# Implications of the Situation in Ukraine on Technical Cooperation with the IAEA

**Resolution adopted on 12 July 2024 during the 1728th session**

## The Board of Governors,

- (a) Reaffirming the objectives of the IAEA to accelerate and enlarge the contribution of atomic energy to peace, health, and prosperity throughout the world,
  - (b) Noting with serious concern the recent attack by the Russian Federation that hit Ukraine's National Children's Specialized Hospital "Okhmatdyt", a recipient of technical cooperation support through the IAEA Technical Cooperation Programme including in the area of cancer diagnostics and treatment,
  - (c) Emphasizing that Okhmatdyt plays a vital role in the treatment of pediatric cancer in Ukraine, supported by IAEA initiatives to enhance radiotherapy capabilities, which are essential for saving young lives and mitigating the impact of cancer,
1. Condemns in the strongest terms the disruption of IAEA technical assistance to Ukraine caused by the Russian Federation's recent military strike that hit the "Okhmatdyt" National Children's Specialized Hospital;
  2. Supports the continuation of IAEA technical cooperation efforts in Ukraine, including the provision of further assistance to the "Okhmatdyt" National Children's Specialized Hospital and similar facilities, to ensure the continuity of essential medical services and to enhance radiation safety and protection measures;

3. Encourages Member States to offer political, financial, and in-kind support to the IAEA comprehensive programme of technical support and assistance to Ukraine, including through the provision of necessary nuclear safety and security related equipment, training and support as requested by Ukraine; and
4. Requests the Director General to continue to provide regular updates to the Board of Governors on relevant developments in Ukraine.
