

Interactive digital textbooks

from your printed publications

Turn your printed textbooks into digital books and enhance them with interactive content and DRM (Digital Rights Management) protection. Help students virtually explore the world of dinosaurs, the process of photosynthesis or the interior of a blood vessel using the interactive items added to your digital publications.

Your publication

mozaBook Editor

Our + your content and tools for easy content creation

for the WEB

for the CLASSROOM and DISTANCE TEACHING

for TABLETS and SMARTPHONES

Teachers can open and use your digital textbooks in mozaBook, our presentation software optimised for in-class and distance teaching, working both online and offline. **Students can** explore your publications during in-class activities and home learning by using our iOS and Android apps for tablets and smartphones, or through mozaWeb, our browser-based student platform.

3D scenes

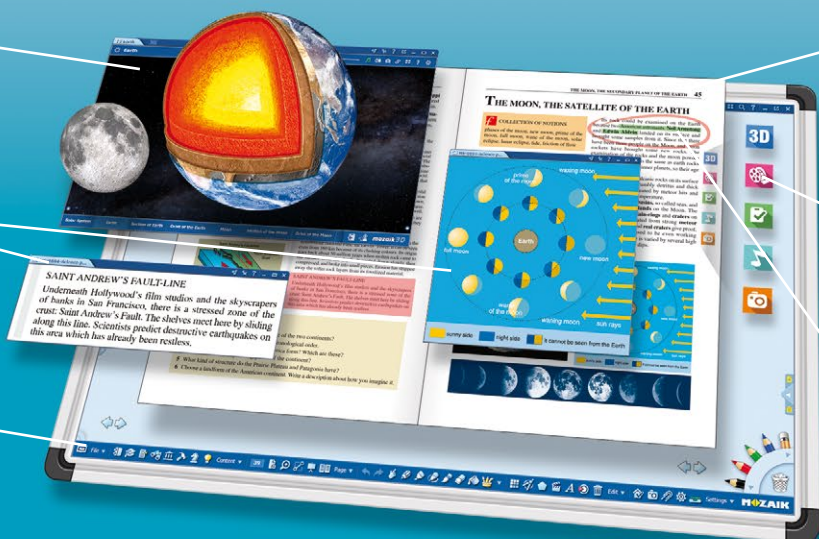

More than 1200 3D scenes with thousands of models

Sections

Images and text are divided into sections that can be enlarged and further utilised

Main interface

Intuitive toolset and shortcuts to make digital enrichment effective

Textbook

The default view of the textbook is identical to the printed edition

Publisher's master layer

Layer enriched with various types of interactive content

User layer

New / custom content created by the teacher

Digital textbooks

Business model and best practices

- Stand out among the competition and add extra value to your printed publications
- Define the length of user access to your digital books accustomed to market needs
- Make your digital textbooks available to your customers free of charge to boost your printed sales or determine the price of access to your digital materials and put them on sale in your webshop to make an additional profit - the decision is yours
- Integrate digital book transactions into your CRM data

Your digital textbooks + mozaBook for teachers

With the mozaBook presentation software, teachers can use your enriched textbooks on interactive boards, PCs and laptops. mozaBook offers countless possibilities beyond just viewing and showing content. It has further illustration, animation, enrichment and presentation opportunities for professional use by teachers. Moreover, teacher-student interactions such as real-time classwork, assignment and evaluation of homework are also available, supported by an integrated LMS. As our publishing partner, you are eligible to sell mozaBook licences within your contracted sales territory. **Having more mozaBook users means the user base of your digital textbooks will also expand.**

Translation and localisation

The interface of the mozaBook software, the mozaBook apps, the mozaWeb online platform and the materials available in our Media library's pool of interactive content are available in more than 30 languages. If, however, any part of the system is not yet available in your language or there are particularities in your country that should be considered for adequacy, you have the option to customise the appearance of elements as well as the translation, using our online localisation and translation platform.
