**MZAIK**

# Overview - What to use on various devices

The aim of this guide is to introduce the digital teaching tools offered by Mozaik Education and to help you start working with them. First, let's see **which products** you can use on various devices and **what purpose they serve**.

**mozaWeb.com**

Interactive website to be used in a **browser with an active Internet connection**.

Open digital textbooks, play interactive content, use thematic applications. You can also buy new books, subscriptions and solve your online homework assignments.

**mozaBook app**

A freely downloadable application for **Android tablets and smartphones** as well as for **iPhones and iPads**, that can be used **without an active Internet connection**.

Take your digital textbooks with you wherever you go and use the embedded interactive content. You can also use the app to join interactive classwork sessions your teachers start.

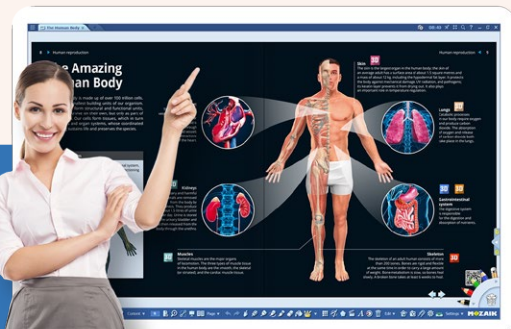

**mozaik3D app**

A freely downloadable application for **Android tablets and smartphones** as well as for **iPhones and iPads**, that can be used **with an active Internet connection**.

Browse and open Mozaik 3D scenes arranged by school subject.

**mozaBook**

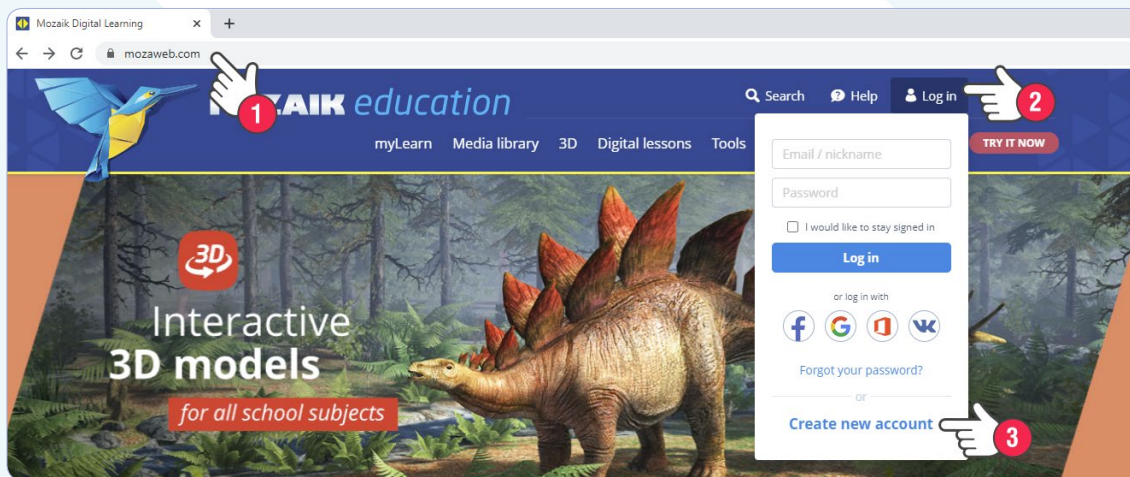

A presentation software for **Windows computers and tablets** that can be used **without an active Internet connection**.

Create presentations and interactive educational content for your lessons, open digital books, play interactive content and use thematic applications.

## 1. Creating a user account, logging in

To open the mozaWeb page, you need an active Internet connection and a browser. For the best user experience, we recommend using Chrome. You will need a user account to use mozaWeb. If you don't already have an account, the first step is to create one. Follow the steps below.

- Enter **www.mozaweb.com** in the address bar of your browser **1**.
- Click on the **Login** icon **2**, then on **'Create new account'** **3**.

- Fill out the form **4**, and don't forget to enter the name of your school too **5**, because this will allow you to contact your teachers and schoolmates.
- If you are not yet 16, you will need a parent's consent to create a user account **6**.
- Read and accept the Privacy statement, then create your account **7**.

