Active-shooter and first responder incidents are changing the way officers operate. In order to increase protection from potential threats, Pacific Safety Products offers an array of first-responder plate racks to suit your performance requirements.

The Modular Plate Carrier (MPC) is ideal for responders who require a hard armour carrier that can be quickly donned over soft armour or as a stand-alone option. The MPC can be ordered with a variety of cummerbund options and can be outfitted with shoulder pads for increased comfort or for the routing of comms wires, hydration lines or radio mics. The carrier can hold the most common 10"x12" hard armour plates allowing for custom ballistic protection based on mission needs. Fastex buckles at the shoulders and sides allow for the attachment of PSP's detachable MOLLE panel and a detachable magazine/utility pouch panel.

FEATURES

- Breathable internal mesh for increased thermal comfort when worn alone
- Can incorporate PSP's modular pouch panel and detachable MOLLE panel
- Can be configured to be compatible with most popular modular chest rigs
- Available with Fastex-secured, single strap side adjustment, MOLLE cummerbund with soft ballistic inserts or skeletonized, MOLLE-compatible webbing cummerbund
- Optional shoulder pads for increased comfort.
