Incentives for SW Washington Customers of NW Natural.

TRC is a Program Management Contractor for Energy Trust of Oregon.

Effective January 1, 2024, Energy Trust offers the following incentives for qualifying new natural gas energy-saving equipment installed at a commercial, municipal or institutional facility in SW Washington:

- Natural gas customers on NW Natural eligible rate schedules (Schedule 1, 3, 41 or 42) can apply for incentives for qualifying natural gas equipment.
- Incentives are subject to change. To apply, submit a complete Energy Trust incentive application with all required accompanying documentation by the date listed in the application form.

Lodging Incentives

Equipment		Incentive				
	Must be a replacement, gas-fired po- continuously burning pilot light. Mus	Non-condensing	g Heater, Covered	\$0.90 per sq ft of area served by heater		
	heater, not to exceed a total (or maccombined. Must have at least 94%	Non-condensing	g Heater, Not covered	\$1.00 per sq ft of area served by heater		
	heaters, or at least 84% efficiency for non-condensing heaters. Site must receive gas from NW Natural. Covered and not covered pools both qualify. Eligible pool covers include solid track, bubble type, or foam type with			Condensing He	ater, Covered	\$3.00 per sq ft of area served by heater
	storage reels.		'	Condensing He	ater, Not covered	\$5.00 per sq ft of area served by heater
	The pool must meet the following m	inimum area requirements	:			
Commercial Swimming Pool		Heater Type	Covered Pool?	Indoor or Outdoor Pool	Minimum Required Pool Sq. Ft.	
Heater		Condensing	No	Indoor	1,275	
				Outdoor	700	
		Condensing	Yes	Indoor	2,150	
				Outdoor	1,050	
		Non-condensing	No	Either	500	
			Yes	Indoor	850	
		Non-condensing				
Commercial Pool Cover	Pool must be heated. Pool must not have had a pre-existing cover within 6 months of pool cover installation. Covers installed at residential pools do not qualify. Eligible sites include commercial pools within lodging, fitness centers and municipal centers. Cover must be specifically designed for swimming pools, cover entire pool surface area and utilize a storage reel. Liquid evaporation suppressants, solar disks and mesh covers are ineligible. Pool heating fuel must be gas provided by NW Natural.					d \$6.00 per sq ft of pool

HVAC and Water Heating Equipment

Equipment	Requirements		Incentive	
New Rooftop Unit (RTU) with Demand Control Ventilation (DCV)	All installed RTUs must be new units with Direct Expansion (DX) cooling and gas furnace heating. provided by NW Natural. Must serve spaces not required by code to have DCV. Economizer must contractor-installed at the same time as RTU, with DCV included.		\$29 per ton	
Advanced Rooftop Controls (ARC) - Full Retrofit	Business has at least 500 annual operating hours. Only gas-heated Rooftop Units (RTUs) qualify; gas heating must be provided by NW Natural. Existing system must have a nominal cooling capacity of at least 5 tons. Existing system must have a single speed supply fan or motor. Existing systems equipped with a Variable Frequency Drive (VFD) or a CO ₂ sensor for Demand Control Ventilation (DCV) do not qualify. Existing systems with economizers do not qualify. Installed equipment must have a controller with digital, integrated economizer with either differential dry-bulb or differential enthalpy with fixed dry-bulb high-limit shutoff. Installed equipment must have a controller with DCV with proportional control based on CO ₂ sensor reading. Installed equipment controls listed on BPA qualifying product list*.			
Infrared Dadient Heater	Must be natural gas-fired, low intensity, non-condensing and positive pressure system. Indoor	Non-Modulating	\$1.25 per kBtu/h input	
Infrared Radiant Heater	area use only, no greater than 20,000 square feet. Site must receive gas service from NW Natural.	Modulating	\$2.25 per kBtu/h input	
Commercial Condensing Tank Water Heater	Gas-condensing, storage-type water heater must have an integral tank volume at least 10 gallons. capacity must be greater than 75 kBtu/h per water heater. Must have at least 94% thermal efficience efficiency. All building types can qualify excluding offices with less than 5,500 sq ft and commercia facilities. Additional storage-only tanks may be present. Site must have water heating provided by where existing water heater is functional, and not at the end of its useful life, do not qualify.	\$3.50 per kBtu/h		
Commercial Condensing Tankless Water Heater under 200 kBtu/h input	Gas-condensing units must function as central source for domestic hot water (DHW) heating. Water Heater Uniform Energy Factor (UEF) must be at least 0.94. Water heater input capacity must be less than 200 kBtu/h per water heater. Additional hot water storage tanks cannot be added. Approved models must be found here: www.ahridirectory.org . Site			
Commercial Condensing Tankless Water Heater/ Boiler at least 200 kBtu/h input	Gas-condensing domestic hot water (DHW) must not be used for space heating and must serve a system. Integral tank volume must be less than 10 gallons. Must have at least 94% thermal efficier input capacity must be at least 200 kBtu/h per water heater. All building types can qualify excluding 5,500 sq ft and commercial gyms without shower facilities. Approved models must be found here: Site must have water heating provided by NW Natural.	\$1.40 per kBtu/h input		
Commercial Condensing Gas Furnace	Must be primary heating source for the space. Input capacity must be less than 225,000 Btu/h. Mu Annual Fuel Utilization Efficiency (AFUE). Must have either multispeed or variable speed Electroni Motor (ECM) supply fan. Site must have gas heating provided by NW Natural.		\$8.25 per kBtu/h input