### Please note

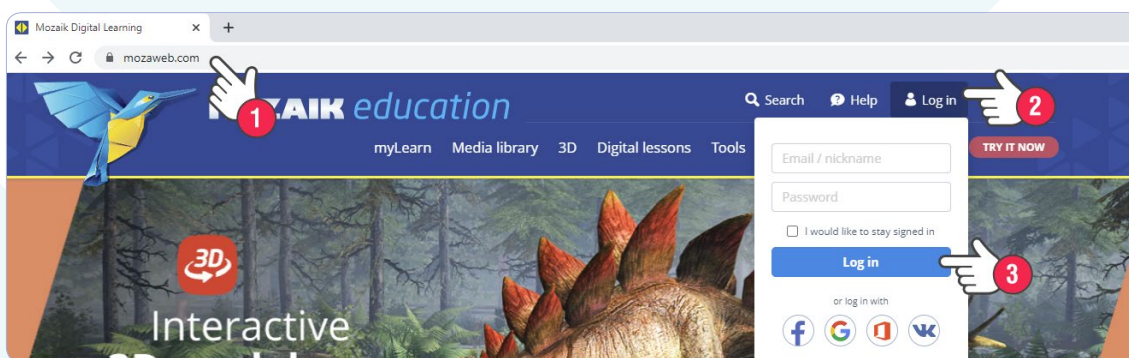

You will receive an email to the email address you provided. You have 5 days to click on the link found in the email to **activate your user account**. If you fail to do so within 5 days, your user account will be deleted.

After successful registration, you will be automatically logged in and you can start working. It is important to know that, using the account you created, you can also log in to the mozaBook software, the mozaBook app and the mozaik3D app. **You only need to create a single user account, either in a browser or through one of the applications.**

## 2. Logging in

From now on, **you can log in to mozaWeb anywhere, using any computer with an active Internet connection**, by entering the username found in the activation email and the password you provided when you registered.

- Enter **www.mozaWeb.com** in the address bar of your browser **1**.
- Click on the **Login** icon **2**, enter your username and password, then click on 'Log in' **3**.

### Hint:

You can use your email address instead of your username to log in.

## 3. What you can do on mozaWeb

As a mozaWeb user, you can

- buy, activate and read **digital textbooks** and play all the interactive content embedded in these books.
- open and play the content of the Media library (**3D scenes, videos, interactive worksheets, digital lessons, etc.**).
- use thematic applications (**tools and games**) that will turn learning into a playful experience.
- create your **own learning platform** and synchronise and share the content you create.
- complete **online homework** set by your teachers.
- join classwork launched by your teachers.
- manage your user data, your subscriptions and licences.

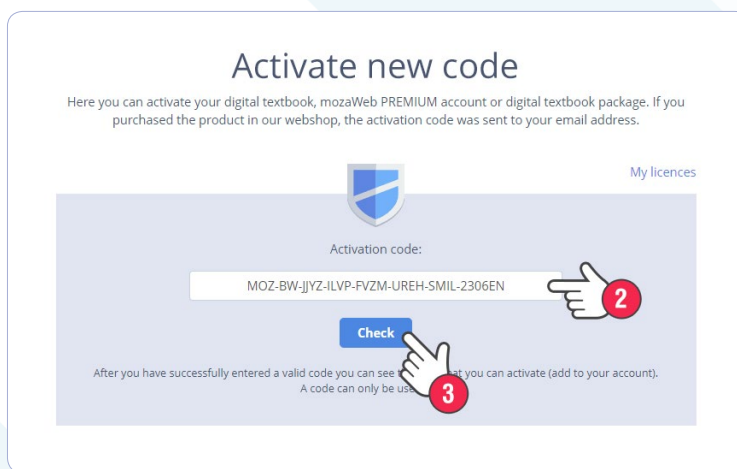

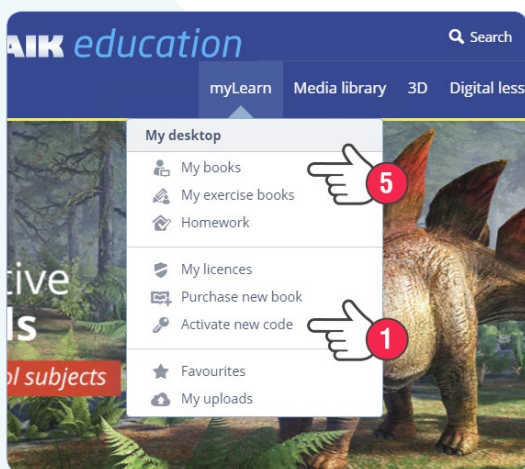

With a free user account, you have limited options, but buying a **Mozaik TEACHER** or **Mozaik STUDENT** subscription will allow you to have full and unlimited access.

