

2024 Clean Ports Program Dry Port Project Eligibility Information

Only projects taking place at water ports and dry ports as defined in the Clean Ports Program Notices of Funding Opportunities (NOFOs) are eligible for funding. This document provides guidance on what qualifies as a “dry port” for purposes of the Clean Ports Program.

A **dry port** is defined in the 2024 Clean Ports Program as:

- an intermodal truck-rail facility that is included in the 2024 Federal Highway Administration’s (FHWA) Intermodal Connector Database based on meeting the criteria set in 23 CFR 470. These criteria include having more than 50,000 20-foot equivalent units per year or 100 trucks per day, or comprising more than 20 percent of freight volumes handled by any mode within a State.

In order for a project to qualify as taking place at a dry port, the project must take place at a truck-rail facility listed below. The list is sourced from the 2024 Federal Highway Administration’s (FHWA) Intermodal Connector Database (https://www.fhwa.dot.gov/planning/national_highway_system/intermodal_connectors/). FHWA works with state Departments of Transportation (DOTs) to collect data on annual freight volumes and daily vehicular traffic at intermodal facilities across the U.S. For a truck-rail facility to be included on this list, it must meet criteria in the regulations for modifying routes and intermodal connectors on the National Highway System (NHS), located in Subpart A of 23 CFR 470, “Federal-aid Highway Systems”. Criteria specific to connectors and terminals are in Paragraph 9 of [Appendix D to Subpart A](#), "Guidance Criteria for Evaluating Requests for Modifications to the NHS".