HVAC and Water Heating Equipment continued

Equipment	Requirements		Incentive
Gas-fired High Efficiency Condensing HVAC Boiler	Must have at least 94% efficiency, either Annual Fuel Utilization Efficiency (AFUE) or thermal efficiency 5-to-1 turndown ratio. Must not be a backup, redundant or lagging boiler. Must be used for H\ used for domestic hot water (DHW), pool heating, and "heat adders" that serve water-source heat pqualify. Boiler system design return temperature must be appropriate to condensing functionality. On the Modulating Boiler Burner measure.	\$6.50 per kBtu/h input	
Modulating Boiler Burner	Must be installed on a natural gas-fired boiler used for hydronic heating (HVAC). Must replace a du off burner. Must have at least 5-to-1 turndown ratio. Boilers used for process heating, domestic hot do not qualify. Cannot be combined with the Gas-fired High Efficiency Condensing HVAC Boiler me	\$10.00 per kBtu/h of burner rated capacity	
Steam Trap	Must replace or repair a failed, open existing steam trap. Must be installed on a gas-fired steam boiler system served by NW Natural. All steam traps in the system must be tested for failure	Replaced steam trap	\$500 each
	status prior to replacement or repair. All systems must be no greater than 50 psig. For repaired traps, invoices for steam trap repair parts are required.	Repaired steam trap	\$400 each
Steam Trap – Dry Cleaners	Must replace steam trap(s); repairs do not qualify. Existing equipment may be operating or failed. Squalify. Must be installed on a gas-fired steam boiler system served by NW Natural. Dry cleaner sy 125 psig. Dry cleaner properties must provide details of last steam trap replacement and previous is steam trap replacement.	\$350 each

HVAC and Water Heating Equipment continued

Equipment	Requirements	Incentive
	Each thermostat must control a single-zone HVAC system with dedicated supply fan. Lodging sites, spaces with 24/7 operation, and semi-conditioned spaces do not qualify. Multiple HVAC systems serving a large open space (retail, grocery, etc.) are eligible if each system has a dedicated controlling thermostat. Self-installed thermostats may be subject to a post-install verification review before payment. A list of qualifying thermostats can be found at https://www.bpa.gov/-/media/Aep/energy-efficiency/document-library/connected-thermostat-qualified-products-list.pdf .	\$500 each at grocery sites
Commercial Smart Thermostats	 The following installation requirements must also be met: If two or more HVAC systems serve the same open space, temperature setpoints, schedules and dead-bands must match. Temperature setback in heating mode must be at least 10°F below the occupied heating setpoint. Temperature setback in cooling mode must be at least 5°F above the occupied cooling setpoint. Fan schedule set to 'auto' mode during unoccupied hours. Manual setpoint override must be limited to two hours or less. Heat pump with backup resistance heat must enable lock-out with appropriate temperature set-points. If a site has existing heating systems with demand-controlled ventilation or advanced rooftop controls, thermostat installers must not disable these systems. 	\$400 each at non- grocery sites

BPA qualifying product list: https://www.bpa.gov/-/media/Aep/energy-efficiency/document-library/connected-thermostat-qualified-products-list.pdf.