## 4. Activating digital textbooks

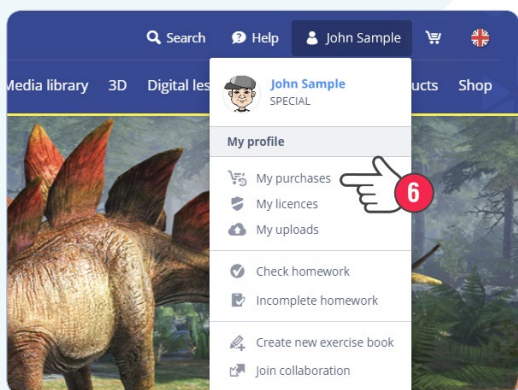

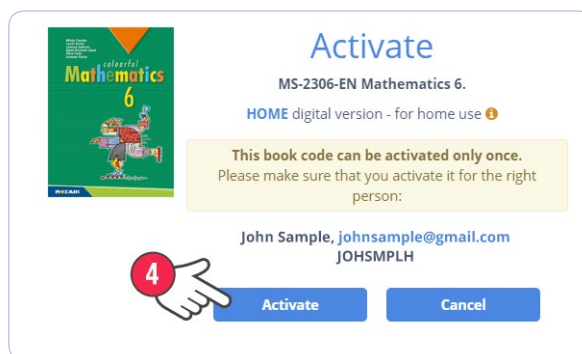

Each digital book has a unique activation code. If you have a valid code, you can use it to activate the book it belongs to. Activation means that you link the book to your user account. The use of the book will be allowed for a single user, that is, the book will be linked to the user account into which you logged in before activating the book.

- If you have already logged in to mozaWeb, select **Activate new code** in myLearn **1**.
- Enter your code in the Activation code field **2**, then click on **Check** **3**.

If you entered a valid code, a window will open and show information about the book, as well as about the user account to which it will be linked.

- If the information is correct, click on **Activate** **4**.
- You can find your activated books later in myLearn > **My books** **5**.

If you purchased the book in our webshop and linked it to your account right away, you do not need to activate it, you will find it in myLearn > My books. If you did not link a book to your user account when you purchased it, then you will find the activation code in **My purchases** after clicking on your name in the top right corner **6**.

If you are logged in to your user account, you can access your activated books on mozaWeb, in mozaBook and in the mozaBook app as well.

The Android and iOS versions of mozaBook can be downloaded to your smart device (tablet and smartphone) free of charge. The app allows you to **use your digital textbooks and the interactive extra content embedded in them anywhere, even when offline**. If your teacher launches interactive classwork, you can join it using the app.

## 1. Download and installation

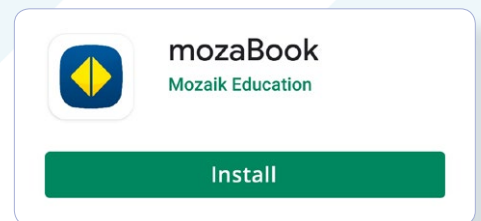

- Open the Play Store (Android) or the App Store (Apple iOS) on your smartphone or tablet and type **mozaBook** in the search box, then tap install.

