Covers and Text:

(*) **CONTENT PROOFS:** Ten digital color **CONTENT** proofs created using the same Raster Image Processor (RIP) that will be used to produce the product. Proofs shall be collated in page sequence with all elements in proper position (not pasted up), imaged face and back, and trimmed to the finished size/format of the product. **NOTE:** Proofs **MUST** show drilling placement.

Covers Only:

(*) **INKJET PROOFS:** One set of **INKJET** proofs that are G7 profiled and use pigment-based inks. A proofing RIP that provides an option for high quality color matching (such as Device Links Technology and/or ICC Profiles Technology), and meets or exceeds industry tolerance to ISO 12647-7 Standard for Graphic Technology (as of 3/19/09, and future amendments) must be utilized plus GRACoL 2006 Coated #1 specifications (CGATS TR006) must be achieved. Output must be a minimum of 720 x 720 dpi on a GRACoL or SWOP certified proofing media. Proofs must contain the following color control strip to be evaluated for accuracy: IDEAlliance ISO 12647-7 Control Strip 2009 or 2013(i1). **NOTE:** Proofs **MUST** show drilling placement.

Proofs must contain color control bars (such as Brunner, GATE, GRETAG, or RIT) for each color of ink on the sheet. Control bars must be placed parallel to the press's ink rollers and must show areas consisting of minimum 1/8 x 1/8" solid color patches; tint patches of 25, 50 and 75%; dot gain scale; and gray balance patches for process color (if applicable). These areas must be repeated consecutively across the sheet.

The make and model number of the proofing system utilized shall be furnished with the proofs. These proofs must contain all elements, be in press configuration, and indicate margins. Direct to plate must be used to produce the final product.

NOTE: Pantone color may be substituted with a similar color (with the exception of process yellow) but may not be built out of the four process colors. Contractor to submit ink draw downs on actual production stock of Pantone color used to produce the product.

SOFT PROOFS: Contractor must provide soft proofs(**) of the tab dividers and of any corrections indicated on the initial proofs of the covers, text, or tab dividers.

Tab Dividers:

(**) **PDF PROOF:** One "Press Quality" PDF Proof (for content only) using the same Raster Image Processor (RIP) that will be used to produce the final printed product. Proof must show drilling placement, color, and contain all crop marks. PDF proof(s) will not be used/approved for color match or resolution.

Corrections:

(**) **PDF PROOF:** One "Press Quality" PDF Proof (for content only) each of the covers, text, and tab dividers after any corrections indicated on the initial proofs have been made. Proofs must use the same Raster Image Processor (RIP) that will be used to produce the final printed product. Proof must show drilling placement, color, and contain all crop marks. **NOTE:** If file size for the text is too large to be emailed as one file, the contractor is authorized to email as low resolution. PDF proof(s) will not be used/approved for color match or resolution.

Email all PDF proofs to Eugenia Collins (Eugenia.F.Collins@irs.gov), Traci Cobb (tcobb@gpo.gov), John Desmet (John.P.Desmet@irs.gov), and Keith Hedgspeth (Keith.R.Hedgspeth@irs.gov). NOTE: Contractor must call Eugenia Collins (404-985-5724) to confirm receipt.

NOTE: Contractor furnished proof approval letters will not be recognized for proof approval/disapproval. Only GPO generated proof letters will be recognized for proof approval/disapproval. Contractor must not print prior to receipt of an "OK to print" via email.

CONTRACTOR TO FURNISH: All materials (**including 2" round re-closeable metal O-Rings**) and operations, other than those listed under "Government to Furnish," necessary to produce the product(s) in accordance with these specifications.

PRODUCT PRODUCTION REPORT: Contractor must email a product production report to Eugenia Collins (Eugenia.F.Collins@irs.gov), Traci Cobb (tcobb@gpo.gov), John Desmet (John.P.Desmet@irs.gov), and Keith Hedgspeth (Keith.R.Hedgspeth@irs.gov) DAILY by 10:00 AM Eastern once printing of the text begins and continue the report through shipping. The report must detail daily quantities for printing, trimming, drilling, set assembly/shrink-wrapping, and shipping. The information must be provided in an Excel spreadsheet and reflect daily quantities.

