## Digital Anatomy Atlas with VR support

- 3-dimensional
- Interactive
- Multilingual

280+  
models

1000+  
questions

10000+  
labels

### **Virtual educational platform for medical training**

The professional models were created using photogrammetry, **based on real cadavers** as well as fixed wet and paraffin-embedded specimens in the dissection room and internationally renowned anatomy museum of the Faculty of Medicine of the University of Szeged, Hungary.

- Spectacular, highly detailed models
- Professional quality content
- Real anatomical structures
- Rare anatomical specimens
- Effective aid in learning

**cadaVR™**  
anatomy

*Optimised for the most popular VR platforms. In the virtual environment, the highly detailed models, based on real anatomical specimens, come to life.*

**Mozaik Education**