Android

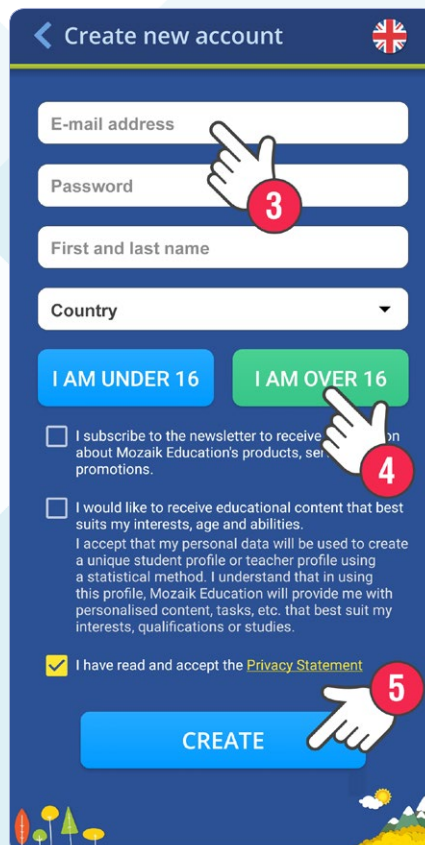

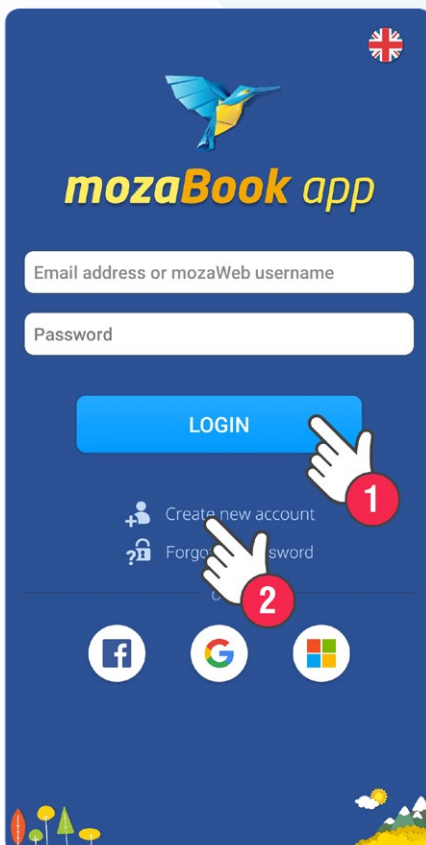

Apple iOS

## 2. Creating a user account, logging in

- The first time you launch the app, you will see a login screen. If you already have a user account, enter your username and password, then log in **1**. If you do not have an account yet, you can create one in the app by tapping **Create new account 2**.

- Fill out the form **3**.
- If you are under the age of 16, you will need parental consent **4**.
- Read and accept the Privacy Policy and create your account **5**.

### Please note

When you create a new user account, you will be logged in automatically and can start working.

Logging in will be done automatically again next time when you launch the app.

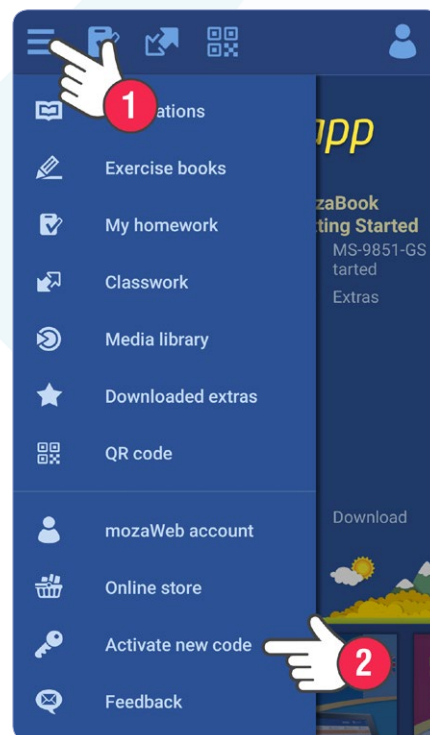

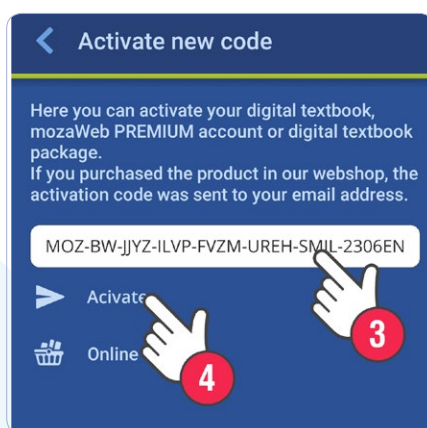

## 3. Activating digital textbooks

Each digital book has a unique activation code. If you have a valid code, you can use it to activate the book it belongs to. Activation means that you link the book to your user account.

- After logging in, open the menu on the main screen of the app **1**, then select **Activate new code** **2**.
- Enter your code in the text field **3**, then tap on **Activate** **4**.