TRIMMING/DRILLING:

-- Covers and Text: Trim 4 sides. Contractor to collate covers 1/2, text, and covers 3/4.

-- Tabs: There are a total of 19 tabs. Tabs are 1/8 cut, 2-3/8 banks of clear laminate tabs. Tab positions begin at foot (i.e. tab position 1 is located at bottom of page). Rounded corners on tabs. After printing, tabs must be reinforced by the lamination method of a single thickness of clear plastic, cellulose acetate, polyethylene terephthalate, or equal materials, securely bonded to each side of the divider which shall overlap at least 3/8" on the base sheet and extend at least 3/8" beyond the tab end. Contractor to collate tab dividers in alphabetical order.

-- Drill covers, text, and tab dividers with three holes (5/16" to 3/8" diameter); centered on the 11" dimension; 4-1/4" center to center; center of holes 3/8" from left edge of product. Contractor to ensure no loss of copy due to drill hole placement. Size of holes must be consistent.

SET ASSEMBLY/SHRINK-WRAP: Contractor to assemble set in the following order: one set of collated covers with text, one set of collated tab dividers, and one piece of 9 x 11" chipboard or equal to protect the tabs. Contractor must also include one O-Ring in each shrink-wrapped package. Contractor's option to place the O-ring on top of Cover 1 or between the covers/text and tab dividers. Shrink-wrap each set individually. Cover 1 of the book will face out on the top of the set. The shrink-wrap must be suitable weight to support the sets in the shipping containers.

PACKING/LABELING: NDC bulk shipments must be packed in UNIFORM quantities per carton*. *Contractor must NOT deviate from the specified quantity. Product must be packed so copies are not damaged in transit. Contractor to place full size corrugated boards on top, bottom, and vertically between any stacks (if necessary to protect product).

All cartons must be packed solid with a maximum weight of 32 lbs per carton. Pack solid in corrugated or solid fiber shipping containers, bursting strength: 200p.s.i, minimum. Carton bottoms may be glued, stapled, or sealed with polyester tape (2 to 3 inches width, not reinforced), minimum 12kNm (65 lbs./inch) traverse tensile strength. If stapled, the cartons may only be stapled on the bottom and/or side; no staples are to be used on top. Cartons are to be sealed at the top with paper or polyester tape (2 to 3 inches width, not reinforced). Contractor will determine exact dimensions of carton in accordance with folded and/or trim size and weight of the product produced. NOTE: Packing peanuts/beads are not acceptable carton fillers.

*In some cases, there may be one carton with an odd quantity due to the quantity packed per carton not dividing equally in the quantity ordered. The label for that single carton MUST be labeled accurately with the carton quantity (see CARTON LABELING for electronically correcting label quantity). Place that odd carton at the top of the load.

CARTON LABELING: Contractor must reproduce shipping carton label at 100% on white paper from furnished PDF file, fill in appropriate fields and securely attach one label to each carton. Carton labels contain barcodes; therefore, dot matrix printing is NOT acceptable.

NOTE: "BLUE LABEL" COPIES ARE REQUIRED. DO NOT AFFIX THE IRS CARTON LABEL TO THE "BLUE LABEL" COPIES.

All cartons for the bulk shipments to the NDC must have IRS Shipping label affixed to one carton end only (never top, long side, or bottom). On cartons shipped via small package carrier (SPC), affix the SPC label on top of carton on the end nearest to IRS label. All shipments to IRS National Distribution Center via SPC are to leave "To (Consignee) Address" field blank. Correct labeling of shipping cartons, in strict accordance with the requirements of these specifications, is essential to the identification, distribution and warehousing activities of the IRS. Use of any other label is prohibited and may be cause for rejection of reimbursement for any expenses incurred to correct use of improper labels.

