

**Student Worksheet**

**What Tools Would You Take to Mars?**

You are planning a robotic mission to Mars! How will your robot move around Mars? Circle your choice – legs, wheels, tank treads – or create your own idea!

Your robot can take small tools with it to help you learn more about Mars. What would you take? Circle the tools you would take and explain what you would use them for. What other tools would you take? Draw a tool in the blank bubble and explain what you would use it for.
