STRING-TIE Special Edition OH

Colour ÁMBER - Ref. AC-STA

String Tie's Galalith (milk stone) beads add a unique look to the bridge and eliminate the protruding string ends. The knot is tied on the bead and not on the bridge, making it easier to tie and preventing scratches. Even the guitar sound is intensified, because the string isn't fastened directly onto the bridge.

String-Tie is a remarkable new guitar accessory, and it's revolutionizing the way guitarists change strings. Not only does String-Tie make changing strings easier than ever, it may actually improve the musical tone of the guitar.