Grocery Equipment

Equipment	Requirements	Incentive	
Doors on Open	Must be installed in gas-heated spaced with gas service provided by NW Natural. Must add doors to existing, functional open freezers or refrigerated cases. Self-contained refrigeration		
Freezers or Open Refrigerated Cases	cases (integrated condensing units) do not qualify. Low temperature is at or below 0°F. Medium temperature is between 1°F and 35°F.	Low Temperature	\$200 per linear ft of door
New Cooler Cases with Doors	Must be a new refrigerated display case with doors: either additional cases are being added or existing cases are being replaced. Doors must be transparent. Cases with solid doors do	Vertical cases - Coolers only	\$150 per linear ft of door
	not qualify. Refurbished cases do not qualify. Must be installed in gas-heated spaces with gas service provided by NW Natural.	Horizontal cases - Coolers or Freezers	\$150 per linear ft of door

Insulation

- Must be installed in gas-heated spaces with gas service provided by NW Natural.
- Must be installed in areas of the building envelope that separate conditioned space and unconditioned space.
- Insulation installed between conditioned spaces is ineligible.
- Damaged or missing insulation must be prequalified and documented by the installation contractor.

Upgrade	Existing Condition	New Condition	Requirements	Incentive
Attic Insulation	R-9 or less	R-25	Insulate to at least R-25 efficiency rating or fill cavity.	\$0.90 per sq ft
Roof Insulation	R-0	R-15	Insulate to at least R-15 efficiency rating or fill cavity below R-15. No existing insulation, unless existing is damaged or missing.	\$2.85 per sq ft
Roof Insulation	R-0	R-30	Insulate to at least R-30 efficiency rating or fill cavity above R-15.	\$2.85 per sq ft
Roof Insulation	R-5 or less	R-30	Existing insulation is R-5 or less. Insulate to at least R-30 efficiency rating or fill cavity.	\$1.00 per sq ft
Wall Insulation	R-6 or less	R-20	Insulate to at least R-20 efficiency rating or fill cavity.	\$1.30 per sq ft

Pipe Insulation

	米
Energy	Trust
O,	of Oregon

Upgrade	Existing Condition		Requirements					Incentive
		Must not have existing insulation. Jacketing must provide an appropriate level of protection for the insulation under the given environmental conditions to maintain the life of the insulation. This will commonly be All Service Jacketing (ASJ) or PVC in indoor applications and aluminum or stainless steel jacketing for outdoor projects. Piping must be part of a system using					Piping serving domestic hot water	\$18.00 per linear foot
			natural gas provided by NW Natural. Water heaters or boilers providing hot water or steam to uninsulated pipes must be natural gas-fired. Piping				Piping serving medium pressure	\$25.00 per linear foot
				Pipe D	iameter		steam (15-200 psig)	
Pipe Insulation	No Insulation		Fluid	1.5 inches or less	Greater than 1.5 inches			
			Domestic Hot Water Heating Hot Water Low Pressure	1.5 Inches	2.0 Inches		Piping serving heating hot water	\$25.00 per linear foot
			Medium Pressure	2.0 Inches 2.5 Inches	Piping serving low pressure steam (less	\$25.00 per linear foot		
							than 15 psig)	

Custom Incentives May Be Available

Energy-efficient equipment not listed above may still be eligible for custom incentives. To learn more about these and other incentives, call the Existing Buildings Program at 1.877.510.2130 or visit our website at https://www.energytrust.org/incentives/custom-incentives-washington/.