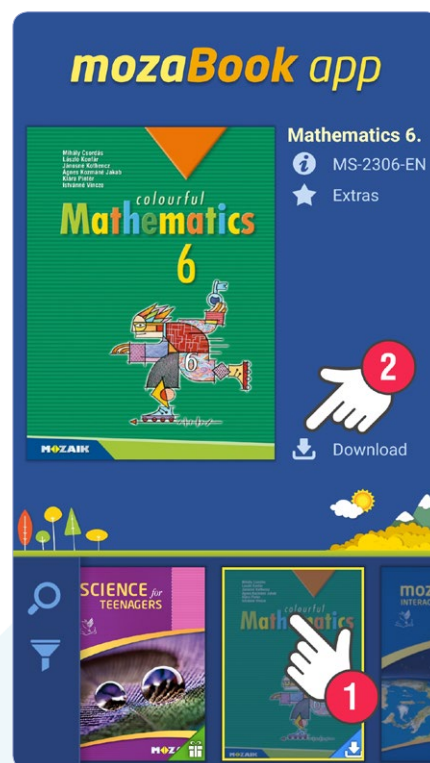

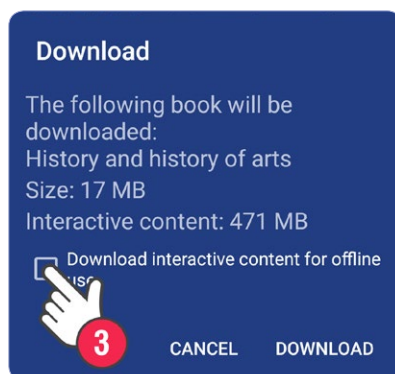

### Please note

If you are logged into your user account, you can access your activated books on mozaWeb too.

## 4. Downloading digital textbooks

- You will find the available books in a scrollable list **1**.
- Download the book you need **2**. By default, only those books are downloaded to your device that can be used without an active Internet connection. The interactive extras embedded in the books are not downloaded so you will need an active Internet connection to open them.
- If you want all the interactive extra content to be downloaded to your device and be available offline as well, (without an active Internet connection), choose **'Download interactive content for offline use'** **3**.

- Open the downloaded book by clicking on its cover and scroll through the pages. Open interactive content by tapping the icons found in the margins of the pages.

The mozaik3D app can be downloaded to your smart device (tablet and smartphone) free of charge. The app allows you to **use the 3D scenes on your smartphone or tablet.**

## 1 Download and installation

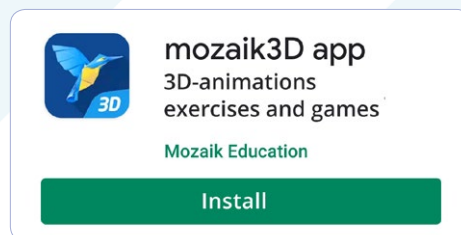

- Open the Play Store (Android) or the App Store (Apple iOS) on your smartphone or tablet and type **mozaik3D** in the search box, then tap Install

Android

Apple iOS

## 2. Creating a user account, logging in

If you create a free user account, you can open five 3D scenes of your choice every week. But if you have a Mozaik TEACHER or Mozaik STUDENT subscription, you gain access too all the 3D scenes in the Media library.

- Tap the User icon on the main screen of the app **1**.
- If you already have a user account, enter your username and password, then log in **2**.

- If you do not have an account yet, you can create one in the app by tapping **Create new account** **3**.
- If you are under the age of 16, you will need parental consent.
- Fill out the form **4**.
- Create your account **5**.

I subscribe to the newsletter to receive information about Mozaik Education's products, services and promotions.

I would like to receive educational content that best suits my interests, age and abilities.

I accept that my personal data will be used to create a unique student profile or teacher profile using a statistical method. I understand that, based on this profile, Mozaik Education will provide me with personalised content, tasks, etc. that best suit my interests, qualifications or studies.

Create new account **4**

By clicking on the Create new account button, the Privacy Statement.

