

G20: Event debates financial inclusion of micro, small and medium-sized enterprises

- *“Powering Growth: Unlocking MSME Finance Through Policies, Innovation and Partnerships” brought together experts from different countries;*

- *Digitalization, lower interest rates, new technologies and international experiences were some of the topics discussed.*

How to promote the financial inclusion of micro, small and medium-sized enterprises? How can we ensure the quality of this inclusion? How to combat over-indebtedness? How to develop effective financing policies for micro, small and medium-sized enterprises? These and other questions were the focus of the international conference “[Powering Growth: Unlocking MSME Finance Through Policies, Innovation and Partnerships](#)”, held on March 14th at the Banco Central do Brasil Headquarters, in Brasília.

Held within the scope of the G20, on the sidelines of the first plenary meeting of the Global Partnership for Financial Inclusion (GPFI), the event was the result of a partnership between the Banco Central do Brasil, Sebrae (the Brazilian Micro and Small Business Support Service) and SME Finance Forum and brought together experts from Brazil and from different parts of the world. There were debates and exchanges of experiences on topics such as financial inclusion, digital transformation, fintechs and innovation for micro, small and medium-sized enterprises.
