

# NATURE CRITTERS

## *Nature Craft*

*Use your imagination to create silly “animals” out of things you find outside in nature!*

**You will need:**

***A collection of leaves, twigs, stones, and flowers***

- Collect a variety of natural items—be careful not to kill any plants in the process!
- On a flat surface, arrange your items to create the head and body of your imaginary critter.
- Try making several different nature critters.
- What would your nature critters eat? Where would they live? What would you call them?
- Create a silly story about your nature critters and share it with your family.
- When your story is finished, have a family member create their own critters and share their story with you!
