Marine receives rare heroism award for saving victim shot 23 times

[1] Issa, now 25, decided to become a Marine when he was 18, he said in an interview with Marine Corps Times on Tuesday. He turned down a full ride to Ohio State University because it didn't feel right to him to pursue the privilege of college without first serving overseas.

[2] In January 2023, Issa was serving with the infantry unit 3rd Battalion, 3rd Marines, at Marine Corps Base Hawaii. The night of the shooting, he and a fellow Marine had wrapped up dinner at Olive Garden and walked into a bar in the Waikiki neighborhood of Honolulu in search of a bathroom. They had been there for only a few minutes when the gunfire started.

[3] When Issa saw the gunmen, he initially thought they were trying to enter the bar. He rushed toward the pair, pushing a few people behind a table to cover them as he went. Then he realized the shooters were targeting someone on the sidewalk. "I just felt like I was on a range," Issa said. "I don't know if it was one of those blocks that I had from being in the Marine Corps infantry, but at the time I didn't feel like there was any danger associated with shooting, but I did feel like there was danger for the victim."

[4] The two gunmen escaped, but one of them sporadically was shooting back at the victim as he ran away, Issa recalled. In those moments, the Marine exposed himself to the fire to attend to the victim.

[5] Issa relied on the casualty care simulations he had run through in training. He took off the victim's shirt and checked him for bullet wounds, of which there were several. Meanwhile, Issa felt a warm sensation on his knees, which were applying pressure near the victim's crotch to cut off the femoral artery. It was blood. Realizing that the victim's legs needed attention, Issa removed the flannel shirt from his own body and fashioned a makeshift tourniquet for the right leg. When two police officers arrived, Issa received from them a pair of real tourniquets that he used on the victim's legs.

[6] The case later was classified as second-degree attempted murder, the Honolulu Police Department told Marine Corps Times on Wednesday. No arrests were made, the police said, and the victim withdrew his complaint and did not want to prosecute.

[7] That night, Issa told his first sergeant that there had been a shooting, though he gave few details. But three Marine officers who happened to have been at the bar and witnessed Issa's actions informed his command, Issa said.

[8] On Feb. 19, Issa received the Navy and Marine Corps Medal from Navy Capt. Michael Puffer, the commanding officer of the Naval ROTC at the University of South Florida. The medal - the highest award for heroism outside of combat - recognizes service members who have taken heroic actions at the risk of their own lives. It's a rare honor.

[9] But, for now, Issa's medal is tucked away in a storage container. Issa said he means no disrespect to those who put in effort to secure him the recognition. It's just that he didn't want an award, because, in his view, what he did is just what anyone should try to do in that situation. "I don't think that any life is more important than another," he said.

Just when demographers are ringing alarm bells about overpopulation, Amazon founder Jeff Bezos says we need to populate our solar system. Mr. Bezos was asked for his thoughts on humanity living in outer space in a thousand years' time. He replied: "I would love to see, you know, a trillion humans living in the solar system. If we had a trillion humans, we would have at any given time 1,000 Mozarts and 1,000 Einsteins. Space would be full of life and intelligence and energy." He added that he wants to help "build heavy infrastructure that will be used by the space entrepreneurs of future generation, so that ingenuity and imagination can really be unleashed".

Based on the text below, answer question 4.

Airline starts to weigh luggage AND passengers

[1] Finland's national carrier Finnair has started weighing passengers on its flights from the capital city of Helsinki. The weigh-ins are being done on a voluntary basis and are completely anonymous.

[2] A company spokesperson said the new initiative is to ensure safety standards on flights are adhered to. He said any airplane should not exceed the prescribed maximum weight for safe take-offs and landings. This weight is made up of the aircraft itself, the fuel, checked baggage and cargo, onboard catering, water tanks, and passengers. Finnair said airlines never know the exact weight of passengers and their carry-on baggage, so they have to rely on average estimates provided by aviation authorities.