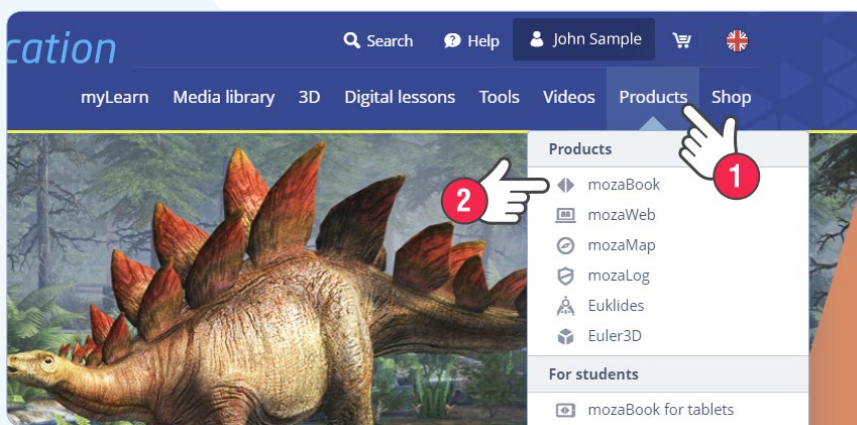

Privacy Statement **5**

The Windows version of mozaBook can be downloaded to computer or tablet free of charge. The software allows you to **use your activated digital textbooks anywhere, even when offline**. Similarly to mozaWeb, you can find the content of the Media library, as well as the thematic applications in mozaBook too.

## 1 Download and installation

- You can download the software after logging in to [www.mozaweb.com](http://www.mozaweb.com). If you do not have an account yet, create one as described in the chapter 'mozaWeb - Creating a user account'.
- In the **Products** menu **1** select **mozaBook** **2**.

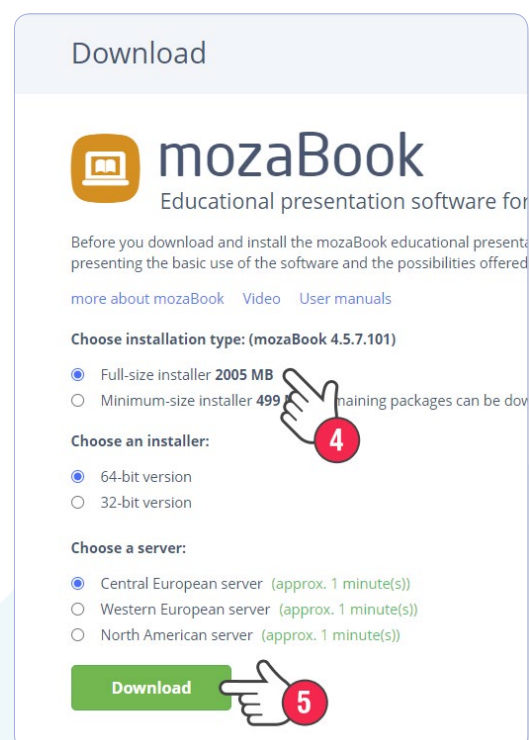

### Please note

To use all the functions of the software once the demo period expires, you will need one of the following subscriptions:

- mozaBook CLASSROOM
- Mozaik TEACHER
- Mozaik STUDENT

These subscriptions will also allow you to join classwork and complete interactive homework assignments.

- Scroll down, click on the green 'Download' button, then on the "Download mozaBook" button on the next page **3**. Select the Full-size installer **4**, then click on Download **5**.

- Launch the downloaded installer and follow the instructions.
- During installation, an icon will be placed on the Windows desktop. Use this icon to launch mozaBook.

## 2. First start, creating a user account

- When launching mozaBook for the first time, you can enter a licence code **1**. If you do not have a licence code, choose Demo mode **2**. You can choose to enter a licence code later. All functions are available in the Demo mode.

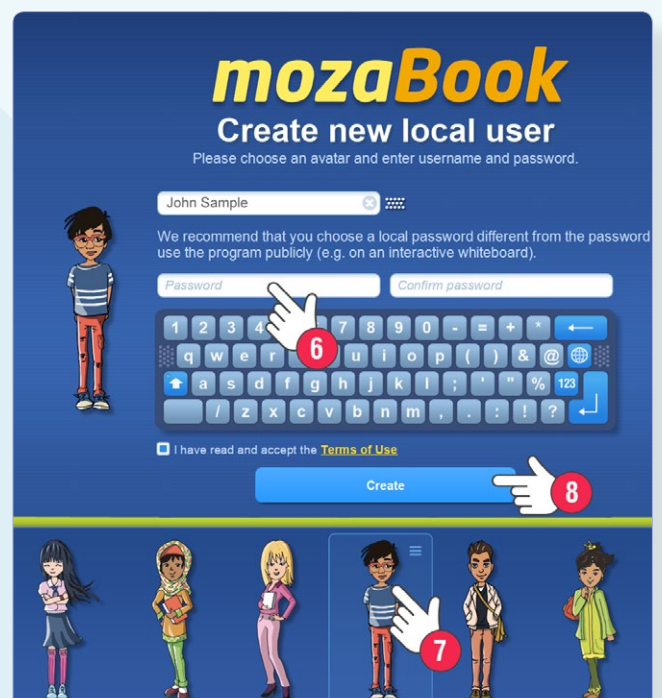

- You will need to add your **user account** **3**. If you have already created a user account (for example, on the mozaweb.com page when you downloaded mozaBook), then enter the username and password of your account. If you do not have an account yet, create one **4**.

