NOTICE

FINAL WASTE RULE QUARTERLY REPORTING REQUIREMENTS

September 14, 2021

In accordance with 19.15.27 and 19.15.28 NMAC, operators are required to start collecting data beginning October 1, 2021 for quarterly reports due in February and May 2022.

The Oil Conservation Division (OCD) sought stakeholder feedback on the draft requirements in August 2021. After thoughtfully considering the feedback and making some additional adjustments, today the OCD announces the finalized template, and has posted both the notice and template file on the [OCD's Announcements web page](#).

The Excel template illustrates the types of data and calculations required in the quarterly reports. This file is in Excel file format for ease of illustration, but the quarterly reports will be submitted electronically through OCD's e-permitting portal. OCD intends to issue additional guidance regarding the required format for electronic submission of the quarterly reports at a later date.

Submit questions to EMNRD.Wasterule@state.nm.us.