[3] Passengers who volunteer to be weighed are stepping on weighing scales at the departure gates at Helsinki Airport. Finnair officials were initially concerned about a customer backlash because weight is such a personal issue. However, in the first week of the tests, over 1,000 passengers had agreed to be weighed. The company said: "We hope to have a good sample of volunteers, both business and leisure travellers, so that we can get the most accurate information possible for important balance calculations." It added: "Our customers have taken it really positively so far." An official said travellers could "rest assured" and have "peace of mind" that their weight would not be linked to their personal data.

(Adapted from <https://breakingnewsenglish.com>)

According to the text, it is correct to state that:

- (A) Finnair will soon start weighing passengers on its flights from Helsinki.
- (B) airliners know beforehand the exact number of passengers that will be weighed.
- (C) passengers who agree to be weighed at the gates will get a customer backlash.
- (D) an official said Finnair could now rest reassured and have peace of mind about safe take-offs and landings.
- (E) all passengers willing to be weighed help the carrier get more precise information for their balance calculations.

QUESTÃO 27

A respeito do funcionamento de transistores bipolares de junção (TBJs) e transistores de efeito de campo (FETs), é correto afirmar que:

- (A) tanto o TBJ tipo NPN quanto o MOSFET de canal tipo N possuem em sua estrutura duas regiões dopadas tipo N separadas por uma região dopada tipo P. A diferença entre seus modos de operação é que no caso do TBJ haverá a formação de um canal tipo N induzido, interligando as regiões tipo N, enquanto no MOSFET este fenômeno não ocorre.
- (B) a aplicação do TBJ como amplificador baseia-se no fato de que, no modo de saturação, este transistor atua como uma fonte de corrente controlada por tensão.
- (C) no MOSFET o aumento da tensão dreno-fonte acima da tensão de saturação leva ao fenômeno de modulação do comprimento do canal, causando o encurtamento do canal induzido.
- (D) para o TBJ, o efeito Early ocorre quando um aumento na tensão coletor-emissor leva a uma diminuição da tensão de polarização reversa sobre a junção. Esse fenômeno explica por que a corrente do coletor nunca varia com a tensão coletor-base na região ativa.
- (E) para amplificadores com transistor FET em altas frequências, não é necessário considerar as capacitâncias internas que estão associadas às junções PN reversamente polarizadas, visto que não causam interferências significativas no ganho.

TEXTO I

O crime organizado transnacional é um grande negócio, gerando ganhos estimados em US\$ 870 bilhões por ano e incontáveis vítimas. Dez anos atrás, o primeiro instrumento global para combatê-lo – a Convenção das Nações Unidas contra o Crime Organizado Transnacional e seus três protocolos suplementares – entrou em vigor, demonstrando o compromisso da comunidade internacional para enfrentar este desafio. O crime organizado transnacional engloba praticamente todas as ações criminais motivadas pelo lucro e cometidas por grupos organizados, envolvendo mais de um país. Em um esforço para educar e explicar os fenômenos a uma audiência global, o Escritório das Nações Unidas sobre Drogas e Crime (UNODC) lançou em 2012 uma campanha contra o crime organizado transnacional.

TEXTO II

O incremento da criminalidade transnacional, no mundo Pós-Guerra Fria, desperta a atenção das Nações sobre as novas necessidades no ramo da Segurança, principalmente nas áreas de fronteira. As Águas Jurisdicionais Brasileiras, ricas em recursos econômicos, vêm se destacando no cenário nacional como fonte de riquezas. Proteger a fronteira marítima brasileira, em sua enorme extensão, é um desafio para vários atores com interesse em Segurança Marítima, que muitas vezes excede a capacidade individual de cada instituição. Desse modo, apoiam-se mutuamente para exercer suas atividades, geralmente sem coordenação e planejamento integrado. Observa-se que essa forma de atuação reflete um modelo inadequado, capaz de gerar duplicidade de ações e desperdício de recursos. Nesse sentido, surge o interesse sobre as Operações Interagências para Segurança Marítima, em busca da melhor forma para realizar a integração das forças para consecução de objetivos comuns. A Segurança Marítima se insere em um ambiente multidimensional sob a ameaça de diversos tipos de atividades criminosas transnacionais, combatidas por um rol de dez atores com interesse em Segurança Marítima.