After adding your user account, you have to create a **local user account**.

You need a local user account to log in to mozaBook. You can create several local user accounts but they can only be used on the computer they were created on.

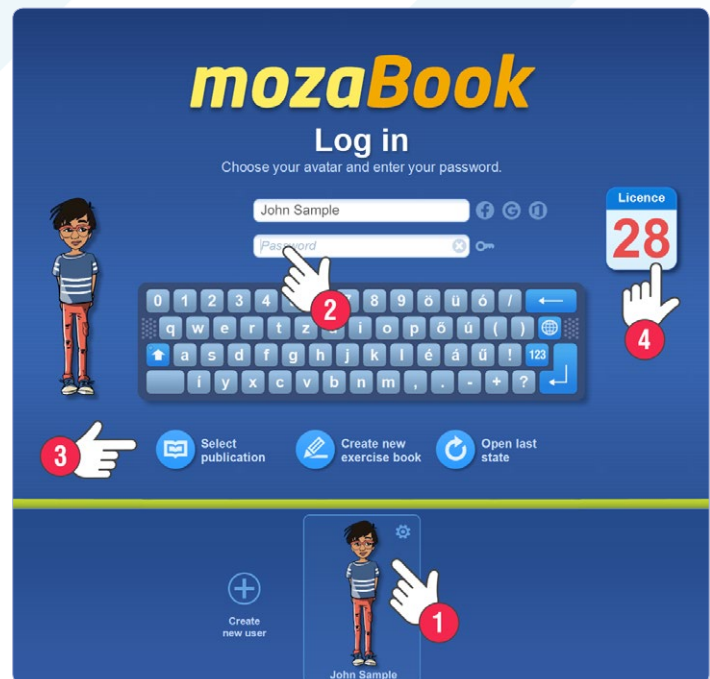

- Enter a password **6**.
- Choose an avatar **7**.
- Read and accept the Terms of Use and create your local user account **8**.

## 3. Logging in

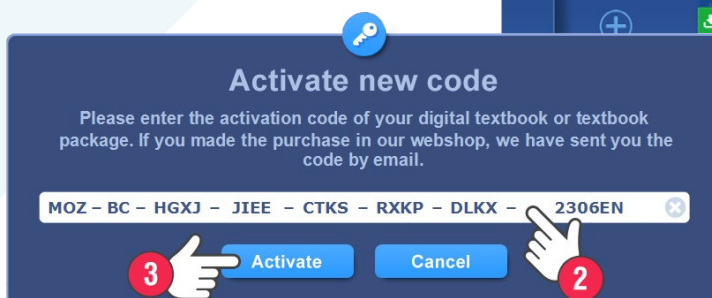

- The next time you launch mozaBook, you only have to **click on your avatar** **1** and **enter your password** **2**.
- Decide what you want to do first after logging in: **3**
  - Open a book or activate a new one.
  - Create a new exercise book.
  - Continue from where you left off last time.
- The counter shows how many days you have until the free Demo period expires. You can enter your licence code by clicking on it **4**.

## 4. Activating digital textbooks

Each digital book has a unique activation code. If you have a valid code, you can use it to activate the book it belongs to. Activation means that you link the book to your user account.

- On the publication selection screen, click on the **'Enter activation code'** icon **1**.
- In the pop-up window, enter your activating code **2**, then click on the **'Activate'** button **3**.

### Please note

If you are logged in to your user account, you can access your activated books on mozaWeb and in the mozaBook app as well.

## 5. Downloading and opening activated digital textbooks

- You will find the available books in a scrollable list at the bottom of the screen, organised in folders. Open the folders by clicking on their icons.
- In the 'Downloadable' folder, you can find books that you can access free of charge and are activated but you have not yet downloaded them **1**.
- In the 'Openable' folder, you can find the books you have already downloaded **2**.

- Open the folder of downloadable books and select your activated book **3**.
- You can **download** the **online** or **offline** version of the book **4**. Both versions can be opened without an active Internet connection but, for the online version, Internet access is necessary to use the extras included in the book.
- The downloaded book can be opened by clicking on its cover **5**.
