The detachable front and rear panels on this MOLLE carrier provide officers a range of capabilities across varied police roles. The front panel simply unclips and pulls down, either to interchange with another colour or allow a hard armour plate carrier to be inserted while retaining all the pouches by simply pulling the front panel back up and re-connecting. The rear carrier, shoulders and cummerbund can easily switch out to allow for varied colours to be used for roles such as public order, liaison, traffic duty or non-police support.
