cities. It makes the community feel like they are that much more supported, and they are more eager to connect because we are right there.”

Monica Jo Patten, IMPACT 307's Assistant Director

EXAMPLE PROJECT

In FY2022, EDA awarded **\$1,220,410 in CARES Act funds to support Guam Community College** with renovating a workforce development training facility in Barrigada, Guam. Guam's economic conditions weakened due to the COVID-19 pandemic and the improvements will allow the Community College to expand workforce development programs to boost employment opportunities in the area.

“One of the things we really appreciate is the fact that EDA had confidence in us to be able to pull this off.”

**Bert Johnston, Director of Education,
the Guam Contractors Association (GCA)**
