

LOSI COMBAT™ SE SERIES

2–3 Person Combat Tents

Weighing considerably less than issue combat tents, the Losi™ 2P and 3P shelters provide increased space, dual access, and ease of set-up thanks to advanced materials and years of experience in shelter design.

- USA Made and Berry Compliant option (Losi™ Combat 2P SE USA).
- The symmetrical design provides each Warfighter an identical large vestibule and door on either side of the shelter, preventing jostling for position when entering and exiting the shelter and maintaining individual gear storage.
- Continuous sleeves for easy pitching in the dark.
- Ridge poles run the long direction on the shelter and terminate above the ground, providing nearly vertical walls on all sides of the shelter for maximum interior space.
- Includes a roll-up style stuff sack for ease of inventory as well as pole repair sleeves, Tear-Aid patches and stakes.
- The Losi Combat™ 3P SE shares the same design but with additional length and width to comfortably fit extra gear or an additional Warfighter.
- Despite being much larger, the Losi Combat™ 3P SE manages to weigh a few pounds less than the standard issue 2 Man Combat Tents.

1. Multiple grommets ensure that a tent can be optimally tensioned at all humidity levels.
2. Strategic panels of mesh and 30D fabric allow moisture to vent from the tent, but block chilly gusts of wind.
3. Overhead vents in the rain fly promote good ventilation even in driving rain.