The following must be updated ELECTRONICALLY by the contractor, when not entered by IRS on the PDF label using Adobe Acrobat 7.0. DO NOT MAKE HAND-WRITTEN UPDATES TO THE LABEL UNDER ANY CIRCUMSTANCES.

- Carton # of #
- From Address
- To Address
- Carton Quantity

Contractor must email a PDF proof of a completed label for copies shipping to the NDC. The email must be sent to Eugenia Collins (Eugenia.F.Collins@irs.gov), John Desmet (John.P.Desmet@irs.gov), Keith Hedgspeth (Keith.R.Hedgspeth@irs.gov), and Traci Cobb (tcobb@gpo.gov) at least two days prior to reproducing labels/carton labeling for inspection and approval of the title, product number, requisition number, and quantity match to barcode.

FAILURE OF THE CONTRACTOR TO COMPLETE THE PDF LABEL ELECTRONICALLY WILL RESULT IN THE SHIPMENT BEING REJECTED AND RE-LABELED AT THE CONTRACTOR'S EXPENSE.

If a "0" is pre-filled in on the furnished PDF label, then contractor MUST change the "0" to reflect actual quantity inside cartons. Contractor must ensure that all cartons have the same quantity. The carton count field in the PDF file is directly linked to the barcode field; therefore, the contractor must press "enter" or "tab" after entering the quantity in order for the quantity to be reflected in the barcode. All changes to the carton count field MUST be made in the electronic label (not hand filled in) to whatever the true carton quantity is so that it is reflected on the label in both the quantity and barcode fields. NOTE: In the case of one carton with an odd quantity due to the quantity packed per carton not dividing equally into the quantity ordered, the label for that single carton must also be updated electronically to reflect the true quantity per carton.

Automated "Carton # of #" fields: To print the correct number of labels for each address with sequential carton numbers, input in the total number of cartons and press "Print Labels" button. Warning: Once the print button is pressed, printing cannot be canceled. Be sure all information is correct prior to printing labels.

PALLETS: All motor freight shipments require pallets.

Pallets for IRS consignments: Pallets must be type III and must conform to the Federal Specifications NN-P-71C, and any amendments thereto except for dimensions and single center stringer (see "EXHIBIT #1"). Pallets must be 48" in length and 40" in width and must not exceed 5" in height. Full entry MUST be on the 40" width. Strict adherence to these dimensions is necessary to accommodate storage requirements of IRS National Distribution Center. Receipt of incorrect pallets may result in a charge for each incorrect pallet, which will be assessed against the contractor. This charge will cover additional costs incurred by IRS to repalletize the shipment onto correct pallets.

PALLETIZING: Cartons shall be stacked on pallets using a reverse layer pattern with a maximum height of 55” including pallet or a maximum of 7 layers (see "EXHIBIT #1" for acceptable stacking methods). Cartons must be fastened securely to the pallet in a manner that will prevent movement during transit but permit ready removal, without damage to the cartons, at destination. Do not use metal strapping or pallet caps for securing material on pallets. There must be no more than one partial pallet per destination.

PACKAGING AND PACKING PROBLEMS: In addition to other inspection procedures detailed elsewhere in these specifications, the contractor is responsible for correcting all packaging and packing problems (i.e. mislabeled cartons, IRS carton labels not being used or securely attached, cartons not being packed solid, incorrect pallets, or pallets not being layered correctly). The delivery will either be returned to the contractor to be corrected or the contractor may be billed by GPO for the amount that accrued in fixing the problem by an outside vendor.

"Mislabeled" means any error on the carton label, which incorrectly states or identifies the title of the form; the form identification number; or the quantity of forms actually contained in the carton, or has any missing information, or is not securely attached.

SCHEDULE: Contractor must be prepared for delays at various stages and still meet the distribution deadlines as indicated in the below schedule.
